Sozodont TOOTH POWDER

and
**SOHOOL
HYGIENE.**

Much depends on those in charge of children for rendering effective the suggestions of Medical Officers and Dentists in regard to Mouth Cleanliness and prevention of Dental Decay.

Urge your scholars to use a cleansing and Anti-septic Dentifrice like Sozodont Powder, and note the difference at the end of the week.

The result will be a pleasure to them and to you.

Sozodont Powder is sold in 6d. and 1/- Hygienic Tins by Chemists and Stores everywhere.

**HALL & RUCKEL,
London and Manchester.**

with some very curious comments on this passage. He would point out the anxiety of the writer to get the effect of the inner harmony in that "tombés là," that sonorous echo in which the sentence, light and tremulous at first as a moonbeam, reaches its end, the *rallentando* given to it by the intentional disregard of grammar in "de si captivant le regard et la pensée." Once a writer is carried away by the theory which will have it that the style should be the absolute equivalent, the complete reproduction of the feeling conceived, to what an exaggerated scrupulousness over details may he not be driven! Pushed to its logical extreme, the theory when applied to a style rich in imagery must issue in meticulous niceties of this sort, just as, logically, its application to the abstract style led Stendhal to write like an Act of Parliament. Human language, that complex product of feeling and thought, may be said to swing between two opposite ideals, the imitative and the algebraic.

We classify the 241 versions received as follows:—

First Class.—Karlsruhe, Carnation, Macnamara, Rolobo, Ardeonaig, L.N.R., Margherita, Kennanmore, A.G.W., Quaker Girl, B.E.J., J.E.M., Adolphe, Fortune le veut, A. Drewe, Nessko, Tempus fugit, Reine Claude, Guy, Mavourneen.

Second Class.—S.M.M., Bourgeois, Spes, Smaragdus, Saxon, M.J.G., G.T.H.P., Old Savilian, Verbalist, A.P.W., Sirach, C'est moi, Gothicus, Kronberg, John Jack, Sowed, Len, Numa, Annulus, L.H.E., Eftersay, Glenleigh, Eckholz, Beeston, Marguerite, Ettore Fieramosca, Eureka, Charles Maurice, Dane, V.C., Chalk, Blackboard, Adelaide Ecnarf, Great Western, Little Dorrit, Norris, Charity, Dunbay, Anglo-Saxon, Clematis, Scando, March, Russie, Patricia, Entente cordiale, Si-Fait, Sweet Pea, Louis, Espérance, E.M.H., Menevia, Zero, Margitaun, W.H.S., All Young, Prudence, Sarnia, Phosbeth, W.B.D., Clothespeg, Abel, Genêt, Fricquette, Accinctus, Nedwos, Rhetorician, Yorick, Ecosaise, Grenville, Yvonne, Peto praeium, Andromache, Peter Rabbit, Koh-i-noor, Tirailleur, Le Blond, Lucien, Harriet Grant.

Third Class.—Little Billee, Mousmé, Lord Archibald Montague, E.N.D., D.B.F., E.F.A., Mergy, K.E.H., R. D. Talbot, Freak, Jungesell, Abbotsford, M.L.R., Queetie, Poum, Yvonne (Worcester), Blue Bird, Amaryllys, Tacitus, Mars, Portsay, Sicily, Duffer, Oxford, L.W., Port Reeve, Rüstung, Una in Spe, With-

more, Woodstock, Colette, Moriando vivo, Arlésienne, Boiteux, Bavin, Macton, Dormouse, Vivian, Quasimodo II, R.R.J., Logan, E.M.P., Esther Hazy, Tertia, Clumps, Mispel, Pansy, Mecca, P.A.G., E. M. Tuck, Jacobite, Vol-plane, D. J. Falcy, Daffodile, S.G.D., G.M.P., Erin, Dartmouth, A.E.P., Pajkosleány, Francesca, Mannrauss, Arosa, Primavera, Lavengro, E.A.M., Harolda, Mascarille, Sablis, Morl, Bamo, Hyacinth Vere de Vere, Paul, Pandora, Pas demi.

Fourth Class.—Emil, Japxy, Propeller, Kalamake, Clummie Crablet, C.M.D., N.M.J., Millette, Jusso, Hawthorn, Bizet, Roscoe, Xenia, L.M.L., Hesperides, Cactus, En Avant, Heathen, Tybert, Keymis, Bladud, Agatha Ross, Y.P., Hoffnung, Unsigned p.m. Salisbury, Rure, Mirabile dictu, Hoffentlich, Chérie, Daisy, Borealis, Vetos, Primrose, L.L.A., N.L.B.I.C., Cromwell, Merrybent, Côte d'Emeraude, J.E.F., Ouida, Romanoff, Den, Prince, Ignotus, Campaspe, E.K.W.

Fifth Class.—J.M., M.D., Jane Grabbe, D.M.C., Elpis, Jim, D.S., M.B., E.D., A.R., J.E.B., Donnerstag, Brutus, Marzial, G.G., Sola, Up, Luckless, Bola, Roby, Eugene.

First, let me dispose of a rock of offence which cannot be removed by translation—how to deal with that part of Bourget's criticism which depends on the actual French words. One competitor, whose name often appears in the First Class, simply copied out the passage from Maupassant. I take it she intended a *reductio ad absurdum* of the present competition. The majority, quite justifiably, left the phrases *tombé là* and *de si captivant* untranslated. But I think there is a more excellent way—to give the nearest English equivalents and add the French in brackets. "Fallen there" or "just lighted" at the end of the sentence does give something of the rhythmic effect, and "so eye- and soul-enchanting" does suggest the grammatical irregularity.

This disposed of, I will go through the passage line by line, noting the commonest mistakes and weaknesses. *Phrase bien nombrée*: "rhythmical (not well turned) sentence." *Morceaux de facture*: "carefully elaborated," "set or show passages" (generally shirked). The title of the book of travel, "Au Soleil," must, of course, be retained. Some of the baser sort translated "To the Sun." *L'espace*: "all space" or "the firmament," not "the

(Established 1873.)

Telegrams:
"GABBITAS, LONDON."Bankers:
BANK OF ENGLAND.**TRANSFER AND PARTNERSHIP
DEPARTMENT.**

MESSRS. GABBITAS, THRING, & CO., having upon their books at all times a large number of thoroughly *bona fide* Boys' and Girls' Schools for Transfer and Partnerships in such Schools to negotiate, as well as the names of a very large number of Purchasers, both ladies and gentlemen, are able, with their thirty years' experience, to negotiate the Transfer of Schools of all types confidentially and efficiently.

The Transfer Department is in the hands of one of the Principals, who personally attends to all instructions.

Valuations are carefully made.

No list of any kind is issued—all instructions being strictly confidential—but each Client receives individual attention on receipt of detailed particulars.

No commission is charged to purchasers.

space." *Vernir*: "to varnish" suggests rather the cabinet-maker than varnishing day, and "burnish" is preferable. The four *jaunes* must be kept; it is not a case for improving on the original. *L'astre*: "star," "planet" were common misrenderings; "the luminary" is stilted; "the orb of night" in a poetical passage is natural; I should prefer "the amber moonlight." *Là-bas, devant moi*: "at my feet." *De sel figé*: "congested," "coagulated," "solid," "stiffened," "frozen," "curded salt," are a sample of the misrenderings. *Zar'z* is the Zahrez of Murray's "Guide Book to Algeria," described as a shallow salt lake on the caravan route to El Oghouat; *sel figé* is the brine, connoting perhaps the encrusted salt on the margin. *Incandescent*: "molten brass." *On eût dit*: "one would have said" is a construe. *Burnous* is as much naturalized in England as in France (generally treated as a plural). *Moderne* qualifies *professeur*, not *rhétorique*. *Curieux*, as Matthew Arnold has pointed out, is not "curious," but here "subtle," "searching." *Une sonorité sourde*: easy to understand, but very hard to render—the three taps of a muffled drum after an aria; "a roll of distant thunder" might stand. *L'alanguissement* is not "languor," but the lowering of tone in a sentence pitched in too high a key; *rallentando* exactly expresses it. *Substitut intégral*: "the exact counterpart." For "to what scrupulosity of details may we not attain" read "to what meticulous elaboration it leads." *Poussée à l'extrême*: "the theory that words should image sentiments, if carried to extremes, is bound to land the writer in preciosity of this kind, just as the theory that the writer should observe the strict logical order of thought led Stendhal," &c. Few translations showed that the sense had been really grasped—the contrast between the impressionist school of word painters and the analytical school of psychologists. "Extremities" for "extremes" is an archaism.

I have to apologize for two bad misprints due to miscarriage of proofs. Fortunately they were too obvious to mislead any one.

A Prize of Two Guineas is offered for the best translation of the following extract from Scheffel:—

Es ist ein schönes Stück deutscher Erde, was dort zwischen Schwarzwald und schwäbischem Meer sich aufthut. Wer's mit einem falschen Gleichniss nicht allzu genau nimmt, mag sich der Worte des Dichters erinnern:

Das Land der Alemannen mit seiner Berge Schnee,
Mit seinem blauen Auge, dem klaren Bodensee;
Mit seinen gelben Haaren, dem Aehrenschmuck der Auen,
Recht wie ein deutsches Antlitz ist solches Land zu schauen.

—wiewohl die Fortführung dieses Bildes Veranlassung werden könnte, die Hegauer Berge als die Nasen in diesem Antlitz zu preisen.

Düster ragte die Kuppe des hohen Twiel mit ihren Klingsteinzacken in die Lüfte. Als Denksteine stürmischer Vorgeschichte unsrer alten Mutter Erde stehen jene schroffen malerischen Bergkegel in der Niederung, die einst gleich dem jetzigen Becken des Sees von wogender Fluth überströmte war. Für Fische und Wassermöven mag's ein denkwürdiger Tag gewesen sein, da es in den Tiefen brauste und zischte, und die basaltischen Massen glühend durch der Erdrinde Spalten sich ihren Weg über die Wasserspiegel bahnten. Aber das ist schon lange her. Es ist Gras gewachsen über die Leiden derer, die bei jener Umwälzung mitleidlos vernichtet wurden; nur die Berge stehen noch immer, ohne Zusammenhang mit ihren Nachbarn, einsam und trotzig wie Alle, die mit feurigem Kern im Herzen die Schranken des Vorhandenen durchbrechen, und ihr Gestein klingt, als sässe noch ein Gedächtniss an die fröhliche Jugendzeit darin, da sie zuerst der Pracht der Schöpfung entgegen gejubelt.

Initials or a nom de guerre must be adopted by ALL competitors, but the prize-winners will be required to send real names for publication.

All competitions must reach the Office by April 16th, addressed "Prize Editor," THE JOURNAL OF EDUCATION, 3 Broadway, Ludgate Hill, E.C.

Those in the First Class are entitled on application to a copy of "Essays, Mock Essays, and Character Sketches."

Translations sent with an addressed and stamped envelope and six penny postage stamps will be returned corrected. Foreign postage stamps are not accepted.

Translations will not be returned unless both these conditions are complied with.

GIRLS' SCHOOL TRANSFERS.

Messrs. GABBITAS, THRING & Co.,
36 SACKVILLE STREET,
PICCADILLY, W.
(Established 1873.)

TRANSFERS OF AND PARTNERSHIPS IN GIRLS' SCHOOLS.

Messrs. GABBITAS, THRING & Co. have a large number of Girls' Schools on the books of their Transfer Department, but issue no list of such Schools. On learning a Purchaser's qualifications and requirements, they will send to her notices of opportunities likely to suit her.

The following are a few of the Schools now on their books:—

No. 1. PARTNERSHIP in old-established Boarding and Day School, at a South Coast Resort. Inexpensive School, but strictly for the daughters of gentlemen. Senior Partner proposes to retire. About 15 Boarders and 8 Day Pupils. Prospectus fees 60 guineas for Boarders and 9 to 18 guineas for Day Pupils. Gross receipts and profits increased the last three years. For last year about £1,200 and £250 respectively. For half share of Goodwill £250 and £250 for household furniture.

No. 2. TRANSFER of Junior School for Boys and Girls in connexion with well-established and high-class Boarding and Day School at a Midland Town. Established by the Founder, for little Boys and Girls up to 11. The Junior part of the Senior School would continue to be maintained.

No. 3. TRANSFER of or **PARTNERSHIP** in old-established and successful Boarding and Day School with Boys' Preparatory Class and Kindergarten, in a suburb of a North-Western City, containing about 10 Boarders and 30 Day Pupils.

GIRLS' SCHOOL TRANSFERS.

Prospectus fees 39 to 45 guineas and 12 to 15 guineas. Gross income about £800, and profits about £300. Goodwill £400. Premises would be let. Furniture at a valuation.

No. 4. OPENING for **STARTING** high-class Girls' School in very desirable surroundings in conjunction with a lady of much successful experience who owns a suitable House and Grounds, and who would arrange to build for the purposes of the School, when desirable.

No. 5. TRANSFER of, or **PARTNERSHIP** to **succession**, to Boarding and Day School at a bracing Inland Health Resort. About 15 Boarders and the same number of Day Pupils. Prospectus fees for Boarders £60 per annum, several paying considerable extras. Day Pupils from 4 to 9 guineas. Gross receipts and profits steady for the last three years at £1,000 and £150 respectively. Price for the whole Goodwill and School and household furniture £1,000.

No. 6. PARTNERSHIP in Boarding and Day School for Gentlemen's Daughters and small Boys in a residential locality near London, containing 3 Boarders and 30 Day Pupils. Fees 50 to 80 guineas and 9 to 15 guineas. Gross receipts over £1,000 and net profit £200. Goodwill of one-third share £150, unless Partner can introduce Boarders.

No. 7. TRANSFER of old-established, flourishing Boarding School at a South Coast Health Resort, containing about 50 Boarders, at prospectus fees of 60 to 75 guineas, and most of them paying quite full fees. Gross receipts for last year about £3,000, being an increase on the average of last three years. Fees for current year indicate further increase. Net profit last year nearly £2,000, an increase on the average of the preceding three years.

No. 8. PARTNERSHIP, with a view to **succession**, in flourishing Boarding School at a favourite South Coast Resort, full with over 30 Boarders. Day Pupils not received. Prospectus fees of 90 guineas. Gross receipts about £4,000 last year. Average annual receipts of last three years about £3,600. Net profits about £800 and £700 respectively. Goodwill of half share £1,000.

No. 9. TRANSFER of Boarding and Day School for Girls. Good residential and service centre near London. 10 to 12 Boarders and nearly 40 Day Pupils. Fees 35 to 39 guineas and 4 to

GIRLS' SCHOOL TRANSFERS.

12 guineas. Average gross receipts over £1,200 for last three years. Goodwill £250.

No. 10. TRANSFER or **PARTNERSHIP**, with a view to **succession**, of first-rate School in a healthy residential locality near London, containing from 30 to 40 Boarders. Prospectus fees 90 to 120 guineas. Some Day Pupils. Gross receipts averaging about £6,500 per annum.

No. 11. TRANSFER of Boarding and Day School, with Kindergarten at a favourite East Coast resort. 6 Boarders and 12 Day Pupils, paying on the average £42 and 49 per annum, without extras. Receipts about £350. Goodwill £100 or capitation fees.

No. 12. PARTNERSHIP, in Boarding and Day School for Girls in a healthy neighbourhood in the South Country, near the Sea. School strictly for the daughters of gentlemen, in excellent premises, and containing nearly 20 Boarders at fees of 75 to 105 guineas, and about 12 Day Pupils at 9 to 18 guineas. School increasing in numbers. One quarter to one half share offered as desired. Price for Goodwill depending on connexion introduced.

No. 13. TRANSFER of or **PARTNERSHIP** to **succession**, with a view to **succession** to successful School at a South Coast Resort, containing nearly 20 Boarders, at fees of 60 to 85 guineas. A few Day Pupils received, most of them paying 50 guineas. Gross receipts about £2,000, exclusive of many extras. Net profits for the current year about £500. 2½ years' purchase for the Goodwill. One third share would be sold if desired with a view to succession.

No. 14. PARTNERSHIP in old established and flourishing Boarding and Day School at South Coast Resort. Home School for the daughters of gentlemen, containing about 14 Boarders, and the same number of Day Pupils and Day Boarders. Excellent Anglo-Indian connexion. Receipts over £2,000. Two Senior Partners retiring, and the Junior Partner, a relative of theirs, remaining with her Successor.

Further information will be sent to applicants, but Messrs. GABBITAS, THRING & Co. will require **full particulars** before arranging introductions to their clients. No charge is made to Purchasers.

Transfers and Partnerships are on pages 195, 197, and 198; other School and Teachers' Advertisements are continued on pages 197, 198, 199, 200, 201, 202, and 203.

Telephone:
7021 Gerrard.

SCHOOL TRANSFER AGENCY.

(Established
1833.)

Proprietors—Messrs. GRIFFITHS, SMITH, POWELL & SMITH.

Offices—34 BEDFORD STREET, STRAND, AND 22 HENRIETTA STREET, COVENT GARDEN, LONDON, W.C.

Schools Transferred and Valued. No charge whatever will be made to Vendors of Schools or School Partnerships, by Messrs. Griffiths, Smith, Powell & Smith, unless a sale is effected or agreed upon.

SPECIAL NOTICE TO VENDORS.

As Messrs. GRIFFITHS, SMITH, POWELL & SMITH have at all times the names of a large number of intending Purchasers of Schools and School Partnerships on their books, they have every confidence in stating that they can readily effect a sale of any desirable Property they may be instructed to dispose of. All instructions receive the personal attention of one of the Partners of the firm.

No commission charge whatever will be made by Messrs. Griffiths, Smith, Powell & Smith, to Purchasers of Schools, or School Partnerships.

Applications from intending purchasers are solicited for the following properties:—

GIRLS' SCHOOLS.

HOME COUNTY. — High-Class

BOARDING AND DAY SCHOOL in very prosperous town. Gross receipts for past year £1,262. Net profit about £300. Number of Boarders 8. Terms from £30 to £15 per term. 40 Day Pupils and over 50 Pupils attend for special subjects. Fine house standing in its own grounds. Goodwill only £250.—No. 1,737.

KENT (Seaside). — First-Class BOARDING AND DAY SCHOOL. Net profits about £500. Number of Boarders 18 and 10 Day Pupils. Very fine premises in exceptional position. Goodwill by capitation fee. Furniture at valuation or by arrangement.—No. 1,658.

Near LONDON. — DAY SCHOOL with Preparatory Departments. 148 Pupils. Gross receipts for past year £1,128. Net profits £300. Rent of premises specially built for a School, £120. Price for goodwill and valuable plant (if purchased at once) only £570.—No. 1,736.

NORTH WEST COAST. — BOARDING AND DAY SCHOOL FOR GIRLS. Gross income over £2,000. Net £600. Number of Boarders 30, and 30 Day Pupils. Exceptional opportunity of securing a School in flourishing condition at a nominal price, viz., £600 for Goodwill. School plant at valuation. Splendid premises and grounds.—No. 1,656.

SOUTH COAST. — PARTNERSHIP IN FIRST-CLASS SCHOOL. One-third share of profits and valuable furniture. About £1,000

is asked for a two-fifths share. The whole purchase money need not be paid down. Very fine premises.—No. 1,735.

SURREY. — TRANSFER OR PARTNERSHIP. — BOARDING AND DAY SCHOOL. Gross income £1,200, net £300. Could be largely increased. 80 to 90 pupils. Terms of sale or partnership to be arranged.—No. 1,743.

MIDLANDS. — Good class BOARDING AND DAY SCHOOL FOR GIRLS. Established 16 years. Gross receipts £1,545. Average net profit £250. Number of Boarders 19, number of Day Pupils 38. MESSRS. METHUEN'S SCHOOL BOOKS

ENGLISH LITERATURE.

By F. J. RAHTZ, M.A., B.Sc. Crown 8vo, 2s. 6d.

This work is suitable for pupils in the Upper Forms of Secondary Schools, and also for older students. Its aim is to review in a general but critical manner the groundwork of English Literature.

The book will be found useful for such examinations as the Cambridge Senior Local and London Matriculation, and will form an excellent foundation for more advanced examinations.

SELECTIONS FROM ENGLISH LITERATURE.

Vol. I (1350-1700). By F. J. RAHTZ, M.A., B.Sc. Crown 8vo, 2s.

Vol. II (1700-1900). By H. N. ASMAN, M.A., B.D., Second Master of Owen's School, Islington. Crown 8vo, 2s.

It is important for the student to have a first hand acquaintance with the authors themselves beyond what may be obtained from the brief extracts given in the English Literature above described. For this purpose two volumes of Selections, uniform with the "English Literature," have been prepared. Extracts are given from prose, poetry, and the drama. In dealing with verse, complete poems have been given where space would permit; and in the case of the drama, prose, and longer poems, the extracts are such as should be intelligible by themselves or with the aid of brief prefatory notes.

ENGLISH COMPOSITION.

By F. J. RAHTZ, M.A., B.Sc. Crown 8vo, 1s. 6d.

This work is intended for pupils of Secondary Schools and private students. It supplies a progressive course in English composition, embracing not only essays and letters, but also other important and useful work in writing English. Numerous and varied exercises are appended to each chapter, while questions and shorter exercises, many of which may be used orally, are introduced in the text. The importance of connecting the student's composition with his reading has been borne in mind throughout.

AN ENGLISH CHURCH HISTORY FOR CHILDREN.

By MARY E. SHIPLEY. With a Preface by WILLIAM E. COLLINS, D.D., late Bishop of Gibraltar. In Three Volumes. With Maps and Illustrations. Crown 8vo, 2s. 6d. net each. Vol. III, A.D. 1500-1911.

A JUNIOR GERMAN GRAMMAR.

By H. C. A. SECKLER, Senior German Master, Owen's School, E.C. Crown 8vo, 2s. 6d. [Junior School Books.]

This book is for the Middle Forms of schools, and meets the requirements of the Oxford and Cambridge Junior Local and the College of Preceptors Examinations. It consists of grammar and exercises, and a particular feature is the co-ordination of accidence and syntax. It aims throughout at training pupils to use their knowledge for composition. The latter part of the book gives various examination papers, with some useful model solutions.

A FIRST YEAR INTUITIVE FRENCH.

By M. VERDON, Modern Language Master at Rotherham Grammar School. Crown 8vo, 2s.

This book is intended for children between the ages of twelve and fourteen in Secondary Schools. It aims at teaching elementary French according to the "New" or "Direct" Method, and follows the lines of moderate Reformers. It is divided into thirty-six lessons, providing ample material for a whole year's work.

AN ELEMENTARY LATIN EXERCISE BOOK.

By H. G. FORD, M.A., and L. V. CAUDWELL, M.A., Assistant Masters at Bristol Grammar School. Crown 8vo, 2s. 6d.

This book covers a two years' course divided into six parts, each part containing twelve explanations and twelve vocabularies of uniform length (10 words), with twenty English-Latin sentences and fifteen Latin-English to each explanation. Throughout only words and constructions found in Cæsar B. G. are used.

A FIRST YEAR PHYSICAL CHEMISTRY.

By T. P. HILDITCH, D.Sc. Lond., F.I.C. Crown 8vo, 2s.

[Text-books of Science.]

An attempt to render this branch of Chemistry more easy to those commencing its study. The more elementary outlines of the subject are treated, as far as possible, from the standpoint of practical use in solving chemical problems; accordingly, the first part of the book is devoted to characteristic properties, such as density or refractivity. Later chapters include introductions to the physico-chemical theories of gases and of solutions, and the more important applications of these theories to pure chemistry. The book should prove useful to Inter. B.Sc. and Final (Pass) B.Sc. candidates, as well as those taking Board of Education examinations.

PHYSICO-CHEMICAL CALCULATIONS.

By JOSEPH KNOX, D.Sc., Lecturer on Inorganic Chemistry, Aberdeen University. Cr. 8vo, 2s. 6d. [Text-books of Science.]

This book is intended for students of physical chemistry, as a supplement to the theoretical matter of lectures and text-books. Here the theory is applied to the solution of practical problems. The book contains eleven chapters, dealing with the main subdivisions of physical chemistry. Each chapter consists of a short introduction dealing with the theory required for the solution of the problems, a series of typical problems with complete solutions, and a list of problems for solution with answers. Practically all the problems have been taken from the original literature of the subject, and by a careful study of the solved problems the student should learn much. The large collection of problems for solution should prove useful to teachers.

A PRACTICAL CHEMISTRY FOR TECHNICAL INSTITUTES.

By A. E. DUNSTAN, D.Sc., and F. B. T. THOLE, B.Sc., Lecturer in Organic Chemistry, East Ham Technical College. Crown 8vo, 3s. 6d. [Text-books of Science.]

This Course of Practical Chemistry meets the requirements of the Upper Forms of Secondary Schools, where a good elementary foundation has been laid in the rudiments of manipulation. The book will be found useful also for classes in Technical Institutes, and covers the following ground:—

Qualitative Analysis of Simple Substances and of Mixtures—Volumetric Analysis—Simple Gravimetric Analysis—Preparation of Pure Compounds—More Difficult Quantitative Analysis—Qualitative Organic Analysis—Ultimate Organic Analysis—General Organic Determinations—Determination of Physical Constants.

TECHNICAL ARITHMETIC AND GEOMETRY.

By C. T. MILLIS, M.I.M.E., Principal of the Borough Polytechnic Institute. Second and Revised Edition. Cr. 8vo, 3s. 6d. An up-to-date course in Arithmetic, Geometry, and Mensuration.

DOUBLE ENTRY BOOK-KEEPING.

A Complete Treatise on its Theory and Practice. By JAMES CUSACK, LL.D., Principal of the Business Training College, Finsbury Square. Crown 8vo, 3s. 6d.

Covers the requirements for all the Elementary, Junior, and Intermediate Examinations held by the London Chamber of Commerce, the Royal Society of Arts, the National Union of Teachers, the Oxford and Cambridge Senior Locals, the College of Preceptors, and other similar Examinations.

Supplement to THE JOURNAL OF EDUCATION.

No. 513.

APRIL 1, 1912.

Cambridge University Press

A First Year Latin Book. By JOHN THOMPSON, M.A., formerly Scholar of Christ's College, Cambridge, Head Master of the High School, Dublin.

Extra
Fcap 8vo
2s

Intended to meet the requirements of the Curricula Committee of the Classical Association, viz.—Average age of form 12. Vocabulary 500 600 commonest words which once introduced are frequently repeated. Variety of methods to fix what is learnt in the memory—(1) Latin oral questions and answers based on text. (2) Repetition of sentences with change of tense, &c. (3) Translation of simple English sentences into Latin, first *trita-voce*, then in writing. (4) Comparison of Latin words with their French and English cognates and derivatives—e.g., *pater-paternal, regina-royne*, and distinction between English derivatives—e.g., *ineligible, illegible*. The vocabulary has been formed by the help of *Lodge's Vocabulary of High School Latin* and *Lee Byrne's Syntax of High School Latin*, so that only words and forms of most frequent recurrence are included. The book contains work for one year, and most of the work should be done *viva-voce*.

Caesar in Britain and Belgium. Simplified text (45 pp.), with introduction (30 pp.), notes (28 pp.), exercises (27 pp.), and vocabulary (23 pp.) by J. H. SLEEMAN, M.A., Lecturer in Latin in the University of Sheffield. With 12 illustrations, map, and plan.

Extra
Fcap 8vo
1s 6d

This book follows out the recommendations of the Curricula Committee of the Classical Association for the second year of Latin study and provides a text in which long sentences have been broken up or curtailed. The introduction gives an account of Caesar's life and times, together with a brief account of Roman Military institutions. The notes are mainly grammatical, and the grammatical terms recommended by the Joint Committee on Grammatical Terminology have been adopted. The exercises are based upon the text, but do not follow it slavishly. The vocabulary contains well under 1,000 words, but there is no English-Latin vocabulary. There is a good general map of the campaigns at the end of the book.

The Revised English Grammar. A new edition of *The Elements of English Grammar*, based upon the recommendations of the Committee on Grammatical Terminology. By ALFRED S. WEST, M.A., Trinity College, Cambridge.

Fcap 8vo

Applications from teachers for specimen copies should be addressed to F.E., Cambridge University Press, Fetter Lane, London, with a statement as to the number of copies likely to be required if the books are adopted for class use.

MACMILLAN & CO.'S LIST.

LATIN.

Latin Translation for Public School Scholarships. By BASIL DALTON, M.A., sometime Scholar of Rugby School. 2s. 6d.

PREPARATORY SCHOOLS REVIEW.—"This little book is admirably adapted to its purpose, and will prove most useful to all schoolmasters engaged in preparing boys to translate into idiomatic English. . . . The notes are a model of good teaching, not overloaded in a single instance, and full of useful hints."

The Roman Conquest of Britain. A Fourth Form Reading Book adapted from the Text of Tacitus. With Map, Introduction, Notes, and Vocabulary by WILLIAM MODLEN, M.A. Illustrated. 1s. 6d.
[Elementary Classics.]

GEOGRAPHY.

Class Book of Physical Geography. By A. T. SIMMONS, B.Sc., and E. STENHOUSE, B.Sc. [Very shortly.]

A Geography of the World. By B. C. WALLIS, B.Sc. (Lond.), F.R.G.S. Illustrated. 3s. 6d. [Practical Modern Geographies.]

THE SCHOOLMASTER.—"The book, which bears evidence of the most painstaking and careful compilation, is a veritable mine of quantitative information, from which the geography teacher and his pupils can obtain all the statistical facts which they can possibly require."

A Geography of Europe. By T. ALFORD SMITH. Illustrated. [Practical Modern Geographies. Very shortly.]

ENGLISH.

The Tragical History of Doctor Faustus. Text of 1604. By CHRISTOPHER MARLOWE. With Introduction and Notes by WILLIAM MODLEN, M.A. 1s. 9d. [Macmillan's English Classics.]

Children of the Dawn. Old Tales of Greece. Written by ELSIE F. BUCKLEY. With Introduction by ARTHUR SIDGWICK. Notes and Subjects for Essays by J. H. FOWLER. In Two Parts. 1s. each. [English Literature for Secondary Schools.]

The story of Œdipus, in a form suitable for school reading, is told in Part I under the heading of "The Riddle of the Sphinx."

Selected Poems for Required Reading in Secondary Schools. Edited, with Introduction and Notes, by HENRY W. BOYNTON, M.A. With Frontispiece. Pott 8vo. 1s. net. [Pocket Series of English Classics.]

Shakespeare.—Henry the Eighth. Edited by CHARLES G. DUNLAP, Litt.D. With Frontispiece. 1s. net. [The Tudor Shakespeare.]

Shakespeare.—A Midsummer Night's Dream. Edited by JOHN H. CUNLIFFE, D.Lit. With Frontispiece. 1s. net. [The Tudor Shakespeare.]

A Book of English Prose, 1470–1900. Selected by J. H. FOWLER, M.A. 3s. 6d. **SCHOOL WORLD.**—"Mr. Fowler has shown the soundest judgment and taste in his choice; we hope—so fully do we believe in the principle it illustrates—that his book will sell by the hundred thousand."

Examples and Exercises in English for Foreign Students By WILFRID C. THORLEY, Author of "A Primer of English for Foreign Students." Sewed. 9d.

FRENCH.

La Vache Enragée. Par Jean Macé. Adapted and Edited by Rev. E. H. ARKWRIGHT, M.A., M.V.O. 1s. [Siepmann's Primary French Series.]

MATHEMATICS.

Arithmetic. Chiefly Examples. By G. W. PALMER, M.A. 3s. 6d.

SCHOOLMASTER.—"A splendid book."

IRISH SCHOOL WEEKLY.—"We can heartily recommend this publication."

Examples in Arithmetic. Part I. Taken from "A School Arithmetic." By H. S. HALL, M.A., and F. H. STEVENS, M.A., Authors of "A School Geometry," &c. With and without Answers. 1s. 6d.

SCHOOL WORLD.—"It is written with the skill of the practised teacher, and it is in line with all the reasonable requirements of pupil and examiner alike. The selection of material seems to be excellent throughout the book, and the explanations and illustrations of rules and methods are both clear and concise."

VOLUME II. JUST PUBLISHED.

A New Algebra. By S. BARNARD, M.A., and J. M. CHILD, B.A., B.Sc. Vol. II, containing Parts IV–VI. With Answers. 4s.

.*. Previously published, Parts I–III. With or without Answers. 2s. 6d. KEY, 6s. 6d. Parts I–IV. With Answers. 4s. Part IV. With Answers. 1s. 9d.

Mathematical Papers for admission into the Royal Military Academy and the Royal Military College, 1905–1911. Edited by R. M. MILNE, M.A. 6s.

MACMILLAN & CO., Ltd., ST. MARTIN'S STREET, LONDON, W.O.

THE LONDON Central Institute for Swedish Gymnastics,

16, 17, & 18 Paddington Street, Marylebone, W.

Telephone: 872 Mayfair.

The School World says: "This college for men students . . . will provide a first year's course fitting students for posts in elementary schools, and a second year's course enabling the graduate to take charge of any school of whatever standing. Anatomy, physiology, theory of movements, hygiene, and kindred subjects necessary for a complete grasp of physical training will be taught by experienced teachers. This will be a noteworthy addition to the facilities for training in this subject. . . . this new college has been most cordially welcomed by the Parliamentary Secretary representing the Board. . . . As a sign of progress, and in the hope of a better future for the physique of the youth of the nation, the new 'Central Institute' will be cordially welcomed."

PUPILS ARE NOW RECEIVED.

The Institute also undertakes the instruction in Physical Exercises on the Swedish System for Schools in the neighbourhood.

Recreative Classes—Gymnastics and Fencing—are held in the afternoons and evenings.

For particulars apply to the Principal—

ALLAN BROMAN,

From the Royal Central Institute of Gymnastics, Stockholm.

A RETROSPECT OF THIRTY-SIX YEARS*

By a PUBLIC-SCHOOL MASTER.

I HAVE known only two schools directly and intimately—Sherborne, where I was educated; Marlborough, which alone I have served. Marlborough is my real subject. Pray do not think that I am setting it up as a model. I believe I know enough generally of other schools to recognize that in many ways, perhaps in most ways, it is typical. Some virtues and some faults it may have peculiar to itself. On some of these I hope to touch. All our great schools have certain individualizing marks, but these tend to become less prominent and assertive. In spite of our having no common superior, or "educational authority," there is a striking solidarity in our public schools, partly due to the interchange of masters, the modifying of local traditions by imported or engrafted custom, much more to the pressure upon them all alike of a common body of public opinion. I can make allowance, then, for the permanence of certain aspects here, while assuming broadly that the changes which have taken place here are parallel to, often identical with, changes which have concurrently affected other schools. The point and pith of the whole matter is—what have those changes been, and have they been for the better or the worse?—if mainly for the better, have they yet entailed other consequences which partly neutralize the good?

The material changes are the most obvious. I have seen Marlborough half, I think more than half, rebuilt, certainly more than half remodelled externally. As I first knew it, it was, for the mass of boys, unquestionably a rough school. I do not use the word in a bad sense. I mean there was very little material comfort; nothing that could be called luxurious; much that was primitive, hard, uncomfortable. It had been a great deal rougher than it was in 1875, and it had been rough in a bad sense. There was a period when the bullying was bad, but all schools then suffered from this. There was always a separate house for the smaller boys, but the mass of the middle part of the school—all the fourth forms and a large part of the fifths—lived in one large room. The boys higher in the fifths had access to house classrooms; the sixth alone had studies, most of them in basements, very dingy and dark, a sort of horse-boxes. Meat was only given once a day, and there was little attempt to make meals appetizing. Boys slept in large dormitories, too closely crowded. I need not give more details. The school was intended to be, and was, a school for the sons of comparatively poor men, and especially the sons of the clergy. If rich men sent their sons, they did so because they believed the discipline was good.

Under these material conditions the school was sending out, about the time when I first knew it, a number of men of marked force of character. All this hardness of life was compatible with keen intellectual life and moral vigour, and at the time of my undergraduate days the impress of men trained in this school was remarkable at either University. Since those days the most obvious changes in the school life have been changes in the direction of greater refinement of life, a gradual softening of the harder conditions. Better food, more of it, and more variety in it, less crowding in dormitories, better bath-room accommodation, much better classrooms and day-rooms, less herding of boys together, much better rooms for reading and quiet recreation (there were none in the old days), more supervision of out-of-school hours, more of what I may call policing—the regulation and organization of boys' spare time—better sanitary arrangements. These changes are not particular to Marlborough; they have affected probably the whole of public school life, in a greater or less degree. Side by side with this refinement of the conditions of living we have seen a much greater advance in the same direction of private schools; private schools have, indeed, quickened the pace of these changes, and gone further than any public school. The reaction of

* A Paper read to the U. U., 1911.

the well conducted private school upon the public school has been very strong; boys come to the public school habituated to supervision over the whole of their life, and ready to accept it as the natural order of things. Then there has been a steady growth of what I may call auxiliary appliances—Libraries, Museums, Laboratories, Gymnasiums, and all the apparatus of games. The latter are so important that I reserve them for separate treatment.

All these changes would seem at first sight wholly for good—an advance all along the line, as I see one education authority puts it. What I desire to ask is—has there been a maintenance of the intellectual standard? has it meant an advance in moral vigour? has it brought any change, for good or bad, in manners and the outlook on life? how has it affected the parents? do we at Marlborough still draw from the same class? can we still boast that this is a school for poor men's sons?

I take the last question first. All these changes have meant money. You cannot have comforts without paying for them. There is much more evidence of wealth. Do we draw from a wealthier class, and so tend to shut out the poorer men? Or has the standard of living gone up all over England, and the scale of parents' expenditure risen concurrently with the school's? I think the answer is "yes" in both cases. It is true to a certain extent that the rich are capturing the poor man's schools: but it is also true that the standard of living has risen in the classes from which we formerly drew and still draw. We live, it is often said, in a luxurious age. I hesitate to use the word luxury. It is a purely relative term. The luxury of one age becomes the refinement of the next, the necessary comfort of the third. Some comforts are civilizing. It would be misleading to describe our life here, as it is now, as luxurious. It is in many ways still primitive and even hard; it lacks a good deal of refinement. In some of these civilizing comforts we have not yet gone far enough. We are at this moment* building two large new houses, not to increase the numbers of the school, but to clear the space in the existing houses and to provide such dormitory, lavatory, and sanitary arrangements as will bring us up to the standard requirements laid down by expert authorities, whose views are based upon now fairly well ascertained laws of health. All money spent in this way I regard as spent, not on luxury, but upon improvements enforced by a scientific study of the laws of health. But we maintain, and hope still to maintain, the character of simplicity, the somewhat Spartan view of life, which we have in the past regarded as one of our best inherited traditions. The crux of the problem here—and I suppose it to be the same elsewhere—is, how to maintain it. Undoubtedly there is more show of wealth. But we still draw largely from the clergy, who cannot be a wealthy body. The standard of living is set by the wage-earner, certainly among the boys who rise to the top of the school. There are more than there used to be who are independent, but at present they fall under the influence of those who are not. Whatever gentle gales of prosperity blow elsewhere in England, they are certainly tempered here by our keener down air, by the struggle for existence, need for effort, competition in life. So, looking back over the thirty-six years, I find that in most respects the material changes have been changes in needful refinement, changes enforced by a wider knowledge of natural law.

But one class of material change needs to be treated separately. There has to be recorded a very large expenditure upon all the apparatus of games, cricket grounds, football grounds, racquet courts, and so on. Money has been lavished upon these. Has it been necessary or useful expenditure? does it represent real progress? or is it expenditure for advertisement? I believe it must be conceded that a great deal of it has been only necessary in the sense of necessary for advertisement. The demand for these things has come from parents. They demand them because they believe them

to be of value, and we cannot resist the demand because we cannot otherwise fill the school. I do not hold Marlborough specially guilty in this matter. A good deal of money has been judiciously spent on necessary enlargements. But hardly any school can be pronounced guiltless.

Looking back on my earlier days, I am certain that we enjoyed our games, with their ruder apparatus, quite as much as the modern boy with his scientific and expensive apparatus. We are losing hold of the true end of games, which should be healthy enjoyment, and substituting the fictitious end of competition. So your millionaire gives his baby a real miniature motor car, when it is perfectly happy with a sardine box and make-belief. We all deplore this, and talk of over-organization, specialization, professionalism, but we have not the courage of our convictions. We encourage in act what we condemn in speech. Our attitude is a little humiliating. If we disbelieve these things, why do we do them?—if we do them, why do we carp? Let us be frank. We live in an age of advertisement, and must frankly confess that we cannot exist without it. My conclusion is: all money spent on games to make them more healthy amusements, to organize them so as to get the maximum amount of use and enjoyment for the largest number, is good. Money spent in obedience to a wave of fashion that exalts games to the be-all and end-all of schoolboy life is money spent for advertisement, and puts the interest of the school above the interest of the boy. If we push our extravagance too far, we as directly challenge State interference as a railway does when it sets the interest of the shareholder above the interest of the passenger.

Let us turn from externals. Has there been any progress in morals? are boys more chaste, more temperate, kinder in disposition? have they the same or better ideals of life? do they take more or less serious views? do they work harder?

In the primary virtues, we must distinguish between nature and habits. Boys' nature surely remains the same. To any rational student of evolution a change of nature in thirty-six years seems an absurdity. But there may be a change of habit, and it is by gradual changes of habit that nature seems to be slowly affected. That there has been some change in manners, which depend so largely on habit, is, I think, clear. And there may be changes in opportunity which affect habit—changes in environment. Older members of the U.U. who remember Wilson's paper on "Morality" and the discussion that followed will agree that evil is at least not so open and flagrant as it was in a good many schools forty years ago. We have driven the snake into holes, possibly have scotched it. Unquestionably manners are gentler. Bullying of the grosser sort seems to be dead; petty persecution one cannot wholly avoid; but the number of boys whose lives are made really unhappy, who leave school with pleasure and look back upon it with repulsion, must surely be small.

Do boys work harder? I should answer, taking the mass of boys into purview, yes, because there are less opportunities for idleness and the modern boy is more amenable to discipline. But even before the drill of the private school was felt, the general standard of industry here was high. When I first came I used to wonder at the amount of work exacted from even the laziest boy, and I do not cease to be astonished at the steady drill. I admire my colleagues and envy many of them their power of getting work done with the least amount of friction, mostly by sheer force of character. I am likewise often astonished at the readiness with which the modern boy submits, with a grumble, to discipline. The difference between him and his predecessor is the difference between the sons of the Gospel. The older boy said, "I go, sir," and too often went not. The younger protests, and goes. In both acts he shows himself more a child than his forerunner. I know there is a possible adverse criticism. We level down as well as up—we seem to echo Paracelsus' prayer,

Make no more giants, God,
But elevate the race at once.

We know, or fancy we know, that the giant, the genius, requires to be let run, like the river, at his own sweet will.

* These buildings have been finished since the paper was written, and are now in use.

The late Lord Tennyson said the schoolmaster was bound to spoil the genius, because he would not recognize him if he had him. I should put it differently. We know that we can recognize talent, and we know that we can develop it; the subtle distinction between the talent and the genius must be unrecognizable in the embryo. We assume, rightly, that our business is with talent; we assume, rightly, that our business is as much with him who has one as with him who has five.

Do the boys take a more serious view of life? I have suggested the answer; they are, from their up-bringing, more childish, less ready to think as a man. It is a question of habit and environment. If you habituate a boy to discipline, he has the less opportunity to think for himself; if you make his environment more comfortable you must expect him to take more comfortable views of life. Your preaching may countervail these tendencies somewhat. Experience is the only master. It is the same in the home. Some return to the simpler and more strenuous life in England generally seems rather desirable than discernible. In our schools we have to keep the needful refinement I have spoken of within bounds. We give boys responsibility, but it cannot compare with the responsibility that fell upon a boy in days when discipline was less strict. That was sometimes a burden too great to be put upon a boy.

But what of the outcome of our present system? Do we fit boys morally and intellectually to "fill, justly, skilfully, and magnanimously, all the offices of peace and war?" We read pictures of the modern schoolboy drawn for us by those who are regarded as authorities by the public Press, a creature without backbone, with graceful manners, generous instincts, truthfulness, honesty, and no initiative, no moral grip, no intellectual interest whatever. The picture is an utter travesty of the facts so far as they have fallen under my observation. To draw from my own immediate experience: I find in my younger colleagues men animated by a devotion not less earnest than I found in the colleagues of my younger days: I find that the same stuff is going to build up other professions, the Church, the Army, the Civil Services. We make the common error of neglecting perspective. We look back, and remember the chosen few who impressed our memories; we look round and we see the mass; the individual few are as yet faintly discernible. If we try to do justice to the individual now, and recall what the mass was then, do we find any falling off? We find, I conceive, a difference, and it is this. In former years, boys had more leisure and more opportunity for cultivating, apart from their school work, tastes and preferences of their own. I remember one boy who made himself, while going through the classical course, first-rate in natural science; another, who has since made his mark in social subjects, was deeply read in Mazzini while yet a schoolboy; another studied Dante in the original. I make allowance for the fact that, being then in College,* I knew boys' inner life better, and the more modern instances of such self-culture may escape my notice. But I think they are rarer, not because the interests and the desires are not there, but because our claim upon the whole of a boy's time gives him less opportunity for the discovery and the satisfaction of his natural bent. How we can maintain the advantage of drill and yet give scope to originality is a problem each man has to set himself to solve. No formula can solve it; to recognize the need is the first step.

I must now narrow my point and come to the question of subjects taught. I note that in some subjects our teaching has certainly improved—Natural Science, History, Geography, for example. English is regularly taught in all forms; that is an advance, but we are still groping for the right method. I prefer to confine myself to the subjects I have myself taught, the Classics. Here I must make a confession. I have been *Dipsychus* all my life. I have loved the Classics and loved teaching them; but all my life I have been haunted by a

doubt whether by clinging with scarcely altered methods to a discipline which we have found admirable in the past, admirable for ourselves, we may be fighting against new forces which imperatively demand adaptation and re-adjustment. I have feared that our classical discipline should become hieratic, what Carlyle would call a formula, that stands in no true relation to life, actuality, movement, progress. I speak of the teaching in its formal aspect. For in respect of the matter of the Classics, I still believe that Greek and Latin furnish the most universal introduction to general, I do not say special, knowledge that has yet been devised by the wit of man. And the boys I have had the privilege of teaching have reached a stage of more or less complete mastery over the language—a stage in which they could find in it an instrument of thought. So far I feel my withers are unwrung. But what of the ceaseless labour of composition, the hours and hours spent over Prose and Verse? These to me are the most delightful of mental exercises—they are a shadow of that creative satisfaction that even the humblest artist feels. When a boy begins to feel that joy, that sense of power, you have indeed given him something of value. But how few reach that stage! how many have to submit to the drudgery that the few may cull the flower of fine scholarship! I find it hard in my conscience to say that the product has been worth the cost. There has not been a great change in the method of teaching Classics since I began. There is less direct linguistic teaching; grammar is cut down to a minimum; we no longer attempt to teach philology. I should say that the chief observable difference is, that just at the time when one desires more insistence upon the matter of books, one is hampered by the increasing ignorance in boys of Greek and Roman history and antiquities. There are those who advocate the complete abandonment of composition. If this view should prevail, it will be other composition-masters, not myself, who will have to make their bow.

I should like to say a word about masters. Of the comparative quality of the staff now and as it was thirty-six years ago, it is invidious to say much. One must discount one's youthful propensity to hero-worship. But this I may say. In the middle of the last century there was a strong current setting towards this profession. When I joined there were certainly in it an extremely remarkable set of men, whose influence deeply affected the period I review. This current drew the finer spirits, or at least divided them with the Bar and the Services. It was not money that drew; it was the attractiveness of the profession in itself, and a missionary zeal. The competition of the Civil Services was not so keenly felt. But monetary considerations must make themselves felt in the long run, and it was seen that, except for the few lucky individuals, the profession was not a paying one. Ardent youth might disregard this consideration; parents took more long-sighted views. But the monetary question is a very serious one, and I do not think we have satisfactorily solved it at Marlborough any more than at other public schools. There ought to be a more just distribution of profits. When I joined, the ultimate prizes within the reach of the few were larger. Boarding-house masters retained a much larger proportion of their salaries, and there was no limit of time to their tenure. These prizes have been cut down, and I regard that as good policy; but I do not find that the levelling up at the lower end and middle of the scale has gone on proportionately. In this matter I speak with imperfect knowledge, but it is possible to calculate that, even with our Retirement Fund, admirable as far as it goes, it is extremely difficult for men who do not become boarding-house masters to provide an old-age pension for themselves at the time of their enforced retirement, and for married men with families it is scarcely possible at all. I am myself in favour of pooling boarding-house profits, as a pure theory; I have never had an opportunity of thinking out a practicable scheme.

I should like to conclude with a still more personal note. Looking back upon my work, I am chiefly conscious of one abiding impression: it is that I have been professedly

* The School retains the hostel system which was its original feature: this part is known as the College. There are also Boarding Houses, of the type usual elsewhere except that all the larger ones join in the College midday meal.

a teacher, really a learner, all my life. You bring to your work a set of notions, fixed ideas of what you are expected to do, and what you can expect from those whom you are there to teach. Every fresh boy who comes under you, clever or apparently dull, brings you something which you cannot quite fit into your formulas, and has something in him which he can teach you if you have the wit to learn it; every fresh generation of boys, brought up under changing ideals, and moulding themselves by altering codes of manners and conduct, presents you with a fresh problem, and they themselves furnish the only key to solve it. Many and many a time the lines of that excellent toper, old Omar, come into my head—

Well,

I often wonder what the vintners buy
One half so precious as the goods they sell—

and I re-shape them and fit them to my own experience
thus—

I often wonder what the learners get
One half so precious as the boon they give.

THE STRIKE.

(François Coppée's "Grève des Forgerons.")

MINE, sirs, is no long story—simply this.
The hammerers, one and all, had gone on strike—
No crime in that. The winter was main hard;
Our street, in short, had, for that bout at least,
Got tired of starving. So one Saturday,
Our pay-night, someone hitched an arm in mine
And drew me to the wineshop, where I found
The old hands—no, you'll *not* learn their names from me.
They cried, "We're bashful like, but you've more pluck.
More pay, or not a stroke more work's the word!
They're bleeding us—that's what we ought to say—
It's our last chance, and we've elected you
Spokesman, by right of seniority,
To go and give the master a mild hint
Our wretched wages must be raised to-morrow,
Or else each morrow will be holiday.
Are you our man, John?"

"Yes," said I, "of course,
I must do all that's like to help us all."

My lord, I never raised a barricade—
An old man that loves peace, and has small faith
In those black-coated gentlemen who bid
The blouses blaze away. Yet it seemed hard
To say them nay. I took the job and went.
He was at dinner, but they showed me up.
I told him of our straits and all the rest—
Rents raised and bread gone up, till we could bear
The strain no longer; figured out at length
His gains and our gains, by the balance proved
(Quite civilly) that he could well afford
To raise our pay. He heard me calmly out,
Cracking the filberts, and when I had done:
"You are an honest fellow, John, and those
Who pushed you forward played a clever game.
For you, John, I shall always have a place;
But let me tell you this, the terms you ask
Are downright robbery, and I close the works
To-morrow. They're a pack of lazy hounds,
Your demagogues, and you may tell them so
From me; that's all." I answered, "Very well, sir,"
And took my leave, sadly to carry back
His answer, as I'd promised, to my friends.
It set them all ablaze; they ranted, swore
Never again to enter the d—d shop,
And I—begad, I swore too, like my mates.
That night, I'll warrant, when they got back home,
And threw their few francs on the table down,

Some wer'n't o'er lively, didn't sleep quite sound
For thinking those poor coins might be the last
They'd see perhaps for many a day, and how
They must get used to starving. As for me,
It was a facer—I'm no longer young
Nor independent-like. When I got home
I took my two grandchildren on my knee—
My daughter died in child-bed, and the man
Who married her turned out a ne'er-do-weel—
And gazing on those innocent rosy lips,
Soon to be pinched with hunger—well, I blushed
For shame that I had sworn to stay at home.
But others were as badly off as I,
And as we workmen stick to what we swear,
I vowed to do my duty like the rest.
Then my old woman came in from her suds,
Bent double with a pile of dripping clothes.
I told my story, half afraid to tell her,
But she, poor dear, had not the heart to chide,
And never moved or looked up; then at last,
After a pause—it seemed an age—"Well, John,
You know that I'm a thrifty wife," she said;
"I'll do my best, but times are very hard,
And if we've got a fortnight's bread, that's all."
I answered, "It will all come right perhaps."
But in my heart I knew there was no hope,
Save turning traitor, and the ringleaders,
To make the strike last longer, would be sure
To keep sharp watch and punish runagates.

And famine came. Oh, sirs, you will believe me,
That never when the pinch was sharpest felt
I could have brought myself to be a thief.
The very thought had made me die of shame.
I make no merit of it; even one
Whom ruin stares in the face from morn till night
Can claim no grace for never giving way
E'en to one guilty thought. I make no boast;
But when, grown old in honest toil, I saw
My brave wife and my grandchildren, all three
Huddling and shivering round a fireless hearth,
Never, with these as tempters—children's cries
And women's tears—a live group turned to stone—
Never, I swear upon the Crucified,
Not in my darkest hour, did I conceive
The thought of theft—to skulk, to prowl, to grab,
Shoplifter, pilferer!—no, 'twere too vile!
Oh! if my pride is humbled, if I bend
Before you now a moment's space and weep,
It is because I see them, the loved faces,
Whom I was telling you about just now,
For whose dear sakes I did what I have done.

Well, at the first we made the best of it,
Lived on dry bread and put our things in pawn.
I found it hard. To us, you see, our room
Is like a cage; we cannot stay indoors.
Look you, I've tried since then what prison's like,
And, 'pon my soul, there is not much to choose;
And doing nothing in itself's hard work.
You wouldn't think it till you've had to sit
Perforce with folded arms, and then you find
You love the shop; its murky atmosphere
Of filings is the air you'd liefest breathe.

After a fortnight we were penniless.
I'd spent the time in tramping like one mad,
On and still on, alone, among the crowd—
The din of cities soothes and muddles one.
And staves off hunger better than a dram.
But once on coming home, about the end
Of a cold grey December afternoon,
I saw my wife, the children on her lap,
All cowering in a corner; and I thought
"Tis I am murdering them"; and when my wife
Said meekly, with a half apology,

"My poor old man, the pawnbroker won't take
The mattress, our last mattress; it's too old.
Where shall you go for bread now?" I replied,
"I'll go"; and, plucking all my courage up,
Determined to be off to work again.
And, though misdoubting my reception much,
Went to the tavern first, where I was sure
To find the leaders. What a sight! at first
I thought I must be dreaming. There they sat
Boozing, aye, boozing on, while others starved.
God's curse on those who paid their drinking score,
And so prolonged our lingering agony!
Let them hear once again an old man's curse!
As I drew near the toppers they looked up
And marked my bloodshot eyes and sunken head,
And partly guessed my purpose; but, in spite
Of scowling looks, I told them why I'd come—
Said, "I'm past sixty, and my wife's the same.
I've two grandchildren left upon my hands,
And in our garret, though we've room enough—
The furniture's all sold—we have no bread.
A workhouse pallet and the sawbone's knife
Are all a wretch like me can well expect.
But with the wife and bairns it's different,
So I propose to go back to the works—
Myself alone—but first must get your leave,
That none may have a right to slander me.
Look you, my hair is white, my hands are black,
I've been a smith these forty years and more;
Let me go back to the foundry, all alone.
I tried to beg, but could not. Let my age
Excuse me. One whose wrinkled brow is marked
By constant efforts of the hammer stroke
Cuts but a sorry figure begging alms
With outstretched brawny hands. I stretch these hands
To beg of *you* now. Would it seem unfair
The oldest should have leave to yield the first?
Let me go back to the foundry, me alone.
That's all: now tell me if this angers you."
One rose, came three steps forward from the rest,
And hissed out "Coward!" Staggering 'neath the shock,
I shivered, blinded by a rush of blood;
Then looked to see who my insulter was.
Tall, ghastly pale beneath the gaslight's glare,
Debauched, a haunter of low music-halls,
With love-locks o'er his forehead like a girl,
He sneered and fixed his mocking eyes on me,
And all the rest kept silence so profound
That I could hear my heart beat hard and fast.

Then all at once I clasped my forehead, cried,
"Right! They must die, my wife and little ones;
I will not go to work. But *you*, I swear,
You, you shall answer me for that word 'Coward';
We'll fight it out as we were gentlemen.
When? On the spot. *My weapons?* I've the choice;
By God, no other than the anvil hammer,
Lighter to *our* arms than the sword or pen.
Our seconds? You, my mates. Come, make a ring,
And, from the litter where they lie and rust,
A pair of sturdy sledges pick me out.
And you, vile mocker of grey hairs, be quick,
Off with your blouse and shirt and spit in your hand."
Then madly elbowing my way among
The crowd of onlookers, from off a heap
Of rubbish in an angle of the wall,
I chose two hammers, judged them at a glance,
And tossed the better weapon to my foe;
He still was sneering, but as if in play
He picked it up, and, standing on his guard,
"Come, come, old man," he cried, "don't get so hot."
I went straight at him—that was my reply.
The villain shrank beneath my honest gaze
As I approached him, swinging round my head
My work-day tool, my weapon for the fight.

No hound that crouches 'neath a master's lash,
And fawns with timid, deprecating eyes,
Had e'er a look so craven, so abashed,
As that tall bully, when he backed and crouched
Beneath the shelter of the pot-house wall.
Too late, alas! too late. A blood-red veil,
A mist of blood, came down and blotted all
Betwixt me and the terror-stricken wretch;
And with a blow—but one—I smashed his skull.

It's murder—a plain case; and I've no wish
To quibble, like your lawyers, and make out
A duel what was downright murder. No.
I murdered him; and, as he lay there dead,
His brains out-oozing, all at once I felt
Like one to whom is suddenly revealed
The whole immensity of Cain's remorse.
I stood there, hiding with my hands both eyes;
And when the others drew around, and laid
Upon me trembling hands, I waved them off
Without a struggle, saying, "Stand aside;
Let me alone. I doom myself to death."
They understood; and, taking off my cap,
I passed it round as one collecting alms,
Crying, "For wife and children, my kind friends."
That brought ten francs, which one has handed them;
And then I went and gave myself in charge.

So here you have a plain and true account,
And need not pay attention overmuch
To what those learned lawyers have to say
About my crime. And if I've troubled you
With these particulars, 'twas but to prove
That sometimes such a heinous deed as mine
Comes from a fatal chain of circumstance.
The little ones are in the workhouse, where
Grief killed my brave old help-mate. So for me,
Whether it's prison or the galley-chain,
Or even pardon, does not matter much;
But if 'tis death, I'll thank you heartily.

A series of articles dealing largely with the advantages of the various technical professions.
- University Education, Royal Commission on; The External Student; Fear of Extinction. By E. Graham Little. *Daily Telegraph*, February 29.
- Vision Test for Young Children, A Satisfactory. By Eleanor E. Bourne. *Medical Officer*, February 24.

EDUCATION IN THE NEW "ENCYCLOPÆDIA BRITANNICA."

By Prof. WILLIAM PHILLIPS.

A YEAR has elapsed since the Eleventh Edition of the "Encyclopædia Britannica" appeared, and its users have now had a fair opportunity of forming at least a partial judgment on those parts of its contents in which they are particularly interested. Most readers of this journal are more deeply concerned with the sections dealing with education than with any others. The number and nature of the entries treating of this subject, however, are so numerous and varied that it is not easy, even after a regular use of the work for many months, to discover all the possibilities of helpfulness it presents. Nevertheless, one can clearly see certain gaps that ought to be filled in the next edition, and it may not be premature to point out some of them now.

But before doing so, I should like to express gratification at the large and increased measure of attention that has been given to education in this edition. In the very helpful classified list of articles placed in the Index (Volume XXIX), I find reference not only to the main article on "Education" by Prof. Welton, Mr. Coore, and President Butler (this covers 38 pages), but also to sixty-seven others, some of which are of an exhaustive character. Take, for example, those on "Academies" by Mr. F. Storr, "Classics" by Dr. J. E. Sandys, "Deaf and Dumb" by Rev. A. H. Payne, "Examinations" by Messrs. Hartog and Watson, "Schools" by Mr. A. F. Leach, and "Universities" by Mr. J. Bass Mullinger and Dr. Gilman. One expected that, in a work like this, the subjects just mentioned would be assigned to specialists and be treated with accuracy and ability, but it was a pleasant surprise to find most of them also dealt with in such a fascinating manner. In addition to the general articles on "Schools and Universities," we get a large number of others on individual institutions. Furthermore, the articles on "Countries" and "States" include an account of educational systems and institutions. Thus, in addition to the six columns devoted by Mr. Coore (in his interesting general contribution) to "The System of Education in France," three more are given to similar topics in the general account of that country, besides the references to schools and colleges under various headings.

The editors of the Index very fairly point out (Volume XXIX, 879) that the items included in the classified list for each subject must necessarily be, to some extent, arbitrary. One is not surprised, therefore, to discover articles of the greatest educational importance not included in that list. Take one example only: under "Art" we get contributions, full of interest to the pedagogue, on the following amongst other topics: "Art Teaching" by Mr. Walter Crane, "Design" by Prof. W. R. Lethaby, and "Drawing" by Mr. J. R. Fothergill. In order, however, to keep these notes within reasonable limits, I must content myself with what has been already said on the important place given to "Education" in the new "Encyclopædia." But I must add that many of the Bibliographies appended to the various articles are very valuable.

Nevertheless, I feel that education even yet does not get its full share of attention in this "Encyclopædia." It seems to me that the following at least ought to have received fuller treatment than has been given to them: (1) theory of education, (2) methods of teaching various subjects, (3) educational biography, and (4) vocational instruction. I purpose adding a few remarks on each of these points.

(1) Prof. Welton's contribution, entitled "Educational Theory," is mainly historical and not theoretical. We have, as a result, an able and fresh treatment of many important theories, and the significance of some of these is made clearer by the setting in which they are placed than would be possible by any other method. But I cannot see any reason why space should not have been afforded also for an article of another kind on the Principles of Education, as was done in an earlier edition. One can confidently hope to find this deficiency supplied in the next edition, whenever it may appear.

A critical account is also needed of certain popular doctrines, such as education according to Nature and the theory of "Recapitulation." Brief references are made to the former, and the bearings of the latter are treated with fullness in regard to several questions, but not to education. A concise article on the present position of the vexed problem of Mental Training ought certainly to have been included. The manner in which this topic is now examined inevitably suggests the place of Experiment in Education. The latter, so far as my search has gone, is entirely ignored in this work. The amount of space given to "Experimental Psychology" also seems quite inadequate.

(2) The articles on such subjects as "Arithmetic," "Algebra," and "Geography" are elaborate, but the pedagogical aspects are not deemed worthy of much attention. The writer (Dr. Shepard) on the first of these subjects gives proofs of his interest in its pedagogical and logical phases, and appends a carefully selected list of the best books on the methods of teaching it. But, unfortunately, he either did not wish, or was not asked, to discuss arithmetic from the teacher's standpoint. This, of course, is not to say that the article will not prove, from another point of view, of great value to all teachers. In the same way, a generous amount of space is devoted to Algebra (42 pages), and "Geometry" (61 pages), but no part of it is allotted to the methodology of those branches. This is also true of "Geography." Twenty-five lines are given to "Learning of Grammar of Foreign Languages"! Similarly, the article on "Classics" gives no account of certain important reforms that have of late years been introduced into the teaching of Latin and Greek, and in particular the re-employment of the conversational method is ignored. Little consideration is given to the pedagogic problems that arise with regard to "Modern Languages."

I anticipate that more than one reader will be strongly inclined to think that it is unreasonable to ask for a pedagogical treatment of these subjects in a work intended for general use. I might reply by pointing out that the majority of the subscribers are probably teachers or officers in educational institutions, but I shall only say (a) that certain other sciences are treated in an exhaustive way, and since education in its various aspects is at least of equal importance to some of these, and certainly of more general interest than most, it should have received a full share of attention; (b) I might quote the words of the Index-makers and affirm that "any encyclopædia worthy of the name must take all knowledge for its province"; (c) as a matter of fact, the pedagogic point of view is adopted here and there in the work, but it is difficult to determine on what grounds either its adoption or rejection is determined. The principles underlying the teaching of "Drawing" are treated in an article on that subject: why, then, should not the same treatment be applied to "Music"? The methods of teaching certain subjects to the deaf are discussed; why should the problems of instructing normal children be ignored? It must be a mistake to give sixty-one pages to "Geometry," and not to include at least a summary of the most generally accepted views now held on the best methods of teaching it. The ignoring of pedagogic problems is a loss and a mistake.

(3) Under "Education," the classified list includes 104 Biographies, and these do not exhaust the number of persons, important for one reason or another in the history of our subject, concerning whom information is given in the work. As examples, let three be mentioned—Sir Thomas Elyot, Francke, and Vives. It is difficult, however, to account for certain omissions. For instance, I cannot understand why Richard Busby should have a biography, but not Richard Mulcaster, or why Guarino da Verona should have an article assigned to him, but not David Stow, Samuel Wilderspin, Tuiskon Ziller, and other interesting figures. Strangely enough, however, some of the most important writers on education receive the least adequate notice. After making all allowances for the difficulty a contributor must experience in writing articles for such a work as this, that shall be at the same time reasonable in length and comprehensive in character, I still cannot see why Prof. Saintsbury, for example, in

dealing with Rabelais, Montaigne, and Rousseau, did not bring out more fully the significance of their educational views—especially those of Rousseau. The unsigned article on "Pestalozzi" is much too brief. Mr. Quick's article on "Froebel," and the bibliography that follows it, are more satisfactory; it is, however, practically a reprint of the one that appeared in the ninth edition. To Locke's views on education only half a column is devoted. But the educator most sadly neglected is Herbart. The article on him is written by Prof. James Ward, and every reader would have welcomed a statement and a criticism by him of Herbart's educational theories. We get a concise account of the latter's philosophical doctrines, and a bibliography in which special attention is paid to pedagogical books, but of educational theory—nothing. Other instances could be given to illustrate what seems a lack of appreciation of the very wide and increasing interest taken in the educational views of the great philosophical writers.

It is needless to say that Prof. Welton, in his article, discusses the place of many of the above in the development of educational opinion, but it did not fit into his scheme to include biographical or detailed matter as well. It is obvious that the "Encyclopædia" will have to revise and extend the section of educational biography.

(4) Sir Philip Magnus's article on "Technical Education" is comprehensive, fair, and, of course, well informed, but slightly infected, perhaps, by his views on mental and manual training. It did not, however, fall to his share to discuss in detail all the principles entering into vocational (commercial, industrial, technical) instruction. The writer deals with some of them in an adequate way, but others he has no room to include. The "Encyclopædia" in other places contains a very large amount of information on these and related matters, but it is found under scores of headings, and, unfortunately, the main index too often omits the sub-heading "Education." I take two instances of this latter point. The provision made for agricultural education is treated in many places, but most fully (a) in Vol. I, +13-4, and (b) Vol. I, +20-2; but (a) is not indexed under "Agriculture," except as "subsidies to agricultural education"; it is included under "Education"; (b) is not indexed under either of these heads. Brief accounts, too, are given in the main article, "Forestry," of the provision made for instruction in that subject in Germany, France, Great Britain, and the United States, but these are not indexed under "Education," "Forestry," or the countries named. One wishes, therefore, that not only somewhat more attention should be paid to these and other branches of vocational instruction, but also that the entries referring to them should regularly appear in the Index under the heading of the industry or vocation concerned, or under "Education."

It would have been an advantage if we had had a fuller account of the arrangements made for supplying such instruction in a few typical populous centres. In particular, I should have liked to have had more and better arranged details concerning the numerous steps taken within recent years in this direction by the London Education Committee.

Conclusion.—Although something might also be said of the claims of "School Architecture" and "School Hygiene" for more consideration, yet I prefer to conclude with a very cordial expression of appreciation of the great service the eleventh edition of this "Encyclopædia" has rendered to education, and with a repeated recommendation of its many able articles to the notice of those readers who have not so far studied them. Only, I ask for "more" in the twelfth edition!

THE Gilchrist Trustees have resolved to grant an Annual Studentship in Geography of the value of £100 for advanced work in geography. Applicants must have had experience as teachers in the subject, and make a declaration that they will continue to teach it for not less than two years after the expiry of the studentship. Applications must be sent to the Hon. Secretary, Geographical Association, 40 Broad Street, Oxford, not later than April 25.

CORRESPONDENCE.

LOCALS AS A TEST OF SCHOOLS.

To the Editor of The Journal of Education.

SIR,—Commenting on a letter which I wrote to the *Times*, you say that you would like to know whether I consider the number of passes and distinctions in the Cambridge Locals to be any test of the comparative merits of schools. Assuming that by "passes" you mean passes in individual subjects, I should say that the results of any general examination (whether Joint Board or Locals) is as good a test as any examination test can be of the merits of the teaching far better than scholarships, army successes, or the like. The latter depend almost entirely on the material secured and only to a small extent on the way in which the material is handled. Thus open scholarships can hardly be gained in any numbers without good entrance scholarships at one end and good leaving scholarships at the other. Army successes depend very largely on whether the school has a good connexion in the class which sends its sons into the Army. Such considerations only affect in a minor degree the results of general examinations, and so far these results are a better test. But, inasmuch as these considerations affect all results to a certain extent—the ordinary leaving age of a school, for instance, will naturally determine the number of Higher or Senior certificates that can be gained—I deprecate all attempts to compare schools by their "successes," and I regard the practice of advertising them as exceedingly mischievous. I advocate the practice of examining whole forms by some external body for a different reason—viz., that it enables the authorities and others who are interested in a school to see how far the standard of the work is maintained or improved from year to year.

You also wish to know the proportion of schools in which a whole form is sent in. I also should like to know, but meanwhile I may refer you to page 53 of the Report, where it is stated that the Committee was furnished by the Board of Education with a return covering the whole of the secondary schools aided by the Board. This, we are told, showed that there are "large numbers of schools" in which such examinations are taken by "forms as a whole." It may be noted that, on the same page, speaking of a closely connected subject, the Committee go on to say that the number of schools in which an excess of competing examinations is allowed is "fewer than we should have anticipated." This remark suggests to me that, if the Committee had been more catholic in the selection of its witnesses, the picture drawn in the Report would not have been quite so lurid as it is.—I am, &c., F. H. COLSON.

Cambridge, March 14, 1912.

A CORRECTION.

To the Editor of The Journal of Education.

SIR,—In a little paper of mine on "Schools and Universities," which was printed in your January number, there is a misstatement to which Mr. Gerrans has kindly drawn my attention. I said that the Oxford and Cambridge Local Examinations still do not confer any exemptions from Preliminary Examinations except at their titular Universities. The fact is that a Senior Local Certificate in the necessary subjects is now accepted at every University. I regret that my information was not up to date and that I have to ask you to insert this correction.—I am, Sir, yours faithfully,

Westminster, March, 1912.

JAMES GOW.

Dr. Gow's correction should have appeared in February; but, by some mishap or oversight, it failed to reach the printers.—ED.

CONGRESS OF THE UNIVERSITIES OF THE EMPIRE.

To the Editor of the Journal of Education.

DEAR SIR,—In a notice of the Congress of the Universities of Empire in your number for this month, there is a slight misstatement which might possibly lead to disappointment. The

Congress will not in any sense be open to the public, but those who wish to listen to its discussions and to enjoy various privileges in connexion with it may submit their names to the Executive Committee, with a view to their admission as associate members. As you rightly state, a fee of 10s. 6d. will be charged to those who are admitted to associate membership.—Yours faithfully,

University of London.

ALEX HILL.

March 11, 1912.

A MID-TERM HOLIDAY.

To the Editor of The Journal of Education.

SIR,—In the "Occasional Notes" of the March number of *The Journal of Education* you mention the suggestion of a holiday in elementary schools for a few days or a week about the end of October. It may not be known to you that such a holiday has been given in Liverpool schools for some years past. Originally tried as an experiment, it was such a success from the point of view of the health of both teachers and children, that it has ever since been continued and has become an established custom. Among the children it is known by the pretty name of the "teachers' rest week."—Yours faithfully,

LOUISA BROWN (Manager of Elementary Schools).

St. Michael's Hamlet, Liverpool.

March 9, 1912.

PLAYS FOR SPEECH DAYS.

To the Editor of The Journal of Education.

DEAR SIR,—I shall be glad if I may use your columns in order to solicit suggestions for English plays suitable for performance on speech days. We have tried lately, and I think successfully, adaptations of "A Christmas Carol" and "A Midsummer Night's Dream," and whatever experience I have gained in their production is freely at the service of any one desiring it. At the same time, I shall be most grateful to any head master who can help me by sending a post card containing the names of any plays which he has found suitable for such entertainments.—Yours truly,

Dr. Morgan's School, Bridgewater.

W. E. CATLOW.

COLONIAL AND FOREIGN NOTES.

GERMANY.

THE text of a new School Bill for the Kingdom of Saxony—to supersede the School Law of 1873—has been published. The Bill will be amended in its passage through the Landtag, the first draft suffices for our purpose, which is to exhibit modern tendencies in education. We observe at the outset that regard is had to variety of local conditions. The Bill supplies, as it were, a framework, within which some measure of freedom is allowed. Thus it is left to the local community to decide whether it will establish a general *Volksschule*, or several kinds: a simple, a middle, and a higher. In religious matters the sectarian (*konfessionell*) character of the school is maintained. The Bill lays down that, in districts where the inhabitants are of different confessions and sectarian schools for the minority exist, the children must attend the schools of their own confession. If there is no separate school of the minority, they must go to the local public school. From the religious instruction in such a school they are exempt, but provision must be made, so as to satisfy the authorities of their Church, for instructing them according to the doctrines of their own confession. "Die gesammte Erziehung des Kindes soll auf fester, sittlich religiöser Grundlage ruhen"—the whole education of the child must rest on a firm moral and religious basis.

Private tuition as a substitute for the teaching of the *Volksschule* may be given only by men or women teachers who have passed examinations prescribed by the State. *Private schools may employ none but such teachers.* The maximum number of pupils in a class is reduced, in the case of simple *Volksschulen*, from sixty to fifty, in the simple *Volksschulen* which tax the teacher most—that is in those with only two teachers and four classes—never more than eighty children may be assigned to one teacher, so that no teacher will have to instruct more than forty at once. These reductions in the size of the classes impose heavy financial burdens on the local communities, and some grace of time is allowed in the enforcement of them.

The supervision of religious instruction belongs to the Church.

With Supervision.

It will be exercised in general by the local clergyman (*Ortspfarrer*); where there are several such clergymen, the higher Ecclesiastical Authority will determine the supervisor. The supervising clergyman is entitled to be present at the religious instruction; but during it he may make no comments, and if he has objections to raise, he must raise them not directly to the teacher, but through the district school inspector. As to general supervision, a noteworthy change is introduced. Formerly, in small schools to which no regular head master was appointed, the clergyman had the right to supervise. This right is now abolished, and the principle of *fachmännische Schulaufsicht* (supervision of schools by those whose business is education) is recognized. The internal management of schools with a head master lies with him; of schools without a head master, with the district school inspector.

But the most striking innovations made by the Bill relate to Continuation (*Fortbildung*), a term to which

With Continuation.

Attendance at continuation classes is now made obligatory for girls, as well as for boys. Exemption from the obligation to attend will be restricted as much as possible. The instruction is to be of such a nature as to chain the interest of older pupils, and it must be brought into relation with their daily activities. In the foreground are put, for boys, vocational knowledge and civics; for girls, domestic economy. For both sexes higher teaching in German, and arithmetic is to be provided; the girls must have also special instruction in the subjects most useful to them as wives, mothers, or independent bread-winners. In all schools, if the local communities can make the necessary arrangements, physical exercises and games are to be carried on. In addition to subjects obligatory everywhere, the introduction of a number of others according to local choice is contemplated. This adaptability to local wants is, indeed, one of the most noteworthy features of the Bill. It is even left to the local communities to decide whether they will exact school fees or not.

Enough of the Saxon Bill. The German Universities are laying increased stress on pedagogy. At Jena Prof. Rein lately announced to the University Pedagogic Seminar that, for the future, pedagogy might be taken as an independent principal subject (*Hauptfach*) in examinations for the doctor's degree. Hitherto pedagogy and philosophy have formed one subject. This winter Tübingen founded a Pedagogic Institute, which is under the control of Dr. G. Deuchler, a pupil of Wundt. The establishment of the Institute is connected with the admission of the primary teachers of Württemberg to study at the University. It is reported that the courses are already well attended. In the summer half-year three laboratories for experimental pedagogy will be organized. Tübingen may yet rival Jena in illuminating the teacher. As to the Universities in general, Leipzig alone has an "ordinary" (*ordentlich*) professor of pedagogy; Berlin, Jena, München, and Tübingen have only "extraordinary" professors; whilst elsewhere *Privatdozenten* or the professors of philosophy lecture on the subject.

The practical teacher is often confronted with the problem—what is to be done with a left-handed child? At Berlin in the *Gemeindeschulen* there are 9,265 left-handed children. German science observed that in 62 per cent. of the cases the peculiarity was inherited. Dr. Schäfer, a School Medical Officer, maintains that the natural tendency should be respected, and that left-handed children should write, draw, and do manual work with the left hand. At present, owing to constraint, the amount of left-handedness decreases as the higher classes are reached. For some reason the proportion of the left-handed is greater among boys than among girls.

FRANCE.

Moral Congresses beget Moral Societies, and Moral Societies have their fruits, as we hope, in Moral Action, or right-doing. With March was born at the Sorbonne a new league, the French League to promote moral education. The moral value of the man should be, it is now agreed, a main concern of the school, and not only of the school but also of all parties and factions to whom the native land is dear. The little company that met at the Sorbonne, under the presidency of Pastor Ch. Wagner, has made it its task to co-ordinate in France the various agencies which seek to further the moral welfare of the young. The League will enjoy the patronage of M. Raymond Poincaré, who, before becoming President of the Council of Ministers, had joined actively with Pastor Wagner and M. Ferdinand Buisson in planning the association.

Une Ligue pour l'éducation morale.

Morality is incumbent on parents as well as on children. One

Isolation after Sickness.

of the most immoral acts that a parent can commit is to send to school a child who is in a state to communicate sickness to other children. The *Bulletin administratif*, No. 2,015, publishes a decree relating to the periods of isolation for children in public schools who have been suffering from some contagious disease. We give, these being the newest rules, the times of exclusion, for the common disorders. *Diphtheria*: thirty days from the time of clinical cure as established by medical certificate. *Varicella*: forty days from the beginning of the illness; but readmission to school is to be granted only on the production of a medical certificate that there are neither scabs nor scales left, and that the pupil has had a bath. *Scarlatina*: the same precautions. *Measles*: sixteen days. *Mumps*: twenty-one days. *Whooping-cough*: thirty days after the complete cessation (established by medical certificate) of the convulsive fits of coughing. *Varicella*: sixteen days from the beginning of the illness. *Typhoid and Paratyphoid Fever*: twenty-eight days from the cure as established by medical certificate. *Dysentery*: the same. *Cerebro-spinal meningitis*: forty days from the time of clinical cure as established by medical certificate; but readmission is to be dependent on an attestation that the child is free from chronic coryza following on the illness. In all cases if the sick child has not been isolated at home, his brothers and sisters return to school, if they have a clean bill of health, at the same time as himself. If he has been isolated, they return after exclusion for the period of incubation of the disease plus two days: in *diphtheria*, fifteen days from the isolation; *varicella*, eighteen days; *scarlatina*, eight days; *measles*, eighteen days; *mumps*, twenty-four days; *whooping-cough*, twenty-one days; *varicella*, eighteen days.

When pedagogues go hence, the space allotted to them on the roll of fame is no measure of what their real importance has been. Late in February there

Of two Dead Pedagogues.

died at Versailles M. Théodore Lévi-Alvarès, in his ninety-first year. He was the son of David Lévi-Alvarès, who established in 1820 the "Cours d'éducation maternelle"—courses, preparatory, elementary, secondary, and higher, for girls—which he carried on down to 1868. His work was continued by his son until 1890. The "Cours Lévi," and the books issued in connexion with them, had for seventy years much influence both in France and abroad. It was David Lévi-Alvarès who, in the twenties of the last century, corrected for us and his countrymen common mistakes in French (such as the use of *coléreux* for *colère*) by means of "Les omnibus du Langage." Théodore had such vigour of mind, so keen an interest in education, that at the age of eighty-seven he began to publish volumes in which his father's memory was to be preserved and the principles of the "Cours Lévi" put on record. Two volumes appeared, the first with a preface by M. Compayré, the second introduced by M. Gabriel Monod; death cut short the preparation of a third. But the best work of the two pedagogues was done by oral teaching, not through books. It has not perished. M. Duruy, when he was dealing with public secondary education for women, studied the methods of the "Cours Lévi," and the girls' *lycée* of to-day bears still an impression got from that old private enterprise.

DENMARK.

In the Spartan days the head master of a public school, being informed that an old pupil of his was a great opponent of corporal punishment, observed thoughtfully: "Yes—yes; he would be. He took nothing away from us but weals." It would seem as if the Danish teachers had sent forth too many pupils of this sort. At any rate, they have had to repel a hot attack made upon them—it was the Socialist Deputy Sabroe that led it—for their use of corporal punishment. They replied with dignity that it was a duty to maintain discipline with such means as were placed at their command, and that they must employ this form of punishment until society should provide them with a better. The Minister of Public Instruction also defended them, and upheld their weapon. The necessity of corporal punishment is always to be deplored; its use is condemned most loudly by those who have suffered it most frequently. Yet the weals should be as few as possible. Moreover, a first recourse to the discipline of pain should be cautious and tender: "how ill we use the twig," says Jean Paul, "which must afterwards be thickened to a stick."

UNITED STATES.

We relate with pleasure that, in accordance with a resolution of the English Round Table of the National Education Association, a National Council of Teachers of English has been formed; and we have already received No. 1, Vol. I, of its organ, *The English Journal*, which is

English.

devoted to the discussion of English work in schools. The *Journal* (published by the University of Chicago Press) contains some interesting statements as to the usage that English receives in the United States. In the small high schools it is a common practice of the Superintendents to engage specialists to teach languages, the sciences, and mathematics, but to distribute the English classes among such teachers as have one or two hours to spare. Statistics collected from 112 high schools show: in Latin, one teacher for every 83 pupils; in history, one for 107; and in English, one for 136. The teachers of English have often had no special training, they have little "class-consciousness," and they do not co-operate in arranging the work of the school.

The Seventy-fifth Annual Report of the Massachusetts Board of

Vocational Schools in Massachusetts.

Education contains an interesting section on vocational schools. "The State-aided vocational schools of Massachusetts are designed to fit persons above fourteen years of age for useful work in the shop, in the home, or on the farm, but not for service in business or in the professions. Such schools are supported jointly by the communities in which they are located, and the State, the former building and equipping the schools, and the State refunding one-half the cost of the work." It is estimated that for the year 1911-12 there will be a total registration of more than 7,000 pupils in not less than forty State-aided vocational schools. There are at present approved schools in thirteen cities and towns in the State. Investigations as to the need and the kind of vocational schools which should be established are being made in many places. The Report advises a widespread introduction of vocational training—at first in an unambitious form. One of the best plans, it is found, is to begin with small evening classes held in regular school buildings. Massachusetts has made relatively more progress with all-day and evening than with part-time classes, though even now a few excellent schemes of co-operation between school and shop are being carried on for the further training of the young wage-earner.

The connexion between vocational instruction and the problems

Child Labour.

of child labour has not escaped notice in the United States. It formed the principal subject of discussion at a recent conference held at Louisville. The exploitation of children in the Southern States is an evil that many righteous Americans are striving to remedy. At some the Bishop of Oxford's proposal is worthy of very great attention. He would have the State fix the number of hours that a child may work, and a certain number of them spent in the continuation school. In the United States nearly all the Legislatures of the country, as the New England *Journal of Education* reports, will have the same Child Labour Bill presented to them at their next session. The bill was drafted at the National Conference of Commissioners on Uniform State Laws in Boston last autumn. The first section of the proposed uniform law forbids the employment of children under twelve years at certain trades, as is already done in eighteen States and in the District of Columbia. Section 2 provides that it shall be unlawful for any person, firm, or corporation to employ, permit or suffer to work any child under fourteen years of age in any business or service whatever during any of the hours when the public schools of the district in which the child resides are in session. Sections 3, 4, and 5 forbid the employment of children under sixteen years of age in certain occupations—notably in or about machinery, saws, planers, printing presses, steam boilers, or upon any boat or vessel in navigation or commerce; also in factories where poisonous acids are used, paint shops, mines, tobacco shops, or in other occupations as determined by the State Board of Health.

We are occasionally asked—who are now the best writers on

Educators as Writers.

education in the United States? The question is somewhat embarrassing. If you want high philosophy and finished workmanship, go to President Butler of Columbia. If your quest is for thoughtful studies of education in its administrative aspect, try Dr. Snedden, Commissioner of Education for Massachusetts. If you like scholarship and virile English, combined with journalistic dash, Prof. Shorey of Chicago is your man. "And President Stanley Hall?" you ask. We are mute. If you would have Prof. Shorey's views on President Hall, you can get them, and much amusement, in the February number of the *School Review*; he leaves—perhaps unintentionally—an impression that the President's only business with education is to get some. We may take a hint from one sentence of the article. Of President Hall's book, "Educational Problems," Prof. Shorey writes: "penetrating and suffusing all is the steaming miasma of his morbid preoccupation with sex."

CAPE OF GOOD HOPE.

The *Education Gazette* (xi, 18) contains an interesting account of the provision made for practical education in the Province. We give the paragraph relating to Trade Schools: "Provision for Government-

Trade Schools.

aided trade schools for European pupils was made in 1893, when a regulation was passed by Parliament enabling the Department to make grants to institutions founded for the training of indigent and neglected white children, just as in the past support had been given to native industrial institutions. As a result of this legislation Trade Schools for boys have been established at Uitenhage, Stellenbosch, Cape Town, Adelaide, and Worcester; and some idea of the work carried out will be gained from the fact that 272 apprentices are being trained in one or other of the following trades: Blacksmith-work, bookbinding, carpentry, farming, gardening, masonry, printing, shoemaking, tailoring, and waggon-making. In the case of white girls three industrial schools have been provided—viz., Grahamstown, Graaff-Reinet, and Wellington. In these institutions house-work, dressmaking, and laundry-work are taught, the number of girls under training being 124. There is also a spinning and weaving school at Port Elizabeth with 35 students, but so far this work has not obtained a sure footing in the Province."

SAFE NOVELS.

John Temple. By RALPH DURAND. (6s. Macmillan.)

It is an agreeable surprise to find a historical novel that covers entirely new ground. We must confess that we had never heard the name of Francisco Baretta, yet the author can justly claim that he was an adventurer worthy to rank with Cortes and Pizarro. Sent in 1569 on an expedition to the land of Monomatapa, now Mashonaland, to take possession in the King of Portugal's name of the gold mines of Masapa, believed to be the land of Ophir, he perished in the quixotic quest. In the novel he is a minor, though heroic, character. John Temple is a purely imaginary character, but the mutiny on board the vessel, which is despatched from Goa to relieve the expedition and the march across country of the shipwrecked crew, in which he plays the leading part, follows closely the Portuguese archives; and of perils by sea and land, galley slaves, cannibals, and scheming Jesuits there is enough to satisfy the greediest appetite. The map at the end is a fraud.

A Newnham Friendship. By ALICE STONACH. New Edition. (3s. Blackie.)

We are glad to see that this story of life in a woman's college has reached a new edition. In spite of the title it is not a *roman à chef*, and we would give it to an intending college student as the most faithful presentment we know of the social life at Newnham or Girton, Somerville or Lady Margaret's.

Prisoners' Years. By I. CLARKE. (6s. Methuen.)

A well contrived and well written story which turns on the conversion of the hero to Catholicism, the consequent breaking off of his engagement, and the final reconciliation brought about by the conversion of the heroine. But it is not, as might be inferred from this skeleton of the plot, a propagandist novel, and there is no fear that it will lead any youthful reader to 'vert. The weak point about it is that the heartlessness of the heroine at the beginning, who quarrels with her fiancé for befriending a dying monk, forfeits our sympathy, and we are not made to feel that her change of religion changes her cold-blooded nature.

Twinkle. By ARTHUR H. HOLMES. (6s. Duckworth.)

We should judge from internal evidence that this is a first novel by a novice. It is crude and ambitious, though not without promise. "Twinkle" is a compound of Peisistratus Caxton and Mr. Brooke of Tipton. He discovers for himself a new philosophy or religion which is as old as the hills, "to be oneself," as he phrases it, distinguished from pure egotism in so far as he is willing that his children should follow the same rule of life and be themselves. The plot, if it can be called a plot, turns on the self-sacrifice of the wife, a new Alcestis with the sexual element emphasized, as the up-to-date novel demands. The style, too, shows the affectation of youth and needs pruning. "He made horrid noises when eating his soup, just as if he had been afraid of being a grace before his meat, to quote, for the nonce, one of those authors whose books taught how tough a thing every kind of goodness could be."

The Chink in the Armour. By Mrs. BELLOC LOWNDES.
(6s. Methuen.)

"The vast majority of intelligent, cultivated English and American visitors to Paris remain quite unaware that there is within half an hour of the French capital such a spot as Lacville." The reviewer is one of the majority, and he is not encouraged by Mrs. Lowndes's novel to ask at the Gard du Nord for an *aller et retour* by one of the 120 trains that daily convey Parisians to this paradise of delight with its lake and its forest and its casino. The casino is the centre of the plot, and of the two leading characters, an English and a Polish widow, one is murdered and the other drugged, escaping by the skin of her teeth. The *dénouement* has been foreshadowed by Mme Cagliostro, a Paris fortune-teller, whom the two friends consult before they walk into the net. Mrs. Lowndes knows France as well as she knows England, if not better, and her Frenchmen, especially the hotel-keepers, are true to the life. The Macbeth couple are cosmopolitans and smack rather of transpontine melodrama.

Fire in Stubble. By Baroness ORCZY. (6s. Methuen.)

A historical novel of the times of Charles II, in which Titus Oates and My Lord Rochester, Mme de Montespan and the Archbishop of Paris figure, but the story is pure fiction and we could not honestly recommend the novel as an aid to historical study. The plot is cleverly contrived and the interest never flags. The Earl of Stowmaries has been calf-wedded to Rose Marie, only daughter of M. Legros, tailor in chief to his Majesty Louis XIV. The match had been contracted twenty years before the story opens by the Earl's dissolute parents to raise the wind. Come to man's estate and his title, the Earl falls in love with an English Delilah, and tries to get the child marriage annulled, but the tailor is one too many for him, and by a bribe of 200,000 francs procures from the Archbishop a confirmation of the marriage by the Pope. The Earl's counter-move is by a bribe of £120,000 (money flows like water) to induce his cousin, a dare-devil desperado (who turns out the hero of the novel), to impersonate him and go through the marriage ceremony at Paris. The plot is further complicated by the fact that the cousin is a rival claimant to the title. He first hoists the Earl with his own petard, the shameful bribe that he has accepted, and then redeems his fame by taking his cousin's place in the dock when the Earl is arraigned on a charge of high treason.

We will not betray the *dénouement*. Rose Marie is a winsome maiden, and her alternatives of love and hate, Catholic loyalty to the unknown husband, whole-hearted surrender to the gallant impostor, and the revulsion of feeling that follows the discovery, are portrayed with rare skill. We hope that "Fire in Stubble" may have the same sequel as "The Scarlet Pimpernel."

Hieronymus Rides. By ANNA COLEMAN LADD.
(6s. Macmillan.)

Given a man with a dual personality, knight and Court Fool by turns, with a purse of Fortunatus and the nine lives of a cat; given also a ubiquitous chaplain who has seen this man's goings out and comings in and knows all the secrets of his heart—if we are prepared to accept these somewhat extravagant conventions of the romancer we shall relish a thrilling narrative of episodes in the last half of the fifteenth century. Hieronymus is the illegitimate son of the Emperor Frederick the Fourth by a gipsy mother, and is brought up by his putative grandfather, a Bohemian alchemist, whose only daughter the Emperor had seduced. The wizard dies or poisons himself as his house is being searched by the mob, and bequeaths his Nibelung horde to his grandson on trust. This is the Fortunatus purse. It is needless to give a catalogue of his subsequent adventures. Enough to say that wherever fighting is going on—in Cyprus against the Turks, in Spain against the Moors—he is in the thick of it. In the intervals of fighting he is by turns a University student, an anchorite, a royal envoy, and a Court jester. Love, too, plays a large part in his life, but it is always a platonic love. He marries a gipsy girl whom he has rescued from slavery, but she dies as the priest is blessing them. He loves Marie of Burgundy and endures the rack to save her honour. He loves a Tuscan lady married to a Milanese nobleman, but it is the love of Dante for Beatrice. The end is finely conceived. For a day the Emperor Maximilian makes over to his Court jester the crown of empire, not in jest but in solemn earnest. For one day Hieronymus is a king and every inch a king, hearing the cause of widows and orphans, delivering innocent prisoners, and rebuking evil councillors, and he ends one day of glorious life by inviting the assassin's dagger intended for his brother, the Emperor. It is a splendid romance, and the vividness of the description makes one forget or pardon the wild improbabilities and the supermanity of the hero.

HORLICK'S MALTED MILK.

THE IDEAL FOOD DRINK FOR ALL AGES.

The wholesome nutrition of pure, rich milk and choice malted grain, supplying strength and vigour, with little tax on digestion. Delicious, nourishing, and refreshing.

PREPARED IN A MOMENT WITH WATER. NO COOKING.

Used instead of tea, coffee, or cocoa at meals, develops healthy bodies and clear brains. Equally useful to the vigorous and the weak, the business or professional man, the youth, the maid, the mother, the child, or the infant.

**An efficient corrective of insomnia,
taken hot before retiring.**

In Glass Bottles, 1/6, 2/6, 11/-, at all Chemists and Stores.

BLACKIE & SON'S LIST

Just Issued.

THE GROUNDWORK OF BRITISH HISTORY.

BY

GEORGE TOWNSEND WARNER, M.A.,

Sometime Fellow of Jesus College, Cambridge; Master of the Modern Side in Harrow School; Author of "A Brief Survey of British History," &c.

AND

C. H. K. MARTEN, M.A.,

Balliol College, Oxford; Assistant Master at Eton College.

With Maps, Time Charts, and full Index.

764 pp., super-crown 8vo, 6s. Also In Two Parts, 3s. 6d. each.

An English History for Middle and Upper Forms, adapted to the methods of modern teaching of the subject, has long been called for. Mr. Townsend Warner's "Brief Survey of British History" has been found well suited to the needs of Lower Forms, and it is hoped that the present work will prove equally serviceable for Middle and Upper Forms.

The subject is treated with the breadth that is now required of senior candidates for University Local and similar examinations, and in full consonance with the views repeatedly put forward in the circulars of the Historical Association; though, be it said, the work has in no way been suggested by these circulars, but is the outcome of the experience of its joint authors, Mr. Warner of Harrow and Mr. Marten of Eton.

THE WARWICK SHAKESPEARE.

Edited by **Prof. Herford, Litt.D.** The best and most widely used edition of Shakespeare for School purposes.

Price **1s.** and **1s. 6d.**

This Series is in use in the following leading Schools, among very many others:—

Eton College.	The Charterhouse.	Wellington College.
Harrow School.	Newnham College.	Liverpool College.
St. Paul's School.	Girton College.	Dulwich College.
Rugby School.	Marlborough College.	Stonyhurst College.
King's College.	Rossall School.	Haileybury College.
Clifton College.	Malvern College.	Reading School.
Merchant Taylors.	Winchester College.	Repton School.
City of London School.	Shrewsbury School.	Bradford Grammar School.

BLACKIE'S ENGLISH TEXTS.

6d. each. Blue limp cloth covers. Over 100 volumes. To be used in correlation with the study of **English Literature** and **History**.

Among the leading Authors are:—

Malory.	Gibbon.	Drake.	Thucydides.	Dickens.
Froissart.	Macaulay.	Raleigh.	Plutarch.	Charles Lamb.
Bacon.	Carlyle.	Anson.	Livy.	Kingsley.
Burke.	Prescott.	Hawkins.	Macrobinus.	Swift.
Ruskin.	Josephus.	Cook.	Lucian.	Borrow.

A NEW ENGLISH COURSE ON MODERN LINES.

A FIRST ENGLISH COURSE.

By **FRANK JONES, B.A.**, Assistant Master, King Edward's School, Aston, Birmingham; Lecturer in English at the Birmingham and Midland Institute; Joint Author of Scott and Jones's "Latin Course."

MADAME BERGMAN ÖSTERBERG'S PHYSICAL TRAINING COLLEGE, DARTFORD HEATH, KENT, FOR RESIDENT STUDENTS.

The College, the first of its kind in England, was opened in 1885, with the view of training educated women as Teachers of Scientific Physical Education.

The Course of Training conducted by a large and competent staff of teachers, extends over two years. It includes the study of Anatomy, Physiology, Hygiene, Anthropometry, and Theory of Movement. In practical subjects instruction is obtained in Ling's Swedish Gymnastics, Dancing, Outdoor Games, and Medical Gymnastics and Massage. At the end of the Course, examinations are held and certificates of theoretical knowledge and practical efficiency in teaching are awarded to successful students.

The College, which provides 50 separate bed-sitting rooms, and several large studios, is situated on very high ground, half an hour from town. It stands in its own fine grounds of fourteen acres, which contain an Outdoor Gymnasium, Running Track, Cricket and Hockey Grounds, Lawn Tennis Courts. The Indoor Gymnasium, 70 ft. by 35 ft., and the Medical Gymnastic Room, 50 ft. by 25 ft., lofty and well ventilated, are fitted up in the most perfect style, all the apparatus having been designed and executed in Stockholm.

The immediate neighbourhood offers over one thousand children for the students' practice as teachers.

Hundreds of posts have been obtained through this College, a list of which is to be obtained with the Prospectus.

Students admitted in September.

For particulars apply—THE SECRETARY.

MADAME BERGMAN ÖSTERBERG'S UNION OF TRAINED GYMNASTIC TEACHERS.

Ling's Swedish System.

Aim of the Union: To advance the cause of Physical Education on scientific lines.

In placing members of this Union as Teachers in Schools, careful and discriminating choice is exercised, and the exact requirements of each School specially considered.—PHYSICAL TRAINING COLLEGE, DARTFORD HEATH, KENT.

RESIDENCE for Students, Teachers, and other ladies. Full or partial board, single and double rooms. References exchanged.—Miss H. VICTOR BROWN, 9 Burton Street, Tavistock Square, London, W.C.

SCHOOLS FOR SALE AND PARTNERSHIPS.

Messrs. TRUMAN & KNIGHTLEY, Ltd., Educational Agents, 158-162 OXFORD STREET, LONDON, W.

MESSRS. TRUMAN & KNIGHTLEY always have on their books a large number of thoroughly genuine Schools for Sale and Partnerships to negotiate, as well as the names and requirements of numerous would-be purchasers, and therefore can offer unusual facilities for satisfactorily negotiating the TRANSFER of SCHOOLS and arranging PARTNERSHIPS. All communications and inquiries are treated in the strictest confidence. The following are a few selected from their list:—

GIRLS' SCHOOLS.

STAFFORDSHIRE.—Good-class **BOARDING AND DAY SCHOOL for GIRLS**, with Kindergarten: 14 boarders and 36 day pupils. Premises consist of two large houses connected by a covered way and standing in delightful grounds. Receipts over £1,500, profit £400. Principal must retire owing to ill-health and would accept the small sum of £200 for goodwill.—T 2,000.

SURREY.—The Principal of a nice-class **BOARDING AND DAY SCHOOL for GIRLS** desires to meet with a lady who would join her in partnership with a view to opening new premises to which the boarders would be removed, so that the boarders' and day pupils' connexions can be carried on in separate premises. Excellent premises with extensive grounds are available. Gross receipts amount to about £1,000. Of this £300 has been estimated profit. The incoming partner would take charge of the boarders' connexion. School has splendid prospects.—T 1,194.

LONDON.—The Principal of a nice-class **KINDERGARTEN and JUNIOR SCHOOL** for Boys and Girls, in a fashionable West-end district, desires to dispose of her connexion. There are 38 pupils. Receipts £656, profit about £90. Capitation fee accepted for goodwill. This is a particularly good opening for a lady who is a trained Kindergarten teacher.—T 1,193.

DERBYSHIRE.—Middle-class **DAY SCHOOL**, 54 pupils. Receipts £110; small expenses which leave a considerable profit. Goodwill £110.—T 1,191.

LONDON.—House of **RESIDENCE FOR STUDENTS** near Kensington, with 13 students now in residence, whose average receipts amount

to £26 per week. Students are all over 20 years of age, and are girls of good families.—T 1,188.

ESSEX.—Good-class **BOARDING AND DAY SCHOOL for GIRLS**: 74 pupils, of whom 8 are boarders. Receipts £1,321, profit £302. Delightful premises built regardless of expense. Grounds of nearly an acre, with good tennis and croquet lawns. The school can be bought at a bargain as only £300 is asked for goodwill, or one term's capitation fees.—T 1,186.

SURREY.—Very flourishing **GIRLS' HIGH SCHOOL**, with Kindergarten: old-established, 85 pupils, 16 of whom are boarders. Receipts £1,200, net profit £400. Splendid schoolroom accommodation for 120 pupils. Good residential neighbourhood, with plenty of scope for increasing present number of pupils.—T 1,189.

HOME COUNTIES.—Large, old-established, and very successful **BOARDING AND DAY SCHOOL**. Principal retiring. 50 boarders, 100 day pupils. Gross receipts over £3,000. Profit £500. Fine premises with field for games. Capitation fee accepted on all pupils transferred. Personally inspected and strongly recommended.—T 1,158.

LONDON, N.—Old-established **BOARDING AND DAY SCHOOL**, with Kindergarten. Principal retiring from the teaching profession. 5 boarders, 60 day pupils. Gross receipts over £1,000. Entire goodwill only £400.—T 1,157.

KENT.—First-class **BOARDING SCHOOL** for the Daughters of Gentlemen, at a favourite seaside resort: 36 boarders; fine premises. Receipts over £4,000; capitation fee accepted on pupils transferred. Partnership would be considered for twelve months in order to give thorough introduction.—T 1,148.

NO CHARGE TO PURCHASERS.

Full particulars of the above and others may be obtained on application. Intending purchasers are invited to write stating their requirements. Address—158 to 162 OXFORD STREET, LONDON, W.

SCOTLAND.—The Principal of a high-class **BOARDING SCHOOL** would receive an experienced and well-qualified lady into **PARTNERSHIP** with a view to succession. The school yields a net profit of about £700 per annum. If desired, the Principal would remain a sleeping partner, leaving entire charge and control of the school in the hands of the incoming partner.—T 1,132.

LANCASHIRE COAST.—Good-class **BOARDING AND DAY SCHOOL**, old-established: 25 boarders, fees £50 per annum; 30 day pupils, fees £15 per annum, exclusive of extras. Specially built premises. Receipts £2,300, net profit over £600. Genuine opening.—T 1,130.

LONDON, N.—Large and flourishing **PRIVATE DAY SCHOOL**, with Kindergarten: 165 pupils. Fees 4s to 12 guineas per annum, exclusive of extras. Specially built school premises, including large assembly hall and gymnasium. Receipts £1,166, profit £330. Entire goodwill, £700.—T 1,168.

SUSSEX.—**PARTNERSHIP** is offered in a nice-class Girls' School at a seaside watering place. There are 16 boarders and 8 day pupils. The school has a good French and German connexion. Receipts £952; profit £250. Half share of goodwill £250.—T 1,180.

NORTHUMBERLAND.—**PARTNERSHIP** offered in a good-class and flourishing School, now conducted by two ladies. A partner would be received with a view to succession. Receipts £1,268; profit £415. The opening would be suitable to a lady able to introduce a few boarders.—T 1,179.

AN ANTHOLOGY OF MODERN ENGLISH PROSE, 1741-1892.

By ANNIE BARNETT

and LUCY DALE, late Scholar of Somerville College, Oxford.

Crown 8vo, 4s. 6d.

A book for use in Secondary Schools, Training Colleges, and Pupil Teachers' Centres. This book has been prepared to meet the Board of Education's requirements in the teaching of English Literature. It contains prose selections from the times of Samuel Richardson and Henry Fielding down to Robert Louis Stevenson—that is to say, from the latter part of the seventeenth century to the close of the nineteenth.

The Editors in this compilation have endeavoured to include most of the writers of great mark, and to choose from their works passages of substantial length that are characteristic and complete, some being preferred for their beauty or impressiveness of diction, and others for their interest as distinctive of the writer's style and method. Notes have been added only where a word of explanation seemed absolutely necessary to make the meaning clear.

MESSRS. METHUEN'S NEW BOOKS

QUALITATIVE ORGANIC ANALYSIS.

By F. B. T. THOLE, B.Sc., F.C.S., Lecturer in Organic Chemistry, East Ham Technical College. With an Introduction by A. E. DUNSTAN, D.Sc., F.C.S., Head of Chemical Department, East Ham Technical College. With Diagrams and Illustrations. Crown 8vo, 1s. 6d.

This book is reprinted, with additions, from the author's "Practical Chemistry for Technical Institutes" in such a form as to be self-contained. It deals with Organic Qualitative Analysis, both of simple compounds and mixtures. A large range of organic derivatives is dealt with, and the author confidently believes that the scheme will carry a student through the Organic Section of his Honours Degree Course.

A complete list of melting and boiling points is given, the substances being classified into their groups. Throughout, conciseness and compactness have been aimed at, so that the student will have the information needed always at hand in an accessible form.

AN INTRODUCTION TO QUANTITATIVE ANALYSIS.

By S. J. M. AULD, D.Sc. (Lond.), Ph.D. (Würzburg), F.I.C., F.C.S., Head of the Chemical Department, South-Eastern Agricultural College, Wye. With many Diagrams. Crown 8vo, 5s.

This book is a carefully selected study of the elements of Quantitative Analysis, providing a thorough introductory course whereby the student is prepared for his more specialized analytical work, details and considerations of which are best obtained from the standard treatises and monographs.

Duplication is largely avoided by giving alternative methods for subsequent estimations of the same type. The book is brought quite up to date by the inclusion of well-attested modern methods. Special features are a theoretical chapter on indicators, and a description of exact laboratory methods for the determination of equivalents, &c.

The text-book contains all the inorganic quantitative work required for the Board of Education Examinations and the later and final B.Sc. Courses.

PHYSICO-CHEMICAL CALCULATIONS.

By JOSEPH KNOX, D.Sc., Lecturer on Inorganic Chemistry, Aberdeen University. Cr. 8vo, 2s. 6d. [*Text-books of Science.*]

This book is intended for students of physical chemistry, as a supplement to the theoretical matter of lectures and text-books. Here the theory is applied to the solution of practical problems. The book contains eleven chapters, dealing with the main subdivisions of physical chemistry. Each chapter consists of a short introduction dealing with the theory required for the solution of the problems, a series of typical problems with complete solutions, and a list of problems for solution with answers. Practically all the problems have been taken from the original literature of the subject, and by a careful study of the solved problems the student should learn much. The large collection of problems for solution should prove useful to teachers.

A FIRST YEAR PHYSICAL CHEMISTRY.

By T. P. HILDITCH, D.Sc. Lond., F.I.C. Crown 8vo, 2s. [*Text-books of Science.*]

An attempt to render this branch of Chemistry more easy to those commencing its study. The more elementary outlines of the subject are treated, as far as possible, from the standpoint of practical use in solving chemical problems; accordingly, the first part of the book is devoted to characteristic properties, such as density or refractivity. Later chapters include introductions to the physico-chemical theories of gases and of solutions, and the more important applications of these theories to pure chemistry. The book should prove useful to Inter. B.Sc. and Final (Pass) B.Sc. candidates, as well as those taking Board of Education examinations.

GEOMETRICAL DRAWING FOR ART STUDENTS.

By SIDNEY A. SWITZER, Art Master and Honours Medallist in Geometry, Examiner to the Examinations Board of the N.U.T. Fully Illustrated. Crown 8vo, 2s.

This up-to-date text-book is the result of twenty years' practical experience. It is designed to assist Art Students generally, and is suited to the requirements of candidates taking the Board of Education, Oxford and Cambridge Local, and College of Preceptors Examinations. The problems are well graduated; suggestive dimensions are inserted in their enunciation; and they are all illustrated. Each page is self-contained, so that there is no turning over in the study of any one problem. Each page has a corresponding set of exercises. These exercises are mostly original.

DOUBLE ENTRY BOOK-KEEPING.

A Complete Treatise on its Theory and Practice. By JAMES CUSACK, LL.D., Principal of the Business Training College, Finsbury Square. Crown 8vo, 2s. 6d.

Covers the requirements for all the Elementary, Junior, and Intermediate Examinations held by the London Chamber of Commerce, the Royal Society of Arts, the National Union of Teachers, the Oxford and Cambridge Senior Locals, the College of Preceptors, and other similar Examinations.

A HISTORY OF ENGLAND FOR SCHOOLS.

In Three Volumes. With 6 Maps and Genealogical Tables. Vol. I to 1485. By H. J. CAPE, M.A., B.Sc., F.R.Hist.S., Head Master of the Mathematical School, Rochester. Crown 8vo, 2s. 6d.

This is the first volume of a series covering the three years' course of consecutive study in "English History with large digressions on foreign history" recommended by the Board of Education. By limiting the space devoted to the less instructive reigns, Mr. Cape has found it possible to treat at greater length the events of outstanding importance, while the great movements of history are discussed in their European bearing and not merely from the influence which they exercised upon our own country.

It is intended for Upper Forms and is a practical text-book for examination purposes.

AN ELEMENTARY LATIN EXERCISE BOOK.

By H. G. FORD, M.A., and L. V. CAUDWELL, M.A., Assistant Masters at Bristol Grammar School. Crown 8vo, 2s. 6d.

This book covers a two years' course divided into six parts, each part containing twelve explanations and twelve vocabularies of uniform length (10 words), with twenty English-Latin sentences and fifteen Latin-English to each explanation. Throughout only words and constructions found in Cæsar B. G. are used.

A FIRST YEAR INTUITIVE FRENCH.

By M. VERDON, Modern Language Master at Rotherham Grammar School. Crown 8vo, 2s.

This book is intended for children between the ages of twelve and fourteen in Secondary Schools. It aims at teaching elementary French according to the "New" or "Direct" Method, and follows the lines of moderate Reformers. It is divided into thirty-six lessons, providing ample material for a whole year's work.

OCCASIONAL NOTES.

IN the awful disaster that has desolated hundreds of homes and saddened two great nations there is consolation in the thought that of all on board, from the millionaire to the third-class emigrant, from the captain on the bridge to the stoker in the hold, it may be said "he nothing lowly did or mean upon that memorable scene." It may be noted that far the best account of the wreck that has yet appeared is written by a schoolmaster, Mr. Lawrence Bessley, sometime Science Master in Dulwich College.

IT was clear that Sir George Marks's Education Acts Amendment Bill would not find its way to the Statute Book. The Board of Education preserved an absolutely non-committal attitude towards it. The fate of the Bill depended upon the decision of the Government with regard to its financial clauses. Questioned on the subject, Mr. Pease replied that the Government reserved a free hand in regard to the finance of a measure for which they were not responsible. He added that it was quite impossible for the Government to say what their attitude towards the Bill would be before it had left the Committee. It appears then that, if the Bill had obtained the support of an overwhelming majority, the Government might have consented to accept its provisions; but on the first substantive clause the Committee were equally divided, and it was lost by the casting vote of the chairman. We cannot but feel that it would have been more dignified for Mr. Pease to take a definite line and either approve or disapprove the Bill. It is for the Minister of Education to take the lead in matters of educational legislation.

AMONG the many proposals that appeared in newspaper columns as regards the Single School Area Bill, the one that on the face of it seemed to have the most in its favour is that children should go to churches, chapels, or other rooms provided by the religious authorities for the instruction in religion that the parents may demand. But, when the proposal is examined, its weakness is easily demonstrated. It is true that instruction according to the Code need no longer be confined to lessons given in the school buildings. Visits to museums, swimming baths, playing fields, count as part of the day's work. And so it might seem that visits to a church or chapel could be included in the time-table. But practical difficulties come in. Attendance could only be secured if the children assembled first at school and then marched with their teachers to the outside place of instruction. And in many parishes half the morning would be wasted in going and coming.

IF we could imagine that such a scheme were ever carried out, the result would probably surprise those who talk solemnly of the rights of parents to decide upon the religious instruction of their children.

County Council Religion. We believe that a large number of parents desire that their children should learn to understand and reverence what is called Religion. They desire that their children should read the Bible. It has become the fashion in certain quarters, as Mr. Bentliff said at Hull, to sneer at County Council Religion. But Mr. Bentliff is quite sure that there is no grievance among parents of children attending public elementary schools with regard to the absence of denominational religion. "Enthusiasts," he said, "have built an inverted pyramid of fiction on a pin-point of fact." The so-called County Council Religion is a syllabus of instruction in religious knowledge suitable for immature minds, and drawn up frequently, we believe, by clergy and ministers of religion. For special doctrinal teaching the pulpit and the Sunday school ought to suffice.

THE Education Estimates of this year provide the sum of £60,000 for the medical treatment of school children in England and Wales. The Board of Education have now issued regulations under which this grant will be administered. The sum is not large, and can only be meant as an experiment. If all goes well, a much larger amount will be needed in future years. If the Board are satisfied that the medical inspection in an area is suitable, they will be prepared to consider the making of grants towards the cost of general medical treatment, especially, we may assume, in cases where school clinics have been established. The second object of the grant is to help in the treatment of tuberculosis or other ailments for which the open-air life is recommended. The two most important steps that Authorities have taken recently in the direction of medical treatment are the establishment of open-air schools and the setting up of clinics. We may take it that these two movements will receive special support.

THE Conference of the National Union of Teachers at Hull showed scant sympathy with the claims of women to equal political rights with men. New ideas

**The N.U.T.
and the Political
Liberty of Women.**

take time to make their way. Men are shocked that their conventional superiority should be called in question, and they seek to save their face by abusing a section of women whose sense of wrong has temporarily upset their judgment. The civilization of China has been until lately absolutely stagnant, if not retrogressive. During a long period of years there has been no progress in the art of living. Observers are not wanting to trace the cause of this stagnation to the subjection in which Chinese women are held. The Chinese cannot understand how a European lady can dare to refuse an offer of marriage. They would be unable to bear the shame of such an insult to their manhood. Schoolmasters find it difficult to preserve their equanimity in the face of the suggestion that women doing the same work as men should receive the same pay as men; or that women should receive that manly appanage of citizenship known as "the vote."

IN "The Changing Chinese" Dr. Ross gives a story of a Manchu literary Chancellor who could not read the essays submitted for provincial honours. "So

**The
Indiscretions of
an ex-Official.**

he piled them on the canopy of his bed, poked them with his cane as he lay smoking his opium pipe, and the thirteen that slid off first were declared winners." Sir George Kekewich would have us believe that the late Duke of Devonshire was equally intelligent in making appointments to the Board of Education Inspectorate. But Sir George himself cuts a sorry figure in these amazing revelations that he makes from time to time of the inefficiency of the Board of Education under his regime. As permanent head of the Board, he had the opportunity of advising his Parliamentary chief. According to his own story, the Duke sought his advice; and yet, in Sir George's words, the Inspectors appointed "were purely University prigs, and the more priggish they were the better." It might be a wise reform to make Civil Service pensions payable only during "good behaviour."

THE controversy as to the site of the new University for London grows somewhat acute. Among all the proposals that have been made, the one that appeals to us most is that the Foundling Hospital should be moved into the country and the University built on the site thus left vacant. There can be only one opinion as to the advantage of removing the foundlings into the country, just as Christ's Hospital has been moved in recent years. The foundlings are no longer slipped into an enlarged letter box at the hospital door; the need for the building in the midst of population has ceased to exist. The children are admitted after inquiry and with formalities. The site would be self-contained and not intersected by streets, as is the Bloomsbury site. We hope the proposal will be considered by those in authority, and that the Hospital will at least have the option of accepting the plan.

AT the Conference of the National Association of Manual Training Teachers, Sir J. A. Cockburn, the President, emphasized certain points of view that are of primary importance in schemes of education. Time was when school concerned itself solely with the reading of

books. In those days boys (we hope) had sufficient leisure and sufficient opportunities of play to develop their muscles. For "the brain cannot be equipped without the action of the muscles." And "the muscles of the hand are of especial importance." Handwriting and sewing are not sufficient, for they do not exercise all the muscles. The manual instructor who at first was suffered in our schools, just as the science teacher of an earlier generation, may yet come to a position of honour. We are now told that the activity of the brain depends largely on the exercise of the muscles of the body and particularly of the hand. School life takes so large a proportion of the day that we must incorporate manual work in the curriculum; and science teaches us not to leave to chance opportunity an essential factor in education.

THE National Food Reform Association has organized a Conference on Diet in Public and Private Secondary Schools, to be held on May 13. The subject is an

**Diet
in Schools.**

important one, and there should be valuable results from the scientific investigations that have been made during recent years. Of the two problems, underfeeding among the very poor and overfeeding with the rich, we hardly know which is the more important. But we certainly want more reliable information as to the value of foods and their effects on the body. Appetite is also an important factor in the matter. Food eaten with whole-hearted enjoyment seems to produce a well nourished and healthy body. The self-indulgent person who, while he eats, fears indigestion, of course gets what he expects. At the other end of the social scale, the want of appetite may come from absence of fresh air and other hygienic conditions. Suitable food of itself will not cure malnutrition. General hygienic conditions must be also considered.

THE growing cost of education and the increasing disproportion between the amount of Government grants and rates are illustrated in the accounts of the

**Cost
of Education.**

London County Council that have just been published. The total amount spent on elementary education during the year was rather more than £4,500,000. Of this sum more than £3,000,000 were raised by the rate-payers, leaving less than £1,500,000 to come from the pockets of the tax-payers. For higher education the total amount spent fell short of £1,000,000; just about half of this came from Exchequer contribution and Board of Education grants; the remainder was raised from the rates. In reality it may not greatly matter whether we pay in the form of taxes or of rates; but there seems to be a strong feeling that the taxes should bear a more even portion of the cost of elementary education.

IN the current number of the *Hibbert Journal* Principal Childs lays down the essentials of a University education. That a University must be a *studium generale*,

**Principal Childs
and
Universities.**

and take all knowledge for its province, that its professors must be leaders of thought, not merely a higher grade of schoolmasters, and that it must be free, if not from State control, at least from all external interference in its administration—all these are principles on which J. H. Newman insisted. The points on which Mr. Childs lays fresh emphasis are, first, the necessity in the case of the new Universities of ample provision for the corporate

life of its scholars. The student who lives by himself in a garret and meets his fellows only in the classroom may be a model of virtue, but he is necessarily lopsided, and has missed half the benefits of a University. Secondly, he defends the newer Universities against the charge of utilitarianism. It is no objection to arts and sciences as a liberal study, but rather a recommendation, that they admit of direct application to the practical needs of to-day. The one thing needful is that teachers and taught should be philosophers in the true sense of the word—that is, seekers after wisdom. Examinations or degrees are not the essentials, but the accidents of a University.

**Poss
Asinorum.**
[N spite of the Girls' Public Day Schools, fashionable boarding schools for young ladies continue to flourish, and some of them vie in extravagance with Eton and Harrow. The better sort are inclined to overdo the physical side of education—games, athletics, and dancing—and devote an excess of time to accomplishments such as instrumental playing, but they engage the most capable teachers and professors and take lessons seriously. We hope the following experience, for which a correspondent vouches, is singular, but it deserves to be shown up. "I found myself the other day in a first-class carriage with three richly dressed ladies and a girl of about fifteen. The talk was all of Bridge. The three elders compared their losses and gains and weighed their common friends in the balance of Bridge. Presently the mother of the girl remarked, 'Mollie is now learning to play Bridge at school. I asked her mistress to arrange for two or three lessons a week. You see I want her when she leaves school to join our Bridge Circle at once. Don't you think it's a good idea?' The two friends waxed enthusiastic and Mollie chimed in, 'I care for Bridge now more than all the rest of my lessons.'"

**A Boon
to Parents.**
A VAUNT perplexity! In future parents may be relieved of all anxiety in selecting a suitable school for their children. Messrs. Selfridge & Co. announce that they have hired, presumably regardless of cost, "one of the leading experts in the scholastic world" who will be pleased "to answer any questions as to the selection of the best school" or "to talk the matter over with any who care to seek his advice." The shade of Mr. William Whiteley must stir uneasily. Here is a new departure that he never thought of. And to educationists there is a new prize to arouse their ambitions. The agent will undertake not only to marry you, but to provide for the education of your children.

**Naval
Officers.**
IT is reported that a Departmental Committee, over which Admiral Sir R. Constance will preside, has been appointed to inquire into the entry and training of officers in the Navy. Nearly ten years have elapsed since the scheme of common training at Osborne and Dartmouth was established, and it is fitting that tests of its efficiency should be applied. At first the interview method of selecting boys of immature age for the Navy met with some opposition from teachers, but in recent years less has been heard of these objections. It will be interesting to have evidence from the teachers and superior officers of selected candidates both as to the method of selection and as to the value of the training. The Admiralty has been unnecessarily reticent as to the educational methods

adopted at Osborne and Dartmouth. Under the old system, boys could be trained as engineer officers without great expense to their parents, and it has undoubtedly been one of the least desirable effects of the new system that the field of choice has been greatly restricted.

**Supply
of Teachers.**
THE question whether there is an over supply of trained teachers has of recent years been discussed with a good deal of acrimony. What is quite certain is that strong pressure has been brought to bear on parents to discourage children from entering upon training for teaching in elementary schools. The effect is evidenced by figures which Mr. Pease supplied in Parliament. These show that, whereas in 1906-7, 11,901 were recognized for the first time as pupil-teachers, the corresponding figure four years later was 6,021, composed of 2,985 pupil teachers and 3,036 bursars. The President of the Board stated that he proposed to discuss the question with a deputation from the County Councils Association. Unofficial statistics, notably a return prepared by the Federation of Teachers in Central Classes, also testify to the seriousness of the position. It is difficult to see how such overdue reforms as the reduction of the size of classes in elementary schools can be carried out if the present shortage continues.

Travel.
IN the eighteenth century foreign travel was a recognized part of a gentleman's education, but, as may be learned from Bacon's "Essay," it was under proper guidance and supervision, not the casual globe-trotting of the present age. Dr. Shipley, the Master of Christ's College, Cambridge, would *mutatis mutandis* revive the practice of Bacon's time, and in a paper read before the Royal Colonial Institute he commended the Association for the International Interchange of Students formed in 1909 under the presidency of Lord Strathcona. For men who can afford it the Association plays the part of Bacon's bear-leader, and to poor students it offers scholarships. We hope that the forthcoming congress of the Universities of the Empire will do much to make known and extend this admirable educational work.

LOCAL AUTHORITIES.

**Vacation
Schools.**
WITH suitable pressure behind it, the thin end of the wedge is bound to work its way. From a report of the Education Committee of the London County Council on the subject of Vacation Schools and Organized Vacation Play, we gather that these schools were started as an experiment to be strictly limited lest the cost should become serious. It was feared lest the establishment of these schools might lead to the request for similar schools in other parts of London; and, secondly, as these vacation schools must be in the charge of experienced teachers, there might be a considerable increase in the salary bill. Dr. Garnett in his report makes a good point. He says: "It would not have been worth while to have experimented with two schools unless it were intended not only that a demand should be created, but that that demand should also be supplied in the event of the experiment proving successful." The wedge has been inserted; it is for the pressure of public opinion to drive it home.

**Their
Moral Value.**
THE whole report is an eloquent witness, not only to the striking value of the vacation schools and to the undoubted advantages that accrue to the children, but also to the human sympathy and goodwill of

those who have organized and controlled these attempts to bring to the children of the crowded streets some of the pleasures of life in the country. The officers, the inspectors, and the teachers combine in speaking of the good done to the children. Of course there is expense, mainly in salaries; but we believe public opinion will make the Finance Committee feel that this expense can be justified, and that the summer vacation school for children who live in the most densely populated quarters of London shall become part of the normal educational program. The idea is to choose a school on the outskirts of population, near Greenwich Park, for instance, and to take the children each morning by tram. One teacher writes: "It is my belief that a holiday school is one of the choicest spots on earth for human nature study, and that the kind of experience gained there is a teacher's liberal education and training."

WE have also received from the London County Council the report of the Medical Officer on the two open-air schools that are carried on by the Education Committee. He has no doubt whatever of their value. Speaking of the children on their admission, he says: "It would be difficult to imagine a more wretched-looking class." Later on he says: "A person has only to see the brightness and general contentment of these children now, as compared with their former apathy and often sullen resentment towards the open-air life, to realize that such an experience as this is for them of great educational value. . . . Attendance at the open-air school enlarges their mental outlook, for in the ordinary way they would have been attending some school in their own cramped and sordid atmosphere, from which for them there would have been no escape. Though it is only a short car-ride from the slums from which they come to this school in a comparatively rural district, yet to them it means a translation from the town into 'the country' with all the associations connected with such a change."

THE following are the essential paragraphs in the Regulations recently issued by the Board of Education for "grants in respect of medical treatment and care of children attending public elementary schools and certain special schools." "The Board of Education will make grants in aid of the expenditure incurred in the financial year beginning on April 1, 1912: (i) by Local Education Authorities on the medical treatment of children attending elementary schools and work ancillary to medical treatment; (ii) by Local Education Authorities or managers of certain special schools on the medical treatment and care of children suffering from tuberculosis or from ailments for which open-air treatment is specially suitable. The total amount of the grants to be distributed will be limited, and they will be distributed at the discretion of the Board of Education, and will not bear any fixed proportion to the expenditure incurred by the Local Education Authorities or managers of special schools."

THE Derbyshire Education Committee have had before them a report from the Board of Education on the physical instruction given in the county, to the effect that (we quote the words of the Committee's report), "speaking generally, the character of the instruction, though often painstaking, seemed to indicate that the teachers, as a whole, had not properly grasped the main principles underlying the Board of Education's syllabus for 1909." From our own observation we are inclined to think that often the teachers fail to win the whole-hearted co-operation of the scholars. The exercises are performed as an unwelcome task. To secure their full benefit the exercises should be done with complete enjoyment. The Derbyshire Committee have decided to send teachers to the holiday courses at Scarborough and Barry. We regret to see that Mr. Evan W. Small has been compelled to resign his post as Director of Education on account of ill health. Mr. A. L. Jenkyn Brown has been appointed to succeed Mr. Small.

RECENTLY a jury awarded £50 damages to a boy in an L.C.C. school on account of injury to his eye. Some builder's stuff had been left in the playground. An appeal by the builder and the London County Council was dismissed. In the case of the King v. Easton the majority of the court gave judgment in favour of the Liverpool Education Authority and against the decision of the auditor who had disallowed expenditure on furniture for non-provided schools. The case was a test one, and it appears now to be established that the Education Authority may provide the furniture in a school that has been provided by persons other than the Education Authority. But the Local Government Board have given notice of their intention to appeal from this decision.

THE Employment of Children's Bill, introduced by Mr. Beck, has passed its second reading in the House of Commons. The main provisions of the Bill have reference to street trading by children. It is proposed that this should be prohibited generally to girls under eighteen and to boys under seventeen, but that exception may be made in the case of boys from fifteen to seventeen who obtain a licence from the local authority.

MR. F. E. KITCHENER, who, since his retirement from the head mastership of Newcastle-under-Lyme High School, has been an active member of the Staffordshire Education Committee and for two years chairman, has been compelled by ill-health to decline the offer of re-appointment as chairman.

THROUGH the liberality of the Clothworkers' Company a new Spinning Section has been added to the Textile Department of the University of Leeds. The new branch will afford instruction in the principles and theory of the manufacture of worsted yarns on the Continental system. The building has been designed by Mr. Paul Waterhouse. It has been erected at a cost of £5,000, making a total of £75,000 granted by the Clothworkers' Company for technical and scientific education in the Textile Industries and Dyeing Departments of the University of Leeds.

SCIENCE NOTES.

SELDOM can an eclipse be watched in England under such favourable conditions as observers experienced on April 17. The memory of the event will still be fresh in our pupils' minds—sufficiently so to make it well worth while to explain some of the more important points in the relative motions of sun, earth, and moon. It is surprising how many persons of ordinary education fail to answer the question, "Do solar eclipses happen at new moon or full moon?" It is less surprising that the man in the street cannot tell why there is not an eclipse once a month. Of course solar eclipses would be monthly occurrences if the plane of the moon's orbit coincided with the plane of the earth's orbit round the sun. As the angle between these planes is $5^{\circ} 9'$, we have not fewer than two nor more than five solar eclipses per annum. On this occasion it was difficult to predict whether an annular or total eclipse would be seen at the centre of the shadow. Why? This question leads to a recognition of the elliptic character of the moon's orbit, in consequence of which its apparent diameter varies from $28' 48''$ to $33' 32''$, while the sun's diameter is seen to change from $31' 32''$ in summer (when we are furthest from the sun) to $32' 36''$ in winter.

WE hope that every school-boy (and girl) is familiar from stories of adventure with the practice of counting time by moons. After 223 moons—i.e. a period of a little over eighteen years, the sun, moon, and earth return to the same relative positions. Hence eclipses repeat themselves after cycles of this period, which was known to the Chaldeans and called *Saros*.

WRITING of mathematical astronomy reminds us that the eminent Professor of this subject at Paris will lecture at the University of London on May 3, 4, 10, and 11. Prof. Henri Poincaré will deal with mathematics both in its philosophical and applied aspects. For tickets apply to the Academic Registrar.

THE article by "G. F. H." on "The Teaching of Chemistry," which appeared in last month's *Journal of Education*, reminded us of a report presented to the Dublin meeting of the British Association in 1908 on "The Sequence of Studies in the Science Section of the Curriculum." This report contained opinions gathered from various sources, chiefly from public-school science masters, which might still be of interest to many. We hear from the Secretary of the Committee which was responsible for the report that there are still a few copies which may be had on application to Mr. G. F. Daniell, Woodberry, Oakleigh Park, London, N. For our own part, we deny the existence, or even the possibility, of a purely

heuristic method; but we should consider that a teacher who neglected the heuristic approach entirely did not know his business.

DIRECT photography in colour has been achieved in two ways at least, independently of the use of pigments, dyes, or coloured screens. At a recent meeting of the Royal Photographic Society a spectroscopic method was shown by L. and E. Rheinberg, by which the authors obtained wonderfully true colour photographs of landscapes, portraits, &c.

THE problem of rural education is being attacked with energy in the United States, and a large flow of agricultural books has been issuing from the publishing houses. In a recent volume called "Beginnings in Agriculture," by Albert R. Mann (Macmillan), we have a serious attempt to show that the American child can receive much education through experience of farm life. The book should interest educational reformers in this country, for Mr. Mann demonstrates the educative value of country work, and shows that it can be carried out without doing violence to the exigencies of village conditions and without assuming impossibilities from the teacher. In this country some of us are wondering whether we have not taken the village boy from the educative farm and put him into a less educative "school." We must get to the root of this matter, and train teachers properly for rural schools and make the position of rural teachers more desirable.

IN a school which professes to retain pupils until the University age there should be a small reference library of scientific books. A valuable addition to any such library would be the new edition of Sir E. Thorpe's Dictionary of Applied Chemistry. The first volume, which contains between seven and eight hundred pages, has just been published. It is written by contributors of the first rank, and is a work of rare excellence. The original edition appeared in 1890, and immediately corrected serious errors which had become almost traditional in the teaching of chemistry.

MR. A. H. SAVAGE LANDOR has just returned to England after performing an extremely arduous feat of Exploration. His journey included the whole of the unexplored part of Brazil, a region which was regarded as impenetrable by the Brazilians themselves. The hitherto unknown portion of the route was about five thousand miles. Often a way had to be cut through virgin forest, and the expedition suffered much from insects. For sixteen days Mr. Landor and his two followers were without food. He studied several new tribes, made vocabularies of their languages, and has accumulated much information of scientific value. He carried no weapons and met with no hostility. We look forward with interest to the fuller account of his great journey, which he has promised to give to the Royal Institution on June 14.

DIRECT MORAL TEACHING IN ITS PSYCHOLOGICAL ASPECT.

WHEN we contrast example and precept as means of moral education, we recognize two methods of moulding the conduct of others. We can form their habits of action by setting a pattern before them for their imitation, or we can do so through the medium of ideas implanted in their minds. Ideas about morality may again be implanted either directly or indirectly, for we may set ourselves to give definite moral lessons without any attempt at concealing our purpose, or we may make use of the ordinary subjects, such as history and literature, to convey our lessons without revealing our design. This paper is an attempt to draw attention to some of the psychological aspects of the direct method of moral teaching. Though it is generally recognized that this method must have some place given to it in the general scheme of moral education, controversy rages round the question of its exact value. Some are inclined to sneer at it, and they justify their attitude by quoting extracts from some of the books of moral lessons actually in use. Others regard it as a method to be used exclusively at a fairly advanced age, when the reasoning power has reached a certain state of development. Some

again hold that this method has its place almost from the start, for at a very early stage we are met with a demand for some justification, however simple, of the modes of action required of the child. It would seem that the question of the value of the method can scarcely be settled until we become clear as to what it aims at accomplishing, by what means it attempts to gain its ends, and on what conditions the success of the means depends.

Let us, in the first place, state exactly what the method is. It is a method by which ideas and conceptions about morality are explicitly conveyed from one mind to other minds. The teacher, be he parent, schoolmaster, preacher, or author, takes some aspect of the moral life, say the virtue of honesty, he analyses it, gives illustrations of it, discusses the consequences of its presence or absence. In direct moral teaching, then, the mature mind communicates the ideas it has formed and accumulated about the moral life to less mature minds.

The aim of this, however, is not simply that the growing individual may have a store of clear and definite and well-reasoned-out moral ideas. He must not be able only to analyse virtuous action, but it must appear to him desirable, and his thoughts about it must realize themselves in action. In other words the aim of the teacher is not intellectual only, it is practical. He seeks not only to inform the mind, but to mould the will. He seeks to make his pupils understand what is meant by morality in order that they may be moral. If his teaching fails to achieve this result, it is barren. Its fruitfulness depends on its practical consequences. It must make a life, not only develop a mind. Divorced from action, thinking about morality too often tends to a glib, unpleasant moral precociousness, or to a dangerous moral cynicism. Experience gives us examples enough of such consequences, and these examples furnish capital for those who are sceptical as to the value of direct moral teaching. They are certainly examples of cases where such teaching has failed to attain its true aim, and they drive us on to the consideration of the conditions on which such achievement depends.

Every idea has a tendency to pass into action, but as a matter of fact, it is only a few of the many ideas that pass through our minds that do actually work themselves out in this way. What is the nature of the ideas that do? How is it that some ideas realize themselves practically, while others do not? Suppose we think of those ideas which, for ourselves, are what we call the guiding ideas of our lives. They may be ideas connected with religion, or with our families, or with our profession, or with public service, or perhaps with wealth. But whatever they may be, we can say at least two things about them. They are ideas about which, in comparison with other ideas, we *think* a great deal, and they are ideas about which we *feel* strongly. They occupy the field of our consciousness with a certain exclusiveness, pushing other ideas into the background. We attend to them often, we concentrate our minds a great deal upon them. And not only that, but we are moved by them, they appeal to our emotions. They may be accompanied by fear or wonder or reverence, by disgust or tenderness or anger; but in any case we are not indifferent to them. We may say then that ideas, if they are to be practically effective, must be attended to, and they must have a strong emotional value. Whether this is so or not in the case of a particular idea communicated by one individual to another, depends upon various conditions. We may distinguish conditions dependent on the internal nature of the idea itself, conditions dependent on the state of the learning individual or the pupil at the time, and conditions dependent on the nature of the teacher.

As to the idea itself, it must be familiar in the sense that it is not beyond the grasp of the pupil. It must not be such as to baffle and discourage the learning mind in its attempt to understand. The capacity to attend is limited by the capacity to make something of the material demanding the effort of attention. Our own experience when we read an article on a subject unfamiliar to us, teaches us how easy it is to let the attention wander in such a case, and how intense the strain becomes if we fight against this tendency to wander from our subject. But it is also true that change and

novelty have their charms, and we crave often for the unexpected and rejoice in it. We take delight in it because it is out of the ordinary run of things, but nevertheless our welcome of the new is dependent on the fact that while it is new it yet is not so new that we cannot grasp it. We welcome the new which has affinities with the familiar. Anything that we could not possibly link on to what we already have of knowledge, would leave us most uncomfortably at sea. To hold our attention, ideas must have such freshness and charm as we can to some extent grasp.

This is, of course, intimately bound up with the nature of the individual who is being taught. Ideas have in themselves no qualities which make them striking or familiar. How they present themselves depends on the person to whom they are presented. This natural basis is the only one on which to build.

Other conditions on which the effectiveness of an idea depends are connected with the state of the individual at the time the idea is presented. We are all more or less conscious of the importance of suitable physical conditions—bodily comfort, sufficient nourishment, the absence of strong distracting elements in the immediate environment. Fatigue may work in different ways, inasmuch as it may render us incapable of receiving an idea, or it may lead us to accept an idea without being able to bring up other conflicting ideas to meet it. But the moral ideas upon which a true moral life is to be based must not be accepted and acted on as the hypnotized person acts upon the ideas suggested by the hypnotizer. We aim at a rational acceptance of our ideas, and we ought to aim at eliminating all such conditions as tend to make the pupil incapable of such.

With regard to the state of the individual being taught, we certainly meet with a difficult problem when the ordinary physical environment is such as to directly counteract the moral teaching given, as when the moral teaching of the school gets a set-back through the home conditions. In such cases the moral ideas imparted have their chance of effectiveness lessened by the fact that the contrary ideas are the ideas which quantitatively at least occupy the greater part of the individual's life. This difficulty may, however, be partly got over if the conditions of the third order, those connected with the persons imparting the moral ideas, are favourable; for, if they are so, those ideas assume a qualitative importance and value which enables them to triumph over the influences of the ordinary environment. What are those conditions? Briefly we may say that the prestige of the moral teacher is the all-important thing. The moral teacher must be recognized to be a superior being, and the attitude of the pupil to him must have a certain emotional character. Now the personal superiority which impresses us may be of various kinds. It may be based merely on superior size, a ground which is certainly important for children, and not altogether without influence on grown-up people. It may be based on the recognition of greater physical strength or of superior social position. Or again, its basis may be found in a consciousness, vague perhaps, of greater knowledge and experience, of stronger will power, or of moral worth. Now those of whose superiority we are conscious on any of these grounds arouse in us certain emotions or sentiments. It may be only fear, as perhaps in a case of superior strength or size; it may be love or admiration or reverence or envy or gratitude. Our attitude towards these superior beings transfers itself to the ideas they put forth, and if they seek to communicate their ideas to us those ideas have for us a value dependent on our attitude towards the persons themselves. Because of their origin they tend to occupy our attention and to appeal to our feelings. It is of course essential, when we are dealing with moral teaching, that the attitude aroused in the pupil by the teacher should be a right one—that, for instance, the prestige of the teacher should not be based on brute strength alone; otherwise the dominant attitude of the pupil is that of fear, which may make him attend to the ideas put forward, but may work against their true moral effectiveness. For successful moral teaching the felt inferiority

must in the long run have its grounds in the moral character of the teacher.

The prestige of the teacher also secures that his convictions and enthusiasms shall communicate themselves along with his ideas. If he feels intensely about his moral ideas—if, as we say, he is really keen about them—then his moral fervour transfers itself to some extent to those who feel his superiority, and this again contributes to the emotional appeal of the moral ideas on which their effectiveness depends.

Considering what has been so far said, we find that ideas communicated by one individual to another must, if they are to be effective, be adapted to the learning mind, and as the child's mind is continually developing, moral instruction must seek to follow development if it is to have any chance at all. The child's moral experience begins very soon, his questions begin very soon, and the questioning spirit and his elementary moral experience get connected, so that the early stages of his life already demand some suitable kind of moral teaching. The natural basis of instinctive activities and the emotional tendencies connected with these, must be built upon; for the moral teacher, like other teachers, finds the only sure basis for his work in the fact that the individual tends to act along certain instinctive lines and to feel in certain ways, and that those tendencies to action and feeling are bound up with definite perceptions and ideas. To bind up ideas, actions, and feelings in the way he thinks right is the task of the moral teacher, and if he tries to do so by directly working upon the ideas of his pupil, he must demand only such ideas and modes of acting and feeling and such combinations of these as his pupil is capable of. He must bear in mind also that this capacity of his pupil is dependent not only on general causes due to the general nature of development, but also to particular causes such as hunger, fatigue, weakness, physical environment, home influence, or conflicting "prestiges." He must remember that moral ideas can, less than any others, be divorced from the personality of the person holding them, and that it is not only the intrinsic worth of the ideas themselves that counts practically, but quite as essentially the strength of conviction with which they are held and expressed, the enthusiasm of the teacher for the ideas and of the pupil for the teacher. To be a successful moral teacher, a man needs not only the power of thinking and expressing himself clearly; he needs zeal, and he needs the power of impressing himself, the power of making others feel the force or the beauty of his personality.

It is in the light of such considerations as these that the value of direct moral teaching must be estimated. That it corresponds to a real need which manifests itself comparatively early seems almost certain; that no moral life is complete unless moral practice is built upon a solid foundation of moral theory is undoubted. The practical problem of how to teach morality seems to lead us back to a study of those great teachers who have made moral history and communicated their own enthusiasm and their own convictions to great numbers of human beings. For the problem which faces us is on a humbler scale, the same problem as they successfully solved. The problem for the teacher becomes, in the long run, not only one of the best ways to formulate and express his ideas, but it is also essentially connected with the supreme practical problem of his life—that of the formation of his own character.

The practical application of these principles must be reserved for a second article.

J. E. ALDERSON, M.A.

THE living that Canon Swallow, as we announced last month, has accepted is St. Mary Abchurch, City, in the gift of his College, C.C.C. Cambridge. Canon Swallow has held the head mastership of Chigwell School since 1876, and he has from its inception acted as one of the Hon. Secretaries of the Incorporated Association of Head Masters, first as the colleague of Dr. R. P. Scott, and more recently of Dr. McClure.

ASTONISHMENT AND THE ART OF LYING.

THE assertion that the development of the imaginative faculties in the young is a business, both admirable and necessary, has now become but little better than a platitude. There is, however, one aspect of this question which is generally overlooked, but which in certain cases presents serious difficulties to all who are employed or interested in education and who have perforce to camp on the neutral territory which separates the kingdom of romance from the dominions of the father of lies.

Every mother of sons is capable of laying two flattering unctious to her soul. She quite honestly persuades herself that her boy has never had any secrets from her, but that she possesses his entire confidence. This is the outer ring of her defences; the inner circle centres in her amiable belief that her son has never told a lie. The candid brows of her offspring when either or both of these statements are made in his presence afford a fine testimonial to the plasticity of the infantile conscience.

It may perhaps be profitable to discuss the preliminary stages through which a child may pass before the Lie Absolute is achieved. We begin, then, with the infant muling and puking after the manner of his kind. He is himself in his small person a perpetual astonishment to the authors of his being, and his sayings and doings are exhibited in a sort of luminous haze of admiration which distorts and magnifies the most trivial incidents of his career. Onlookers are tacitly invited to join the genial conspiracy, and if they wish to maintain their names on the visiting list of the family they wrap their mantles around them, pull down their sombreros, and dissemble in the true Adelphi manner.

Innocence in the person of the infant begets a half unconscious deceit in the persons of its parents, and in this the bystander must acquiesce or stand no longer by. Presently the child begins to take notice. It is then the function of his nurses to keep him in a perpetual bath of astonishment: "Look at this pretty thing!" they cry and, if the child fails to show a becoming surprise he is searched for pins or dosed with powders.

At a later stage the child himself begins to understand the game. He discovers that he is expected to pose as a phenomenon. He becomes self-conscious; he looks about him for the admiration which only infants and political candidates can extort from their partisans. He cannot even play a game by himself without a gallery. If he proposes to jump a puddle or to take his post-prandial mud bath he must first call together his retainers to witness where he lies. He has learnt in fact not only to express or simulate astonishment where it is seemly so to do, but he demands reciprocity, he elects to become a cause of astonishment in others.

It is at this point that the game ceases to be purely humorous and may easily become pernicious. A child who has been subjected to this treatment in his early years—and which of us has not?—develops a craving for notoriety which would be excusable only in a society actress. He will—at the age of eight or nine—invent the most astonishing tales of adventure which befall him in his daily progress to and from his dame's school. His conscious aim is to *épater le bourgeois*. Truth, he has discovered, is a dull and unemotional thing not half so strange as fiction. He lives in a world of fancy originally invented for him by some remote primeval ancestor, and he dresses his facts to suit a pleased and partial audience. If the facts are not susceptible of embellishment, he falls back on his imagination. In a word, he is no longer able to draw a fine line between reality and romance, and so it comes about that the vast majority of small boys are mentally incapable of speaking the plain unvarnished truth without some conscious effort.

Hereabouts the schoolmaster appears. The small boy has in course of years taken the length of the paternal foot and discovered in the process that the maternal slipper is somewhat shorter, but the schoolmaster is a fowl of another feather. At home the boy has a reputation to live up to. It is borne

in upon him with painful distinctness that this reputation may have, at school, to be lived *down*. Although the situation has its humorous aspects, it may become dangerous. There is no telling what the boy may say to his home people about the doings at his school. His imagination grows by what it feeds on, and, as his parents still move in a rosy cloud of implicit confidence in his unswerving veracity, the school and its masters may suffer the greatest discredit from tales which they never hear and which they have no opportunity of disproving.

The boy himself can scarcely be blamed. His schoolmaster, if he is a man of experience, would no more impute blame to him on this account than a doctor would heckle his patient for contracting an infectious disorder. He has been brought up in an atmosphere that would demoralize a minor poet, and, just as the capacity for exhibiting and producing astonishment evolves the Ready Liar, so also, in the course of a few short years of judicious schooling, astonishment at the painful results which follow the Lie Absolute restores his mental equilibrium and produces the Honest Man.

The imaginative small boy, seconded by the matter-of-fact parent, may become one of the greatest possible dangers to a school's reputation, and his conversion to the moral standards of the Good Citizen is a work for which his schoolmaster receives no thanks, but for which the unconscious parent and his aggregate—the British nation—owe the teaching profession unstinted praise. "L'excès en tout est un défaut," and this is particularly true of the cultivation of the juvenile imagination.

P. SHAW JEFFREY.

THE VICTORIA LEAGUE.

By G. H. HALLAM.

Honour all men. Love the brotherhood. Fear God. Honour the king.

"IS virtue a thing which can be taught?" was a question discussed many years ago. A question of to-day, on which much depends, is of a similar nature. Is the virtue of patriotism, and in particular of what may be called the larger patriotism, a thing which can be taught and fostered, especially in young people? By "the larger patriotism" we mean a consciousness of the brotherhood and common nationality which unite the Briton at home with his fellow Britons beyond the seas.

The Victoria League, which was founded just ten years ago, at the end of the South African War, believes that it has found an answer to this question "in the affirmative." Politicians differ in their notions how best to bring about a closer union between the daughter nations and the Mother Country; but in trying to understand each other better, and in cultivating mutual sympathy, we all have a common ground, and we may say with Burke: "These are the ties which, though light as air, are stronger than links of iron." The Victoria League is "outside and above all party politics"; among its vice-presidents are the leaders of both political parties; and its aim is defined to be that of "promoting mutual understanding, help and intercourse between all citizens of the British Empire." The difficulties of the Empire, said Sir Edward Grey at the Imperial Press Conference, "are difficulties of distance." If we may quote Mr. E. T. Cooke's words in the *Victoria League Notes* of January, "the work of the Victoria League is to help in bridging those distances."

A sagacious person remarked to the writer not long ago: "There are two kinds of leagues; there is the league which urges other people on to do something, and the league which does things itself. It seems to me your Victoria League is of the second and better class." Certainly it finds plenty of things to do.

The first work it found to do was in connexion with the soldiers' graves in South Africa. More than £8,000 was contributed through the League for that pious duty. Gradually other objects suggested themselves. To encourage a

knowledge of the Empire a Lending Library, now containing twelve hundred volumes, was formed; lectures and picture talks are given; prizes for essays are awarded. Over forty thousand books and magazines have been sent out, nearly four hundred libraries to South Africa, and forty-five "Minto Libraries" to Canada. Eighty-one thousand good newspapers were sent last year by individual members of the Victoria League in this country to individuals in the Dominions. The Hospitality Committee organizes hospitality and gives a welcome to visitors from overseas. Last year personal introductions to the League were brought by one thousand five hundred persons, among whom were more than one body of teachers. There is a corresponding "Settlers' Welcome" organization for visitors or settlers going from Great Britain to other parts of the Empire. In May last a very interesting Victoria League Conference was held, attended by hundreds of delegates and other members of allied bodies in the Dominions.

But the special educational development to which we wish to draw attention is that of the Junior Associates. This organization was started in 1908, and one such branch to-day has over eight hundred members. These are of all classes and are drawn from secondary and elementary schools. They give proof of their interest in the League and its objects by paying a yearly subscription, those from ten to fourteen paying threepence, older members from fourteen to eighteen, sixpence. They elect their own officers, and, as far as possible, manage their own affairs. Most of the Junior Associates' Branches are formed in connexion with an Adult Branch, but they are to be found, through the energy of some enthusiastic elementary school teachers, even in small villages. High schools generally have their own Branches.

The details of work done vary according to circumstances. Lantern lectures are given in the winter. In the summer some Branches have open-air gatherings. Exhibitions of interesting objects from one or another part of the Empire are held. All Branches aim at having a lending library bearing on the Empire and its makers. Essays are written. The Junior Associates even have songs of their own. Many Branches act masques and tableaux during the winter or perform old national dances in the summer.

Every Branch has its correspondence, either with individual children or with linked schools overseas; and out of this correspondence has grown the interchange of collections of flowers, butterflies, minerals and other natural products, as well as of drawings, photographs, or picture post cards.

The boys and girls also play no inconsiderable part in the newspaper scheme, sending out home newspapers to other children, or to "lonely farmers" and other individuals overseas; and it is one of their keenest pleasures to find from grateful letters how warmly these newspapers are appreciated. Even quite young children in elementary schools take part in sending out the papers, and are able to keep up a weekly supply by combining in sets of four for the purpose. This service to their distant brothers appeals in a very marked way to the children, and it appeals no less markedly to the lonely farmer who receives the gifts. The boys of one of our great public schools send out over sixty newspapers every week.

In order that the members of the League and kindred bodies, especially the Junior Associates, at home and overseas might be kept more closely in touch, about a year and a half ago the *Victoria League Monthly Notes* was started. This small paper, published at a halfpenny, has now a steadily increasing circulation of about two thousand, and reaches all parts of the Empire, while its pages have grown from four to eight. It may be mentioned that several of the great shipping companies regularly take copies of the *Notes* for their steamers. Boys and girls in New Zealand and Canada take part with those "at home" in the competitions, and contribute letters and articles, poems and cartoons to the pages of the *Notes*; and an Empire calendar which has lately been published for use in schools also had its origin in the *Notes*. We have sketched somewhat barely the various activities of the Victoria League, but new opportunities of useful work are constantly suggesting themselves.

The Victoria League has its head quarters at Millbank House, 2 Wood Street, Westminster. On application to the Office, lectures can be arranged, and sets of fifty lantern slides on the various parts of the Empire, with a "talk" to accompany them, are supplied for a small payment. The Victoria League possesses three thousand slides, many of them the gifts of generous friends, illustrating the scenery, industries, and characteristic features of the Empire and Dominions. Similar sets of slides, of the Mother Country, have been presented and sent out for the use of the Overseas Branches and Allied Associations.

It is not difficult to interest the young people; they are quick to grasp the idea of brotherhood. We believe such instincts should be encouraged and developed, and that it will be of no little importance to the future of the Empire if the men and women of the next generation, the boys and girls of to-day, have been brought into personal touch with their brothers and sisters across the sea, and taught to realize, while they are young and impressionable, something of what the Empire means, its privileges and responsibilities.

SAFE NOVELS.

The Principal Girl. By J. A. SNAITH. (6s. Methuen.)

This is a rattling extravaganza, better even than "Araminta"; the fun is fast and furious and the humour broad, but without a touch of coarseness or vulgarity. It is the old, old story of the Beggar Maid and King Cophetua; but in this case it is the beggar maid who steps down and condescends to share the "burden of an honour with which she was not born."

In the World of Bewilderment. By JOHN TRAVERS. (6s. Methuen.)

The world of bewilderment is India and the author is content to show us a mighty maze without a plan, yet throughout a sense of mystery daunts our spirits and makes us feel that it is truer vision than "Plain Tales from the Hills." Take, for instance, what is only an interlude in the story, the assassination of a Brahman by Jamadar of a Sikh regiment, a deed of heroism worthy of a Jael or a Mucius, but set down by those to save whom it was done as a brutal murder without excuse. The main plot is the old story of the two Iseults, but the husband whose creed is that you can be on with a new love without being off with the old and the much enduring wife who wins in the end by devotion and pluck are finely conceived and subtly delineated characters.

Joseph in Jeopardy. By FRANK DANBY. (6s. Methuen.)

This is a clever study of the seamy side of fashionable London life. The man who pulls the strings is a Universal Provider, who has made a fortune by catering, and is cajoled by penniless lordlings into writing a novel and running a theatre. The hero, his son-in-law, is a great Bond Street picture dealer, and he captains the Australian cricket team. The staging of the piece, it will be seen, gives the author ample scope for displaying his keen observation both of Fleet Street and St. James's, of the Green Room and Lord's, and the conflict between bloated bourgeois and beggarly lords and ladies is well brought out. As to the main plot indicated by the title, we cannot endorse the publisher's announcement:—"Its moral is a healthy one, and its lesson is that virtue can triumph over vice however beautifully clothed." The moral, as we read it, is not that of Browning's "Any wife to any husband" (misquoted on page 165), but of "The Statue and the Bust." Whether a healthy moral or not, our readers must judge for themselves.

The Quest of Glory. By MARJORIE BOWEN. (6s. Methuen.)

This is the story of Vauvenargues, and follows very closely the incidents of that great writer's life. We begin with the siege of Prague in 1742 and the retreat of the French army, more terrible than the retreat from Moscow. Then follows the weary suit for State employment of a courtier too proud to curry favour and we catch glimpses of *le roi fainéant*, of Voltaire, Marmontel, and Amelot, with a half-length portrait of Richelieu, who plays a leading part in the plot. The third act, entitled "The Quest Triumphant," shows us Vauvenargues when he has found his true vocation as an author. He is homeless, penniless, crippled, half blinded by smallpox, and dying in a garret with none of the consolations of religion, but he triumphs in the consciousness that he has expressed himself, given to the world of his best and nothing lowly done or mean. Miss Bowen has, perhaps wisely, not attempted to present the style of Vauvenargues' writings, but she has finely conceived the life and character of which they were the outcome.

THE N.U.T. CONFERENCE AT HULL. AN IMPRESSION.

HULL has more than a commercial history. It is not simply a place where merchants meet. There are literary traditions to grace it. The name of Andrew Marvell is held in reverence unto this day. He represented Hull at Westminster, and the citizens are proud of the fact. They have done him honour in stone. One statue, however, is lofty and arresting even in a city of splendid buildings. It is the statue of William Wilberforce, a native of Hull. As it meet, he looks out upon the harbour where ships resort from every land. If the legacy he has left be not literary in the strictest sense of the word, he made richer the soul of man which is the soul of literature, after all.

At the civic reception the Mayor gave the delegates a peep into Hull's ancient past. He did so with quainter word than he might easily have found for himself. He spread to view a few of the charters granted to the city from time to time. The documents dated back through all the kings to the thirteenth century. Grey and faded letters with royal signatures there were, too, and a "last will and testament" with date, 1303 A.D. And, hinting of olden days, were the words of James I when, in 1610, he gave permission to the Mayor and Burgesses of Hull to have "the free election and choyce of such person as shall from tyme to tyme bee Scholemaster," provided that they choose "a learned and sufficient man" and that he be "examyned, approved, and allowed by the Archbishops of Yorke." Vast scope for imagination there is in that phrase of the scribe—"a learned and sufficient man." Granted the full significance, how many would pass the test to-day?

I set these ancient matters first not because Conference took note of them, but because it did not. One of the mournful things to report of this Easter assembly of teachers is that, so far as the platform was concerned, the sense of vision was missing. I listened in vain for suggestions of that something which is beyond the dust of classrooms, and which, indeed, transfigures it and makes it tolerable. There is a story of a man who could build a wall, but never a window. So with the speakers at Hull. They touched upon many themes, from school clinics to the parliamentary franchise for women, but seldom did they speak as seers, conscious of light to which the commoner eye is blind. They denounced the Board of Education and the powers that be, particularly in regard to the Commission appointed to inquire into Civil Service promotions, and always in the language of scolding.

No wonder the platform was barren of poetry. "I am disappointed," said a young teacher to me; "these leaders speak not as prophets, but as pugilists." Even the President, Mr. Bentliff, failed in this; he had no word to surprise one as with a landscape. And, if we are to awaken the people to a sense of the wonder that is round about the schools, we must see that we are not blind to it ourselves. Teachers are expected to do more at their annual conferences than sit down and pick blackberries, to borrow Browning's phrase.

I repeat there was a lamentable absence of "atmosphere," and the author of the Holmes-Morant circular could not anywhere have found a stronger defence of his attitude than the tone of the speeches against it. The grand exception was the Archbishop of York. His speech of welcome had no peer. It was nobly conceived, as nobly delivered. Every teacher felt that to serve in the nation's schools has in it something near akin to the priestly order. "I lift my hat to you," said Dr. Lang; "you are the makers of great destinies."

Mr. Marshall Jackman introduced a motion condemning the personnel of the Royal Commission set up to inquire into conditions governing appointments in the Civil Service. It was a vigorous speech against public-school and University caste. Sir George Kekewich surprised us from the background. Humorously enough, he gave us a snapshot of the late Duke of Devonshire as President of the Board of Education. "I took in a list of three hundred names of candidates for the inspectorship. The Duke received me with a sigh.

'Make out a select list,' he urged drearily. 'On what principle?' I asked. 'Choose out the men with the most distinguished academic careers,' said the Duke." This gave Sir George text enough, and he spoke greatly to the liking of the majority. He has wonderful influence over Conference, and one could have wished to hear him get beyond denunciation to a broader theme.

I do not intend to write a chronological account of the Conference. There was a lively debate on Women's Suffrage, when feeling got to fever heat, though not to so high a temperature as at Aberystwyth last Easter. The controversy seemed to many of us to be mistaken. It gave plenty of colour to the journalist, and, for this reason, crowded out from the Press all but the scantiest references to the educational problems discussed that morning. The talk on the claims of rural teachers was on a high level, for instance, but the other topic came along and swept it into oblivion.

Secondary teachers were left in the cold, save for the significant word spoken by the President in his address to a special meeting on the Wednesday evening, which about forty people attended. He said that he was present to mark the fact that the N.U.T. recognized the secondary teachers as an important factor of the Union. He thought that the closer teachers of primary and secondary schools got together, the better it would be for all. This freemasonry, one may add, ought to be more conspicuous on the Conference platform.

Mr. J. L. Paton, of Manchester, addressed the meeting on the question of Examinations in Secondary Schools, and strongly criticized the Report of the Consultative Committee of the Board of Education. While the external examination was useful as a sort of periodic stocktaking and as a means of assessing the work done in a school, it had led to very grave abuses and had prevented the adoption of true educational methods: (1) External examinations, rigid and centralized, could not lend themselves to testing the new subjects and new methods now taught in schools—e.g. manual training, domestic subjects, natural science, geography on modern lines. (2) They had a devitalizing influence—important periods in history were neglected because they did not happen to be set for examination; in literature, annotated editions prevented both teacher and pupil from thinking. Pupils became fluent reproducing machines. (3) They created a craze for results, which were frequently totally deceptive. Promising children were exploited for the sake of results. Mr. Paton did not, however, declare for total abolition. He thought examinations had their place. Like fire, they were a good servant but a bad master, and he appealed for the closer co-operation of inspection and examination. It was a fine utterance, worth many sessions of Conference. Mr. Paton is seeking to bind together the two branches of the profession. This year he is President of the Manchester Branch of the N.U.T.

It was appropriate that Mr. Mease should move that "a cordial understanding between the various bodies representing teachers is essential in the best interests of the whole profession." He described the work that had been done in Sheffield to establish intimacy between the A.M.A. and the N.U.T.

A discussion followed on the constitution of the Central Secondary Schools Committee of the N.U.T. A strong desire was voiced that a proportion of the members of the committee should be elected by teachers who are engaged in secondary schools. The whole matter was eventually referred to the Executive.

The Conference, it will be seen, was far from being a feast of fat things to the non-elementary teacher. Much has yet to be done before the N.U.T. can claim to have entered into a sympathetic understanding of the problems that face teachers in secondary schools. Little can be hoped for until suspicion be banished and a worthier spirit and outlook govern the Conference debates. The true marriage of the two branches of the profession cannot be brought about until the wooing be more sincere and all jealousies be burned away in common passion for the great ends of education. Hull was disappointing, save as a festival; the Conference speeches

were often artificial—in many cases there was undue striving for effect—and the manner of approaching educational questions could by no means be described as “spiritually minded”; and, in education above all things, “to be spiritually minded is life.”

SYDNEY WALTON.

CORRESPONDENCE.

EXTERNAL EXAMINATIONS.

To the Editor of The Journal of Education.

SIR,—It would almost seem, in these changeful days, as if the Englishman had lost the power of *weighing* the force of an argument, and that, in the consideration of even the most vital matters, he was influenced more by the *number* and variety than by the weight of the arguments for or against a course proposed. This conclusion is borne in on us by the perusal of the recent report of the Consultative Committee of the Board of Education on the subject of External Examinations in the secondary schools over which the Board has control. According to this report, External Examinations encourage cramming; they limit the range of studies and stereotype them; they are detrimental to the health of the children; they occupy the thoughts of masters so entirely as to interfere with moral training and the cultivation of character; they encourage an unhealthy rivalry among the children themselves; and they are the cause of undue anxiety among the masters who teach them, &c., &c. The indictment against these External Examinations seems overwhelming; the *number* of the arguments against them is legion; the conclusion apparently self-evident. Let them be destroyed—root and branch! If any be required, let them be confined to a Leaving Examination, to be undergone quite at the end of the school life before going out into the world, and

a Testamur, perhaps, granted by the head master, without examination!

In coming to this conclusion, however, the Committee appear to have overlooked the fact that they have entirely eliminated competition from the education of the young—competition, the most powerful motive force that induces the child to fulfil the main purpose for which he is sent to school. Not only is it eliminated from the ranks of the children, but it is eliminated equally from the ranks of the masters and mistresses who teach them. The evil does not end here: it extends to the heads of schools, who would be deprived by the recommendations of the Committee of all means of evidencing in any way the superiority (or inferiority) of the conduct of their schools.

The Committee may stigmatize the competition set up by the external examination as *unhealthy* rivalry; but the fact remains that rivalry is about the only force that will induce the average English boy to do the best with the faculties with which Nature has endowed him. The impulse to do his best thus set up has also the great advantage of being spread over the whole body of those who enter—it is not confined (as with prize-giving) to a limited number of the best children, but acts equally on the rank and file, not one of whom is indifferent to being posted as a failure, and each of whom is interested in making his position on the Pass List as high as he can.

To the enormous importance of rivalry among children as a force in inducing them to work, the great majority of practical schoolmasters (would that there were more on this Consultative Committee!) would be ready to testify. It is, now that the march of progress has abolished corporal punishment in schools, almost the only incentive available to make a boy work. The normal boy's interests and aspirations are all centred on sports; his feelings towards the acquisition of knowledge range from absolute indifference to positive anti-

(Continued on page 310.)

FROM GINN & COMPANY'S LIST

AN ILLUSTRATED SCHOOL GEOGRAPHY.

By A. J. HERBERTSON and A. E. FRYE.

An adaptation by Professor Herbertson of Frye's "Complete Geography" for use in English Schools. The book contains nearly 700 Illustrations and Diagrams, about 50 Outline and Relief Maps, and 16 pages of fully coloured Maps. Large 4to in size, 263 pages. Price 5s.

PHYSICAL GEOGRAPHY

By W. M. DAVIS. A scholarly, practical text-book, emphasizing man's physical environment as determinant of man's social and political modes of life. 428 pp. With Illustrations and Maps. Price 5s. 6d.

ELEMENTARY PHYSICAL GEOGRAPHY

By W. M. DAVIS. Based on the author's "Physical Geography," with the addition of practical exercises and more space devoted to the atmosphere. 401 pp. Illustrated. Price 5s. 6d.

PRACTICAL EXERCISES IN PHYSICAL GEOGRAPHY

WITH
ATLAS.

By W. M. DAVIS. TEXT.—148 pp. Price 2s. ATLAS.—50 pp. Price 1s. 6d.

The object of this manual is to provide a series of systematic and disciplinary Exercises in Physical Geography, in order that the student may approach this subject through practical work in the laboratory as well as through lessons in a text.

THE MOTHER TONGUE

By G. L. KITTEDGE and S. L. ARNOLD.

BOOK I.—Specially revised for use in English Schools by JOHN W. ADAMSON, B.A., Professor of Education, King's College, London. LESSONS IN SPEAKING, READING, AND WRITING ENGLISH. xiv+294 pages. Illustrated. Price 1s. 6d.

BOOK II.—ELEMENTARY ENGLISH GRAMMAR, WITH LESSONS IN COMPOSITION. xxii+417 pages. Price 3s.

BOOK III.—ELEMENTS OF ENGLISH COMPOSITION. xx+431 pages. Price 4s. 6d.

GENERAL HISTORY

By P. Y. N. MYERS.

704 pages. Price 7s. 6d.

A complete outline in one volume of the World's History from that of the Eastern Nations to the present time. Accepted and recommended as the best brief course in General History. Half-morocco. Contains 30 Maps and over 160 Illustrations.

PART I.—A Short History of Ancient Times. 388 pages. Price 4s. 6d.

PART II.—A Short History of Mediaeval and Modern Times. 488 pages. Price 4s. 6d.

pathy; and now the proposed abolition of this rivalry would leave the teacher helpless in the face of this indifference and this antipathy.

Second only to the effect of rivalry on the children is its effect on the masters who have to teach them. The ambitious and efficient welcome it as giving them the opportunity of proving their efficiency. The somnolent and the inefficient dread it as likely to reveal the fact of their incompetence to the Head of the school who appoints them.

In the same way, the ambitious Head welcomes it as enabling him to spot the weaknesses of his staff of masters, and to remedy them, and thus bring his school up to the level or above the level of others in the same class. And behind the headmaster there stand the public bodies to which many of our large public schools belong—the Education Committees of the County Councils, the City Companies, &c. Are they not equally interested in preserving the External Examination, the only means they possess of testing the success of the schools under their control and the efficiency of the Head whom they have appointed?

In summing up this side of the question, the feelings of the public (the parents of the children who are being legislated for by the Board of Education) should not be entirely disregarded. About their desires in this matter there can be no question whatever. They have not yet been "converted," as the Report itself admits; they take the greatest interest in the success of their children, for which the public outside examination is the only reliable test; and they frequently require the testimony of the certificate awarded in furthering their entrance into business or public employment. It is, in addition, almost the only means they have of appraising the value of the instruction their children are getting at the schools they attend, or of choosing a school to which to send them.

To go one step higher, now that the Board of Education threatens to control (perhaps to absorb) the whole secondary education of the country, are we not, in destroying the public

External Examination, depriving ourselves of the only reliable test of the success of the Board's own administration? May we not even be said, in abolishing this indirect form of criticism, to be destroying one of the safeguards whereby the Board itself may be saved from falling into the stagnation of other great Government Departments, wherein efficiency and merit have little opportunity of being recognized and promotion goes by seniority alone?

T. T. H.

[We willingly admit this letter as the best that can be said for a policy that we have persistently opposed. To answer it would need an article, and we will only ask the writer one question: Does he consider German schools, where external examinations are unknown, less efficient than English schools?—ED.]

GRAMMAR STYLE.

To the Editor of The Journal of Education.

DEAR SIR,—A friend of mine, who read my article in the April *Journal* upon "Grammar and Style," has been good enough to point out to me that, at the meeting to discuss the Interim Report on Grammatical Terminology published by the Joint Committee of the Classical Association, a majority expressed strong approval of the grammarian's method of dividing sentences into "simple" and "complex." To make my point clearer, let me give an instance of a "simple" sentence:—"These grammatical experts, knowing the difficulties of the subject, hearing all sides of the question, desiring to find some satisfactory solution, patiently examining and inquiring, seeing, discussing, weighing and pondering, decided upon the retention of the present grammatical distinctions, leaving the matter thus upon the lines of precedent, fortifying the present distinction by the prestige of their influence, hoping thereby to aid in a satisfactory settlement of hitherto debatable matters."

So much for simplicity. Now let me give an instance of a "complex" sentence:—"To argue that the above sentence may be called *simple* is surely ridiculous."—Sincerely yours,

The Home School, Grindleford,

WILLIAM PLATT.

Derbyshire, April 7, 1912.

A SCHOOL FLORA

For the Use of

Elementary Botanical Classes.

By W. MARSHALL WATTS, D.Sc. Lond.

With 174 Illustrations.

LONGMANS, GREEN & CO., 39 Paternoster Row, London, E.C.

DUSTLESS SCHOOLS

For the effective LAYING of DUST and DIRT, during each Sweeping, and also throughout all the intervening periods—which is of greater hygienic importance,

the Odourless, or powerful Germicidal

USE

FLORIGENE

(A Registered Name suggested by FLOOR-HYGIENE)

On all School, Laboratory, &c., Floors & Linoleums of every description

EARLY in EACH VACATION

for Best Results.

NOT MORE THAN THREE TIMES A YEAR. Easily applied. Floors are impregnated, not sticky—the ordinary daily dry sweeping alone required to clean, without sprinkling of any kind.

"Florigene" is an aid to the prevention of throat and other diseases, and has been awarded the BRONZE MEDAL of the ROYAL SANITARY INSTITUTE. It is also strongly recommended by MEDICAL and other authorities.

Two well-known SCHOOL MEDICAL OFFICERS have jointly reported on the advantages of "Florigene"—

1. Economy of labour in cleaning the room.
2. Prevention of the rising of dust once deposited; hence a healthier atmosphere for breathing.

They also favour its more general adoption.

"Florigene" is being continuously used on the floors of The Royal Naval Colleges, H.M. Science and Art and other Government Buildings; also in numerous Schools, Laboratories, Libraries, Museums, &c., in the United Kingdom and Colonies with approval.

For particulars, Medical Reports and Testimonials write—

JUST PUBLISHED

A BUSINESS READER FOR TOP CLASSES.

ELEMENTARY BUSINESS TRAINING.

By VICTOR H. ALLEMANDY. Crown 8vo, 1s. 6d.

Business men complain that children leave school useless or unsatisfactory to them. It is because some knowledge of the machinery of business, its routine, customs, &c., is indispensable to a boy or girl, no matter what else they have been taught, and what walk of life they may enter. This book has therefore been written in simple language by a practical teacher to give young persons an intelligent knowledge of the details and duties expected of them in a business career. It deals with such matters as writing, indexing, and copying letters; dispatching goods; invoices and receipts, bank-notes and cheques; bills of exchange; the address book, postage book, petty cash book, &c. It forms a Business Reader for day and evening classes, as well as an elementary textbook for commercial schools.

EXPERIMENTAL DOMESTIC SCIENCE.

By R. H. JONES, M.Sc., F.C.S. Crown 8vo, 2s. 6d.

Many authorities are now convinced that science can be adequately taught in the kitchen without a previous training in elementary science, that the principles of science can often be made clear by drawing upon everyday experience and by the aid of kitchen utensils and commodities. The present book, which is intended primarily for Domestic Science Schools and Girls' Schools generally, provides a course based upon this view, and contains popularized information appealing to all interested in the culinary and domestic arts.

* Application for specimen copies will be considered from Teachers stating size of School or Class and enclosing 4d. postage.

Mr. ALFRED J. FLINT, late Assistant Secretary of the Teachers' Guild of Great Britain and Ireland, and now Organizing Secretary of Co-Partnership Tenants Ltd., will be pleased to send a copy of this splendid publication on Housing and Education

Post free on receipt of post card

addressed to him at—6 BLOOMSBURY SQUARE, LONDON, W.C.

Sozodont TOOTH POWDER

and
**SOHOOL
HYGIENE.**

Much depends on those in charge of children for rendering effective the suggestions of Medical Officers and Dentists in regard to Mouth Cleanliness and prevention of Dental Decay.

Urge your scholars to use a cleansing and Anti-septic Dentifrice like Sozodont Powder, and note the difference at the end of the week.

The result will be a pleasure to them and to you.

Sozodont Powder is sold in 6d. and 1/- Hygienic Tins by Chemists and Stores everywhere.

HALL & RUCKEL,
London and Manchester.

HORACE ODES, i. 16.

A PALINODE.

OF a fair mother child more fair,
Those ribald rimes of mine don't spare;
Burn them, or let the raging West wind
Over the sea that libel bear.

Not Dindymene so can quell
The sense, nor in his Pythian cell
The god, nor Liber; not so madly
Corybants clang their gongs and yell,

As savage wrath; wild seas that drown
It braves, and armed warriors' frown,
And ravenous fire, and Jove in angry
Thunder and lightning crashing down.

Prometheus forced to add, they say,
Some part of all flesh to his clay,
Took from the lion his gall and made us,
Each in his wrath, a beast of prey.

'Twas wrath that caused Thyestes' fall,
'Tis wrath that threatens cities tall
With ruin, till the proud oppressor
Marks with his share the battered wall.

Then, lady, curb your anger; I,
I too, in days, alas! gone by,
When my young blood ran hot, was tempted,
Fool that I was, to rimes to fly,

Those wanton rimes of youth. Forbear,
Accept a penitent's meek prayer.

Oh, pardon; smile once more upon me,
Let me again your friendship share.

F. S.

OBITUARY.

THE REV. F. RENDALL.

THE death of the Rev. Frederic Rendall, which occurred on April 21 at his home in Philbeach Gardens, removes almost the last surviving member of the Harrow staff appointed by Dr. Vaughan. That staff included many men of mark—Bishop Westcott and Dean Farrar, E. Bradby and James Robertson (in succession Head Masters of Haileybury), and E. M. Young (Head Master of Sherborne), Prof. Henry Nettleship, Bosworth Smith, E. E. Bowen, and R. H. Quick. Frederic Rendall was one of the famous Birmingham scholars educated by Prince Lee. He was senior in the Classical Tripos of 1845, bracketed with Dr. Holden, Twenty-ninth Wrangler, and first Chancellor's Medallist. Elected to a Trinity Fellowship the next year, he joined the Harrow staff in 1848, and held his mastership for thirty-three years.

Rendall was not great as a teacher, and the Lower Fifth Form was a block on which the razor made no impression. In those prehistoric days the art of teaching was unknown, and his colleague, Quick, was regarded as a harmless faddist with a bee in his bonnet. But as a house master he won the affection and esteem of his pupils. Grove Hill was a deservedly popular house with parents, as one in which their boys would find some of the amenities and care of home life. Among Mr. Rendall's house pupils were A. J. Symonds, Lord Rowton, and Lord Moncreiff. Since his retirement Mr. Rendall devoted himself to theological work: he was a frequent contributor to the *Expositor*, and published several commentaries on books of the New Testament. He died in his ninetieth year. The late Head Master of Charterhouse is his son.

AMONG the Summer Courses of Lectures of the London School of Economics we note as likely to attract teachers and intending teachers:—Prof. Cannen, on The Elements of Economics; Mr. Lees Smith, on The British Constitution; Dr. Knowles, on The Growth of English Industry; M. Boulgé, on Les Etapes du Mouvement Social en France au dix-neuvième siècle. Most of the lectures are given or repeated in the evening. For times and fees apply to Secretary, L. S. E., Clare Market, W.C.

BLACK'S REFORM FRENCH COURSE.

A CONSECUTIVE AND CONNECTED COURSE.

Edited by F. B. KIRKMAN, B.A. Oxon.

LA PREMIÈRE ANNÉE DE FRANÇAIS.

By F. B. KIRKMAN, B.A. Oxon., Occasional Inspector to the Board of Education, Oxford and Cambridge Joint Board, &c.

Fourth Edition, Revised. With or without Vocabulary. Small crown 8vo, cloth. Price 2s. Fully Illustrated.

The text describes, in the form of a continuous narrative, with dialogues, a day passed by an English boy in Paris, and teaches incidentally some knowledge of life in France.

LA DEUXIÈME ANNÉE DE FRANÇAIS.

By F. B. KIRKMAN, B.A. Oxon., Occasional Inspector to the Board of Education, Oxford and Cambridge Joint Board, &c.

With the Assistance of

CH. M. GARNIER, Professeur Agrégé au Lycée Henri IV, Paris; and W. H. B. LEECH, M.A., Head Master of the Penrith Grammar School.

With or without Vocabulary.

Small crown 8vo, cloth. Price 2s. 6d. Fully Illustrated.

A sequel to "Première Année," the vocabulary of which deals chiefly with the home, the street, and the school. This book takes the learner to the country and seaside in the form of a tour through Brittany and Normandy. The book is self-contained; everything required by the pupil will be found in it.

TO STANDARD OF PRELIMINARY LOCALS.

LECTURES ET EXERCICES, COURS ÉLÉMENTAIRE.

Small crown 8vo, cloth. Price 2s. Fully Illustrated.

Continuation to "Deuxième Année." Stories; Letters; Chapters from French History, 1180-1643. With Grammar Tables. No Vocabulary. By F. B. KIRKMAN, L. CHOUVILLE, and Miss A. P. PECHEY.

TO STANDARD OF JUNIOR LOCALS.

LECTURES ET EXERCICES, COURS MOYEN.

Small crown 8vo, cloth. Price 2s. Fully Illustrated.

Continuation to "Lectures et Exercices, Cours Élémentaire." Chapters on France and its History, 1643-1804. Edited, with Exercises, by M. P. ANDREWS, M.A. With or without English Notes. No Vocabulary.

TO STANDARD OF SENIOR LOCALS.

LECTURES ET EXERCICES, COURS SUPÉRIEUR.

Small crown 8vo, cloth. Price 2s. Fully Illustrated.

Continuation to "Lectures et Exercices, Cours Moyen." Chapters on France and on its History from 1804. With Exercises by Miss F. M. S. BATCHELOR.

TO HIGHER CERTIFICATE STANDARD.

CHEZ LES FRANÇAIS.

Small crown 8vo, cloth. Price 2s. Fully Illustrated.

Continuation to the preceding. Chapters on Modern France from the best authors. Higher Certificate Standard. By H. CARTER, M.A. With Exercises by Miss SHEARSON, M.A.

For Additional and Supplementary Readers, please apply to the Publishers for full List.

PUBLISHED BY ADAM & CHARLES BLACK, 4, 5, & 6 SOHO SQUARE, LONDON.

HARRAP'S LATEST PUBLICATIONS

AN ENTIRELY NEW SERIES. JUST READY.

To meet the requirements of the Board of Education.

Extract from the Official Circular No. 753 on "The Teaching of English":—"In every class repetition from memory should form an essential part of the instruction in Literature. There is no reason for restricting learning by heart to poetry, as is commonly done; passages of good prose should be learnt by heart also. Nor need all the pupils in a class invariably learn the same piece."

A Treasury of Prose and Poetry

For Learning by Heart. In Six Graded Parts. Compiled by AMY BARTER.

Parts I to V, 96 pages each. Stiff paper, 5d.; limp cloth, 6d.

Part VI, 128 pages. Stiff paper, 6d.; limp cloth, 8d.

A Special Prospectus of this New Series will be sent post free on application.

The Poetry and Life Series

General Editor, Professor WILLIAM H. HUDSON, Staff Lecturer in Literature to the University Extension Board of the University of London.

A new series of Monographs on the Poets, in which the principal work of each poet is shown in its proper relation to the life of its author. Each volume contains a representative selection of the poet's work printed in chronological order in the story of his life.

NEW VOLUMES.

Spenser and His Poetry. By S. E. WINBOLT, M.A. 160 pages, 10d.

Mrs. Browning and Her Poetry. By KATHLEEN E. ROYDS. 136 pages, 10d.

Milton and His Poetry. By WILLIAM HENRY HUDSON. 184 pages, 1s.

Scott and His Poetry. By A. E. MORGAN, B.A. 160 pages, 10d.

Other Volumes in preparation.

A Descriptive Circular with Professor Hudson's General Preface will be sent to any address.

Told Through the Ages. 34 Volumes

Large crown 8vo, 256 pp. 16 Plates. Cloth boards, 1s. 6d.

LATEST VOLUMES.

Stories of Pendennis and the Charterhouse. Selected from Thackeray by AMY BARTER.

Sir Guy of Warwick.

Heroes of the Middle Ages. By E. M. TAPPAN, Ph.D.

The Story of the Crusades. By E. M. WILMOT-BUXTON, F.R.Hist.S.

All Time Tales. 25 Volumes

Each with at least 8 Full-page Illustrations. Printed in clear type and bound in limp cloth.

"The London City and Midland Bank, Ludgate Branch." *Postage stamps can only be received at the rate of thirteen to the shilling.*

Notice must be given of all remittances through the Post Office from abroad stating full name and address of the sender; and all Foreign Money Orders must be crossed for payment through a Bank.

Date of publication of next issue will be found at top left-hand corner of front page.

LONDON: WILLIAM RICE, 3 BROADWAY, LUDGATE HILL, E.C.

"HYSTERICA PASSIO MEDICORUM."

THE present writer once tried to stop a fight between two women in the Euston Road, but failed to break through the gang of male ruffians who were keeping the ring. Espying a policeman in the distance, he called his attention to this breach of the peace, and the policeman went off at a somewhat leisurely pace in the direction of the crowd, but, instead of intervening, he was seen mizzling down a side street. Which things are an allegory. We have watched the contest between Suffragists and Suffragettes, between one half of the Cabinet represented by Mr. Asquith and the other half represented by Mr. Lloyd George, and we have held our peace. But we have no mind to play the part of the prudent policeman on the plea that the Suffrage question does not concern a non-political journal, and the lull which has followed the rejection of the Conciliation Bill affords us an opportunity of expressing our sentiments on a question that is no less educational than political.

That this is so is shown by letters to the *Times* from two distinguished doctors, who profess to pronounce judgment purely on physiological grounds and unbiased by its political bearings. For our purpose we need quote only the last paragraph of Dr. Leonard Williams's letter:—

It is time that parents and guardians realized what this means [screaming and scratching and wanton destruction] in the matter of the development of the characters of those for whom they are responsible. If there are no more Marthas in this country, and the Marys are ever and anon to punctuate their passion for fruitless contemplation of imaginary wrongs by wild outbursts of organized tarantism, sacrificing their physical and moral womanhood on the sorry shrine of a ballot box, then the lunacy laws will require revision.

We need not take very seriously such wild and whirling words, though they appear in large type on the leader page of the *Times*. Dr. Williams is evidently a homœopath who believes that stone throwing can be cured by throwing mud. But they are significant as indicating what is often felt but rarely expressed, the revolt of primitive man against the

higher education of women. There are still many men who hold with Dr. Williams, though they have not the courage of their opinions, that we should revert to the training of Marthas, the housekeeper, the Hausfrau, the odalisque, and that Marys who have "chosen the better part" are an abnormal product of the forcing house that needs to be severely checked, and in the last resort consigned to Bedlam.

Sir Almroth Wright's letter of three columns (*verbosa et grandis epistola*) merits more careful consideration, but we can deal only with parts of it. He begins by saying that there are facts of sex on which no man feels at liberty to speak (and we agree with him) and he then proceeds to discuss these matters fully and unreservedly. Here we cannot follow him. He lays down as a first principle that the normal condition of women is motherhood, and we agree likewise with the rider that fatherhood is the normal condition of man. The one remedy for the present discontent he finds in the emigration of the half million of excess female population. Peace will come when every woman for whom there is no room in England finds rest beyond the seas, "each one in the house of her husband." That such a plantation beyond the seas is highly to be desired we should be the first to admit, but it will not bring about Sir Almroth's millennium of forty-two millions of contented females, all actual or prospective mothers and all offering willing subordination to the father or husband who holds the purse strings and rules by the right of the stronger.

The fallacy that vitiates the whole of Sir Almroth's argument is the assumption that the sexual instinct dominates all the relations between men and women to the exclusion of all other, the ignoring of a common humanity. He believes with the author of Genesis that "male and female created he them," the man to till the ground in the sweat of his face and the woman to be his helpmeet and replenish the earth. He has still to learn the higher gospel that Man (*der Mensch*) shall not live by bread alone; that in heaven, and in more than one mansion of the kingdom of heaven on earth, there is neither marrying nor giving in marriage.

To descend to particulars, Sir Almroth tells us that a man doctor is unwilling to meet in consultation a woman doctor because he wishes to keep up as between men and women "the modesties and reticences upon which our civilization has been built up." Does he not see that in the sick room sex ceases to exist; that, if he were logical, he would attend none but men patients and banish all female nurses from the hospital? For such modesties and reticences we must look to the East with its harems and zenanas.

Again, he pronounces it a fatuous claim that women should receive the same wage as men for the same work. If, and so far as, by reason of sex, their work is inferior, *cadit quaestio*, but some of the grounds that he alleges for their universal inferiority seem to us (to use his own word) fatuous. A woman, forsooth, cannot work cheek by jowl with a male employer, nor work among men as a man with his fellow employees. This imaginary incompatibility is disproved every day in the Civil Service, the Inspectorate, the Post Office, Banks, and Kew Gardens.

Sir Almroth is more discreet than his colleague and does not directly attack the higher education of women, yet he asserts that militant hysteria is fostered and encouraged by colleges and schools which are staffed by unmarried suffragists who teach young girls "such tales as it never entered into the heart of man to conceive" of the rights of woman and of the indignities and outrages that she has suffered at the hands of man. We venture to assert that this is a pure fiction of the brain, and shows that Sir Almroth knows no more of girls' colleges and schools than we know of bacteriology, and in proof we would challenge Sir Almroth to name any association of men, from the Royal Society to the Head Masters' Conference, so level-headed and free from cranks and faddists as the Association of Head Mistresses.

We should like to have discussed the letter paragraph by paragraph, and it is only out of consideration for our readers that we have chosen salient points that could be dealt with shortly. It would have been easy to show that some of the

arguments are mere claptrap and puerile. Thus, because *en dernier ressort* it is a vote that determines the execution of a criminal Sir Almroth concludes that "the noblest woman in England would see that it is not precisely her job to hang a murderer." Does he hold that by signing a death warrant Queen Victoria was degrading her sex? As a climax we are asked whether the legislator would be helped in remodelling the divorce or the bastardy laws by the presence of unmarried suffragists as assessors. Could a more unfortunate instance have been chosen? For answer we would quote the dictum of a great Roman jurist, A.D. 215. Ulpian writes: "It would be most inequitable if a man demanded chastity (*pudicitia*) from his wife when he himself in no way set her the example." Thanks to J. S. Mill and other like-minded male suffragists, the English law of divorce has been during the last fifty years reformed and purged of its grossest inequalities, but it still lags behind the Roman Code of the third century. Would not the pace have been quickened if women had been able to express directly by their votes their sentiments on marriage?

We detest militarism in every form more heartily than does Sir Almroth Wright. Like him we would punish all law-breakers, men and women alike, but his contention that the world is governed by physical force seems to us not only immoral but contrary to fact. It is not the fact that suffragists are composed of sexually or intellectually embittered women, women who have failed to attract husbands or been worsted in the unequal struggle of active life. For a complete answer by anticipation to Sir Almroth Wright we must refer our readers to "Homo Sum, a letter to an Anti-Suffragist from an Anthropologist." The letter is unsigned, but there is no attempt to conceal the authorship, and we should be curious to know under which of his neurotic categories Sir Almroth would class the writer.

Since the above was written, Miss Jane Harrison has acknowledged the authorship of "Homo Sum," and Miss Faithfull has indignantly denied that Cheltenham College or girls' high schools generally are used as propaganda for women's suffrage.

THE USE OF THE TALKING MACHINE IN THE TEACHING OF MODERN LANGUAGES.

THE claims of the talking machine as an aid to the teaching of modern languages are now being seriously considered by teachers, yet it would seem that in very few cases has the phonograph or gramophone been put to the test of actual work in the classroom. Articles have appeared in various educational journals dealing with the advantages of one or other of these instruments to the teacher in improving his pronunciation, and in keeping him in touch with the foreign language, but few (if any) articles dealing in detail with their practical use in teaching have been available at least in this country. The time has therefore seemed opportune to invite attention to the practical side of the matter, and to state the results of the writer's own experiments with various classes of boys and girls ranging in age from twelve to fifteen years.

At the beginning one may be pardoned for emphasizing the truism that no talking machine can ever take the place of the teacher. The teacher has still quite enough scope for the display of his linguistic powers, and he must not feel that he is discounting his own capabilities in employing any means that minimizes the inevitable drudgery of repetition. In ordinary teaching we know it to be a fact that pupils will repeat wrongly over and over again certain sounds rightly pronounced by the teacher, except the latter by suitable methods removes the cause of error. The same is true to a still greater extent when a machine is used. Nor need the teacher who employs either of these instruments feel that he is thereby making confession of his own weakness. Of course his pupils

will criticize and compare; most teachers will relish that criticism and comparison. Indeed, it is good for us to realize that our pupils are on the *qui vive* for our faults. Any means which arrests the attention and thereby focuses the child's mental powers is valuable, and the use of the machine without doubt renders the child more critical and more observant. Nor is the increased attention a short-lived one provided that the use of the machine is not overdone.

Some difference of opinion exists as to the relative merits of the phonograph and gramophone as aids in the study or teaching of languages. In the writer's opinion the phonograph is the more useful instrument for school purposes. With a phonograph a teacher is able at small extra cost to make records of his pupils' efforts, and can usually with the aid of an obliging native add to his collection of records for class use. This making of pupils' records is perhaps the most potent influence that a teacher can possess in the improvement of the individual pronunciation of his pupils.

We may repeat and repeat our sounds; we may bring into our lessons all the help that phonetics can give to make our pupils' pronunciation approximate to that of the native, but our efforts do not appeal to the child in the same way that the possession of his own record does. A child will take unlimited trouble to satisfy his teacher if he knows that he will become the proud recipient of a self-made record which he can put on his own phonograph or that of a friend. Apart from the actual value of these records to the pupil, they are often the means of interesting the parent in the child's work, and this is a factor the importance of which will be readily admitted by most teachers.

No doubt it is true to some extent, as Prof. Rippmann points out in *School World* of April, 1906, that "the making of records is of real value only to the trained observer." The teacher ought surely to be included in the category of the "trained observer." Records made at regular intervals ought to be of value to the teacher if he selects his pupils properly and makes a careful note of progress. But the making of records is of use to the child quite apart from the increased enthusiasm evoked by the effort. It has been found that the sound of a boy's own voice will, in some cases, help him more than any amount of explanation or criticism from the teacher. The pupil can compare his effort with that of the teacher (or better, with that of a native). Children are very keen critics of their own work. They can state in the main where differences exist between their efforts and their "copy." It is the business of the teacher to get rid of these differences, and he accomplishes this much more quickly when the pupil appreciates the fact that there are such differences.

The value of this record-making having been insisted on, it may be pointed out that the actual work can be satisfactorily attempted by the veriest novice. The Edison recorder costs 12s. 6d.; a suitable horn for recording can be made of cardboard, and pupils are usually glad to supply their own "blanks." The Edison blanks (1s. each) have been found to be the only satisfactory ones, and have the advantage that they can be used several times after being "shaved"—a process which usually costs a penny.

Exception has been taken to the peculiar *timbre* of the phonograph, and to its somewhat *nasillarde* reproduction of certain sounds. But it may be questioned whether its slightly strident tone is not, after all, a real advantage, especially in the case of French. It seems to help the teacher in that it serves to emphasize the vowel sounds, and thereby counteract the pupil's tendency to diphthongalization. No tendency to reproduce the *nasillarde* qualities has been observed—here no doubt the voice of the teacher keeps matters right. Comparing the results obtained with the gramophone, and other machines of that type, a good phonograph seems to have less scratching sound, and to be more easily followed at the back of the classroom. Careful attention must be paid, however, to the speed at which the reproducer is travelling. The Edison "Standard" (£5 15s. 6d.) is a very suitable machine for school purposes; if it is not desired to make records, one of the cheaper machines will serve almost as well.

It is in the matter of records that the teacher has most ground for complaint. At present, there seems to be very little variety of cheap records available. Really suitable records are, however, supplied by Mrs. J. G. Frazer, of Cambridge, and, with the exception of a few suitable ones in Edison's list, those of Mrs. Frazer were used almost exclusively in the present instance. These cost 3s. each or 34s. 6d. per dozen.

The French records in this series consist of "Fables" of La Fontaine; dictation passages based on these fables; selected scenes from Molière; a very useful selection of French phonetic exercises; nursery songs; dialogues from Mrs. Frazer's well-known "Scenes from Child Life"; advanced classical pieces and French recitations. One has only to mention Mrs. Frazer's name to feel assured of the educational soundness of the series, and the teacher who desires a selection of records of varying degrees of difficulty and suitable for class use (an important point when one is dealing with records) cannot do better than make use of this exceedingly good collection.

Perhaps the way in which the phonograph can render most service to the modern language teacher is in the matter of songs. In teaching songs one is compelled to spend a considerable time before the pupils are familiar with the tune. Pupils supplied with copies of the words can learn the song from the phonograph in an amazingly short time. One feels, however, the need of more advanced songs for elder pupils than are at present available in this series. With younger children they are a great help forward in what is usually one of the most enjoyable features of their modern language lessons. By means of the phonograph one is enabled to double the number of songs taught, and certainly to reduce materially the labour of teaching them. After a little practice the child, gradually join with the instrument, and seem to take an especial pride in commencing exactly with the machine.

The spoken records may be put to various uses. To bring specially into prominence the intonation of the language as a whole, an unknown record can be put on and the general flow of sound noticed. Children are keen in trying to find out as much as possible of the record, and they will try again and again until they have satisfied themselves as to its contents. Gradually the record may be used as a dictation exercise, sentence by sentence, and each pupil can note the words or phrases which he failed to recognize. In this way it has been found that certain definite related sounds persistently give trouble to certain individuals. In this exercise the pupil can work with his teacher to increase his power of understanding the spoken language.

The special dictation records have proved very interesting. They are modelled on fables, &c., which have already been taught, and thus the pupil is familiar with the vocabulary of each test. The whole piece is recited first, and then at suitable intervals each phrase is repeated three times. Occasionally the records tend to go rather quickly, and the struggle to keep pace with the inexorable machine becomes interesting.

After sufficient repetition the recitations have a marked influence upon the pronunciation of the children. Simultaneous recitation (if the practice is indulged in) follows quite as easily from the machine as from the teacher. Besides, the latter is thus put in a much better position to point out mistakes than if he were attempting to do the work which the machine does in addition to his proper work—that of drawing attention to errors. It has been found an excellent plan to allow five or six pupils to repeat with the machine—the others listening and noting any differences.

Perhaps most benefit is reaped from the Phonetic Exercises, as they provide drill on those sounds which are most difficult. There are exercises on the vowel sounds themselves; sentences illustrating different phonetic principles; exercises on nasal vowels; and a collection of general exercises on pronunciation and enunciation which are great favourites with children. It might be pointed out that the isolated vowel sounds are not always a success; in some cases they tend to take away the attention of the class from the sentence which follows. This phonetic collection is of

great help to the teacher; he can drill class after class and still preserve *some* freshness of voice. This saving of voice and energy alone would, in the writer's opinion, justify the use of the phonograph even if it possessed none of the advantages which have been claimed for it in the preceding paragraphs.

The phonograph, with a dozen records and recorder, means an initial expenditure of over £8, and grants are not, as a rule, readily obtained for apparatus of this description. But to apply (with slight alteration) the words of the High Master of the Manchester Grammar School in his Presidential Address to the Modern Language Association:—"Let the teacher show that the machine is worthy of its hire and before long, by an inevitable sequence of economics, the hire will be available for the machine."

CAESAR IN BRITAIN.

BY A DRUID.

GOVERNMENT inspection is a reality; but, in spite of this, it is still the local examinations of Oxford and Cambridge which hold the controlling influence over the teaching in most secondary schools. It is their syllabus which fixes the work to be done during each year, and the style of previous papers determines the points which are chiefly to be dwelt upon. Whether we like the fact or not, it is best to realize it and to appreciate the tremendous influence exercised by these examinations on the education of the country. It is useless to try to reform the teaching done in schools unless such reform is encouraged by the style of papers set by these examining bodies, and it is remarkable how very little different these papers are from those which were set thirty years ago. The examiners seem to have forgotten nothing and to have learnt nothing.

The educationist may say that examinations are a mistake and have a deadening effect on teaching; but, unfortunately, the public judges of a school by the number of its successes, and an assistant master who does not see that his pupils pass in the subjects for which he prepares them will quickly find that he must seek for another post. Teachers, though they may chafe under the conditions by which they are bound to do and teach certain things, are more or less slaves to the system in which they live and in which they have to do their work.

It is this fact which explains the common use which is made of translations of the Latin authors which are read in ordinary schools, particularly of Caesar. Writer after writer in the various educational magazines has pointed out the unsuitability of the "Gallic War" for elementary classes, but as it is always

the prose subject for the Locals, Caesar becomes the chief author read by most boys. His constructions are hard, his sentences frequently long, and his interest for the general reader of the smallest. But, though this has been said again and again, it has had absolutely no influence with examiners, which must be the excuse for repeating it once more. The majority of scholars in our grammar schools come to them, at the age of twelve or thirteen, with absolutely no knowledge of Latin, and when they begin to prepare for the Junior Locals they have had time for little experience in continuous translation. During the first term, therefore, fifteen chapters are the most that can be read thoroughly by those who have little or no knowledge even of the accusative and infinitive or the ablative absolute. As three lessons a week, or more usually two, are the most that can be given to translation in these days of almost unlimited subjects, it follows that during the rest of the year from twenty to twenty-five lines must be read during each lesson of about forty minutes, even to go over the work only once. But any teacher knows that by the time the end of the book is reached the first part is forgotten, unless there has been frequent revision. The public has to see results, the Head has to be satisfied with passes, and the boy requires a certificate, perhaps for professional purposes. There is a broad and easy way for the satisfaction of all parties. Distribute translations; allow the use of cribs. They are detrimental to the study of Latin, they discourage self-reliance, but they increase the chance of a pass and render good marks a greater certainty. Those who thoroughly disapprove of them are yet frequently driven to their use by the necessity of revision, and of cramming up a book of Caesar which there is not time properly to read through.

Teachers are bound by the examination system, and they cannot free themselves from its requirements. Their complaint is that their efforts after reform are not backed up by those who have the setting of the papers—a class of men who, as a rule, have little or no practical acquaintance with class work. It is often whispered that trade and money-making are at the bottom of many abuses which are difficult to understand; that Caesar is set because the publishing houses have copies of which they wish to dispose; that the set books in general are arranged not for the advantage of education, but for that of the University Presses. Of course, this must be a slander, but such things are said, and it is often difficult otherwise to explain why certain authors have so frequently to be read. But the vagaries of examiners are always inexplicable. Those who have the setting of papers seem to be quite unaffected by opinions expressed over and over again by the highest authorities on educational matters. In English subjects the absurdity of turning the finest thoughts of the poets into the worst and baldest of prose has been demonstrated for years past; but so long as examiners ask for paraphrase so long will time have to be wasted by practising it in class. But this is a digression. My main point is this—that the examination in Latin of the University Locals does not conduce to the best teaching; that it encourages the use of translations even by those who disapprove of them; and that many of the books set are quite unsuitable for the majority of the candidates.

I would suggest, then, that Caesar be entirely abolished in all elementary examinations; that the set book necessary for a pass be much shorter than at present; and that, for the sake of more advanced classes taking the same examination, two or more books may be set, but that one of these should always be sufficient for a pass in the subject.

If the statistical tables of the Locals be examined, it will be seen that there is something decidedly unsatisfactory in the present system; for only a small proportion of the candidates examined take Latin, and yet it is a subject almost universally taught in the schools by which these examinations are chiefly supported. No doubt the schools themselves are largely to blame, but with a different sort of papers a different result might be attained. A change of some kind is manifestly necessary, but, to produce a thorough reform, it is, above all things, necessary to convert the examining bodies.

CONFERENCE ON SCRIPTURE TEACHING IN SECONDARY SCHOOLS.

THIS Conference was held at Cambridge, April 10 to 13, and was well attended, though the disorganization of the railway services prevented the attendance of some who would otherwise have been present.

Wednesday evening, 8 p.m.: opening address by the Chairman, Mr. H. CRAIDOCK-WATSON, M.A., Head Master of Merchant Taylors School, Crosby, Liverpool, on "The Place of the Bible in Public School Education."

Mr. CRAIDOCK-WATSON pointed out that, while there was no religious difficulty at present in the public schools, it was a question whether this was not due rather to indifference than to wise tolerance, and with the improvement in Bible teaching difficulties might well arise; if so, they must be prepared to face them and to overcome them by the exercise of a little worldly tact as well as of Christian charity. Common work for common ideals was the great solvent of religious controversy. By an improvement in their Bible teaching he meant not only an improvement in method and a more satisfactory dealing with the problems of modern criticism, but also the giving to the Bible lesson a more religious value. To this end mere syllabuses were of little value; it was "the man behind the guns" who counted. Modern teaching in all subjects made more of a demand on the teacher, and the Bible lesson above all required not only considerable knowledge but the greatest moral earnestness on the part of the master. In laying stress on this he was not blind to the danger of appealing too directly to the religious instincts of the growing boy and of making a "prig" of him. The development of the schoolboy followed the development of the race, and in the "Viking" stage the fostering of the right habit and the setting before him of the right example were all-important. For this purpose the Old Testament, properly edited, was an ideal textbook; its development followed the lines of development of the child's mind. The first thing they had to do was to awaken interest in the Bible, which was too often to the boy a *dull* book. To do this they must appeal to the historical, the literary, and other human interests. The different values of the different books must be brought out, the distinction between prose and poetry, history and allegory made clear. The old-fashioned literalism was a thing of the past, but its evil consequences remained in much of the indifference, if not scepticism, of the day. The Prophets, too, must be put into their proper historical perspective, and their lessons for their own day as well as ours brought out. Through all this, the moral and spiritual value of the Bible must not be neglected; above all things they must give purpose to their lessons by emphasizing the spiritual unity of the Old Testament as a preparation for the New, and as a progressive revelation of the purpose of God to man. Without the foregoing history of Israel they could not fully understand Christ, and they were learning more and more to study the life of Jesus in relation to its human antecedents. This alone could restore to them that clearness of vision which had been too often blurred by a medieval perspective. When they turned to the New Testament they were naturally on a higher plane and could concentrate more on the spiritual teaching. At the same time they would recognize that historical issues must submit to historical treatment. Truth had nothing to fear from honest criticism. They would be careful to point out, even at school, that in the New Testament also there was a progressive revelation of God's truth to man; that there was an advance in the comprehension of the personality of Jesus Christ between St. Mark's Gospel and St. John's, a difference between the position of Peter and of Paul. The boy must leave school forearmed against the critical as well as moral difficulties he would have to face in the workshop or the University.

Thursday morning, 10—11.30 a.m.: "The Teaching of the New Testament," by Rev. Dr. H. B. SWEET, Regius Professor of Divinity.

Prof. SWEET said that the phrase "preliminary instruction" seemed to him exactly to express what New Testament teaching in schools should be. The power of the University student to profit by the further teaching he received depended largely on the training he had at school. The aim of school teaching should be largely knowledge of the subject matter, though in the senior forms the ground might be broken in regard to modern criticism. It was better for boys to meet with those difficulties at school than in a more unsettling form for the first time in after life. By criticism he meant that which was based on sufficient data or rested on a reasonable and probable interpretation of the facts. The introduction of immature minds to mere destructive criticism was to be deprecated. If he rightly understood the purpose of their Conference, there was no one who wished to make the New

Testament a mere exercise-ground for their intellectual faculties. As Christian teachers their chief interest in the Gospels lay, not in the literary or textual problems, but in their contents. Their object was to interpret to their scholars the Christ of the Gospels. Here the very familiarity of the words was in itself a danger. They had to "restore the picture" dimmed and blurred by the dust of years. To do this, they must break through the crust of conventional interpretation, and this could not be done without very careful preparation on the part of the teacher. This preparation must consist both of study and reflection. It was the personal impression of the teacher that would be the inspiration of the class. It was in the interpretation of the sayings of Jesus Christ that he had found undergraduates fresh from school most seriously at fault. Much might be done at school to help boys to get beneath the surface of the words, so as to think for themselves, and to express their thoughts in modern paraphrase. In their study of the New Testament he thought that the Synoptic portrait of our Lord should have the foremost place in the preliminary school teaching, and that boys should begin, as the early Church began, with the simple records of the facts of our Lord's earthly life before proceeding to the interpretation of the facts as supplied by St. Paul and St. John.

At the close of his paper Dr. Swete recommended many books for the teacher's own use, among others Latham's "Pastor Pastorum" as an instance of the value of personal study and reflection; and for linking up the history of the Old and New Testament narratives, "Jerusalem under the High Priests" (Beavan).

The remainder of the morning was occupied in a discussion of the miraculous element in the Gospels and the best way of presenting it to the youthful mind, so that the boy would have nothing to "unlearn" afterwards, and would best be prepared to face the intellectual difficulties which would meet him at a later stage.

In the afternoon a most enjoyable visit was paid to Ely at the invitation of Canon Kennett, who kindly took the Conference over the Cathedral, giving them the benefit of his intimate knowledge of its history, and afterwards entertained them to tea.

Thursday evening, 8 p.m.: "Is the Old Testament worth Presenting to the Young?" by Rev. Dr. FOAKES-JACKSON, Dean of Jesus College.

The title of his paper, Dr. FOAKES-JACKSON said, raised an important question, and there were many considerations which might be urged in favour of a negative answer. The morality inculcated in the Old Testament often needed some qualification. Its science and geography were full of difficulties. In its history facts were frequently subordinated to purposes of edification, and again many of the stories related could hardly be called edifying. Generally, it was asserted that the Old Testament was not of sufficient value as a medium of religious instruction to be presented to schoolboys. In reply to these objections he wished to submit a few considerations. First, in regard to the moral teaching: moral consciousness was a matter of development, and standards of morality varied. In the individual, as well as in humanity in the aggregate, morality was progressive, for it was the fruit of experience. Further, much of the ethical teaching of the New Testament was based on the Proverbs and wisdom-literature of the Old. Further, its teaching might be described as national, and was it not necessary at the present day to lay stress upon national righteousness? In regard to the second question, the antagonism between the Old Testament and elementary truths of science did not present the difficulties it did forty years ago. We now frankly recognized that the Bible did not profess to teach us science, and that the ignorance of the ancient Hebrews in this respect did not detract from the value of the truths they had to teach us. He urged then the retention of the study of the Old Testament. In spite of its difficulties, its stories stirred the imagination like nothing else in the world. Above all, it was the key to the revelation of the New Testament, which was based upon a right understanding of the books of the Old Covenant.

After a discussion on Dr. Jackson's paper, Mr. C. J. EVANS, M.A., Head Master of the Friends' School (Leighton Park) at Reading, opened a practical discussion on "Textbooks and their Use." The substance of this will be given in the Bibliography to be published in the full report of the Conference.

Friday morning, 10 a.m.: "School Teaching and Modern Criticism: Some Practical Difficulties," by Rev. H. COSTLEY WHITE, M.A., Head Master of Bradfield College. (See newspaper account.)

Modern criticism had made the teacher's part easier in two ways: it had made the Bible a real human book, and it had left him a freer hand to deal with it. As regards the Old Testament there was, thanks to modern scholarship, a body of definite knowledge that they could and were bound to impart to their pupils. With respect to the New Testament, though something had been accomplished, they still moved in a region of speculation, and the teacher could only profess his ignorance or state what he believed as his personal opinion. To take an extreme instance, if the teacher were questioned about the Virgin birth, he (the speaker) was not bold enough, nor was he qualified, to say what the answer should be. If the teacher handled the question with

honesty and could speak with conviction, he could safely speak his whole mind. If he could not, he could use what tact he possessed to postpone the answer till the question could be reopened by another master under more favourable conditions. The essential qualifications for the teacher of Scripture were honesty and conviction. Any teacher who was convinced of the truth of the Christian religion as summed up in the Apostles' Creed could discuss frankly the most glaring difficulties of the Hebrew and Christian records, and by so doing confirm instead of subverting the faith of his pupils. Modern thought had given a new and juster view of inspiration, and it was the bounden duty of the teacher to bring all the teachings of the Bible into harmony with the practical commonsense and experience of boys of the twentieth century.

The Rev. Canon KENNETT, Regius Professor of Hebrew, then read a paper on "The Teaching of the Old Testament." He urged that for all but the highest class textbooks should be discarded and lessons given from the Bible itself. He endorsed a friend's remark that the Cambridge Bible for Schools was responsible in part for the prevailing religious indifference. When a single book—say the book of Joshua—was annotated and bound just like an edition of Xenophon or Cæsar, was it surprising that the schoolboy drew caricatures on the margin or "chucked" it at his neighbour's head? The greater part of the Old Testament hung together, and there were few portions that could be properly taught without reference to other parts. As to the higher criticism, it would be a crime for a teacher to ignore it, but the results should be given to the pupil by the way, and the attention of the pupil concentrated on the spiritual force of the Old Testament rather than on the physical anatomy.

On Friday evening the Bishop of Hull (Dr. KEMPTHORNE) delivered an address on "The Schoolmaster's Opportunity." The Bishop of Hull's address was followed by a paper from the Rev. H. J. CHAYTOR, Head Master of Plymouth College, on "The Use of Selected Extracts for Form Teaching and the Principles of their Selection." Dealing with objections to the use of selections, the speaker said that no irreverence towards the Bible was involved. The open Bible would always remain in the possession of pupils, and in the upper form of a school would be constantly used, if only for purposes of reference. There were parts of the Bible which were unsuitable and inadvisable for reading in the lower forms, and there were certain subjects discussed and certain expressions used which required either explanation or excision. While explanation upon matters of sexual physiology was desirable, such questions should not form part of a Scripture lesson, unless the treatment of them could be based upon knowledge already in the learner's possession. Selected extracts were further desirable for the reason that the Bible as a whole was an inconvenient book for use with lower forms. Chapter and verse divisions were often misleading, and the Authorized Version made no difference between poetry and prose. The Bible provided no continuous history for some parts of the narrative; for instance, the history of the wanderings of the Israelites in the wilderness after the giving of the Law was scattered through the books of Exodus, Numbers, and Deuteronomy: why should not the passages required be printed in conjunction? There was also a large amount of matter that junior students were never likely to read. Such a selection of passages as that edited by Canon Glazebrook should be used in the lower forms of a school. A scheme should be drawn up to ensure that when a boy had reached the Lower Fifth he should have covered the Old Testament narrative in outline and the New Testament Gospel history. In the Fifth and Sixth Forms he would begin the study of special books for examination or other purposes, and the Bible as a whole would then be constantly in his hands. Reverence for the Bible would only be increased by methods of teaching which would make the study and appreciation of it clearer and more rational.

The concluding session of the Conference was held on Saturday morning, when Mr. F. G. YOUNG, Head Master of Bishop's Stortford College, read a paper on "Suggestions for a Syllabus of Lessons to a Sixth Form or an Introduction to a Study of the Gospels."

We understand that the Committee will publish shortly the principal papers read at the Conference, and that it is intended to hold a similar meeting next Easter, probably at Oxford.

AMONG the passengers in the "Dunottar Castle" for the Easter cruise to the Isles of Greece were Mr. and Mrs. Lyttelton, of Eton; Canon James, of Malvern; the Dean of Winchester; and Miss Furneaux and Mr. C. H. Greene, of Berkhamsted.

WE would call the attention of modern language teachers to Messrs. Dent's new series of "Best French Plays." The titles of the first six volumes will be found under "Books of the Month." They are well printed, strongly bound in limp cloth, and cheap. It is needless to point out the various uses to which they can be put.

JOTTINGS.

THE National Food Reform Association will hold a Conference on Diet in Schools on Monday, May 13, at the Guildhall. The Lord Mayor will preside at the first session, and papers will be read by Dr. Clement Dukes, Dr. Mumford, Dr. Shelly, and Miss A. M. Burns. Application for membership should be made to Secretary, 178 St. Stephen's House, Victoria Embankment, S.W.

THE 218 Trade Scholarships for Girls awarded by the L.C.C., and consisting of free tuition and a maintenance grant of £8 for the first year, and £12 for the second year, have been assigned to the following institutions:—Borough Polytechnic, Paddington Technical Institute, Shoreditch Technical Institute, Shepherd's Bush Trade School for Girls, Bloomsbury Trade School for Girls, Woolwich Polytechnic. The members learning the several trades are as follows:—Dressmaking, 64; Designing and making of wholesale costumes, 38; Upholstering, 28; Ladies tailoring, 26; Millinery, 17; Cookery, 10; Photography, 8; Waistcoat making, 7; Corset making, 7.

THE Prize Fellowship of £120 offered by the Federation of University Women for research work has been awarded to Miss C. E. Spurgeon, Lecturer in English Literature at Bedford College, London. Miss Spurgeon will pursue her work on Chaucer criticism, to which her "*Chaucer devant la Critique depuis son temps jusqu'à nos jours*" served as introduction.

THE Board of Education have just published their complete list of Holiday Courses. This year there are thirty-seven courses (mostly in the summer), twenty-three in France and French Switzerland, seven in Germany, and four in Great Britain—at Edinburgh, Oxford, London, and Ramsgate. The paper costs 2d., and can be obtained through any bookseller.

WHAT is a *toquade*? The word is as strange to us as it was to the author of "*Five Years in a Paris Convent School*." It means the nun chosen by a pupil as the object of her idolatry, to be enshrined in her heart as the ideal of perfection. No wonder that the author, who considered them all a pack of silly old maids, eventually left the Order. The wonder is how she came to endure five years of it.

THE Association of Head Mistresses has just issued a third edition of its pamphlet, "*The True Sort of Secondary Education for Girls*," of which the second part, "*Salaries and Staffing*," has been entirely recast. It is pointed out that since 1905, the date of the first edition, by reason of the Board of Education's requirements and the increase of special subjects, one teacher for every twenty pupils is the irreducible minimum; further, that for fully qualified teachers (a University degree and training) £120 is the minimum living wage. This should rise by annual increments of £10 to £220 (the scale adopted by the London County Council). The salary for head mistresses ought not to fall below £300, non-resident, and in a few large schools there should be prizes of £1,000. Mrs. Bryant points out that, if women continue to be paid at a lower rate than men for the same work, the effect will be, as in America, that men will be ousted from the teaching profession.

MISS L. C. BREW, M.A., who has been for seven years head modern language mistress at the Godolphin and Latymer School, Hammersmith, has been appointed Head Mistress of the West Hartlepool Municipal Girls' School, and enters upon her duties there in September next.

AN interesting case of liability for school fees was decided last month in the City of London Court by Judge Lumley Smith. The plaintiffs kept a boarding school at Lausanne, and sued the defendant for a term's fees due on account of his daughter. The girl had not been vaccinated, and the father refused to allow her to be vaccinated in accordance with the State law of the Canton de Vaud, and ordered his daughter to return to England. The Judge held that it was the parent's business to ascertain the law of the land to which he was sending his unvaccinated daughter, and gave judgment for the plaintiffs, with costs.

THE National Peace Congress, which meets May 15 to 18 in the Caxton Hall, Westminster, will devote one session to the consideration of the educational side of the Peace question. Sir James Yoxall, M.P., will preside, and papers will be read by Principal Estlin Carpenter, of Manchester College, Oxford, on "*The Universities and Peace*;" by Mr. John A. Hobson, M.A., on "*The Importance of Instruction in the Facts of Internationalism*;" and by Mr. F. J. Gould on "*The Peace Teacher at Work*." Delegates from the N.U.T., the Froebel Society, and other educational associations, will attend and the discussions will be open to all teachers.

THE Froebel Society has nominated Miss Esther E. Lawrence, Principal of the Froebel Educational Institute, West Kensington, as their representative on the Teachers' Registration Council. The two representatives nominated by the Head Mistresses' Association are Miss Douglas and Miss Gadesden.

THE Advisory Committee appointed by the President of the Board of Education to consider the allotment of Exchequer grants to Universities and University Colleges in England have issued their report. They criticize the distribution of recent grants as traditional and not in correspondence with actual circumstances, but they do not venture on an assessment *de novo*. The grants vary from £17,500 to the University of Manchester to £2,400 to the Hartley University College. University College, London, comes next with a grant of £16,000, Liverpool third with £15,500, Birmingham fourth with £13,500. It is recommended that the present grants be fixed for a period of five years. We are glad to see that a balance of £12,000 is reserved pending a consideration of a superannuation scheme.

THE Annual Meeting of the Secondary Schools Association will be held at Caxton Hall, Westminster, at 2.30 p.m., Monday, May 20. Sir Philip Magnus will preside, and there will be a discussion on "*Pensions for Teachers*" and "*The Insurance Act in relation to Secondary Schools*."

THE SOUTH LIVERPOOL SCHOOL FOR GIRLS.—In the recent examination for scholarships at Somerville College, Oxford, Celia Cook has been awarded an Exhibition for Classics. M. B. Corke (St. Hilda's Hall) has gained a Second Class in Honour Moderations (Classics).

THE Governors of the Carlisle County High School for Girls have appointed to the Head Mistressship Miss Frances E. Bevan, Classical Honours, Newnham College, Cambridge, Head Mistress of the South Liverpool School for Girls.

COLONIAL AND FOREIGN NOTES.

UNITED STATES.

Mr. R. T. Crane, of Chicago, was a great "captain of industry." His firm distributed to its employees millions of dollars as their share in the prosperity of its business. But he was no friend of education. In strongly worded publications he denounced all schools above the elementary, maintaining that the young should be trained after early childhood in offices, factories, and shops. Universities he termed "frauds," and he declared that they rob both parents and children. It seems that to the Presidents of American Universities greater licence of speech is allowed than to English Vice-Chancellors; for one of them called Mr. Crane an "ass," another an "idiot," and a third a "troglodyte." Not abashed, he argued that their language proved the worthlessness of higher education, and showed of what stuff University Presidents are made. Mr. Crane has lately died. We mention him because we in England have also our Cranes, who go, too often, unimproved. It is only in education that uninformed opinion passes for oracular. As we have said before, education is a science in which every one is an expert except the teacher.

Vocational Training: a Limit. Vocationalism must be recognized as a principle of ever-increasing power in American education. At the St. Louis meeting of the Department of Superintendence of the National Education Association much attention was given to the question of

vocational training. The New England *Journal of Education*, so often rich in suggestive matter, has been publishing articles on "The Training of the Factory-worker through Industrial Education," by Deputy Commissioner Prosser, of Massachusetts. He touches on many of the problems involved in the subject, and dwells, in particular, on the necessarily large number of unskilled labourers. In the United States there are now more than twenty million persons, men, women, and children, engaged in occupations for which little or no special training is required. As the system of production on a large scale and division of labour is extended, more and more workers are assigned to small, monotonous, and almost automatic tasks, or to service on specialized machines. The workers may be classified into groups, and the more intelligent trained to some higher calling; for the rest a brightening of life is the thing most needed. What we in England must bear in mind is that the vocational instruction included in Continuation will not aim at a wholesale conversion of unskilled into skilled labourers. The action of the law of supply and demand in the labour market may be cruel; still more cruel were a neglect of it.

The Girls at Work. A little confusion as to terms is arising. Continuation embraces vocational instruction, but it means more. In England we seek, defending the secondary school as a place of liberal studies, to set beside it the continuation school as the shrine of vocationalism, but with room for an altar to Levana. In the next paragraph we—from a sense of duty; we are not *frondeurs*—refer to certain matters relevant to the development of Continuation in England. Let us first look at the girls of Boston as they learn one of the best vocations—home-making. A model home has been fitted up. Some fifteen or sixteen firms allow the girls in their service to leave work *without loss of wages* twice a week for two hours at a time. One group of a dozen girls will come to the home at one o'clock in the afternoon and stay until three, when they go back to the factory, another batch taking their place. The course lasts sixteen weeks for each group, and relates to cooking, to the choice and preservation of foodstuffs, to household furniture, and to colour and design as applied to home decoration and dress. The instruction is mainly conversational; but the girls also do household work. They take the greatest interest in the whole business: for—many of them are about to be married. That is what Boston calls "a continuation class."

Continuation in England. In England, to which we return, Continuation, in our sense, has still its battle to fight. There are unhappily signs that the Board of Education is observing its traditional policy. Free to write what it will on a new Minister's slate, it conceals from him vital issues. Mr. Birrell was told nothing, for example, of the connexion between the doctrine of sanctions and Continuation. He was allowed to think that education in England was only a means of paying Nonconformists for support at the polls; hence the fiasco of the Battersea Park Bill. Mr. Runciman must also have been left uninformed of this connexion, for his Bill fixed sixteen as the age-limit of continuation, and sixteen does not afford the necessary sanction for the secondary schools; rather, it would harm them as seeming to approve that age for the termination of secondary studies. Of Continuation Mr. Pease says that, if the Local Authorities will build continuation schools, whether they can fill them or not, the public purse shall be opened to defray the cost. But the question is not primarily one of bricks, and the secondary school would get no sanction whatever from the most extensive building operations. The question is larger, and of deepest significance for the nation—*Does the State acknowledge any duty on its part towards the adolescent, and, if so, in what form is it prepared to discharge it?* We say that, following modern tendencies, it must recognize such a duty and fulfil it impartially towards all classes of the community. And for our part, we can see only one adequate mode of fulfilment. Proceeding by orderly stages, and overcoming prejudice gradually, the State must bring it about that within a reasonable time—ten, fifteen, or, if need be, five-and-twenty years—every child over fourteen and under seventeen years of age is either attending a secondary school or kept under wholesome influence and appropriate training in a continuation class.

Is Opinion ripe? "Yes," you will say; "but sanction for the secondary school can be got from Continuation only through compulsion, and public opinion is not ripe for compulsion, as the reluctance in Scotland to

apply the Act of 1908 proves." Whose opinion is meant? Is progress in education to depend on the enthusiasm of our Cranes for culture? Are we waiting until the children, in the stress of their need, break down the railings of Hyde Park? The opinion that, for the present, is important is that of Parliament. If Clause 6 of Mr. Runciman's Bill can be made the basis of an economic bargain with the representatives of Labour, no outside opposition is to be feared. Those who are to profit by the bargain will see that it is carried into effect, and Continuation, wisely and cautiously developed, will commend itself to a nation which sees its children growing into manhood year by year richer in knowledge and power, brighter in the calm of life and stronger to face the storm.

FRANCE.

Foreign Students at Paris. Nothing can vulgarize Paris, and if any one can render learning winsome it is a French professor. The University of Paris outdoes all the academies of the world in attracting studious youth from abroad. The last Report of the Conseil de l'Université bears striking testimony to this fact. Of (in round numbers) 18,000 students no less than 3,500, or nearly one-fifth, are of other than French nationality. "C'est là," says the *Journal des Débats*, "c'est là un fait considérable, qui démontre à quel point le rayonnement de l'esprit français est puissant dans l'univers civilisé." For what do these foreigners come? Many for general culture. That is why the Faculty of Letters has in its clientèle 1,300 of them, more than one-half being women students. The Faculty of Law embraces 950 foreigners. Medicine has drawn from abroad 329 women and 476 men; the Faculty of the Sciences, about 300 men and 200 women. Among the nations represented it is the Russian that preponderates; there are, in all, 1,600 Russians at the University of Paris. If to the foreign contingent at Paris be added the 2,000 foreigners attending provincial Universities, it will be seen that France is feeding with culture and knowledge 5,500 students who are not her own children.

Women Students. In connexion with the French Universities we give a few figures relating to a subject in which we and many of our readers are much interested—the pursuit of higher studies by women. Statistics just published show an increase, if only a slight one, in the number of women students. Last year there were in the University of Paris 2,121 women out of 17,238 students registered; this year there were 2,190 women out of 17,321. We look to see how the women are distributed among the Faculties. In that of Law they number 99; in Medicine, 570; in the Sciences, 248; in Letters, 1,241; whilst in the Higher School of Pharmacy there are 32. The other French Universities have the same result of progress to report. German women are studying (Protestant) theology, to qualify themselves for teaching, for the cure of souls (*Seelsorge*), and for the conduct of institutions in which the religious instruction is a vital part of the whole. Last summer half-year there were 29 women students (12 duly matriculated) of theology in the Universities of Prussia. We have not heard of any French girls who are making the pulpit their goal.

What France is studying. The total University population of France (certain medical schools excluded) is 39,422. Nearly one-half of the students are enrolled in the Faculty of Law. But we print the exact figures for all the Faculties: Law, 17,027; Medicine, 8,265; the Sciences, 6,463; Letters, 6,309; Pharmacy (higher schools), 1,358. Putting Law aside, we observe how modern France is being drawn away from literature to the fields of scientific inquiry.

Local Knowledge. The lessons that we are slowest to learn are those which lie at our doors. Yet we are mending our ways. London has collected the memorials of its past, and we have recently been told that every town and every village should have a museum to foster the study of local history. At Paris there has been founded, under distinguished patronage, a Société d'études locales dans l'Enseignement public. It proposes to encourage (i) studies of local interest among teachers of all orders, (ii) the adaptation of the results of such studies to the purposes of instruction, in the spirit of the ministerial circular of 25th February, 1911. It will issue bibliographies of local history, geography, folk-lore and language for the use of students, as well as popular textbooks for the pupils of schools. It is a French principle: "L'instituteur peut et doit accommoder son enseignement au pays où il le donne"; nor is there any better method of quickening interest.

What is to be the fate, amid new developments, of the higher

Higher Primary Schools. primary school? We get the hint of an answer from France. The Tenth Annual Congress of the Fédération nationale des professeurs des lycées de garçons et des établissements secondaires de jeunes filles opened its session at the Lycée Louis-le-Grand on April 12. It expressed a wish that higher primary education, at present ill defined, presenting itself now as "finishing education," now as vocational instruction, should be absorbed, according to local needs, either in secondary or in technical education. In England we are asking that the primary school should be followed either by the secondary or by the continuation school, with reservation perhaps of the purely technical school for quite exceptional cases. The Runciman Bill specifies fourteen as the age up to which a parent is required to see that his child receives "efficient elementary instruction"; which age may be raised by by-law to fifteen. But surely it would be simpler to fix fifteen at once by Statute. Yet on this point we would raise no difficulty, since fifteen, determined as proposed, were helpful towards progress by stages. We are not dreamers, but practical politicians, with immediate knowledge of schools; that is why we lay stress on the stages.

Death of M. Gabriel Monod. By the death of M. Gabriel Monod the University of France has suffered a loss which will be felt sympathetically throughout the Universities of Europe. Born at Le Havre in 1844 he was educated at the Collège of his native town, at the Lycées Bonaparte and Louis-le-Grand, at the Ecole normale supérieure, and lastly at the Universities of Berlin and Göttingen. Among the offices that he filled were those of Maître de conférences at the Ecole normale supérieure and Professor of the History of Civilization in the University of Paris. He wrote much, critical studies on the sources of Merovingian and Carolingian history representing his most substantive work. But he was so lavish of himself in the service of his pupils, on whom he had always counsel, help, or a preface to bestow, that he never found time to write a really great book. In his "Souvenirs d'adolescence" he treated of his relations with Mgr. Dupanloup, whom he deemed one of the most notable educators of the Nineteenth Century; it was a shock to him when, in 1865, Mgr. Dupanloup ran foul of Littré, Renan, Taine, and Michelet. As a historian he sought to combine German depth of research with the lucidity and elegance of French literature. If the Middle Ages were the chief field of his study, he was also a penetrating observer of the modern world. England he knew well. We may not withhold a tribute from one who wrote of her thus: "La ruine de l'Angleterre ne serait pas seulement une défaite pour la liberté dans le monde; le monde y perdrait quelque chose de sa noblesse."

GERMANY.

Frankfurt University. The new Frankfurt University is in some respects peculiar. It is a State—not a free or communal—University, yet the payment of its professors is the affair of the founding societies (Town, Akademie, Institut für Gemeinwohl, &c.). Administratively it is to be governed by the Great Council (Grosser Rat) as the deliberating, and the Kuratorium as the executive body. Of each the Oberbürgermeister of the town is president; in the Great Council the University will be represented by its Rector and its Prorector as perpetual members. In the appointment of professors a list of three must be submitted to the Minister of the Faculty concerned; no consideration of religion is to have weight in the filling of chairs. There will not be, at least in the first instance, any Faculty of Theology. The Faculties provided for are five: (i) Law, (ii) Medicine, (iii) Philosophy, (iv) the Natural Sciences, and (v) Social and Political Economy. Noteworthy features are these: Unusual opportunities for research will be given to certain professors by relieving them of all obligation to teach or examine; moreover, the University as successor to the existing Akademie will undertake the higher education of persons already earning a living by commercial or official pursuits.

CEYLON.

Progress. The Report of the Director of Public Instruction for 1910-11 indicates progress. The total number of pupils returned as attending schools in Ceylon is 336,374; of these, 299,620 are attending Government and grant-in-aid schools, and 36,754 are attending unaided schools. In 1909 the total number of those attending school was 302,638, the increase for 1910 is 33,736. As to the schools, in 1910 the number of Government schools was 759 with 96,600 pupils. The numbers for 1909 were 682 and 86,702 respectively. There is

therefore an increase of 77 schools and 9,898 scholars. The grant-in-aid schools in 1910 numbered 1,910 with 203,020 pupils, as against 1,862 schools and 187,245 pupils in 1909. There has therefore been an increase of 48 schools and 15,775 pupils. The number of unaided schools which reported to Government in 1910 was 1,546 with 36,754 pupils. In 1909 there were 1,528 schools with 28,691 pupils. There is therefore an increase of 18 schools and 8,063 pupils. But the figures furnished by many of the unaided schools are not to be depended on. A slight decrease in the annual cost to revenue of each pupil in a Government school is observable.

Education of Women. The number (86,150) of girls attending Government and aided schools is increased by 8,106; that of girls in unaided schools is returned as 10,079. Altogether, then, there is a total of 96,229 girls under instruction, or about 33 per cent. of those of school-going age. Ceylon girls did fairly well in the Cambridge Local Examinations. Miss Gibbon, reporting on the work of girls' English schools, states that physical drill is now more common in them, "but much is still merely spectacular. Very few schools have yet tried basketball, rounders, &c. The proper method of breathing, so important for health, is still little taught." She regrets that many of the teachers are not competent to undertake Nature study and elementary science. Of household management she writes: "the schools vary much. In some of the best schools the principals are alive to the importance of this matter. The elder girls who are boarders have certain household duties, certain responsibilities for the little ones, while all learn something, theoretically and practically, of the laws of health and how they should be respected. We need still the transition year between school and home, which is now a part of the education of so large a number of girls in Europe. Indeed we are far behind America and progressive European countries in this matter."

UNIVERSITIES AND SCHOOLS.

LONDON.

The amount promised for the proposed new head-quarters for London University has reached the large sum of £355,000. Further promises naturally ceased when the ambiguous position of the University authorities in the matter was revealed to the public. It is difficult to determine what is the present position as the Senate have not yet promised an opinion on the merits or demerits of particular sites. The Bloomsbury site, behind the British Museum, holds the field so far as the Royal Commission and the Government are concerned, but some awkward questions have been raised as to the money value of the site. Numerous alternative suggestions of possible sites have been put forward in the Press, several of them obviously impracticable.

CAMBRIDGE.

The end of February brought the University a great surprise. The last *Reporter* of the month (27th) began with a remarkable document, published by the Vice-Chancellor "for the information of the Senate." It was a Memorial signed by all the Divinity Professors, who desired "to express our opinion that the condition whereby Divinity Degrees appear to be restricted to Clerks in Holy Orders in the Church of England should be removed and a declaration of assent to the formularies of the Church of England before admission to these degrees be no longer required." Originally, they explain, the Divinity Degree conferred authority to teach, but it has long ceased to be regarded as having this effect. Meantime, from among "members of the University who do not belong to the Church of England," "some have attained to distinction in theological studies and there may not improbably be an increasing number of such instances as time goes on." They venture, therefore, to recommend that Graces should be submitted to the Senate in order to the amendment of the Statutes in the sense suggested.

In the following number of the *Review* the proposal was welcomed, but a personal expression of opinion was printed in the shape of a letter from the Dean of one of the colleges, who approved of the proposal, he said, but would vote, or would be inclined to vote against it, unless some other letters were substi-

tuted for D.D., for if these were conferred on a person, in whom the public might be misled if it expected to find a "divine," things, he opined, would be very wrong. The Dean was well chaffed in the next issue about the letters that might summarize his new degrees of Doctor of Theology or Doctor of Sacred Letters; and the pertinent question was suggested whether anybody would care to apply for these brand new wares. The truth is that timidity in Cambridge is almost a virtue, but it plunges people into extraordinary ungraciousness sometimes without their understanding it.

It was the more pleasant to read in the next issue of the *Reporter* a report from the Council upon the subject. It leaked out that the Dean's suggestion had been broached and dismissed. In any case the report stated that "the Council would welcome the proposed alterations of Statute, which come to them supported by so great a weight of authority, and which, by opening degrees in Divinity to laymen and to ministers of other communions than the Church of England, appear likely to give fresh encouragement to active theological study." They accordingly recommend: "That the necessary steps be taken for making the following amendment in Statute A," and enumerate six changes in wording which will effect what is asked. The report is signed by every member of the Council—again, a remarkable unanimity.

The step is a very significant one. The *Oxford Magazine*, I notice, wishes to explain that somehow or other the cat was let out of their bag in our *Reporter*, but I can find no reference to Oxford either in the Memorial of the Divinity Professors or in the Report of the Council. No doubt it will be mortifying to some of our Oxford friends that such a forward movement should begin in Cambridge, but one cannot see exactly what other ground of complaint they can have. The *Church Times* has a grievance of another kind—Cambridge, once the seat of Catholic teaching, may be giving instruction in the Koran eventually; the change will probably pass, but the *Church Times* hopes it will be opposed. Really there are certain people, and at least one organ of opinion, whose view seems to be that the Church is in danger unless it is giving positive and gratuitous offence to English people outside its communion. Happily, they do not represent the best feeling of the Church nor the majority of Churchmen, as is evident from the fact that the movement originates with the Divinity Professors.

Everybody will feel that the Professors have done a wise and graceful thing. How the Church could be harmed by Mr. Rendel Harris or the Abbot of Downside receiving a Divinity Degree from Cambridge is inconceivable; and it is as hard to see how it would or could hurt Cambridge. So long as men's ideas on degrees remain what they are more and more seen to be at present, the doctorate is an incentive to study; and as the University's business is to promote learning and research—not least, but most, one would hope, in that branch of inquiry that most matters to men—the opening of these degrees is likely to promote the objects for which the University exists.

Whether opposition will develop here, unless L.S.D. is substituted for D.D., cannot yet be foreseen. It is rumoured that certain persons who have a repute for Non-Placeting, may raise objections—but such rumours are merely not unnatural conjectures. Now that it appears that in Oxford also the change has been in contemplation, it is quite clear that whatever opposition there may be, the matter will rest neither where it was before nor where it is at present. In one way or another the proposal of the Divinity Professors will come into the Statutes, and we may safely predict that the Divinity Degrees that will be conferred on "members of the University who do not belong to the Church of England" will not be new-fangled and unintelligible inventions of a half-way character, but B.D. and D.D. And a debt will be owed to the signatories of the Memorial—Dr. Swete, Mr. Bethune-Baker, Mr. Burkitt, Dr. Emery Barnes, and Dr. Stanton.

I have twice before mentioned a scheme proposed by a special
Pensions
for Professors. Syndicate for Pensions for Professors. Alas! the Financial Board "have come reluctantly to the

conclusion that they cannot advise the University to adopt the scheme proposed by the Pensions Syndicate at the present time," though they hold that existing Pension Funds should be strengthened by a considerable increase of the annual payments made to them. The Syndicate rejoin that it seems to them most desirable that their scheme should be approved by the Senate at once, so as to be available to be brought into operation as soon as financial conditions allow.

WALES.

At the half-yearly meeting of the Court of Governors it was stated that a sum of £120,338 out of total sum of £133,919 was promised towards the building fund of the College. Special efforts will be made by a small sub-committee to collect the remaining £12,000 as quickly

as possible. It is an interesting fact that 3,539 persons had contributed sums of less than £10, which proves that it is not the wealthy only who have helped to erect the fine pile for the College. To complete the building scheme a further sum of £100,000 at least would be required for the science block.

It was decided to make an application to the Development Fund Commissioners for an annual grant to the College to pay the salary of a lecturer in Mining and Quarrying.

Swansea is apparently not going to be recognized as the premier art school in Wales without a struggle; for its great rival, Cardiff, is also determined to make a bid for the honour. At a recent meeting of the

Cardiff Technical Instruction Committee, the Superintendent complained that the Board of Education had dealt unfairly with the Cardiff School in the matter of grants, and that they had penalized it severely. The Swansea grants, on the other hand, had been substantially increased. Being somewhat alarmed by this difference in treatment, the Chairman stated that they must see to it that Cardiff is not pushed aside from the premier place it now holds in Art. It would be fatal to their position if they allowed Swansea to establish an Art School which was generally recognized as the finest in the Principality. In this rivalry between these two towns, Swansea, however, has several points in its favour. The first Art School in Wales was established there, while the proximity of many large industrial works tends to foster the demand for advanced Art teaching. The Glynn Vivian Art Gallery is also a valuable addition to the Art equipment of the town. But it is difficult to understand why both towns should not develop Art to a high level of efficiency, and the success of one school need not in any way interfere with the progress of the other. The visit of Mr. A. T. Davies, the Permanent Secretary of the Welsh Department, has apparently borne fruit already.

SCOTLAND.

The Universities have been in vacation for the greater part of April; but there have been one or two meetings of Courts and General Councils. It has now been officially announced to the Glasgow University Court that a sum of £15,000 will be available from the surplus funds of the Scottish National Exhibition, for the endowment of a Chair of Scottish History and Literature. It is also understood that a sum of between £4,000 and £5,000, collected by subscription, will be added to this. There being thus a sufficient endowment, the Court has resolved to proceed to the foundation of the Chair. It was also reported to the Glasgow Court that to complete the £10,000 required for the new recreation ground there remains to be obtained only about £240. Prof. John Watson is delivering, at Glasgow University, the second course of his Gifford Lectures on "The Interpretation of Religious Experience." Tuesday, June 25, will be observed as Commemoration Day at Glasgow University. Prof. Bower will speak on the work of Sir Joseph Hooker. A bronze medallion of Emeritus Professor William Stewart will be presented to the University in commemoration of his long service as Professor and Clerk of Senate. Honorary degrees will be conferred, and there will be a University dinner. Delegates attending the Congress of the Universities of the Empire are expected to be present. Mr. A. J. Balfour has accepted the invitation of the Senate of Glasgow University to be Gifford Lecturer at Glasgow from 1913 to 1915.

The Senate of Aberdeen University has approved new regulations regarding curricula for the M.A. degree. The regulations are almost identical with those which are at present in force at Glasgow, where they have been found satisfactory on the whole. The curricula for the degree at St. Andrews, though different in form and detail, are substantially in accord with the Glasgow regulations. Edinburgh University has not yet modified the loose system of wide options which it introduced some years ago; but there is considerable dissatisfaction with its effects, and a revision of the scheme is probable. The General Council of Aberdeen University has appointed a Committee with powers to make such protest or representation as may be desirable against the recent regulation of the Carnegie Trust which requires that "beneficiaries by the Trust must qualify by the Leaving Certificate of the Scotch Education Department." The mover of the motion described the regulation as an insult to the Universities, part of a petty, illiberal, and spiteful endeavour to discredit the Preliminary Examination, and as part of a policy which had been maturing for some time on the part of the officials of the Carnegie Trust, in collusion, apparently, with the officials of the Department. For all this there is no evidence, and it is curious that the resolution leaves out a most important part of the Carnegie Trust's regulation, which applies only to students who have had an opportunity of taking the Leaving Certificate and have failed to do so. The explanation of the regulation is quite simple. The fee-paying fund of the Trust is unable

(Continued on page 326.)

DENT'S TEXTS FOR THE LOCAL EXAMS., 1913.

The following Texts have, with few exceptions, been specially prepared for use by candidates for the Oxford and Cambridge Local Examinations, each text being provided with a scholarly introduction, copious notes, and a glossary where necessary.

MARMION. By Sir WALTER SCOTT. Edited by the Rev. R. P. DAVIDSON, M.A. (Oxon.), Assistant Master, Malvern College. With Biography, Topographical Drawings, Introduction, copious Notes, and Glossary. Crown 8vo, cloth, 2nd Edition, 1s. 4d.
[Cambridge Preliminary and Junior.

THE HEROES. By CHARLES KINGSLEY. Edited by OLIPHANT SMEATON, M.A. With Introduction and Notes. Eight Illustrations by T. H. ROBINSON. Fcap. 8vo, cloth, 1s. 4d.
[Cambridge Preliminary.

THE TALISMAN. By Sir WALTER SCOTT. Edited, with Notes, &c., by G. L. TURNBULL. Illustrations from old prints in the Notes. Cloth, 1s. 6d.
[Cambridge Junior.

OLD MORTALITY. By Sir WALTER SCOTT. Edited, with Introduction, Notes, and Glossary, by A. J. GRIEVE, M.A. 1s. 4d.
[Cambridge Senior. Oxford Junior and Senior.

THE LAY OF THE LAST MINSTREL. By Sir WALTER SCOTT. Edited by J. W. YOUNG, M.A., Head Master, Pupil Teachers' School, Bradford. Crown 8vo, cloth, 1s. 4d.
[Oxford Preliminary, Junior, and Senior.

ESSAY ON CRITICISM. By ALEXANDER POPE. Edited by B. M. WANTILOVE, M.A., Litt.D. With Introduction and Notes. Fcap. 8vo, cloth, 1s. 4d.
[Oxford Senior.

MORE'S UTOPIA. Edited, with Notes and Glossary, by A. J. GRIEVE, M.A. Cloth, 1s. 4d.

to meet the demands on it, and the regulation is one way of securing that the available money will go to the better students—i.e. to those who have not failed in the Leaving Certificate Examination. There is no need to suppose that the officials of the Trust and the Education Department have been conspiring to discredit the Preliminary Examination. As a matter of fact the great majority of those who enter the University do so by means of the Leaving Certificate. If the General Council's Committee can devise a better way out of the difficulty, it will no doubt be carefully considered; but if they merely protest, they run the risk of being made to look foolish.

The Scotch Education Department has issued a circular regarding the superannuation scheme for teachers. It indicates the arrangements which it is proposed to make for obtaining information as to the names, addresses, and salaries of teachers, and also for the payments into the superannuation fund.

IRELAND.

Owing to the pause of the Easter vacation and to the fact that public attention is at present engrossed by other issues, there has been little stir in the educational world during the past month and a marked absence of reference to educational matters in the meeting of public bodies.

The National Teachers' Organization held their forty-fifth Annual Congress, at Kilkenny, on April 9 and following days, under the presidency of Mr. George O'Callaghan, last year's President. The Countess of Aberdeen made an address at the opening meeting, and various representatives of municipal and local bodies, as well as delegates from the English and Scotch Primary teachers, were received during the Congress. The business dealt chiefly with matters affecting the status and payment of teachers and various resolutions were passed, including one which seems Utopian—namely, that men and women teachers should be placed on the same basis as regards salaries and appointments. Others dealt with the relation of teachers to the Universities, asking that the system of extern students might be restored as under the Royal University, that representatives of the National Teachers should be appointed to the Senates of the new Universities as vacancies arose, and that provision should be made for University extension lectures and summer courses of which teachers could avail themselves. It was

also proposed that in future appointments to schools in Irish-speaking districts, only teachers competent to teach Irish should be chosen; also that Irish might be taught at whatever hour of the school days the teachers considered most suitable, and that fees should be paid for teaching in all standards. The elections for the Central Executive Committee were made during the first day's proceedings: a woman teacher, Miss Mahon, being elected President. It was decided to appoint a permanent secretary who should devote all his time to the organization, and have an office in Dublin, with a salary of £150 rising to £250.

A meeting of members of the Gaelic League of South Louth, clergy, and others, held on April 8, in Drogheda, under the presidency of Cardinal Logue, to consider the best means of promoting the study of Irish in the schools, adopted a resolution to the effect that (after a grace of two years) no teachers should be appointed unless they possessed a certificate of competency to teach Irish. Such resolutions show the trend of public opinion, including that of the teachers themselves, though at present they seem a little ahead of actual requirements and of the equipment and courses of the training colleges.

The Alexandra College Guild holds its annual Conference on Saturday, April 27, when a large gathering of past and present students is expected. The morning session, under the presidency of Miss White, LL.D., will be devoted to business and the reports of the various college organizations, also to the extraneous social and philanthropic work carried on in connexion with the Guild. A new departure in this latter work is being made at present by the establishment of a hostel for working girls in Dublin. Papers will also be read by Miss Maud Taylor on "Girl Guides," and Mrs. Harold Lett on "Women's Work in Rural Districts." At the afternoon session, under the presidency of the Countess of Aberdeen, papers will be read by Dr. Mary Murdoch on "The Child and the State," and by Dr. Elizabeth Sloan-Chesser on "Women and Efficiency."

SCHOOLS.

HARPENDEN, ST. GEORGE'S SCHOOL.—H. G. Powers and L. Birch have been awarded Open Classical Scholarships (£80) at Wadham and Worcester Colleges, Oxford, respectively. Dorothy K. Horne has won an Open History Scholarship at Lady Margaret Hall, Oxford.

WILD FLOWERS AS THEY GROW

*Photographed direct from
Nature in Colours on one
plate by [The Lumière
Photographic Process
and exquisitely
reproduced by
the Four-
Colour
Method*

To realize what this means, trace the steps in the picturing of a Flower.

FIRST, it was laboriously sketched, petal by petal, stamen by stamen.

SECOND, it was coloured by hand. But the Nature student could not always recognize the flower that way.

THIRD, it was photographed—but the one essential for purposes of recognition was lacking—it had no colour.

FINALLY, Lumière invented his wonderful colour photography process—reproducing the *actual form and colour*.

To secure these colour photographs in their natural conditions and in their natural colours, **Mr. H. ESSENHIGH CORKE, F.R.P.S.**, submitted the Flower to a six-minute exposure, screened from the wind without excluding the light.

Each flower has been dissected, diagrams of each portion drawn, and they are all explained in graceful non-technical English by the well known botanical expert,

Mrs. G. CLARKE NUTTALL, B.Sc.

HINTS ON FRENCH SYNTAX.

[May be used with advantage with **any** French Grammar.]

The following appears in

LE COURRIER: Bulletin de l'Institut Pédagogique International,
dated March 30, 1912:—

L'auteur disait dans la Préface de la 1^{re} édition: « Mon but a été non de développer, mais d'alléger l'étude de la syntaxe.» Le succès de l'ouvrage, dont on donne la 8^e édition, prouve évidemment que ce but a été atteint.

Les « notes sur la syntaxe » de M. Storr, remarquablement claires et précises, peuvent rendre de grands services non seulement aux Anglais qui apprennent la langue française, mais aussi aux Français qui étudient l'anglais. Nous n'hésitons pas à les recommander aux uns et aux autres.

London: WILLIAM RICE, 3 Broadway, Ludgate Hill, E.C.

PRIZE COMPETITIONS.

The Translation Prize for April is awarded to "Les Quennevais." *Proxime accessit* "Constantine."

The winner of the Translation Prize for March is J. Ewing, Esq., 13 Oxford Road, Cambridge.

! Es ist ein schönes Stück deutscher Erde, was dort zwischen Schwarzwald und schwäbischem Meer sich aufthut. Wer's mit einem falschen Gleichniss nicht allzu genau nimmt, mag sich der Worte des Dichters erinnern :

Das Land der Alemannen mit seiner Berge Schnee,
Mit seinem blauen Auge, dem klaren Bodensee ;
Mit seinen gelben Haaren, dem Aehrenschmuck der Auen,
Recht wie ein deutsches Antlitz ist solches Land zu schauen.

—wiewohl die Fortführung dieses Bildes Veranlassung werden könnte, die Hegauer Berge als die Nasen in diesem Antlitz zu preisen.

Düster ragte die Kuppe des hohen Twiel mit ihren Klingsteinzacken in die Lüfte. Als Denksteine stürmischer Vorgeschichte unsrer alten Mutter Erde stehen jene schroffen malerischen Bergkegel in der Niederung, die einst gleich dem jetzigen Becken des Sees von wogender Fluth überströmt war. Für Fische und Wassermöven mag's ein denkwürdiger Tag gewesen sein, da es in den Tiefen brauste und zischte, und die basaltischen Massen glühend durch der Erdrinde Spalten sich ihren Weg über die Wasserspiegel bahnten. Aber das ist schon lange her. Es ist Gras gewachsen über die Leiden derer, die bei jener Umwälzung mitleidlos vernichtet wurden ; nur die Berge stehen noch immer, ohne Zusammenhang mit ihren Nachbarn, einsam und trotzig wie Alle, die mit feurigem Kern im Herzen die Schranken des Vorhandenen durchbrechen, und ihr Gestein klingt, als sässe noch ein Gedächtniss an die fröhliche Jugendzeit darin, da sie zuerst der Pracht der Schöpfung entgegen gebuhelt.

By "LES QUENNEVAIS."

It is a beautiful stretch of German country that opens out there between the Black Forest and the Suabian lake. If we do not press too closely an untrue comparison, we may recall the poet's lines :

"The land of the Alemanni, and its mountains white with snow—
It's clear blue eye—the waters that past fair Constanz flow ;
It's yellow hair—the cornspikes that fill the fields with gold—
It is in sooth a German face, that land which we behold."

Although it might be fairly said that, if we continue the simile, the Hegau hills would be the nostrils in the face.

The summit of the High Twiel, with its jagged ridges of clinkstone, rises menacingly into the air. The abrupt, picturesque cones of the mountains stand as memorials of the stormy prehistory of old mother earth in the lowlands which once, like the actual basin of the lake, were whelmed beneath a heaving flood. It was indeed a notable day for the fish and the gulls when the depths roared and hissed, and the basaltic masses, all molten, forced their ways through the rifts in the earth's crust over the surface of the water. But that happened long ages ago. The grass has grown up over the sufferings of those who were remorselessly annihilated by that convulsion ; only the hills stand there as ever, isolated from their neighbours, lonely and defiant—like all who, with a core of fire in their soul, break through the barriers before them ; and the rocks ring as if there still lingered in them a remembrance of their gladsome youth, when they first shouted for joy at the glory of the creation.

We classify the 110 versions received as follows :—

First Class.—Constantine, Kennanmore, Les Quennevais, Eicarg, Eftersay, Viridis, Schwabenstreich, Larus Ridibundus, Macnamara, Bergstrasse, Greenfinch, Constance.

Second Class.—A.B.C., Craigmillar, H.M.E., Praxedis, Hibernia, Forget-me-not, Redgauntlet, Fortune le veut, Bogen, Taunach, Gemma, J.H., An old Neuwieder, Nessko, Old Savilian, Em, Oxoniensis, Enzian, Corcaig, Martin, Amaryllis, Pix, Ebba, E.M.D., L.B.T., Beth, Smaragdus, Alexia, E.E.W., Bübchen, Tirailleur.

Third Class.—Norris, Katar Murr, Hiddegeigei, Trinchen, Primrose, A.F.A., Moriando vivo, Beginner, Einsam, G.M.P., Iris, Syene, Mecklenberg, Francesca, En avant, N.H.S., Sirius, Mars, Audifax, Bladud, Agatha Ross, Kussie, Bal, Chingleput,

(Continued on page 330.)

THE LONDON Central Institute for Swedish Gymnastics, 16, 17, & 18 Paddington Street, Marylebone, W.

Telephone: 872 Mayfair.

The School World says: "This college for men students . . . will provide a first year's course fitting students for posts in elementary schools, and a second year's course enabling the graduate to take charge of any school of whatever standing. Anatomy, physiology, theory of movements, hygiene, and kindred subjects necessary for a complete grasp of physical training will be taught by experienced teachers. This will be a noteworthy addition to the facilities for training in this subject. . . . this new college has been most cordially welcomed by the Parliamentary Secretary representing the Board. . . . As a sign of progress, and in the hope of a better future for the physique of the youth of the nation, the new 'Central Institute' will be cordially welcomed."

PUPILS ARE NOW RECEIVED.

The Institute also undertakes the instruction in Physical Exercises on the Swedish System for Schools in the neighbourhood.

Recreative Classes—Gymnastics and Fencing—are held in the afternoons and evenings.

For particulars apply to the Principal—

ALLAN BROMAN,

S. H. Judge, Entente cordiale, Marsh Miller, Wie und Wo, Shim-nah, Gretchen, Puck, M.C.L.

Fourth Class.—O.L., Nostis, Quill, Tinker, F.O.T., Julian Forrest, Landscape, A.D., Comet, Vernon, Collect, Swab, U.T., Herga, L.A.S., Trivia, S.U.M., Fry, Lance, G.F.R.

Fifth Class.—Novice, Purdie, Boden, Onyx, P.A.R., Una, Ever the same, Dolt, Fost, Hermit, Lapse, Dilly, O.N., Loam, Mona, S.O.M., T.A.P.

For once I discovered that I had set too easy a passage, and, though there was sufficient scope for style, there was little in the extract from Scheffel's "Ekkehard" to test German scholarship. Compare, in the first sentence, "Tis a fair prospect of German soil that meets the eye" and "A beautiful bit of German earth spreads itself out." We may say "the Suabian lake or inland sea," but not "the Suabian sea." *Nicht allzu genau nehmen*: "not to be too critical," "if we can pardon a somewhat forced comparison." Obviously the quotation must be rendered in verse, and there is no excuse for changing the metre. The plural "noses" sounds odd even in a *reductio ad absurdum*; but so it stands, and "nostrils" is no improvement. *Ragte*: past tense, "at the time of the story," "Clinkstone" or "Klingstone" is better than the technical phonolite. "Pre-history" of the prize version is a needless neologism. "When it roared and hissed in the depths" is an instance of bad style. Why was "grass has grown over the victims" so often watered down "nothing remains to show," &c.? *Kern*, again, is not "a spark of fire," but the "molten lava," and *Gestein klingt* is not "the stones sound," but "the rocks ring." For "barriers before them," of the prize version, read "the barriers of their age and circumstances."

A Prize of Two Guineas is offered for the best translation of the following extract from A. Vinet:—

Dix ou douze années, dans le milieu du 18^e siècle, virent se déployer plus de talents divers, s'accomplir plus de destinées littéraires, se consommer une révolution littéraire plus importante, qu'il ne s'est jamais vu peut-être en aucun pays et dans un espace de temps beaucoup plus long.

Jusque dans les plus blâmables excès de cette école, on doit

reconnaître l'inévitable réaction de la liberté de penser trop longtemps comprimée. Il y a peu de modération à prétendre de l'esclave qui brise ses fers. La pensée, au 18^e siècle, ne s'exerce pas, elle se venge. Et que de griefs suscitait ou réveillait imprudemment tout ce vieux monde prêt à crouler! L'exaspération naturelle à toute tyrannie qui s'en va, la ténacité désespérée qui s'acharne à tout conserver précisément parce que tout lui échappe, enfin cet effet d'optique qui, sur un fond toujours plus lumineux, multiplie et, pour ainsi dire, rend plus visibles les ténèbres, tout cela justifie l'indignation, peut excuser la violence et l'exagération, explique l'injustice et la mauvaise foi chez les agresseurs du passé. Surtout on comprend qu'un esprit imperturbable de méthode et la patience des déductions, n'aient pas caractérisé la philosophie d'une telle époque. Les philosophes du 18^e siècle ne sont pas de paisibles rêveurs: entourés d'un ordre de choses ou plutôt d'un désordre qui les blesse, ils en appellent à la raison, à la justice, à la nature; ils sont les hommes du présent, les champions d'intérêts vivants. Leur philosophie n'est point proprement scientifique: mais, au milieu d'eux, une école qui peut mériter ce titre, conduit méthodiquement aux mêmes résultats qu'ils poursuivent avec une ardente préoccupation. C'est l'école de Condillac, qui, rapportant uniquement aux sens l'origine de nos idées, et réduisant le rôle de l'âme à une *sinécure* mal dissimulée, dirige vers le matérialisme les esprits déjà matérialistes par anticipation.

Initials or a nom de guerre must be adopted by ALL competitors, but the prize-winners will be required to send real names for publication.

All competitions must reach the Office by May 16th, addressed "Prize Editor," THE JOURNAL OF EDUCATION, 3 Broadway, Ludgate Hill, E.C.

Those in the First Class are entitled on application to a copy of "Essays, Mock Essays, and Character Sketches."

Translations sent with an addressed and stamped envelope and six penny postage stamps will be returned corrected. Foreign postage stamps are not accepted.

Translations will not be returned unless both these conditions are complied with.

These School and Teachers' Advertisements are continued from page 294.

UNIVERSITY OF MANCHESTER. HALL OF RESIDENCE FOR WOMEN STUDENTS.

Ashburne Hall, Edward Behrens Estate, Fallowfield.

Warden: Miss SHEAVYN, D.Litt., Tutor for Women Students at the University.

Vice-Warden: Miss B. E. GWYER, Lit.Hum.

IRELAND.

VICTORIA COLLEGE, BELFAST.

TO BE SOLD by Private Treaty as a going concern, by order of the Executor of Mrs. Margaret Byers, I.L.D., the late Principal.

This well known COLLEGE FOR GIRLS (founded by the deceased in 1859) has for many years held a very prominent position among institutions for the education of women, and is now being sold to close the Estate. Its equipment (including boarding accommodation) is complete and modern: there has been no change in the working arrangements since the Principal's death, and the attendance has been fully maintained. The average number of pupils in attendance during the last six years has been 250, consisting of about 40 boarders and 210 day pupils (between 30 and 40 of the latter are in the Kindergarten).

The COLLEGE BUILDING, which includes a PRINCIPAL'S RESIDENCE, is held in perpetuity at the yearly rent of £38.17s. 6d. It was specially designed and built for educational work. Adjoining houses, held on yearly tenancies, have been added as required to provide accommodation for the increasing attendance.

Arrangements can be made to give the purchaser immediate possession.

Further particulars can be obtained from
CARSON & M'DOWELL,
51 Royal Avenue, Belfast. Solicitors.
11th April, 1912.

MENTHOLIN PASTILLES RELIEVE TIRED THROATS.

Used as directed, the vapour of their ingredients (Menthol, Eucalyptus, Camphor, Formaldehyde) is brought into contact with the whole mucous tract of the throat and nose, immediately removing congestion.

In quarter-pound boxes, 1/4 post free, from—
EDMUND WILLCOCKS, Pharmacist,
3 BROADWAY, LUDGATE HILL, E.C.
SAMPLE FREE on receipt of stamped envelope.

GIRLS' SCHOOL TRANSFERS.

Messrs. GABBITAS, THRING & Co.,
36 SACKVILLE STREET,
PICCADILLY, W.
(Established 1873.)

TRANSFERS OF AND PARTNERSHIPS IN GIRLS' SCHOOLS.

Messrs. GABBITAS, THRING & Co. have a large number of Girls' Schools on the books of their Transfer Department, but issue no list of such Schools. On learning a Purchaser's qualifications and requirements, they will send to her notices of opportunities likely to suit her. The following are a few of the Schools now on their books:—

No. **TRANSFER**, owing to death, of old-established Boarding and Day School at South-West Coast Resort in delightfully situated house, containing about 20 bedrooms, with grounds. 25 Pupils. Prospectus fees for Boarders 75 to 90 guineas. Receipts at the rate of over £900 per annum. Price for goodwill and all school and household furniture, &c., £1,000.

No. **TRANSFER** of large Day School in a healthy suburb of an important Irish City, containing about 80 Day Pupils at prospectus fees of £2.5s. to £4.10s. per annum, with considerable extras. Prospectus fees for Boarders £30 per annum. Gross receipts £900. School very flourishing and good opening. Price £200 for Goodwill and furniture.

No. **PARTNERSHIP** in flourishing School for Gentlemen's Daughters in the Home Counties. Partner required to assist in extension. About 12 Boarders and 30 Day Pupils. Prospectus fees of £25 to £100 and about £30 per annum respectively. To be divided into different departments in separate houses. Present profit about £300, and pupils being refused.

GIRLS' SCHOOL TRANSFERS.

No. **PARTNERSHIP** in old-established 4,954. Boarding and Day School, at a South Coast Resort. Inexpensive School, but strictly for the daughters of gentlemen. Senior Partner proposing to retire. About 15 Boarders and 8 Day Pupils. Prospectus fees 60 guineas for Boarders and 9 to 18 guineas for Day Pupils. Gross receipts and profits increased the last three years. For last year about £950 and £250 respectively. For half share of Goodwill £250, and £250 for household furniture.

No. **TRANSFER** of Junior School for Boys 4,948. and Girls in connexion with well-established and high-class Boarding and Day School in a suburb of a Midland Town. Established by the Principal recently, for little Boys and Girls up to 11. The Principal of the Senior School would continue to interest herself.

No. **TRANSFER** of or **PARTNERSHIP** 4,936. in old-established and successful Boarding and Day School with Boys' Preparatory Class and Kindergarten, in a suburb of a North-Western City, containing about 10 Boarders and 30 Day Pupils. Prospectus fees 39 to 45 guineas and 12 to 15 guineas. Gross income about £800, and profits about £300. Goodwill £400. Premises would be let. Furniture at a valuation.

No. **OPENING** for **STARTING** high class 4,918. Girls' School in very desirable surroundings in conjunction with a lady of much successful experience who owns a suitable House and Grounds, and who would arrange to build for the purposes of the School, when desirable.

No. **TRANSFER** of, or **PARTNERSHIP** 4,912. to **succession** to, Boarding and Day School at bracing Inland Health Resort. About 15 Boarders and the same number of Day Pupils. Prospectus fees for Boarders £60 per annum, several paying considerable extras. Day Pupils from 4 to 9 guineas. Gross receipts and profits steady for the last three years at £1,000 and £150 respectively. Price for the whole Goodwill and School and household furniture £1,000.

No. **TRANSFER** of old-established, flourishing 4,890. Boarding School at a South Coast Health Resort, containing about 50 Boarders, at prospectus fees of 60 to 75 guineas, and most of them paying quite full fees. Gross receipts for last year about £3,000, being an increase on the average of last three years. Fees for current year indicate further increase. Net profit last year nearly £2,000, an increase on the average of the preceding three years.

GIRLS' SCHOOL TRANSFERS.

No. **PARTNERSHIP**, with a view to **succession**, 4,880. in flourishing Boarding School at a favourite South Coast Resort, full with over 30 Boarders. Day Pupils not received. Prospectus fees of 90 guineas. Gross receipts about £4,000 last year. Average annual receipts of last three years about £3,800. Net profits about £900 and £700 respectively. Goodwill of half share £1,000.

No. **TRANSFER** of Boarding and Day 4,868. School for Girls. Good residential and service centre near London. 10 or 12 Boarders and nearly 40 Day Pupils. Fees 33 to 39 guineas and 4 to 12 guineas. Average gross receipts over £1,200 for last three years. Goodwill £250.

No. **PARTNERSHIP**, in Boarding and Day 4,804. School for Girls in a healthy neighbourhood in the South Country, near the Sea. School strictly for the daughters of gentlemen, in excellent premises, and containing nearly 20 Boarders at fees of 75 to 105 guineas, and about 12 Day Pupils at 9 to 18 guineas. School increasing in numbers. One quarter to one half share offered as desired. Price for Goodwill depending on connexion introduced.

No. **TRANSFER** of or **PARTNERSHIP** 4,773. with a view to succession to successful School at a South Coast Resort, containing nearly 20 Boarders, at fees of 60 to 85 guineas. A few Day Pupils received, most of them paying 30 guineas. Gross receipts over £2,000, exclusive of many extras. Net profits for the current year about £600. 2½ years' purchase for the Goodwill. One-third share or more would be sold if desired with a view to succession.

No. **PARTNERSHIP**, possibly to **succession**, 4,476. in Boarding and Day School in healthy Northern Suburb. A few Boarders paying on the average about £60 per annum, and about 40 Day Pupils, and Day Boarders, paying fees varying from 9 guineas for the youngest up to 28 guineas per annum, and considerable extras. Gross receipts over £1,000. Goodwill by Capitation Fee.

Further information will be sent to applicants, but Messrs. GABBITAS, THRING & Co. will require full particulars before arranging introductions to their clients. No charge is made to Purchasers.

X Other Transfers and Partnerships are on pages 295 and 334; other School and Teachers' Advertisements are continued on pages 334, 335, 336, 337, 338, and 339. X

Telephone:
7021 Gerrard.

SCHOOL TRANSFER AGENCY.

(Established
1833.)

Proprietors—Messrs. GRIFFITHS, SMITH, POWELL & SMITH.

Offices—34 BEDFORD STREET, STRAND, AND 22 HENRIETTA STREET, COVENT GARDEN, LONDON, W.C.

Schools Transferred and Valued. No charge whatever will be made to Vendors of Schools or School Partnerships, by Messrs. Griffiths, Smith, Powell & Smith, unless a sale is effected or agreed upon.

SPECIAL NOTICE TO VENDORS.

As Messrs. GRIFFITHS, SMITH, POWELL & SMITH have at all times the names of a large number of intending Purchasers of Schools and School Partnerships on their books, they have every confidence in stating that they can readily effect a sale of any desirable Property they may be instructed to dispose of. All instructions receive the personal attention of one of the Partners of the firm.

No commission charge whatever will be made by Messrs. Griffiths, Smith, Powell & Smith, to Purchasers of Schools, or School Partnerships.

Applications from intending purchasers are solicited for the following properties:—

GIRLS' SCHOOLS.

HOME COUNTY.—High-Class BOARDING AND DAY SCHOOL in very prosperous town. Gross receipts for past year £1,262. Net profit about £300. Number of Boarders 8. Terms from £30 to £15 per term. 40 Day Pupils and over 50 Pupils attend for special subjects. Fine house standing in its own grounds. Goodwill only £250.—No. 1,737.

KENT (Seaside).—First-Class BOARDING AND DAY SCHOOL. Net profits about £500. Number of Boarders 18 and 10 Day Pupils. Very fine premises in exceptional position. Goodwill by capitation fee. Furniture at valuation or by arrangement.—No. 1,658.

NORTH WEST COAST.—BOARDING AND DAY SCHOOL FOR GIRLS. Gross income over £2,000. Net £600. Number of Boarders 30, and 30 Day Pupils. Exceptional opportunity of securing a School in flourishing condition at a nominal price, viz., £600 for Goodwill. School plant at valuation. Splendid premises and grounds.—No. 1,656.

LANCASHIRE (Seaside).—BOARDING AND DAY SCHOOL FOR GIRLS. Gross receipts about £1,000. Number of Boarders 18, and 30 Day Pupils. Rent of very fine house only £120; this could be nearly covered by letting the house in the holidays. Price for goodwill, £400.—No. 1,663.

Near LONDON.—DAY SCHOOL with Preparatory Departments. 148 Pupils. Gross receipts for past year £1,128. Net profits £300. Rent of premises specially built for a School, £120. Price for goodwill and valuable plant (if purchased at once) only £570.—No. 1,736.

SOUTH COAST.—PARTNERSHIP IN FIRST-CLASS SCHOOL. Gross receipts about £2,500, net income fairly considerable. About £1,000 is asked for a two-fifths share. The whole purchase money need not be paid down. Very fine premises.—No. 1,735.

SURREY.—TRANSFER OR PARTNERSHIP.—BOARDING AND DAY SCHOOL. Gross income £1,200, net £300. Could be largely increased. 80 to 90 pupils. Terms of sale or partnership to be arranged.—No. 1,743.

LONDON, N.—Successful BOARDING AND DAY SCHOOL FOR GIRLS, with Kindergarten Department. Gross receipts about £1,000. Number of Boarders 5 and 65 Day Pupils. Price for goodwill only £400.—No. 1,661.

BOYS' SCHOOLS.

MIDLANDS.—Successful DUAL SCHOOL. Net profits for 1910, £378, and for 1911, £392. No. of Day Pupils, 92. Price for goodwill, £750. Excellent premises with private dwelling house.—No. 6,055.

MIDLANDS.—FIRST CLASS PREPARATORY SCHOOL FOR BOYS. Gross receipts about £3,000. Net about £1,000. Exceptionally fine premises. Extensive grounds. Price for the Freehold, £12,000. Goodwill, £2,000. A fairly large sum could be raised on mortgage.—No. 6,050.

CHESHIRE (Seaside).—PARTNERSHIP IN BOYS' BOARDING AND DAY SCHOOL. Gross receipts past year about £880. Number of Boarders 17 and 10 Day Pupils. Price for half share of goodwill, school and household furniture, only £340.—No. 6,057.

NORTH-WEST OF ENGLAND. BOYS' BOARDING AND DAY SCHOOL. Income £1,600 to £1,700. Net about £430. Number of Boarders 21 and 42 Day Pupils. Very fine premises. Price for goodwill and furniture moderate. Very desirable opening.—No. 6,056.

KENT (Seaside).—BOARDING AND DAY SCHOOL FOR BOYS. Almost entirely Preparatory. Income about £2,200. Net profit about £500. Number of Boarders 30 and a few Day Pupils. Price for goodwill, £800. Furniture optional.—No. 6,054.

SURREY.—Partnership in first-class PRIVATE SCHOOL, established many years. Excellent premises and grounds. Reasonable terms will be accepted.—No. 6,052.

Posts Wanted.

Prepaid rate: 30 words, 2s.; each 10 words after, 6d. (Use of Office address, 1s. extra.) For latest time for receiving these announcements see front page.
[Replies to advertisements marked * should be sent under cover to "The Journal of Education" Office, 3 Broadway, Ludgate Hill, E.C., in each case accompanied by a loose stamp to cover postage on to advertiser. Post cards will not be sent on.]

Literary Supplement to THE JOURNAL OF EDUCATION.

No. 514.

MAY 1, 1912.

Cambridge University Press

Themis: a Study of the Social Origins of Greek Religion

By JANE ELLEN HARRISON, Hon. LL.D., Hon. D.Litt. With an Excursus on the Ritual Forms preserved in Greek Tragedy, by Professor GILBERT MURRAY, and a Chapter on the Origin of the Olympic Games by Mr. F. M. CORNFORD. With 152 illustrations.

Demy 8vo
15s net

"Miss Harrison has written a work which is likely to last long as a monument both of her wide range of classical scholarship and of her sympathetic insight into primitive conditions of mind and society. It is a book not only learned, but also instinct with a soul. Moreover, as every notable creation must be, the book is revolutionary. . . . Miss Harrison's book sets out to explain the newly-discovered Hymn of the Kouretes, and, in the course of a search for analogies and illustrations, achieves a wide circuit and survey of the more primitive forms of Greek religion."—*Athenaeum*

The Heroic Age

By H. MUNRO CHADWICK, Fellow of Clare College, Cambridge. With 3 maps. Cambridge Archaeological and Ethnological Series.

Demy 8vo
12s net

"The most remarkable thing about the book is the clearness with which it establishes that the two heroic ages dealt with, the Teutonic and the Greek, historically separated by more than a thousand years, had so many close coincidences in social organization. The book, for the rest, is full of interest for students of the history of civilization."—*Scotsman*

Cambridge Geographical Text-books

General Editor, G. F. BOSWORTH, F.R.G.S.

A series of three volumes (Junior, Intermediate, and Senior) planned on the concentric method and so graded as to cover the whole course of geographical instruction. The Junior book will give a brief sketch of the chief geographical features of the world, and the Intermediate and Senior books will go over the same ground, but with more detail. Each book will contain numerous illustrations, maps, and diagrams. The following is now ready:—

Intermediate. By A. J. DICKS, B.A., B.Sc. With 62 illustrations and 20 maps and diagrams.

Crown 8vo
3s

The ground covered by this volume is approximately that required for the University Junior Local Examinations.

Physical Geography for South African Schools

By ALEX. I. DU TOIT, B.A., F.G.S. With maps, diagrams, and illustrations.

Crown 8vo
4s 6d net

This work has been prepared in order to furnish a concise and somewhat condensed account of the processes of Physical Geography in general and applied to South Africa in particular.

Cambridge Nature Study Series

General Editor, HUGH RICHARDSON, M.A.

The aim of this series is to help children to study Nature. No attempt is made to substitute book study for Nature study, and, while there are passages of continuous reading, the books are not mere "readers." Abundant and varied practical exercises are suggested, the apparatus required being of the simplest character, and careful instructions are given so that the books shall be intelligible to children. The following volume will be ready shortly:—

The Gateways of Knowledge. An introduction to the study of the Senses. By J. A. DELL, M.Sc.

Crown 8vo
2s 6d

This book deals with the methods and machinery of observation, and contains chapters on:—The Meaning of Observation; The Brain, Nerves, and Sense-Organs; The Sense of Touch; Heat, Cold, and Pain; The Machinery of Movement; The Experience of Movement; Taste and Smell; Sound and Hearing; Light; The Eye; How the Eye is used in Seeing; The Experience of Sight; Action; Memory. There is a List of Works suitable for reference and an Index.

Widsith: a Study in Old English Heroic Legend

By R. W. CHAMBERS, M.A., Fellow and Librarian of University College, London. With 2 maps.

Demy 8vo
10s net

"Scholars have lavished so much time and pains on the story of 'Beowulf' that the other relics of old English heroic poetry have been unduly neglected. Mr. Chambers has, therefore, turned his attention to 'Widsith,' which, as his learned treatise shows, will repay close and critical examination. . . . The whole work bespeaks scholarly study and careful, painstaking research."—*Scotsman*

The Cambridge History of English Literature

Volume VIII. The Age of Dryden. Edited by A. W. WARD, Litt.D., P.B.A., Master of Peterhouse, and A. R. WALLER, M.A.

Royal 8vo
9s net

"The new volume of the 'History' is in every way worthy of the earlier ones—each successive instalment the more fully impresses upon us the valuable work which Dr. A. W. Ward and Mr. A. R. Waller are doing. When completed, the 'Cambridge History of English Literature' will be something far more than a work of reference, it will be at once a body of authoritative criticism and exposition for students, and a work in which every reader with a true liking for literature will find inexhaustible delight, for the 'readability' of the volumes is one of their marked characteristics."—*Daily Telegraph*

A First German Book, on the Direct Method

By G. T. UNGER, M.A., late Exhibitioner of Trinity College, Cambridge, Assistant Master at Acton County School. With or without vocabulary.

Crown 8vo
2s 6d

This book is an attempt to provide an easy course of instruction for pupils who begin the study of German at an early age. It contains a series of graduated lessons with questions and exercises, phonetic transcriptions of the first eleven lessons, and a brief summary of grammar. A vocabulary giving the simple English equivalents and the pronunciation of each word in phonetic spelling is also supplied for those who desire it.

A Grammar of the German Language

By G. H. CLARKE, M.A., Head Master of the Acton County School, and C. J. MURRAY, B.A.

Large crown
8vo
Reissue at
5s

"We congratulate the authors of the present volume on having had the courage to draw up a grammar on what we should call the old lines, were it not for the fact that very few of the old-line manuals have anything like the fullness and completeness of theirs. It is not, and is not meant to be, a work for beginners; but it is one which all those who, by whatever method, have already acquired a certain knowledge of German will find invaluable for the further process of perfecting themselves in the language."—*Glasgow Herald*

A Shorter Geometry

By C. GODFREY, M.V.O., M.A., and A. W. SIDDOES, M.A.

Crown 8vo
2s 6d

"A well-arranged and clearly expounded school textbook which covers the three stages distinguished in a recent recommendation of the Board of Education. It is, in short, a valuable development and continuation of the excellent 'Geometry for Beginners' written by the same authors."—*Scotsman*

Also published in four parts:—

MR. EDWARD ARNOLD'S LIST.

JUST PUBLISHED.

Selected Essays from English Literature.

Edited, with introduction and brief notes, by ELIZABETH LEE. 2s.
The essayists drawn upon are Bacon, Cowley, Steele, Addison, Fie ding, Johnson, Goldsmith, Lamb, Hazlitt, de Quincey, Leigh Hunt, Mitford, Thackeray, Carlyle, and Dr. John Brown.

Mirabilia. By C. D. OLIVE, M.A., formerly Head Master of Rokeby School, Wimbledon. With or without Vocabulary. 1s. 6d.

A collection of modern stories told in Latin, which can be used either for the purposes of a reading book or for unseen.

The Ancient World. An Historical Sketch. By C. DU PONTET, M.A., Assistant Master at Harrow School. With Maps. 4s. 6d.

This book gives a brief survey of ancient history, developing in broad outline the story of the empires of the ancient world. It enables the pupil to view ancient history as a whole, to see the various events in their proper perspective, and to comprehend the relations of the different empires to one another.

Arnold's English Texts. 96 pages. Limp Cloth. Price 6d. each.

<i>The Song of Hiawatha</i>	LONGFELLOW.
<i>Marmion</i>	SCOTT.
<i>Idylls of the King, and other Poems</i>	TENNISON.
<i>Hereward the Wake</i>	KINGSLEY.
<i>The Cloister and the Hearth</i>	CHARLES READE.
<i>The Life of Nelson</i>	SOUTHEY.
<i>Tanglewood Tales</i>	HAWTHORNE.
<i>Gulliver's Voyage to Lilliput</i>	SWIFT.
<i>The Pilgrim's Progress</i>	BUNYAN.
<i>The Bible in Spain</i>	BORROW.
<i>The Natural History of Selborne</i>	GILBERT WHITE.
<i>A Naturalist on the River Amazons</i>	BATES.

The Storied Past. Illustrated. 1s. 6d.

This book, which is designed as a Literary Reader for Junior Forms, consists entirely of selected passages from English literature illustrative of historical events or of the life and customs of bygone days.

Arnold's Shilling English Composition. By E. KENNY. Cloth, 1s.**The Britannia Book of Poetry.** A Poetical Reader for the Intermediate and Upper Classes. 128 pages. Limp Cloth, 8d.**The Poet's Realm.** An Anthology of Verse for Schools. Edited by H. B. BROWNE, M.A., Assistant Master at Hymers College, Hull. 224 pages. 1s. 6d.**Outlines of Inorganic Chemistry.** By E. B. LUDLAM, D.Sc., Head of the Chemical Department, Clifton College. 4s. 6d.

In this book Dr. Ludlam has specially developed the historical side, as a means of training the minds of boys in inductive science.

Inorganic Chemistry. Covering the Syllabus of the London Matriculation Examination. By W. M. HOOTON, M.A., M.Sc., Chief Chemistry Master at Repton School. Crown 8vo. 3s. 6d.**Electricity and Magnetism.** By C. E. ASHFORD, M.A., Head Master of the Royal Naval College, Dartmouth. With over 200 Diagrams. 3s. 6d.

These two volumes form a general work on Physics intended to combine the practical with the theoretical teaching of the subject.

Mechanics. A Course for Schools. By W. D. EGGAR, M.A., Science Master, Eton College. 3s. 6d.**Elementary Mechanics of Solids and Fluids.** By A. CLEMENT JONES, M.A., Ph.D., and C. H. BLOMFIELD, M.A., B.Sc., Mathematical Masters at Bradford Grammar School. 4s. 6d.**Light.** By W. H. TOPHAM, B.Sc., Chief Master of the Army Class, Repton School. 2s. 6d.

Please write for Prospectuses.

LONDON: EDWARD ARNOLD, 41 & 43 MADDOX STREET, W.

ART AND EDUCATION IN RECENT BOOKS.*

"THE Political Economy of Art," which is the first of the four works of Ruskin now published by Messrs. Macmillan in one volume, is better known under its later name "A Joy for Ever." It is certainly the least known of the four (the others are "Unto this Last," "Sesame and Lilies," and "The Crown of Wild Olive"), but in a way it is most characteristic of the author, who may be said to have been led by his ideal of art into the morass of economic controversy. There are passages in it which we could not afford to lose. One is the description of Verona, a town very dear to Ruskin's heart. The other is the plea for art in the classroom: "The time ought to come in the life of a well trained youth when he can sit at a writing-table without wanting to throw the inkstand at his neighbour, and when he will also feel more capable of certain efforts of mind with beautiful and refined forms about him than ugly ones." That learning comes through the eye as much as through the ear is a truth on which educators have now acted for some time. Ruskin went further, and said that "through the eye we must in reality obtain or put into form nearly all the useful information we are to have about this world." Modern authorities are less given to exaggerate the importance of the eye than to exalt, perhaps beyond reason, the educative powers of touch and muscular sense. They would counteract the desire to throw inkpots by occupying the hands otherwise, and certainly it is the most obvious way of doing it. Whether the mere presence of noble sights overawes the inkpot-throwing instinct is more open to doubt. "Stimulate the desire to use muscular power rightly by means of eye and ear and all the afferent nerves" would perhaps be the advice of the up-to-date educator. Still, there is no doubt that a general respect for learning can be inculcated by images of beauty and greatness, especially if it is part of one pervading tradition, and if all the elements of education work together to produce that atmosphere of dignity and that feeling of things worth doing, without which true education cannot thrive.

This is the indirect and subsidiary use of art, and is quite different from its use as the definite object of the learner's activities. Mr. Graves, who has given us in collected form many of his musical criticisms and essays first published in the *Spectator*, has occasion, in criticizing a fellow critic, to say something about music at the public schools. He is dealing with the assertion made by Mr. E. A. Baughan that the influence of the "gentleman musician" has not been good for English music. "When in doubt, abuse the public schools" might be said to be the maxim of most holders of a brief against English education, and Mr. Baughan had said, not without truth, that "the ideals of our public schools—uniformity and stoicism—are incompatible with the free expression of the emotions." Mr. Graves points out that "restraint," one of the qualities in which the other critic had found modern music to be lacking, was precisely what this "gentlemanly" tradition could supply. But we might add that, so far as the public-school boy produces any art at all, it is not as a product of the "uniformity" complained of, but as a protest against it. It is the boy who has no talent for games and no ambition to be "a blood" who frequently takes refuge in art; the trouble is that he tends thus to become over-precious and to make the gulf between himself and the Philistine impassable. But in their total effect the public schools do undoubtedly strengthen that unwritten law of the British race against which Sir Hubert Parry protests, that "the expression of strong feeling is unseemly." Respectability, he observes, "obliterates individuality and reduces everything to the dreary level of monotonous barrenness."

* (1) "Library of English Classics": "The Political Economy of Art, &c." By John Ruskin. (3s. 6d. net. Macmillan.) (2) "Post-Victorian Music." By C. L. Graves. (6s. net. Macmillan.) (3) "Style in Musical Art." By C. H. H. Parry. (10s. net. Macmillan.) (4) "The Aristoxenian Theory of Musical Rhythm." By C. F. Abdy Williams. (12s. 6d. net. Cambridge University Press.)

This judgment is particularly interesting when it comes from such a quarter, for to whom could we look for an eminent example of the gentlemanly, public-school, restrained, and truly British artist if not to Sir Hubert himself? It has even been said that the "healthy" quality of his music is due to his boyish prowess at athletics! Yet Sir Hubert has individuality, he is rarely monotonous, and never barren. Perhaps his enemies would find the fatal note of respectability in his treatment of modern vulgarisms. For, though we may allow that "the cavalier treatment of the leading note" or the once abhorred tritone are often the resource of empty vulgarity which relies on the abnormal for its whole effect (is not this also the law of the hippodrome with its performing sea-lions and diving elephants?), it is pedantry not to allow a freer use of these devices to the present than to past ages. Deny this principle, and we ought, if consistent, to confine ourselves to common chords. No sequence of notes is essentially vulgar in itself, any more than a sequence of words; it all depends on its use and emotional intention. In one respect Sir Hubert Parry must have been led astray through lack of information. When he expresses a fear that "the unsavoury qualities of slum art are permeating the higher kinds of art and poetry as they are gradually contaminating music," his apprehension is not without reason; but surely it is a very different thing to assert that the attempt to "make the lives of less prosperous classes better and more spiritually wholesome through the instrumentality of music" has reacted unfavourably on music itself. A closer acquaintance with such a city as Manchester, and certain working-class associations there, might cause him to modify his opinion; for of some of these it has been said that they will have none but the best, even when it is offered them free. No form of art is stronger than music in its influence on life when it succeeds in its appeal. Plato was not wrong in attaching so much value to the quality of the music which would be heard in his State. In this respect ear is at least as important as eye. Sir Hubert Parry illustrates this by a story of a missionary in India who tried to adapt the aboriginal music to church purposes. "No, no, Sahib," an old man protested; "whenever I hear the old music the Devil comes into me and I forget that I am a Christian." Such a story adds point to a remark made by Mr. Abdy Williams that the introduction into the early Church of rhythmical hymns in addition to the prose melody of the Psalms was strongly opposed; the effect was inconsistent with the ascetic ideal.

It has been said that the Gregorian tone exactly represents the pessimistic ideal of art as superseding sensual desire by supersensual joy. Mr. Williams's theme is that rhythm is the permanent and essential element in music; melody and harmony the accidental and changing. According to Aristoxenus, rhythm is that which transmutes speech into poetry, sounds into music, bodily motions into the dance. The Greek choric ode, in which they are all found in combination, obviously gives the best opportunity for the analysis of rhythmic effect. There the musical value of rhythm is identical with the verbal and dance value. Whether it is always so—at any rate, when the different elements are combined most skilfully—is a question which cannot be discussed here. To bind poetry down to a system of musical equivalents would probably be fatal to poetic art. Still, it is probable that, in the simplest combinations of words and music, as in the folk song, the rhythmical values are identical. But Mr. Williams's object is to prove that rhythmical effects remain constant even when the theory of poetical metre has changed, when the character of melody has been transformed and harmony has been introduced. The importance thus assigned to rhythm is confirmed by most modern authorities and goes far to justify the high respect with which ancient philosophers regarded it. Plato's analogy of the rhythm of music to the rhythm of the soul is undoubtedly more than a literary flourish. Nor has he exaggerated its educational value; for, if it is the chief of all outward and visible signs of the soul's inward and spiritual state, to learn the language of those signs must surely be more than a mere elegant accomplishment.

REVIEWS AND MINOR NOTICES.

Educational Values. By WILLIAM CHANDLER BAGLEY. (Macmillan.)

The student of psychology in its relation to educational practice will welcome the appearance of Prof. Bagley's latest work. The purpose of this volume is to organize the methods of teaching upon a rational basis. "The time will never be ripe," says the writer, "for a final statement of educational values." Problems of function, however, can be solved by an appeal to positive science, and the chief aim of this book is to clear up the confusion between functions and values which has so long darkened our educational discussions.

The business of education is to control conduct, and to

control it for the attainment of certain social ends. What these ends should be is a question for ethical philosophy to settle; in the present work the writer accepts social efficiency as the standard. The "controls" of conduct are either inherited or acquired. The former are the instinctive reactions to stimuli, interesting simply as psychological facts in the study of the development of character. The acquired controls, on the other hand, are the material on which the educator has to work. The writer classifies these under five heads, and shows in each case what educational function deals with each type of control. A certain proportion of our conduct consists of more or less automatic acts, performed in obedience to specific habits. The "training function" in education is concerned with the production of such habits and is the chief business of elementary education. The greater number of our "adjustments," however, are made consciously. Sometimes they are initiated simply by an idea or by a judgment; this type of control is primarily intellectual, and the corresponding educational function is the "instructional" which results in knowledge. Or the mental state which initiates action may have a predominant emotional element in it: we may be spurred not merely by an idea, but by an ideal, and this ideal or "emotionalized standard" is developed by what the writer terms the "inspirational function." Again, the ideals or standards by which we are habitually guided tend to become prejudices in favour of certain types of action; or they may develop in us an attitude which will determine the manner in which we are likely to interpret all future situations. The state of mind where action is determined by prejudice or taste is predominantly emotional, while the "attitude" type of control is characterized by a greater intellectual element. The educational functions corresponding to these types of control are the "disciplinary training function" in the former case, and the "interpretive function" in the latter.

The classification of values is not so simple. In a brief discussion of the criterion of value, the writer adopts the Kantian position. The only rational criterion for the individual is the categorical imperative; the only rational aim of progress is achievement. The question of ends is, however, reserved for some future work, and in the meantime the standard of social efficiency is adopted. The values to be realized by the educational functions Prof. Bagley classifies as (a) the utilitarian, (b) the preparatory, (c) the conventional, and (d) the socializing.

How these values are realized or missed in the curricula of the elementary and secondary schools forms the subject-matter of five chapters, which are the kernel of the book. The chief controversial point raised is that of the value to be realized in fulfilling the disciplinary functions—i.e. the question whether training and the consequent proficiency acquired in one field is capable of "spreading" to other fields. Here, of course, lies in a nutshell the whole vexed question of the value of mathematics and classics in the school curriculum of to-day. After a clear and impartial statement of the case, with descriptions of the recent experiments made by the principal investigators of different schools, the writer offers a solution already foreshadowed by his treatment of the entire subject. Training in one department will help in another exactly in so far as it is intelligent training—in so far as it produces a true insight into and appreciation of the subject. A training in mathematics, for example, will produce in the student a capacity for correct reasoning precisely in so far as he has gained an appreciation of the virtues of the "rigid, clear-cut mathematical methods." If he has studied mathematics in purely mechanical fashion, his reasoning powers will probably have gained but little from the exercise.

An interesting and suggestive chapter deals with the limitations of educative forces. Genius, the writer appears to admit with reluctance, cannot be created by any method of education. But, while capacity is doubtless inherited, the use that will be made of this capacity, whether achievement is on a low or on a high plane, whether the gifted individual unwittingly rediscovers old truths or proceeds to new ones—all

this depends on education. Further, it is the task of education to pass on to future generations the fruits of the inventions and discoveries of genius, and thus to bring the mass of mankind to the level that genius attains. Prof. Bagley is an enthusiastic believer in the influence of environment, hence an optimist as regards the possibilities of education.

The phraseology of the book is somewhat unnecessarily technical, a defect which is likely to discourage beginners in psychology. The book is, however, so thorough in the working out of the problem which the writer has set himself, and so suggestive in every detail, that it cannot fail to appeal to all who are interested in educational problems.

A History of Classical Philology. By HARRY THURSTON PECK. (8s. 6d. net. Macmillan.)

This is a short book from America on a subject with which Sir John Sandys dealt lately in an *opus magnum*. Useful as an outline and for younger students, it can hardly be described as being a substantive treatise of permanent value. Its place, so far as we can judge, were in the school library, not for reference but to kindle inquiry.

We may seem to be ungracious in pointing out the faults instead of expatiating on the merits of classical books. But extravagant praise is odious to the scholar. And in an author so well known as Prof. Peck, an editor of "The New International Encyclopædia," merits may be assumed. Let us indicate some blemishes in his work. First we observe that his definition of "Classical Philology" is so wide that he must have been embarrassed in choosing the matter to be presented. We are told all about the Persian wars, nothing about Alexander de Villa-Dei, who, if he did not add to the sum of human knowledge, had a mighty influence on the mode of its diffusion. Hear him teaching prosody ("Doctrinale," 2138 f.) and then consider what method he fathered:—

Ante d fit brevis o, velut exodus; hinc procul esto
Herodes, et ei custodes sint sociandi.

Again, Prof. Peck might have given as more about palæography, even if he had had to leave out his account of the musical notation of the Greeks. And, whilst it is uncertain what you will find in the book, it is also uncertain where you will find it. We read about Boëthius, then thirty pages further on about Martianus Capella; yet Capella supplied to Boëthius the form of his principal work (Ebert, "Allgemeine Geschichte der Literatur des Mittelalters," I², 490). Misprints abound. The date of Jean Baron de Witte's birth, for example, is given as 1868 instead of 1808; where the true reading is less easy to divine than in the statement: "Theodoric, King of the Ostrogoths, made Rome his capital in the year 5000"! Moreover, sometimes the facts asserted are doubtful or erroneous. We wonder how Prof. Peck knew that it was in 540 that Cassiodorus entered the Vivarian convent; and the statesman-monk was not *præfectus urbis* under four Gothic kings, but *præfectus prætorio* (Mommson in Mon. Germ. Hist., "Cassiodori Senatoris Variæ," pages 570 f.). We are informed that Freund's "Latin Dictionary," as translated by Andrews in the United States, was "conveyed" by the English publisher, William Smith (afterwards Sir William). The publisher was Murray, who would know nothing of any "conveyance." Prof. Peck's disparagement of William Smith (whom it would be possible to overrate) is not due to international jealousy; for he is unkind enough at times to his own countrymen. George Bancroft is "the long-winded historian." It is astonishing to read that the Americanized Greek E. A. Sophocles "wrote a Greek grammar of the Roman and Byzantine periods." The Greek grammar of Sophocles relates to classical Greek; his "Greek Lexicon of the Roman and Byzantine periods" is a standard work. Prof. Peck describes how the publication of the "Archiv für lateinische Lexikographie" was begun and the "Thesaurus" planned; he seems not aware that the "Archiv" was closed in October, 1903, Wölfflin dying a few days later, and that good progress has been made with the "Thesaurus." Sometimes his inaccuracy is irrita-

ting. Be this an instance: "Banks (*sic*), Arden, Harris, carried on fruitful explorations at Herculaneum, resulting . . . in the rescue of important fragments of Epicurus, Philodemus, a part of the *Iliad*, speeches of Hyperides, and others already mentioned as recovered." The Bankes papyrus found at Herculaneum! And Babington's edition of the "Orations for Lycophron and for Euxenippus" should have taught Prof. Peck that Harris and Arden got their fragments of Hypereides at Thebes in Upper Egypt.

But we have done carping enough. Let us touch on one or two matters of general interest. About the American academies the author writes: "There are now in the United States more than four hundred institutions that call themselves colleges or Universities, but barely a score satisfy the definition." He fights bravely to pluck Prof. Anthon of Columbia (friend of our boyhood!) out of the region of comedy. Strange, by the way, that he does not name Richard Shilleto. "Classical Philology," he observes, "is opposed in every way to the spirit of pedantry"—a fault with which we fear that he may reproach us. But if we have differed with him as to some details, we agree in the fine sentiment which he quotes from Gaston Paris: "Studies in common, carried on in the same spirit in all civilized countries, form, above restricted, diverse, and often hostile nationalities, a great fatherland which no war soils, which no conqueror threatens, but wherein souls find the refuge and the unity which was given them of old by the citadel of God."

Lectures on Poetry. By J. W. MACKAIL. (10s. 6d. net. Longmans.)

This third volume completes the trilogy of lectures delivered by Dr. Mackail as Professor of Poetry in the University of Oxford. It is a miscellany, and we may doubt whether the most intelligent reader who had not perused the previous volumes would have discovered for himself the guiding idea—"the progress of poetry regarded as a vital and organic art." Of the thirteen lectures four stand apart and give in sum the Professor's theory of Poetry, two at the beginning entitled "The Definition of Poetry" and "Poetry and Life," and two at the end on "Imagination" and "The Progress of Poetry." The intermediate lectures deal with particular poets or poems—Dante, Virgil, Shakespeare, Keats, and Arabian poetry.

We should have expected a definition at the beginning of the course, but Dr. Mackail has been well advised in reserving his definition to the end, so that it appears as the sum and substance of his teaching, the conclusions to which he has led his audience after a critical examination of the greatest and most typical of the world-poets. We do not think that he has answered the riddle of the Sphinx, but it is no small merit to have shown clearly the problem to be solved and to have exposed the inadequacy or fallaciousness of previous guesses at the truth. First he points out that the form and substance of poetry must be distinguished and that no possible definition can cover the two. Of previous guesses he considers that Phillips comes nearest to the mark, and conjectures that Phillips may have got from Milton, his uncle, the aphorism that "poetry is writing consisting of rhythm or verses"—"a definition that it is not possible to better materially." He does not make the obvious criticism that poetry was spoken or sung long before it was written, but his own amended version avoids this pitfall—*qua* form "Poetry is patterned language," and "pattern" is further defined as "composition which has a *repeal*." "Pattern" is, of course, used in a special technical sense, but the metaphor is misleading in so far as it fails to suggest that the poet makes his own pattern, and shows his originality in the form no less than in the matter, as the very words Alcaic, Sapphic, Alexandrine testify. Of the two we prefer Shelley's "A certain uniform and harmonious recurrence of sound." So, too, we should demur to the statement that poetry, like all arts, is largely a matter of sound craftsmanship—not an instinct, but an acquisition, an art that can be taught. This is a half truth and needs the correction that here nature is infinitely more than nurture. We should have welcomed a further discussion

of compositions which lie half-way between poetry and prose, and simply to be told that the Book of Job lies on the border-land is to shirk the problem. The "mixed mode," to borrow the Greek term, ranging from the Psalms to "Leaves of Grass," is too extensive and important to be left as no man's land.

Of poetry in its essence there is no formal definition, but a pregnant sentence which we must be content to quote without comment: "The substantial and vital function of poetry is to make patterns out of life"—a vast improvement on Matthew Arnold's "Criticisms of Life."

Of the supplementary lectures the most attractive is the study of the "Aeneid," "the richest, the most fully charged of all Latin poems, perhaps of all the poems that have ever been written." "As a mere matter of fact and history Virgil has been, from his own day till now, the voice, the interpreter, the chosen recorder and exponent of Rome—of the Latin race, the Latin Empire, the Latin civilization." And as bearing on a practical question mooted at the last meeting of the Classical Association we will quote the introductory paragraph:—

Greece and Rome represent two forces, two different streams of tendency and bodies of achievement, which are nevertheless indissoluble, which flow together, intermingle and reinforce each other to fill the sources from which succeeding ages have drawn. But, of the two, Rome is the closer to us, the more directly in the line of ascent. Modern life owes its highest ideals, directly or indirectly, to the inspiration of Greece; it owes its whole structure and existence to the creation of Rome. And so also with the two languages; for, while Greek is a language of unequalled beauty, flexibility, and strangeness, Latin is to us, and to all inheritors of the Latin civilization, a second mother tongue.

To return to the "Aeneid," the exposition of its structure, the architectonics, is masterly. The last six books are the "Aeneid" proper, corresponding to the "Achilleis" of the "Iliad." To this is added the Wanderings of Aeneas contained in the first four books, Virgil's "Odyssey." The fifth book, an imitation of the Games at the tomb of Patroclus, was composed as an interlude, but Virgil perceived that it was but a *tibicen*, a shore or stopgap, and by a stroke of genius he conceived his Inferno. The sixth book slips the keystone into the arch and locks the whole structure.

The book is full of subtle, sometimes over-subtle, criticisms on which we would fain linger; but we have only space for one sample. The lines from the pseudo-Virgilian "Lydia"—

Non ulla puella
Doctior in terris fuit aut formosior

—are "like a phrase from a Greek lyric for pellucid colour." We confess we are colour-blind. But another couplet from the same poem:—

Luna, tuus tecum est : cur non est et mea mecum ?
Luna, dolor nosti quid sit : miserrere dolentis—

is quoted to show how the popular ballad-verse is taken up and woven into the structure of a poem. And Dr. Mackail shows us the trick, if we may so express it, the accentual riming trochaics of the *Volkslied*.

Luna, tuus est ut tecum,
Cur non est et mea mecum ?
Luna, quid sit dolor sentis,
Miserere tu dolentis.

Dr. Mackail almost persuades us that there must have been pre-Augustan rimes, although it is inconceivable that no single fragment should have survived.

History of Scotland to the Present Time. By P. HUME BROWN, M.A., LL.D., F.B.A., Historiographer-Royal for Scotland and Fraser Professor of Ancient (Scottish) History in the University of Edinburgh. In three volumes. With illustrations. (30s. net; or, separately, 10s. 6d. each. Cambridge University Press.)

The excellence of Prof. Hume Brown's "History of Scotland" is handsomely recognized by this magnificent reproduction in three stately and profusely illustrated volumes. The text is divided at the accession of Mary Stuart and at the Revolution of 1689. Each volume has a frontispiece and an average of 43 fine plates (42, 44, and 43), widely varied in

subject, and largely illustrative of the political and social history; and the first volume has seven maps and the second four. The type is large and amply spaced, and the binding is artistic as well as substantial. The new issue, however, is not a mere reproduction in more ambitious and luxurious form. The text has been revised in the light of the latest research, and a new chapter has been added, bringing the narrative down from 1843 to 1910. Though in the nature of a severe summary, this new chapter places judicious emphasis on the more outstanding movements and supplies what was felt to be a defect in the original work. The very first sentence of the chapter shows how necessary is the supplement: "Scotland, during the last half century, has undergone a transformation unparalleled in any previous period of her history." And this transformation is equally apparent in all the most vital interests of the people—in politics, in education, and in religion. It is under these three heads, therefore, that Prof. Hume Brown signalizes the later remarkable developments.

The crises of political excitement during the period "prove that the nation is still characterized by the perverted temper which produced the Covenants." Since the Reform Bill of 1832 Scotland has been Radical, the Radical minority of four in 1906 being the solitary exception—a temporary aberration attributed by Prof. Hume Brown to Home Rule and the Boer War, but essentially due to intelligible prejudices in the one case and to misrepresentations of the facts in the other case. "By the preponderance of the support she has given to one party, Scotland has exercised a determining influence on the political development of Great Britain out of all proportion to the relative numbers of her electorate," and emphasized "the divergent temperaments and ideals of the English and Scottish peoples"—emphasized in particular the effects of superior education on a community. The revolution in all the grades of Education "is the most striking illustration of the national development during the last half-century"; this period "has witnessed more fundamental changes in the aims and scope of public instruction than all the previous centuries since the Reformation." Prof. Hume Brown traces the progressive amelioration of the position of the elementary teachers in status, emoluments, and freedom; the reform of secondary education, which took a more serious turn in 1885; and the vast changes effected in University education—in emancipation of the professors from religious tests, in improved administrative arrangements, and in the widening of the curriculum under the new Ordinances of 1908. He notes that in all the grades "the traditional conceptions of intellectual and spiritual culture are yielding to the immediate pressure" of the material needs of an industrial community, the dominating aim being "a discipline that will most effectually prepare the taught for 'the battle of life.'" In Religion, "the Church is adapting itself to the spirit of the time," and the Churches are tending, not without hesitations, to union. Generally, "during the period that has elapsed since the Disruption [1843], religion in Scotland has undergone a transformation in all that formerly constituted the essentials of every Christian Church such as is without a parallel since Protestantism displaced Roman Catholicism as the national religion." While sharing fully in the progressive movements of Imperial development, yet Scotland has not shed her national characteristics: "in all that distinguishes a people—in her political affinities, in her type of religion, in her deepest intellectual interests—she remains as distinct a nation from England as at any period of her history." There may be superficial assimilation, but the two peoples "see different visions."

Universities of the World. By CHARLES FRANKLIN THWING. (10s. net. Macmillan.)

This can hardly be called a book. It is made up of a series of independent sketches such as might appear in one of the better monthly magazines. In fact, we gather from the preface that many of the articles have appeared in this form. In his introductory remarks the author indicates four different types of Universities. "Examples of these types," he tells us,

"are found in this volume, although it was not by any means written to illustrate these types." After reading it we certainly wonder what it was written for. The author helps us by saying "Rather the book was written to give some idea, however imperfectly outlined or inadequately presented, of the higher education of the world." It cannot be said that the book has succeeded in this aim. One can find no guiding principle underlying the author's presentation of his matter. It is true that he gives a more or less picturesque account of twenty Universities, all of which, with the single exception of Melbourne, he has himself visited. The Universities selected include such remote seats of learning as those of Bucharest, Cairo, Calcutta, Peking, and Tokio. Taken by themselves the articles are excellent descriptions of local conditions, and in many cases embody the results of very intelligent observation. But there does not appear to be any particular reason why they should be strung together and make their appearance in book form.

Generally speaking, the style is vivacious, but there is a certain straining after effect that rather wearies the reader. Prof. Thwing tells us that Oxford and London Universities are in many fundamental respects alike, and concludes the matter by saying: "They are both ministers of culture to humanity. Oxford is also on the Thames." In showing Oxford's indebtedness to Paris, our author informs us that "The Seine flowed into the Isis." We have to be continually on the look out for epigrams in the text if we do not want to be caught out by an apparently simple statement like "The University of London is a University in London." We feel that there must be something more here than meets the eye, but when we come to the plain statement: "But the University of Vienna is the University of Vienna," we know that the author either means an epigram, or is writing with unusual care and precision. The latter explanation cannot apply to his other remark about this University: "But in respect to students, its six thousand are larger than are found in any American institution with the single exception of Columbia." But he is not often caught napping. In "As I write I hold in my left hand a program of intercollegiate sports," he certainly, by the words we have ventured to italicize, forestalls a possible criticism.

Prof. Thwing's references to the English University system are exceedingly friendly. After all, it is rather a compliment than otherwise to say that our Oxford tutors teach so much that their over-work "is liable to result in mental disintegration, destruction, or death, or other damnable things"; and the remedy suggested is very palatable—"one-half of the calendar year should be a college vacation." We wonder what our Scotch friends will think of an account of the Universities of the world that does not include even one of their four. They are not ignored altogether, however, for the students of Budapest are compared to those of Edinburgh and St. Andrews, and the whole condition of student-life at that University is said to suggest "the men of Aberdeen, who came down from their highland home, bringing their bag of oatmeal." By the way, if the Prof. Ramsay referred to on page 196 is the distinguished archæologist, he is of Aberdeen and not "of St. Andrews."

Not from the book itself, but from an advertisement at the beginning, headed "Professor Thwing's Books on College Subjects," we get a suggestion that may explain the lack of a general treatment in the present case. One finds from the list that, of the twelve books that have preceded the present, eleven deal directly with aspects of University and collegiate life and interests. No doubt Prof. Thwing has done all his generalization already, and is now content to present his readers with fresh material to illustrate principles previously laid down.

Problems of Boy Life. Edited by J. H. WHITEHOUSE, M.P. With an Introduction by the BISHOP OF HEREFORD. (10s. 6d. net. P. S. King.)

The name of the editor is a sufficient explanation of the title. As a founder of schoolboy clubs and schoolboy camps and cognate institutions too numerous to mention, he has done

as much for the welfare of the rising generation as any living Englishman. To the present volume he contributes three essays on "The Reform of Elementary Education," "Street Trading by Children," and "The Supervision of Juvenile Employment," and he shares with Mr. S. J. Gibb a fourth on "Boy Labour"; and his ten collaborators have all been active workers in the same field.

The first essay by the editor advocates reform on which all are in theory agreed—the raising of the age for school attendance, smaller classes, less of book and more of handwork, continuation schools coupled with a statutory limitation of the hours of boy labour; but it contains one original suggestion well worth considering. Instead of building schools in the centre of crowded districts, Mr. Whitehouse would build them in groups round certain great open spaces—for instance, Victoria Park for the East of London—and make arrangements for the conveyance of children to the school. It is a bold project environed with difficulties, the least of which is the expense, but not, we believe, chimerical, and the gains are incommensurable.

The bulk of the essays are concerned with the social and economic aspects of boy life, and have only an indirect bearing on education in the stricter sense of the term. We pass to a memorable article by Mr. J. L. Paton, with the stimulating title "Cross-fertilization in Schools." He puts his finger on the weak spot in our boasted public schools—inbreeding.

They are shut off from all contact except with the moneyed classes; their scholarship system, which was designed to counteract the danger, has served in practice merely to accentuate it. They are shut off from all contact with foreign schools—even the foreign teacher is now tabooed. They are shut off, too, from contact with schools of other grades even in their country. They are fed from preparatory schools, which are specialized to meet their needs; they have a separate Conference of their own; they have no sort of correlation, and owe no sort of allegiance except to the two older Universities. Into the public-school boy one fixed idea is instilled from the first: that his school is far and away the best in England.

And the same inbreeding is largely seen in the staffing. Public-school masters form a class apart, and even their holidays are regulated for them by Dr. Lunn. And, lastly, this intense enthusiasm for schools of the type of Eton and Harrow has infected our "governing classes," and made them indifferent to the education of boys whose parents cannot afford to pay at the rate of £150 to £200 a year.

The same evil of segregation has infected our elementary schools, and produced in the teachers "a certain rigidity, intolerance of criticism, *grooviness*." What we need, and have not yet succeeded in attaining, is some reform whereby the scholar, on leaving the elementary school, shall become a member of the public school, freed from its class prejudices, and share in its *esprit de corps* and its other high qualities, which are fully recognized.

We would gladly continue our analysis, and quote some of Mr. Paton's wise and witty observations on Free Trade in education, experimentation, and the dissemination of professional knowledge, his commendation of classical and modern sides, his scathing denunciation of the proposed public school for bagmen, his plea for common religious teaching as a binding force; but we hope we have said enough to send our readers to the essay itself.

The whole volume deserves careful perusal. The contributors are all reformers, and would, by those who resist all reforms, be stigmatized as socialistic, but the reforms are temperately urged, and none of them, in our judgment, is Utopian. We could wish, however, that the editor had used his blue pencil on page 206.

The Man-made World. By C. P. GILMAN.
(4s. 6d. Fisher Unwin.)

Those who take long views, as well as wide, will best appreciate this arresting book. The somewhat ominous title portends no vehement and bitter diatribe on the existing order; it is with restraint and comprehensiveness that Mrs. Gilman examines in detail our familiar surroundings. It is possible

that, by one of the ironies of literary criticism, "The Man-made World" may find itself classified as a contribution to the literature of sex. In reality it is directed throughout against the over-emphasis of sex. In agreement with Miss Harrison's pamphlet, "Homo Sum," Mrs. Gilman holds that "we do not consider in what our humanness consists, nor how men and women may fall short of it, or overstep its bounds, in continual insistence upon their special differences. It is 'manly' to do this; it is 'womanly' to do that; but what a human being should do under the circumstances is not thought of." As against the widespread assumption that "men are people, while women are only females," we are reminded (in what can hardly be called an extravagant assertion) that "woman's natural work as a female is that of the mother; man's natural work as a male is that of the father . . . but human work covers all our life outside of these specialities." Handicrafts and professions, science and art, education, recreation, government, religion, "the whole living world of human achievement—all this is human."

What we have all this time called "human nature," and deprecated, was in great part only male nature, and good enough in its place; what we have called "masculine," and admired as such, was in large part human, and should be applied to both sexes; what we have called "feminine," and condemned, was also largely human and applicable to both. Our androcentric culture is so shown to have been, and still to be, a masculine culture in excess, and therefore undesirable.

The author demonstrates what has been the effect of "androcentric culture" on things familiar to us all—on *human* concerns such as the family, health, art, literature, education.

Sometimes you feel you are reading self-evident platitudes, till you suddenly remember that almost every sentence runs counter to accepted views and standards in any department of life—of those "big, common, unquestioned world ideas" of which Mrs. Gilman speaks; "vast is the labour of those that seek to change" them. But, without doubt, that labour of the pioneers will be the lighter for this valuable bit of spadework in breaking the new ground.

We have two adverse criticisms to make, besides a plea for more efficient proof-reading in the next edition: first, of the author, that she assumes, rather than explains, the momentous transition from the matriarchate to the "ancient proprietary family"; second, of the publisher, that he has not provided the book with an index, a grave omission in the case of a work of such wide range and fertility of ideas.

The Groundwork of British History. Part I: To 1603. By G. T. WARNER, M.A. Part II: From 1603. By C. H. K. MARTEN, M.A. (6s. Blackie.)

If we are to judge by the scanty output and frequent failures, it is the historian's hardest task to cater for that period of mental development which has passed beyond the textbook—a mere stringing together of facts and dates—and is not yet ready for those larger handbooks more suited to the History Schools at the University. Prof. Bury has done this for Greek history; there is perhaps no history of Rome suitable for the intermediate stage; and there is ample room for a book on English history which shall be up to date, coherent, and stimulating, placing universals and particulars in their right relation, and not too insistent on sources, while not neglecting them altogether—a book which shall form an introduction to that which few can enter upon while still at school, the science of history.

We think "The Groundwork of British History" is such a book. This joint product of Mr. Warner of Harrow and Mr. Marten of Eton—to some extent an advanced edition of the former's "Brief Survey of British History"—is well calculated to suit the stage in mental development to which we have referred. It is lucid and coherent: the main lines of British history are adequately traced out; facts are treated without cutting up chronological divisions (though cross-references are sometimes necessary); mere facts and dates (for chronology is a small thing) are in due subordination. For particular mention we may select the excellent accounts of the Reforma-

tion, the Napoleonic wars, the constitution since the Act of Anne, and the prominence given to the history of Scotland and Ireland, too often neglected in school histories.

Both writers have done their work well. If asked for the characteristic of each, we might say that Mr. Warner makes a point of laying strong emphasis on the fact or facts necessary for the understanding of a period, while Mr. Marten's character sketches are admirable. If we are to carp, a little more about English literature would not have been amiss, and perhaps some of the diagrams—e.g. those to explain the difference between *ban* and *arrière-ban*, page 64, and to trace the breaking up of the Yorkist power, page 232—are rather fantastic and superfluous. However, the book, which we may best compare to Bury's "History of Greece," fills the empty place admirably, and should suffice both to turn the attention of the upper forms of schools to the history of their own country, and also to serve as a starting-point for more advanced students. It should be noted that it is also published in two parts at 3s. 6d. each.

Puppets: a Workaday Philosophy. By GEORGE FORBES.
(3s. 6d. net. Macmillan.)

In acknowledging this volume we hesitated whether to enter it under romance or metaphysics, but, on perusal, it is clear that philosophy is the *idée mère* and romance an afterthought, the gilding of the pill, or (shall we say?) the philosopher's stone. The story is delightfully naive. Bubbles, a lieutenant in the Navy, is watching the roulette table at Spa and comes to the rescue of a girl in mauve who is being cheated of the stake she has won. He is invited to lunch by the grateful maiden, and, after lunch, takes her for a drive and stands her a dinner. He writes off to his mother, giving an account of his day and requesting her to invite the girl in mauve to Knock Castle. Unluckily, he has omitted to ask her name, and he finds next day, to his disgust, that she has left her hotel without giving her address. He starts in pursuit, but discovers that he has been robbed of his pocket-book. A stranger volunteers to lend him a five-pound note. The scene changes to Knock Castle. An American family has taken the next place, and calls are interchanged. Bubbles's mother is convinced at first sight that Ida Porter, the American's eldest daughter, and not the girl in mauve, is the wife for Bubbles, and, on the return visit, "she almost fell on Ida's neck," and "Ida seemed not a bit surprised." Who could resist her beauty and wit? Some one remarked that the motor which would not start was out of breath and tired, and Ida instantly capped it with: "Yes, pneumatic and india-rubber tired." "And she kept it up." The youngest reader will have guessed the *dénouement*. The girl in mauve and Ida are one and the same. Ida has pined for Bubbles as much as Bubbles has pined for Ida. "She lies down all day with an expression that makes Archie (Bubbles's father) think of the angels." They meet. "She was dressed in a delicate fabric of mauve, with a thin, flimsy mantle of the same tint enveloping her from head to foot"; but "her expression appeared to be so ethereal as to lift her above the sphere of human mortals." Introductions followed (surely a superfluous detail). "Mabelle, my darl —" he exclaimed, and checked himself, and she could only ejaculate: "Oh, Bubbles!" "and her eyes devoured him." Bessy (*alias* the Countess of Banff) falls on Mrs. Porter with kisses, "and they shed real tears of relief upon each other's necks." (We hope they had real handkerchiefs.) Need we add that the lender of the five-pound note turns out to Mr. Porter, who, with rare prevision, had thought how nice it would be to do a kindness to a possible son-in-law. To complete the story, we learn in the concluding paragraph that Bubbles is Lord Fintrae.

We have lingered so long over the gilding of the frame that there is hardly space left for a glance at the picture, and, to be honest, we feel, like the guests at Knock Castle, that "we are not competent to criticize." Briefly, it is a development of Berkeley's "Idealism." "Berkeley had an idea that the Creator put his thought of the universe into our thoughts, but he did not carry his idea far enough." With Wordsworth, Mr. Forbes believes that the infant is the best philosopher. "Baby knew all about our world, and was thinking things before his little body was born." The nearest approach we can make to the Nirvana of infancy is when we are under anaesthetics or dead tired. "When you have no sensations to distract your thoughts, you may be in contact with the universal thought of the world." And this is a workaday philosophy. To start with, it will cure the toothache. Is not the successful cricketer a palmary instance of unconscious cerebration? He succeeds where the professor of philosophy

would signally fail. Do you need further proof? Try the simple experiment of toe-wagging. If you try to wag one toe without moving the others, you discover that no amount of willing avails; you must let your thoughts range till they chance on the thought of the brain cells that move the toe-muscles. But Jack reminds us that "this is a tremendously big subject, a whole philosophy in itself for explaining memory, understanding, and reasoning," and we must not pursue it. We ask, like Bessy, "What do you mean by your Self," the Ego that wags your toes and pulls all the other strings of the puppet? And we are answered, the meaning depends upon the point of view. There are five Selves as regarded from the social, the practical, the intellectual, the ethical, and the philosophical plane. We fear we cannot echo Bessy's "That is quite clear."

Unemployment: a Social Study. By B. SEEROHM ROWNTREE and BENNA LASKER. (5s. net. Macmillan.)

This survey has been carried out with the same care and thoroughness that made Mr. Rowntree's "Poverty" a landmark in social reform. It suffers even more than his first study from the limited area to which his inquiry was confined, and lays itself open to the quip that it is the brick of Scholasticism offered as a sample of a house. If the manufacture with which Mr. Rowntree's name is associated were removed, the conditions of unemployment in York would be wholly changed. But this limitation affects only to a small extent the problem with which we are here concerned—the relation of unemployment to education. Mr. Rowntree's remedy, or rather palliative, for the evil is an organized system of School Care Committees working in connexion with the Advisory Committees on Juvenile Employment and the local Labour Exchanges, an admirable plan if only sufficient volunteer workers could be secured. The sad fact would still remain that there are more lads than there is work for, and we are driven to the conclusions of the Minority Report on the Poor Laws—a minimum leaving age of fifteen and compulsory continuation classes up to eighteen or nineteen.

The Home and the Child. By E. WALFORD MARTIN
(2s. 6d. G. Allen.)

Simple addresses to parents mainly on the upbringing of their children. They are undogmatic, and we could not determine from internal evidence to what denomination the author belongs. The chapter on "The Child's Religion," with its warnings against premature forcing by way of services, catechisms, collecting cards and such like, is particularly sensible. The pedagogics are not so satisfactory. For instance, the dictum that "as the instrument of punishment will be hated, no means must be used which we do not desire the child to hate" does not carry us far. It leads the author to the conclusion that the cane is a fitting instrument of punishment, with the caveat that it must be used discreetly and not as a practice.

Classic Myth and Legend. By A. R. HOPE MONCRIEFF.
(7s. 6d. net. Gresham Publishing Company.)

"Classic Myth and Legend" covers much the same ground as "Fifty-two Stories of Classic Heroes"—a composite work to which Mr. Hope Moncrieff contributed. In the earlier volume there was no attempt at uniformity of style or treatment. Some stories were free paraphrases of Homer, Virgil, and Ovid; others, following the example of Hawthorne's "Tanglewood Tales," were original fictions, for which the old myth served as a skeleton. There is no need to decide which is the better method. The wrath of Achilles must be treated otherwise than the late romance of Cupid and Psyche, and the tale of Procne must be bowdlerized almost past recognition to make it suitable for the young person. On the other hand, Mr. Moncrieff has covered the ground more thoroughly, and he tells his stories with even excellence. In the matter of illustrations, the new is infinitely better than the old. In place of the original designs of a comparatively unknown artist, we have illustrations, in colour and monochrome, taken from the pictures and statues of famous masters, old and new—the Zeus and Venus of Melos of the Louvre, the Cupid and Psyche of Canova, six of Lord Leighton's pictures, three of G. F. Watts, and others by Briton Rivière, Sir E. J. Poynter, Sir E. Burne-Jones. We think Mr. Moncrieff would have done better to plunge at once into the narrative without prologue. To discuss the origin and meaning of myth in a dozen pages is a hopeless task, and the impression that the young reader will gather from the introduction is "all that we know is nothing can be known." The Cosmogonies also are too much in the style of Lemprière. "The reign of Zeus was soon marked by civil war. . . . Fresh rebellion broke out under Typhon, . . . and henceforth the history of Olympus becomes rather a scandalous chronicle of despotism tempered by intrigues." "To Homer Olympus furnished the most comic scenes in his story" will give the young reader a false notion of the "Iliad." Polymnia (better "Polyhymnia") does not mean "sublime hymn,"

and we dislike modernisms such as "the celibate nymph Daphne," "tender passages" between Diana and Orion. But these faults disappear when Mr. Moncrieff gets into his stride, and, as we said before, he has the rare knack of telling a story. The classical poems, among them Wordsworth's "Laodamia," are a welcome addition, and we could wish the number trebled.

- (1) *Isidori Etymologiarum sive Originum Libri xx.* Edited by W. M. LINDSAY. (2 vols., 10s. cloth, 9s. paper covers.)
(2) *Platonis Opera.* Tom. III, fasc. II. Edited by J. BURNET. (3s. 6d. paper, 4s. cloth.)

We have here two books included in the "Bibliotheca Oxoniensis" (Clarendon Press). (1) Isidore was created Bishop of Seville about the beginning of the seventh century, and he held the see for some forty years. His works have significance for the light that they cast on a period which is otherwise dimly illumined. Yet his statements are often grotesque enough. He argues somewhere for an affinity of Scythae and Getae from the fact that, one letter taken away, another changed, the names can be made practically identical; and he believed that the Goths sprang from Magog, a son of Japheth, the Spaniards and Italians from Magog's brother Tubal. Nevertheless, in the "Dark Age" he was a much-quoted authority. The "Etymologiae," now skilfully edited by Prof. Lindsay, who finds there to be three archetypes and no more, are interesting if only because they show the state of classical learning in Spain at the time when Isidore wrote. But they aim at more than that: they would present all science in a sort of encyclopaedic summary. From the science we shall not learn much now; but it is pleasant to dally awhile with the etymologies, which are, although the Bishop knew it not, a terrible admonition against guessing. He teaches, for example, that *cuniculi* is for *caniculi*, and that rabbits were so called because they were hunted with dogs; *venenum*, (from *venenosum*, and connected with *Venus*; originally, then, a love potion) he derives from *vena*, the name being justified in that poison goes through the veins. But Isidore is not the only man that has propounded foolish etymologies, and we owe him thanks for transmitting to us much curious old-world lore.

(2) The preface to Prof. Burnet's Plato, Tom iii, "Tetralogias V-VII continens," is dated 1903. The present part-volume (undated) is, if we may trust our hasty collation, a reissue in a separate form of the sixth tetralogy ("Euthydemus," "Protagoras," "Gorgias," and "Meno") as then printed. At least it would seem that matter which has appeared since 1903 has not been taken into account. If Gifford's conjectures, "Euthydemus," 271. c. 7, καὶ δὲ for καὶ δ, and 286. e. 7, εὐ δ' ἐκέλευε, might have been ignored, Radermacher's σύν γε νῦν for συγγεῶν (*Rheinisches Museum*, LXV, 472) in "Meno," 91. c., would surely have been mentioned by an editor free to notice it. But Prof. Burnet's work on Plato is so good that we should have no heart to chide him for small omissions, even if he deserved it. The publication of these four dialogues in a detached form is a boon to students.

Translations from Heine and Goethe. By PHILIP G. L. WEBB. (A. C. Fifield.)

Heine is like the lady in Aristophanes who had many wooers, but whose favours few enjoyed. His poems fall under three categories, the untranslatable, the translatable, and those not worth translating. In the first class we put such lyrics as "Du bist wie eine Blume" and "The Pine and the Palm Tree"; in the second, "The Pilgrimage to Kevlaar" and many of the ballads. Both classes are represented in this small volume, and of the "Pilgrimage" we have a wholly satisfactory version. If, however, there was a censorship of translations, or if only each translator, before he published, would examine what his predecessors have accomplished, the effect would be something like a coal strike. In the present instance "The Pilgrimage" has been as well, if not better, rendered by Miss Stretton, and the same criticism applies to the second section, "Mountain Idylls," translated some years ago in *Macmillan's Magazine*. This objection does not apply to the last poem in the volume, "The Poet Firdusi," and here the first unrimed canto is distinctly good. The other two show stress of rime, and are marred by grave faults of taste and some positive blunders. Heine: "By the double sense of what he said and the greater deceit of what he left unsaid." Webb:

"Using words of double sense,
Saying nought deceitfully."

"Lord Mahomet has eaten his fill,
He looks about him with right good will.
In the garden by twilight, on cushions of gold
He sits by a fountain which plashes cold."

The German is "in happy mood" and "on a cushion of purple." We have "water pots" to rime with "leopard skins with mighty spots," "drinks of all kinds, bitter and sweet," to rime with "potted meat." Worst of all is the ending—

"But out of Thur at the same moment
A mourning procession passed and went,
At the opposite end through the eastern door,
And the dead Firdusi to burial bore."

Had the piece been set for competition we wager we should have got a score of better versions than this. Here is one at random:

Through the eastern gate, at the town's far end,
Another train in silence wend.
No trumpets blare, no banners wave.
It bore Firdusi to his grave.

Deux Contes. Par JOSEPH MÉRÉ. Adapted and edited by T. R. N. CROFTS. (1s. Clarendon Press.)

Méré's two short stories, a Scotch botanist treed by a crocodile and an incident in the siege of Constantine are well suited to attract the British boy. We need not repeat the method on which the "Oxford Junior French Series" is edited. It is well carried out by Mr. Crofts in this volume, but he does not give either in notes or vocabulary all the help required. In "Après Constantine" "grande comme sa mère impériale" wants a note; "circumstance" does not render *la circonstance*; *pays*, "countryman," is not given; *les trois sauts* and *le coup de quinze* need notes.

"Siepmann's French Series for Rapid Reading."—*Bataille des Dames.* Par E. SCRIBE et E. LEGOUÉ. (1s. Macmillan.)

We need only note the appearance of this popular comedy in Mr. Siepmann's series and explain to teachers that for "rapid reading" all possible difficulties of vocabulary and translation are given under "Words and Phrases." The phrases of this play are correctly and idiomatically rendered.

Through Evolution to the Living God. By the Rev. J. R. COHU. (3s. 6d. net. J. Parker.)

In previous volumes Mr. Cohu has given us studies on the Bible as seen in the light of modern science, and now, passing from the particular to the general, he adumbrates a Natural Theology, which is a reconciliation of religion and science. All answers to the Riddle of the Universe must needs be partial and provisional, and our first impulse is to class this with attempts to square the circle or discover perpetual motion. But, as was said of old, if there is no such thing as philosophy, we must still philosophize; so, however sceptical we may be, we are bound to give the theologian a hearing, provided he can first convince us of his competence and of his honesty. Of both qualifications Mr. Cohu furnishes abundant proof. He is a convinced evolutionist, and has studied not only what we may call the Right Centre, Darwin, Wallace, and Weismann, but the Extremists on both sides, Romanes and Hæckel. And he shows his honesty by revealing his own phases of faith. Bred in a narrow Evangelical school, he was led by the writings of Herbert Spencer to abandon his early creed, and emerged "a fairly reasonable Agnostic, but unsatisfied." Clinging to the one clue left him, Spencer's "unknowable Power behind phenomena," he was brought back, under the guidance of T. H. Green, to his old belief in the God-Man, the doctrine of an immanent Deity, purged of the accumulated dross of scholasticism and ecclesiasticism. Here we must be content to leave the author with his readers, having shown, we hope, that he is well worth reading.

Thomas Carlyle: a Study of his Literary Apprenticeship, 1814-1831. By WILLIAM SAVAGE JOHNSON. (4s. 6d. net. Frowde.)

The book is founded on a course of lectures delivered in Yale University on Carlyle, in which "Sartor Resartus" was used as a textbook; but the author has been well advised in obliterating all traces of the lecture form. He finds that as early as 1831—the year of "Characteristics"—Carlyle's creed, spiritual, social and literary, was evolved and fixed, and that his work for the remaining thirty-five years of his life was but a restatement in divers forms of the same doctrines. The lectures, then, were an attempt to trace the origin and development of his philosophy in his earlier works. Thus we find in the "Critical Essays," more clearly stated than elsewhere, the central philosophic doctrine of the reality of spirit and the inanity of the material world, as well as the ethical doctrine of *Entsagung*. The analysis shows great literary skill, and good use has been made of the posthumous autobiographical novel, "Wotton Reinfred," an esoteric writing in every sense of the word. Mr. Johnson is expository, not critical; he emphasizes what is admirable in Carlyle, but does not attempt to whitewash or palliate his imperfections. Perhaps something more might have been said of his failure as a historian and as a social reformer, and his style deserved a chapter to itself.

In Praise of Oxford: an Anthology in Prose and Verse.

Vol. II: *Life and Manners.* Compiled by THOMAS SECOMBE and H. SPENCER SCOTT. (6s. net. Constable.)

The first volume dealt with the topography and history of Oxford. The second, dealing with the life, manners, and customs

of the University, is compiled with equal learning and literary taste, and will attract a far wider circle of readers, the many who care nothing for archæology, but love all *biographia literaria*. The extracts from Gibbon, Charles Lamb, Boswell's "Johnson," Hogg's "Shelley" will be familiar to most; but Hearne and Anthony Wood are more talked of than read. Not only have obvious sources—reminiscences, autobiographies, lives—been tapped and tasted, but we have telling extracts from novels, ranging from "Tom Brown at Oxford" to Mr. Calderon's "Downy V. Green." For instance, there is a delightful piece of fooling from Theodore Hook's "Peter Priggs," a work of which we had never heard; and one of the best thumb-nail portraits of Jowett ever drawn, from Julian Sturgis's "Stephen Calinari." We wonder, by the way, that Mr. Mallock's "New Republic" has not been drawn upon. We must not begin "sampling," or we should never end; but here is one story (slightly curtailed) new to us, told by Mr. Denison, who was proctor in 1832. Dr. Jenkyns, the Master of Balliol, was just sitting down to dinner. He asked, "What is all this disturbance outside?" "Master, it is a great fight—town and gown; and they say that Mr. Denison of Oriel is killed." "Give me my academicals and open the street door." He was warned of the danger, but insisted. He stood on the doorstep, and had just begun, "My deluded friends," when he was doubled up by a big stone, and fell back into the arms of his servants, crying "Close the door." It was said at the time that Dean Buckland asked him for the stone in order to discover from what quarry it had come, and so help to identify the thrower. On page 583 there is a corrupt version of a famous Oxford limerick:

"I am the Dean, this Mrs. Liddel (*sic*),
She plays the first, I second, fiddle;
She is the Broad, I am the High,
We are the University."

The true reading is—

"I am the Dean of Christ Church, Sir;
This is my wife, look well at her."

We should like to identify "The City of Dreams," a striking poem here given anonymously. There is plenty of material left for a third volume, Oxford Literary, and the editors hint that some such addition is contemplated.

Isocrates: Cyprian Orations. Edited by E. S. FORSTER.
(3s. 6d. Clarendon Press.)

The three "Cyprian Orations" of Isocrates ("Evagoras," "Ad Nicoclem," and "Nicocles aut Cypri") have been edited by Mr. Forster, Lecturer in Greek in the University of Sheffield, to provide a reading book easier than Thucydides and harder than Xenophon. Whatever the mark at which he aimed, an Upper Fifth Form may be taken as representing that which he hits. The matter of the pieces is not of high interest. On the other hand, the Greek is elegant and flows smoothly. The editor's notes contain much matter that will be instructive to young students; but his work is not free from blemishes. In the analysis of "Evagoras," 5-7, it is misleading to put for *τοῦτων δ' αἰτίος ὁ φθόνος* "this feeling is due to jealousy," for *τοῦτων* means "of the fact that eulogies are posthumous instead of contemporaneous with their objects." In "Evagoras," 21, does not the rendering of *ἐξ ὧν μεζύωνος ἂν φανεῖν γεγονώς ἢ κατ' ἀνθρώπων*, "judging from which his birth would appear to have something superhuman about it," offend against a well known rule? *Ib.* 28, we doubt whether *λαβὼν ταύτην ἀφορμὴν* is "taking this as his principle"; we understand "having got the position of an injured man to start from." It was an oversight on the part of Mr. H. Clarke to say that *ταύτην* is explained by *ἀμύνεσθαι καὶ μὴ προτέρους ὑπάρχειν*. In spite of some flaws Mr. Forster's book has one conspicuous merit: he would raise us from the dull mists of word-for-word translation to the clear air of literary English.

Tennyson's Guinevere, and other Poems. Illustrated by FLORENCE HARRISON. (12s. 6d. net. Blackie.)

This splendid quarto which, had it been published last Christmas, we should have pronounced the colour book of 1911, prompted us to take down from a dusty shelf the illustrated edition of Tennyson published by Moxon in 1857. The most distinguished artists of the day—Millais, Rossetti, Stanfield, MacIise—were enlisted, and put into it some of their best work. The illustrations are all in black and white, and it would be misleading and unfair to compare them with those of Miss Harrison, half of which are in colour; but it is no reflection on the great painters of a past generation to say that the mid-Victorian volume seems out of date, faint, feeble, and washy compared with Messrs. Blackie's edition. It is the art of illustration that has made such gigantic strides in the intervening half century. Miss Harrison herself has advanced since she illustrated the Poems of Christina Rossetti. Then she caught, it is true,

the very spirit of the poetess, but, as the poems are all in monotone, so there was unavoidably some monotony in the illustrations. In Tennyson Miss Harrison has found a far wider field, and, though she chooses what may be called the Pre-Raphaelite strain in Tennyson, yet she rises to the occasion, and is, on the whole, a worthy interpreter of the poet. When there are so many hits and so few misses, it is hard to pick and choose, but the pictures that have pleased us most are Helen of Troy and Iphigenia in "The Dream of Fair Women," the Lady of Shalott, the boy in a boat in "The Arabian Nights," and Night with Sleep in his arms. Among the misses—or, we would rather say, the outers—we should name Godiva (the nude figure is too long, and awkwardly broken by the tablecloth) and Maud (we see first the crinoline and then the face).

Lyrical Forms in English. By NORMAN HEPPLE.
(3s. net. Cambridge University Press.)

This is not, as the title might lead one to suppose, a treatise on metre, but an anthology selected with the object of illustrating and exemplifying the various genera of English lyrics. It falls accordingly into five sections: Song-lyric, Sonnet, Ode, Idyll, and Elegy. The classification is obviously artificial, by no means exhaustive, and entailing cross-divisions. The ballad, a distinct form of lyric, is omitted, and "Thyrsis" is an ode and an elegy in one. Again, the structural scheme of the lyrics in general here propounded—motive, thoughts arising from the motive, intellectual conclusion—is suggestive and helpful, but it would be impossible to stretch a quarter of these specimen lyrics on such a Procrustean bed. It is easy to pick holes, but, in spite of imperfections, we can assure teachers that they will find in this original selection good material and apparatus for the study of lyrical poetry. With few exceptions, which it would be invidious to specify, as the authors are alive, we can endorse the statement that in no case has poetry of inferior merit been admitted. The one name conspicuously absent is George Meredith, and the short poems of Browning (Longfellow is allowed four) give no notion of Browning's lyric powers. It is curious to note how doctors differ. Mr. Hepple holds that the Elizabethan song-lyrics are unrivalled in the world's literature; Prof. G. Murray, in a recent lecture to the English Association, maintained that to find in English anything that could rival the music of a Greek chorus we must wait till the age of Shelley. To maintain his thesis Mr. Hepple might have chosen a more characteristic specimen of Campion. One pin-prick in conclusion. An Editor who has collated the best authoritative texts should not have admitted in Gray's Elegy "the lowing herd winds."

Fore and Aft: the Story of the Fore-and-aft Rig from the Earliest Times to the Present Day. By E. KEBLE CHATTERTON. (Seeley.)

This handsome volume is a complement to the author's "Sailing Ships and their Story," where the subject was only glanced at in passing. A monograph of 350 pages on one form of rig can appeal only to yachtsmen and other sailors, but the story is told with such a zest that even a land-lubber catches something of the author's enthusiasm and will enjoy the narrative of the two "Marys," the yacht which Charles II brought with him from Holland at his restoration, and the second built on the Thames from the Dutch model. A reference to Hexham's Dutch Dictionary, 1638, settles the derivation of the word, which the author leaves an open question: "*lucht* or *see-roovers schip*, a pinnace or private ship." The artist friend who accompanied Mr. Chatterton on his Dutch navigation has supplied numerous first-rate illustrations. If we may be allowed to hint a fault, we wish Mr. Chatterton were more careful with his English. "Starting out in a little fore-and-aft rigged yacht . . . the English shore was followed to the eastward. Armed with this knowledge, still further researches were undertaken." These are two sentences on consecutive pages and not exceptional lapses.

Cromwell's Army. By C. H. FIRTH. Second Edition.
Illustrated. (6s. Methuen.)

It is needless to dwell on the merits of this admirable work, which was first published ten years ago. It is a masterpiece of industry, order, and grasp, and gives the reader an insight into the conditions of warfare in the seventeenth century such as no other book affords. Very little alteration has been made in the text in this new edition, but a number of well chosen illustrations have been added to it. The subject needs pictorial treatment, and we could wish that the publishers had gone further in this direction, and given us a volume which would range with those of M. Paul Lacroix, or with the illustrated edition of Green's "Short History." However, we may be thankful for what is provided, especially for the reproductions from Jacob de Gheyn's "Exercise of Arms." It is as well to remind our readers that this is not a book for military students only. "In studying the history of the Great Rebellion, it became necessary for me to study

every side of it, the military history as much as the political or the religious history . . . How was it that the Parliament succeeded in creating an efficient army, while the King could not do so, and what was the secret of the efficiency of the new model?" This is Prof. Firth's account of the origin of the book. How civil and military matters were interwoven at that time is to be seen especially in the last chapter, "Politics in the Army." This deals not only with the relations of the Army to King and Parliament, but with the divisions in the Army itself. Manhood suffrage, equal electoral districts, biennial Parliaments, and single chamber government found sturdy advocates, while Cromwell and Ireton stood for conservatism and the rights of property.

Wimbledon Common. By WALTER JOHNSON. Illustrated. (5s. net. Fisher Unwin.)

In more than one recent article we have pointed out how geography, geology, and natural science can be profitably studied in the open air, even by scholars who live in London. As a guide for such field days the teacher could not have a better companion than Mr. Walter Johnson. With the help of friends he has studied Wimbledon Common in all its aspects—archæology, history, geology, and natural history—and there are excellent contour maps and plans.

Wordsworth and Coleridge: Lyrical Ballads, 1798. Edited by HAROLD LITTLEDALE. (2s. 6d. net. H. Frowde.)

This is an exact reprint of the first edition, except that the errata have been incorporated in the text. It is interesting to note that in "The Ancient Mariner" (l. 200) "oft darts the spectre-ship" was altered with a pen to "off" in all extant copies but three.

How to Learn English: A Reader for Foreigners. By ANNE PRIOR and ANNE L. RYAN. (2s. 6d. net. Macmillan.)

By "foreigners" are meant non-English emigrants to the States, and the "Reader" is adapted for evening schools. The vocabulary, of which the readings are composed, is well chosen, and includes the most necessary words of everyday life, but it would need to be edited before it could be used in England. Thus, the wife builds the fire in the stove from the coalhod, wishes groceries, goes to the store in a trolley-car, and is served with cookies by the clerk.

London County Council Conference of Teachers, 1912. *Report of Proceedings.* (1s. 6d. P. S. King.)

These Proceedings were duly chronicled in our February Supplement, and we need only remind our readers that they embrace matter of exceptional interest: Prof. Adams's Address on Formal Training, Sir James Crichton-Browne's on Backward Children, and various papers on Educational Experiments.

"The Cambridge County Geographies."—(1) *Carnarvonshire.* By J. E. LLOYD. (2) *The Isle of Man.* By the Rev. JOHN QUINE. (3) *Monmouthshire.* By HERBERT A. EVANS. (4) *East London.* By G. F. BOSWORTH. (5) *Oxfordshire.* By P. H. DITCHFIELD. (6) *Buckinghamshire.* By A. MORLEY DAVIES. (7) *Northamptonshire.* By M. W. BROWN. (8) *West London.* By G. F. BOSWORTH. (9) *Breconshire.* By CHRISTOPHER J. EVANS. (10) *Midlothian.* By ALEX. MCCALLUM.

These pleasant little volumes can hardly lay claim to the title of "Geographies," for the synthetic method characteristic of the geographer is almost entirely absent. The series forms, however, a very useful source of raw material for the teacher of local geography and history. Each volume has a double-page map, diagrams, and numerous illustrations. It is invidious to discriminate, but, as volumes of special interest from their subject-matter, we may mention "Oxfordshire" and "West London."

CHEMISTRY AND SCIENCE.

Outlines of General Chemistry. By WILHELM OSTWALD. Translated by W. W. TAYLOR, M.A., D.Sc. Third edition. (Pp. xvii, 596. 17s. net. Macmillan.)

This is a translation of the fourth German edition of Prof. Ostwald's well known work. The whole text has been revised and very largely rewritten, in the hope of rendering in a more readable form than characterized the earlier editions the difficult subject matter of such a work. By a division of each chapter into short paragraphs, upon which the attention is focused by suitable headlines, particular subjects and references have been made readily accessible. New chapters have been added, dealing with ions, radioactivity, and colloids, and a wonderful array of phenomena are adduced in support of the atomic hypothesis—notably from J. J. Thomson's researches on gas ions and recent work on the Brownian movement. The wide scope of the work will be understood from the titles of the seven parts into which the subject is divided. These are respectively, Matter, Stoichiometry, Chemical Thermodynamics, Electrochemistry, Microchemistry, Photochem-

istry, and Chemical Affinity; and all are treated with particular attention to the clear enunciation of fundamental principles, and with that remarkable philosophic insight which unifies all Prof. Ostwald's work. The section on Microchemistry deserves mention here. It deals with various apparently unconnected phenomena connected with suspensions, colloids, absorption, Brownian movements, &c. These are systematically treated, and it is shown that all are manifestations of surface energy, which, however, only becomes appreciable when microscopic dimensions are involved. In the same way the other divisions of the book are each characterized by the predominance of a particular form of energy—heat, electrical, radiant, and chemical. A valuable feature in the book lies in the simplicity of the mathematical treatment, which is nowhere here so much in evidence as in the majority of similar textbooks. Much is gained owing to this; for although mathematical treatment may be necessary in arriving at exact notions, yet the more complex processes of chemistry are so obscure that qualitative ideas are, after all, better than quantitative values, which may be based on quite inaccurate premises. Ostwald is amongst the most lucid of scientific writers, and not the least important service which this volume will render will be to encourage a chemical, rather than a mathematical, temperament. The translation is excellent, and, while a few of the illustrations are weak, the work is, on the whole, an admirable publication, and will prove an invaluable addition to the library of the chemist and physicist.

A Treatise on Chemistry. By the Rt. Hon. Sir H. E. ROSCOE and C. SCHORLEMMER. Vol. I.: *The Non-metallic Elements.* Fourth Edition. (1p. xii, 955. 21s. net. Macmillan.)

Another edition of the first of the familiar brown-backed volumes which make up this great work has appeared, and we are glad to find that in six years the last edition has been exhausted. The volume commences with an historical introduction which is very interesting. The general principles of chemistry are next treated, leaving the remaining and greater part of the volume for the non-metallic elements. These are described very fully, but the matter never becomes uninteresting, as constant attention is paid to the economic and historic sides of the subject, and the natural history of the various substances is not forgotten. There is great scope for a development of the latter point of view in works on chemistry, particularly since Clarke's great work on geo-chemistry appeared. In this connexion, it should be pointed out that Clarke's work on the composition of the earth's crust is not mentioned where this question is treated on page 58. Of special value is the accurate series of descriptions of important processes in technical chemistry, the illustrations attached to each being a model of clearness. The coal gas and sulphuric acid processes may be cited as examples which are excellently treated. In theoretical chemistry the work is well up to date. A systematic division of silicates under the chief acids of silica is given in the most modern form, a notable fact, since most books persist in ignoring the advances which have been made in the chemistry of silicates. The book is well bound and printed, though it could be improved by having the pages cut.

Science Progress in the Twentieth Century. No. 23. January 1912, (5s. net. Murray.)

We have before us a most interesting number of this useful quarterly. Sir Oliver Lodge contributes the first article, and discusses the problems which arise in battling confusion out of the conception of ether. He contends against the principle of relativity, and foretells that physicists will return again and interpret Nature in terms of the ether of space. The most recent advances in our knowledge of air currents are described by Dr. Shaw, and applied to the problems of aviation. The structure of the atmosphere, its currents and bores and whirlpools, and the minor details of variation, are illustrated by copious observations and maps. Line squalls and thunder squalls are found to be essentially unsafe, even for the most experienced airmen. There are two most fascinating studies of the origin of life. At the present time two doctrines hold the field—vitalism and biological determinism. Life offers two main questions—one for the chemist, another for the psychologist. Neither has an efficient reply to make; but the former is usually a determinist, the latter a vitalist. Natural history is represented in several papers. There is a delightful account of weeds from all sorts of points of view. Their impudent intrusion where they are not wanted, their extraordinary means of reproduction, their love for certain types of soil, are all described by an author who loves the outcasts he has studied. Prof. Farmer contributes the results of his inquiries into the mobile mechanisms of higher plants, and deals with three types in which the movement is due to protoplasmic changes, hygroscopic changes, and cohesion of water. Lieut.-Colonel Wood pleads for the animal life of Labrador, which he says is being recklessly and wantonly squandered in order to satisfy the selfish desires of a few people. He proposes a system of sanctuaries—wild "zoos" on large scales, where man is passive

and the rest of Nature free and active. There are also papers dealing with ozone and the corrosion of iron and other metals, and an article on "Mathematics and Chemistry," in which the author warns students against "the tendency to hide ignorance under the cover of a mathematical formula." The journal is composed of papers which are readable and interesting to the intelligent general reader, and yet are none the less useful to the scientific expert.

(1) *Practical Plant Physiology*. By F. KEEBLE. (2s. 6d. G. Bell.) (2) *Plant Physiology*. By B. M. DUGGUR. (7s. Macmillan.)

Plant physiology is one of the most important subjects in a scientific education, and one which is receiving more attention with each year as knowledge of its principles increases. No subject probably has received more study, or has been more changed, by the improved methods which have been introduced as a result of it. Mr. Keeble is concerned chiefly with the importance of individual study and experiment. He maintains that the science cannot be learned thoroughly merely by attending lectures and reading books. He therefore has built up a series of experiments which will lead the student logically to a knowledge of plant physiology, and at the same time train him to think and experiment for himself. No doubt in the past too much has been left to mere memory, and it is certain that no one who has really carried out the instructions contained in this book can fail to have a clear idea of the modes of plant life. He will further be incited to realize the connexion between plant and animal physiology. We should say that access to a laboratory would be essential to a proper study of this book, which otherwise would demand too great an amount of time for the construction of instruments. Mr. Duggur writes for the benefit of more advanced students, who must possess a good deal of elementary knowledge of the subject if they are to benefit by it. At the same time the whole work bears a much closer relation to practical agriculture than Mr. Keeble's, and is intended evidently for students who mean to take up work at an agricultural college or to experiment scientifically with farm crops. The chapters on Mineral Nutrients and on Deleterious Agents are especially good in this respect, as also are those on the relations of light, heat, and heredity to plant growth. The figures and diagrams are excellent, and ample to illustrate the text, but some of the tables of statistics are not sufficiently explicit, notably those on pages 124 and 264. Then, again, in certain instances the conclusions arrived at seem hardly to be borne out by practice, as, for example, the paragraph on fertilizers in direct contact with the seed. The book forms part of the Rural Text-book Series, all of which are well executed. The fact that Mr. Duggur has relied on American statistics to illustrate his thesis does not invalidate the value of the work to any great extent for English readers.

The Young Ornithologist. By W. PERCIVAL WESTELL. (5s. Methuen.)

There is no lack of books on birds, but Mr. Westell has made a new departure by grouping common British birds according to habitat—the garden, the country lane, the woodland, and so forth. This classification is somewhat arbitrary and leads to cross division, but it is most helpful for the young naturalist, and will show him where to look for birds and their nests and what he may expect to find. Mr. Westell gossips pleasantly and with full knowledge about birds and their ways, and the young ornithologist will not carp at a few split infinitives and slips in English (such as calling "titbits for tits" a bull), and the illustrations, mainly from photographs, are good. The volume is enriched by a chapter of practical hints by Mr. A. R. Horwood, of the Leicester Museum.

Senior Electricity and Magnetism. By R. H. JUDE and J. SATTERLY. (5s. Clive.)

The well known "School Magnetism and Electricity" written by Dr. Jude has been used by Dr. Satterly as the framework of the volume now under notice, which is one of a series designed to meet the requirements of the Cambridge Senior Local Examinations. The very thorough treatment of static electrical phenomena from the standpoint of potential is still the outstanding feature of the book, and the chief alterations consist in the greater prominence given to laboratory work with simple apparatus and in the exclusion of some of the harder parts of the old book. Although the old-fashioned frictional machine is still useful from an academic standpoint, we think that one of the two spaces given to the blocks representing it might, with great advantage, have been assigned to the Wimshurst machine, and that a short description of this useful instrument should have been given. Is it not rather unfortunate to have chosen the silver molecules as a typical di-atomic molecule (page 293)? The difficulty of deciding on the number of atoms which the molecule of a given metal contains is well known to be very great except in a very few cases. We can recommend the book as efficient and trustworthy.

Paton's List of Schools and Tutors,

**PUBLISHED ANNUALLY, is an Efficient Aid to
Parents in the Selection of Schools.**

*The following appeared in "The Journal of
Education" for October, 1911:—*

**PATON'S LIST OF SCHOOLS AND TUTORS,
1911-12. (2s. J. & J. Paton.)**

The fourteenth annual edition runs to over eleven hundred pages. Photographs of leading educationists in the Dominions and Colonies is a new feature. There have been so many bogus agencies, some of whose doings we have helped to expose, that we welcome all the more the growing prosperity of a firm against whom we have heard no complaints and frequent commendation.

PHILIPS' NEW WALL ATLASES

EUROPE, BRITISH ISLES, ASIA (others in preparation). Under the joint editorship of J. F. UNSTEAD, M.A., and E. G. R. TAYLOR, B.Sc. Arranged for **Comparison**; to show by means of Eight Maps of Geographical Phenomena the chief facts which can be expressed in Map form. Relief of Land, Pressure and Winds, Rainfall, Temperature, Vegetation, Products, Population, &c. The newest, most adaptable, and most educational Maps obtainable; very clear and distinct; essentials only shown. Maps, singly, **2s. 6d.** each, also mounted on cloth and eyeletted, **3s. 6d.** net each, complete from **21s.**, according to style of mounting. An explanatory Handbook (**6d.** net) is supplied gratis with a complete set of the Maps. A detailed Prospectus and reduced coloured facsimiles of the Maps will be sent free on application.

CONTOUR EXERCISE BOOK.

By ERNEST YOUNG, B.Sc., and JAMES FAIRGRIEF, M.A. For use as a drawing book, in which the pupil can actually work out geographical problems. Contains numerous diagrams of contours, &c. With lines ruled for drawing sections. Size, 11 by 7 inches, **4d.**

GENERAL AND REGIONAL GEOGRAPHY.

A new Textbook of Modern Scientific Geography for Teachers and Students. By J. F. UNSTEAD, M.A., and E. G. R. TAYLOR, B.Sc. With 140 Maps and Diagrams specially drawn. Second Edition. 520 pages, large 8vo, **6s.** Also obtainable in two parts if desired. **3s. 6d.** each (not sold separately).

THE GEOGRAPHY OF THE BRITISH ISLES.

Based on the chapters on the British Isles in the General and Regional Geography, with additional letterpress and Maps, adapted for students preparing for the Civil Service and Universities' Local Examinations. By J. F. UNSTEAD and E. G. R. TAYLOR. Large 8vo, **1s. 6d.**

COMMERCIAL GEOGRAPHY, General and Regional.

For Higher Elementary and Secondary Schools, Civil Service Classes, &c. By J. F. UNSTEAD and E. G. R. TAYLOR. Large 8vo, with Maps and Diagrams, **2s. 6d.**

PHILIPS' VISUAL CONTOUR OUTLINE MAPS.

Specially prepared for Practical Exercise Work in Geography, colouring Contours, tracing Routes, marking Distributions, &c. Contours indicated by a new and very distinct method. Size, 10 by 8 inches. On stout Paper. **2s. 6d.** To accompany these we have prepared a little Book of Method (written by an expert Teacher, and illustrated with a coloured facsimile), entitled "**HOW TO USE CONTOUR HANDMAPS FOR CLASS TEACHING**" — full of practical hints. Post free, **6d.**

Prospectuses on application.

CLASSBOOK OF PRACTICAL GEOGRAPHY.

With Exercises, Examination Questions, and numerous Diagrams. By ERNEST YOUNG, B.Sc., and J. FAIRGRIEF, M.A. Crown 8vo, **1s. 6d.**

PHILIPS' NEW SCHOOL ATLAS OF MODERN HISTORY.

A Series of over 121 Maps and Diagrams, with full Introduction. By RAMSAY MUIR, M.A., Professor of Modern History in the University of Liverpool. Second Edition. Large 4to, **3s.** net.

PHILIPS' NEW HISTORICAL ATLAS FOR STUDENTS.

By Prof. RAMSAY MUIR. An Enlarged Edition of the above, with complete Index. Over 154 Maps and Diagrams, with full Introduction. Demy 8vo. Cloth, gilt lettered, **9s.** net, half-leather, gilt top, **12s.** net.

A SYNOPSIS OF THE LEADING MOVEMENTS IN MODERN HISTORY.

By F. R. A. JARVIS. For the use of students preparing for Civil Service and other Examinations. Crown 8vo, with Diagrams, **2s.**

Joint Agency for Women Teachers

74 GOWER STREET, LONDON, W.C.

(Under the management of a Committee appointed by
the Teachers' Guild, College of Preceptors, Head
Mistresses' Association, Association of Assistant
Mistresses, and Welsh County Schools Association.)

This Agency has been established for the purpose
of enabling Teachers to find work WITHOUT
UNNECESSARY COST. All fees have therefore
been calculated on the LOWEST BASIS to cover
the working expenses.

No Registration fees are charged to Members of
the above Associations, and their commissions are
reduced.

Hours for Interviews—

11 a.m. to 1 p.m., and 3 to 5 p.m.
Saturdays, 11 a.m. to 1 p.m., and 2 to 3 p.m.

When possible, special appointments should be
arranged.

Registrar—Miss ALICE M. FOUNTAIN.

UNIVERSITY OF ST. ANDREWS.

L.L.A. DIPLOMA FOR WOMEN.

THE attention of Candidates is
drawn to the ordinary and Honours Diplomas
for Teachers, which are strongly recommended as
suitable for those who are or intend to be Teachers.

Examinations are held at Aberdeen, Birmingham,
Blackburn, Brighton, Bristol, Cardiff, Croydon, Devon-
port, Edinburgh, Glasgow, Hull, Inverness, Leeds,
Liverpool, London, Manchester, Newcastle-on-Tyne,
Norwich, Nottingham, Oxford, St. Andrews, Sheffield,
Swansea, and several other towns.

Information regarding the Examinations may be
obtained from the SECRETARY, L.L.A. Scheme, The
University, St. Andrews.

**THE ASSOCIATION OF UNIVERSITY
WOMEN TEACHERS.**

39 CAMBRIDGE STREET, HYDE PARK, W.
Recommends highly qualified Teachers and Lecturers
with University qualifications (Degree or equivalent).
Secretary—Miss GRUNER.
Calling hours—Wed. 3 to 5 p.m.; Sat. 11 to 1 p.m.

MISS LOUISA DREWRY gives
Lectures, Readings, and Lessons in English
Language and Literature and Kindred Subjects; reads
with private pupils; examines; and helps Students by
letter, and in her Reading Society. For information
about her Meetings for the Study of Literature apply
by letter—143 King Henry's Road, London, N.W.

TEACHERS' DIPLOMAS.

The COLLEGE OF PRECEPTORS holds Exam-
inations of Teachers for the Diplomas of Associate,
Licentiate, and Fellow of the College in London,
Birmingham, Bristol, Dublin, Leeds, Liverpool,
Manchester, Newcastle-on-Tyne, and Plymouth. The
Associateship and Licentiate Examinations are
held twice a year, viz., in January and in August-
September. The Fellowship Examination is held
only in January. The Theory and Practice of Edu-
cation is an obligatory subject for each grade. For
Regulations apply to the SECRETARY, College of Pre-
ceptors, Bloomsbury Square, London, W.C.

PRELIMINARY EXAMINATIONS

FOR
MEDICAL, DENTAL,
AND
PHARMACEUTICAL STUDENTS.

The COLLEGE OF PRECEPTORS holds Pre-
liminary Examinations in March, June, September,
and December. All the Examinations are held in
London, Birmingham, Bristol, Cardiff, Edinburgh,
Leeds, Liverpool, Manchester, Newcastle-on-Tyne,
and Nottingham. For the June and December
Examinations there are other Centres, including
Blackpool, Brighton, Cheltenham, Croydon, Ealing,
Exeter, Glasgow, Inverurie, Margate, Plymouth,
Portsmouth, Sheffield, Southampton, Southport,
Sunderland, and York. In March there is a Centre
at Inverness, and in September at Aberdeen. For
Regulations, apply to the SECRETARY, College of
Preceptors, Bloomsbury Square, London, W.C.

LONDON UNIVERSITY DEGREES.

B.A., M.A., LL.B., B.D., B.Sc.,
B.Sc. (Engineering), B.Sc. (Economics).

(Graduates of other Universities are exempted
from the Matriculation Examination of
London University.)

Publications (chiefly C.H.L. Examination
Papers), List of Successes, &c., apply to the
MANAGER.

ALBERDARE HALL, CARDIFF.— RESIDENCE FOR WOMEN STUDENTS OF THE UNIVERSITY COLLEGE OF SOUTH WALES AND MONMOUTHSHIRE.

Principal: Miss KATE HURLBATT.

Fees £42. 10s., £37. 10s., and £32 per annum. College tuition fees £12 per annum. Scholarships of £25 and £20, awarded on the result of Scholarship Examination of University College, Cardiff, to be held in April. Students prepare for the B.A. and B.Sc. Degrees of the University of Wales, and a Medical School and Department for Secondary, Elementary, and Kindergarten Training are attached to the College. Students with recognized academic qualifications can enter in October or January, for one year's Secondary Training Course. Apply to the PRINCIPAL.

COLLEGE HALL, LONDON (UNIVERSITY OF LONDON).

Hall of Residence for Women Students of University College, the London School of Medicine for Women, and other Schools of the University.

Early application to be made to—Miss ALICE LINDSELL, M.A., Principal, College Hall, Byng Place, London, W.C.

CHERWELL HALL, OXFORD.

TRAINING COLLEGE FOR WOMEN SECONDARY TEACHERS.

Recognized by the Board of Education, by the Oxford Delegacy for Secondary Training, and by the Cambridge Syndicate.

Principal: Miss CATHERINE I. DODD, M.A. (late Lecturer in Education in the Manchester University), assisted by a staff of Tutors and Lecturers.

A Residential College, with extensive grounds in a beautiful situation on the banks of the Cherwell. Students are prepared for the Oxford and London Teachers' Diploma and the Cambridge Teachers' Certificate.

Attached to the College is a perfectly equipped Girls' School, with a Preparatory Department. Students admitted in January, April, and October. Fees for the Course, from 65 guineas.

There is a Loan Fund and Students may borrow sums not exceeding £30 to be repaid within three years. Scholarships of from £40 to £20 are offered Students with a degree entering Cherwell Hall.

UNIVERSITY OF ST. ANDREWS. UNIVERSITY HALL FOR WOMEN STUDENTS.

Warden: Miss M. E. DOBSON, M.A., B.Sc.

University Hall was opened in 1896, under the Government of the University of St. Andrews.

The Course of Study at University Hall is in preparation for the Degree Examinations of the University of St. Andrews, of which all the Classes and Degrees in Arts, Divinity, Science, and Medicine are open to Women on the same terms as to Men.

The Terms of Residence are from October to December, January to March, and April to June.

The Hall has been enlarged to accommodate 95 Students.

Residence Fees from £45 to £75 per annum. Matriculation and Class Fees average £12 per annum.

For further information, apply to the WARDEN, University Hall, St. Andrews, Fife.

WINTERSDORF, BIRKDALE, SOUTHPORT (LANCS). FOUNDERS: The Misses SIMON.

PRINCIPALS: Miss A. L. JANAU, B.Sc. Hons. (Lond.).
Miss ETHELWYN M. AMERY, B.A. (Lond.).

Special facilities for acquiring Foreign Languages.

Prospectus may be obtained by applying to the PRINCIPALS.

MADAME BERGMAN ÖSTERBERG'S PHYSICAL TRAINING COLLEGE, DARTFORD HEATH, KENT, FOR RESIDENT STUDENTS.

The College, the first of its kind in England, was opened in 1885, with the view of training educated women as Teachers of Scientific Physical Education.

The Course of Training conducted by a large and competent staff of teachers, extends over two years. It includes the study of Anatomy, Physiology, Hygiene, Anthropometry, and Theory of Movement. In practical subjects instruction is obtained in Ling's Swedish Gymnastics, Dancing, Outdoor Games, and Medical Gymnastics and Massage. At the end of the Course, examinations are held and certificates of theoretical knowledge and practical efficiency in teaching are awarded to successful students.

The College, which provides 50 separate bed-sitting rooms and several large studios, is situated on very high ground, gravel soil, on the confines of an extensive heath, half an hour from town. It stands in its own fine grounds of fourteen acres, which contain an Outdoor Gymnasium, Running Track, Cricket and Hockey Grounds, Lawn Tennis Courts. The Indoor Gymnasium, 70 ft. by 35 ft., and the Medical Gymnastic Room, 50 ft. by 25 ft., lofty and well ventilated, are fitted up in the most perfect style, all the apparatus having been designed and executed in Stockholm.

The immediate neighbourhood offers over one thousand children for the students' practice as teachers. Hundreds of posts have been obtained through this College, a list of which is to be obtained with the Prospectus.

Students admitted in September.
For particulars apply—THE SECRETARY.

MADAME BERGMAN ÖSTERBERG'S UNION OF TRAINED GYMNASIUM TEACHERS.

Ling's Swedish System.

Aim of the Union: To advance the cause of Physical Education on scientific lines.

In placing members of this Union as Teachers in Schools, careful and discriminating choice is exercised, and the exact requirements of each School specially considered.—PHYSICAL TRAINING COLLEGE, DARTFORD HEATH, KENT.

THE VICTORIA UNIVERSITY OF MANCHESTER.

DEPARTMENT OF EDUCATION.

THE University provides complete Courses of Training for Graduate Students proposing to qualify for appointments in Secondary Schools.

(1) SIX BURSARIES are offered, giving free tuition in connexion with the Course of Training under the Board of Education Regulations for the Training of Teachers for Secondary Schools. Candidates must have completed the course leading to a University Degree.

(2) TWO or more ADVANCED STUDENTSHIPS in EDUCATION are offered to Graduates who, in addition to the degree, have completed with credit a course of post-graduate training in Education and desire opportunities for further study and research. These Studentships are of the annual value of £50, and include the discharge of duties for a portion of each week as Class Teacher in the Fielden Demonstration School.

(3) The University also receives every year about one hundred students who have completed their education at a Secondary School (fifty men and fifty women) and who are prepared to spend four years at the University under the Regulations of the Board of Education for the Training of Teachers for Elementary Schools. Under these Regulations the first three years are spent mainly in academic work for a degree and the fourth year in professional training. A few of these places are reserved for students prepared to be specially trained to qualify for appointments as teachers of young children.

For further particulars and forms of application apply to the REGISTRAR, The University, Manchester.

ADMINISTRATIVE COUNTY OF LONDON.

TRAINING COLLEGES FOR TEACHERS.

Next term begins April 29th.

SCHOOLS FOR SALE AND PARTNERSHIPS.

Messrs. TRUMAN & KNIGHTLEY, Ltd., Educational Agents, 158-162 OXFORD STREET, LONDON, W.

MESSRS. TRUMAN & KNIGHTLEY always have on their books a large number of thoroughly genuine Schools for Sale and Partnerships to negotiate, as well as the names and requirements of numerous would-be purchasers, and therefore can offer unusual facilities for satisfactorily negotiating the TRANSFER of SCHOOLS and arranging PARTNERSHIPS. All communications and inquiries are treated in the strictest confidence. The following are a few selected from their list:—

GIRLS' SCHOOLS.

SOUTH COAST.—DAY AND BOARDING SCHOOL FOR GIRLS, with preparatory class for little boys; house five minutes' walk from the sea. Receipts, £260; goodwill, to include school furniture, £50.—T 2001.

PARIS.—The Principal of a first-class Educational Home in Paris desires to dispose of her connexion; 7 boarders paying fees from £150 to £200 per annum. Profit about £300. Accommodation for 10 pupils. Goodwill, to include furniture, £1,000. A thorough introduction and excellent references given.—T 2006.

STAFFORDSHIRE.—Good-class **BOARDING AND DAY SCHOOL FOR GIRLS,** with Kindergarten; 14 boarders and 36 day pupils. Premises consist of two large houses connected by a covered way and standing in delightful grounds. Receipts over £1,500, profit £300. Principal must retire owing to ill-health and would accept the small sum of £200 for goodwill.—T 2,000.

SURREY.—The Principal of a nice-class **BOARDING AND DAY SCHOOL for GIRLS** desires to meet with a lady who would join her in partnership with a view to opening new premises to which the boarders would be removed, so that the boarders' and day pupils' connexions can be carried on in separate premises. Excellent premises with extensive grounds are available. Gross receipts amount to about £2,000. Of this £300 has been estimated profit. The incoming partner would take charge of the boarders' connexion. School has splendid prospects.—T 1194.

LONDON.—The Principal of a nice-class **KINDERGARTEN AND JUNIOR SCHOOL** for Boys and Girls, in a fashionable West-end

district, desires to dispose of her connexion. There are 38 pupils. Receipts £656, profit about £200. Capitation fee accepted for goodwill. This is a particularly good opening for a lady who is a trained Kindergarten teacher.—T 1,193.

LONDON.—House of **RESIDENCE FOR STUDENTS** near Kensington, with 13 students now in residence, whose average receipts amount to £26 per week. Students are all over 20 years of age, and are girls of good families.—T 1,188.

ESSEX.—Good-class **BOARDING AND DAY SCHOOL FOR GIRLS;** 74 pupils, of whom 8 are boarders. Receipts £1,321, profit £302. Delightful premises built regardless of expense. Grounds of nearly an acre, with good tennis and croquet lawns. The school can be bought at a bargain as only £300 is asked for goodwill, or one term's capitation fees.—T 1,186.

SURREY.—Very flourishing **GIRLS' HIGH SCHOOL,** with Kindergarten; old-established. 85 pupils, 16 of whom are boarders. Receipts £1,200, net profit £300. Splendid schoolroom accommodation for 120 pupils. Good residential neighbourhood, with plenty of scope for increasing present number of pupils.—T 1,189.

HOME COUNTIES.—Large, old-established and very successful **BOARDING AND DAY SCHOOL.** Principal retiring. 50 boarders, 100 day pupils. Gross receipts over £3,000. Profit £500. Fine premises with field for games. Capitation fee accepted on all pupils transferred. Personally inspected and strongly recommended.—T 1,158.

LONDON, N.—Old-established **BOARDING AND DAY SCHOOL,** with Kindergarten. Principal retiring from the teaching profession.

NO CHARGE TO PURCHASERS.

Full particulars of the above and others may be obtained on application. Intending purchasers are invited to write stating their requirements. Address—158 to 162 OXFORD STREET, LONDON, W.

CHANNING HOUSE HIGH SCHOOL AND BOARDING SCHOOL FOR GIRLS, HIGHGATE, LONDON, N.

Head Mistress: MISS LILIAN TALBOT, B.A. Honours, London.

Pupils prepared for Matriculation and Intermediate Examinations of London University. Healthy situation, good playground and garden. Great attention given to physical training. Special terms for daughters of Unitarian Ministers. All inquiries to be addressed to the HEAD MISTRESS.

CORRAN BOARDING AND DAY SCHOOL FOR GIRLS, WATFORD.

GOOD Music and Drawing, Resident French, German, and Gymnastic Mistresses and Trained Nurse. Large hall and good classrooms. Garden and field for Games. Preparation for Examinations. Gravel soil and bracing air.

THE ROYAL DRAWING SOCIETY'S TEACHER-ARTIST CERTIFICATE (Ablett's System).—Classes are held for Figure Drawing from Life, Painting, &c., in preparation for the next Examinations. Correspondence Lessons are also arranged as preparation for these Examinations or as practical suggestions for School work. For particulars apply to PAUL KICK (Member of the Royal Drawing Society), 10 Stanley Gardens, Haverstock Hill, N.W.

ROYAL NAVAL COLLEGE, OSBORNE.

FOR information relating to the entry of Cadets, Parents and Guardians should write for "How to Become a Naval Officer" (with an introduction by Admiral the Hon. Sir E. R. Fremantle, G.C.B., C.M.G.), containing an illustrated description of life at the Royal Naval Colleges at Osborne and Dartmouth.—Publication Department, Gieve, Matthews, & Seagrove, Ltd., 65 South Molton Street, London, W.

CORRESPONDENCE LESSONS.

MISS A. W. GREGORY, L.L.A., Coaches orally and by correspondence in History and Literature, Anglo-Saxon, French, and German for the Higher Local, Holloway Scholarship, and other University Examinations, &c. Terms moderate. Apply—3 Ickburgh Road, Upper Clapton, N.E.

THE SOUTH OF ENGLAND SCHOLASTIC AGENCY, WOOLSTON, SOUTHAMPTON.

THIS old-established Agency undertakes all business connected with the Scholastic Profession. Good continental clientèle. Prospectus (English or French) on application.

DANCING.—MISS CHEEK, member of the Imperial Society of Dance Teachers. Ballroom and Fancy Dancing. Special terms for Schools. Terms, &c.—The Peldon, Sheen Road, Richmond, Surrey.

MISS C. S. BREMNER, author of "Education of Girls and Women," is prepared to give a brief series of lectures, four or six, on "English the Greatest Living Language," showing its wealth, simplicity of structure, freedom from concord, and its misuse in slang, senseless abbreviations, amplifications, &c. Teachers are unanimous that the lectures are helpful, stimulating, suggestive.—12 Weaponness Valley, Scarborough.

A BRIGHT happy Home for Girls requiring change of air (sea and country combined), plenty of outdoor interest, Games, Gardening, Poultry rearing, Driving. Very generous diet. From 6 guineas monthly.—Courtlands, Clacton-on-Sea.

YOUNG Lady, holding L.L.A. Certificate in German, and Teacher's Certificate, would like to have one or two children to teach with her sister, aged ten. Would take entire charge of children with parents abroad, also children during holidays. Every home comfort in large country house. Full particulars given and required. *The Journal of Education* to be had middle of each month, half price and postage.—RYALL, Brosna, Kings Co., Ireland.

WANTED, a HOME for a French Boy, 16 years old, preferably in the house of a member of the teaching profession, who would give instruction in English. There should be other boys (English) of same age. Address—M. M. M., c/o. Miss Hickmans, 85 Midland Road, Wellingboro'.

5 boarders, 60 day pupils. Gross receipts over £1,000. Entire goodwill only £400.—T 1,157.

SCOTLAND.—The Principal of a high-class **BOARDING SCHOOL** would receive an experienced and well qualified lady into **PARTNERSHIP** with a view to succession. The school yields a net profit of about £700 per annum. If desired, the Principal would remain a sleeping partner, leaving entire charge and control of the school in the hands of the incoming partner.—T 1,132.

LANCASHIRE COAST.—Good-class **BOARDING AND DAY SCHOOL,** old-established. 25 boarders, fees £50 per annum; 30 day pupils, fees £15 per annum, exclusive of extras. Specially built premises. Receipts £2,500, net profit over £600. Genuine opening.—T 1,130.

LONDON, N.—Large and flourishing **PRIVATE DAY SCHOOL,** with Kindergarten. 165 pupils. Fees 4s to 12 guineas per annum, exclusive of extras. Specially built school premises, including large assembly hall and gymnasium. Receipts £1,166, profit £330. Entire goodwill, £700.—T 1,168.

SUSSEX.—PARTNERSHIP is offered in a nice-class Girls' School at a seaside watering place. There are 16 boarders and 8 day pupils. The school has a good French and German connexion. Receipts £952; profit £250. Half share of goodwill £250.—T 1,180.

NORTHUMBERLAND.—PARTNERSHIP offered in a good-class and flourishing School, now conducted by two ladies. A partner would be received with a view to succession. Receipts £1,268; profit £415. The opening would be suitable to a lady able to introduce a few boarders.—T 1,179.

NEAR WIMBLEDON COM- MON. CLOSE TO DISTRICT RAILWAY. Continual train service to all parts of London. Bracing and quiet. Lady desires to receive during Summer Holidays two (or three) Ladies to occupy rooms vacated by High School Mistresses. Extremely moderate terms for board-residence. Write—HOUSEKEEPER, 12 Malcolm Road, Wimbledon.

MISS BOOTH is again arranging to take a small party of girls to France in August for a **HOLIDAY COURSE.** Inclusive terms for residence, lectures, excursions.—Sunny Bank, Loughton, Essex.

THE JOURNAL OF EDUCATION Volume for 1907.—A few copies of this volume, which has been "out of print" for some time, are now on hand. These are practically "as new," and can be supplied at usual price of 7s. 6d. each, through any Bookseller.

MATERIAL for NATURE STUDY, BOTANY, and PAINTING LESSONS supplied. Accommodation for Reading and Nature-Study Parties.—Miss MERRY, Ifield Wood, Crawley.

MENTHOLIN PASTILLES RELIEVE TIRED THROATS.

Used as directed, the vapour of their ingredients (Menthol, Eucalyptus, Creosote, Formaldehyde) is brought into contact with the whole mucous tract of the throat and nose, immediately removing congestion.

AN ANTHOLOGY OF MODERN ENGLISH PROSE, 1741-1892.

By ANNIE BARNETT

and LUCY DALE, late Scholar of Somerville College, Oxford.

Crown 8vo, 4s. 6d.

A book for use in Secondary Schools, Training Colleges, and Pupil Teachers' Centres. This book has been prepared to meet the Board of Education's requirements in the teaching of English Literature. It contains prose selections from the times of Samuel Richardson and Henry Fielding down to Robert Louis Stevenson—that is to say, from the latter part of the seventeenth century to the close of the nineteenth.

The Editors in this compilation have endeavoured to include most of the writers of great mark, and to choose from their works passages of substantial length that are characteristic and complete, some being preferred for their beauty or impressiveness of diction, and others for their interest as distinctive of the writer's style and method. Notes have been added only where a word of explanation seemed absolutely necessary to make the meaning clear.

CONTANSEAU'S SCHOOL DICTIONARIES.

BOOK OF ENUNCIATIONS FOR HAMBLIN SMITH'S GEOMETRY, ALGEBRA, TRIGONOMETRY, STATICS, AND HYDROSTATICS. Small 8vo, 1s.

THE METRIC SYSTEM OF WEIGHTS AND MEASURES. Crown 8vo, 2s.

BELL'S NEW EDUCATIONAL BOOKS.

HISTORY FROM CONTEMPORARY AUTHORITIES.

BELL'S ENGLISH HISTORY SOURCE BOOKS.

Joint Editors: **S. E. WINBOLT, M.A.**, Christ's Hospital, Horsham; **KENNETH BELL, M.A.**, Fellow of All Souls College, Oxford.

Crown 8vo, 1s. net each.

First Volume. Now Ready.

1780—1801. AMERICAN INDEPENDENCE AND THE FRENCH REVOLUTION.

Edited by **S. E. WINBOLT, M.A.**

Second Volume. Ready Immediately.

1603—1660. PURITANISM AND LIBERTY.

Edited by **KENNETH BELL, M.A.**

This series is designed for use in the Upper Forms of Secondary Schools and for undergraduate students. It will consist of extracts from contemporary authorities, and its aim will be less to give the truth in a given case than to provide data for the student to work on. For this reason the choice of selections will be as wide as possible. In all cases the exact source of the extract will be quoted, and full bibliographical details given. Brief introductions and notes will be included. Further volumes will be announced later.

PUBLIC SCHOOL EXAMINATION PAPERS IN MATHEMATICS.

By **P. A. OPENSHAW, B.A.**

Crown 8vo. 1s. 6d.

Consisting principally of Papers set at Examinations for Entrance Scholarships at Public Schools, together with Navy, London Matriculation, and Original Papers.

MATRICULATION PRÉCIS.

WITH A KEY.

By **S. E. WINBOLT, M.A.**

Crown 8vo. 1s. net; or, with Key, 1s. 6d. net.

This book is intended primarily for use by candidates for the London Matriculation Examination, but it is hoped it may be used with profit by pupils in any kind of school between the ages of fifteen and seventeen.

GEOMETRY FOR SCHOOLS.

By **W. G. BORCHARDT, M.A.**, and the **Rev. A. D. PERROTT, M.A.**

Just Published. Vols. I-IV in One Volume. 3s. 6d.

This Volume covers the ground of the Oxford Local and Part I of the Cambridge Local Examinations.

Vol. IV.—Circles. 1s.

Already Published.

Vol. I.—Covering Stages I and II of the Board of Education Circular, No. 711, 1909. 1s.

Vol. II.—Properties of Triangles and Parallelograms. 1s. 6d.

Vol. III.—Areas. 1s.

Also Vols. I-III in One Volume, 2s. 6d.

Ready Shortly.

Vol. V (Proportion), Vol. VI (Solids). Vols. II to VI cover Stage III of the Board of Education Circular.

BELL'S SIMPLIFIED LATIN CLASSICS.

Edited, with Notes, Exercises, and Vocabulary, by **S. E. WINBOLT, M.A.** Fcap. 8vo. With numerous Illustrations. 1s. 6d. each.

New Volume. Now Ready.

Vergil's The Taking of Troy.

Crown 8vo. 3s.

THE CALCULUS FOR BEGINNERS.

By **W. M. BAKER, M.A.**

In this volume Mr. Baker has prepared an introduction to the Calculus (Differential and Integral), covering all the ground required for a first course in the subject.

CIVIL SERVICE EXAMINATION PAPERS.

Edited by **H. N. ADAIR, M.A.**, Senior French Master at the Strand School, King's College, London.

This new series is intended primarily for the use of Candidates for the Middle Grades of the Civil Service.

HISTORY PAPERS. Edited by **A. PERCIVAL NEWTON, M.A.**, Assistant Master at the Strand School. Crown 8vo. 1s. *Just Published.* Other Volumes to follow.

Crown 8vo. 2s. 6d. Also Books I-III, separately, 1s. 6d.

A NEW GEOMETRY.

By **W. M. BAKER, M.A.**, and **A. A. BOURNE, M.A.**

"The book carries the pupil from the preliminary practical work right on to solid geometry, and both choice of matter and order of development are excellent, and will ensure the book a speedy success."—*Journal of Education.*

OCCASIONAL NOTES.

SO far as concerns schools in receipt of Government grants, the provision of a pension scheme is virtually secured by the promise of the Chancellor of the Exchequer given to a deputation of secondary teachers early last month. Mr. Lloyd-George is not yet certain that he can see his way to include private and proprietary schools. The proposal to which the Chancellor promised the support of the Treasury is that teachers should pay £7 a year towards the purchase of an annuity and that the State should add £1 to the annuity for each year of recorded service. After thirty-five years' service it is expected that a teacher would secure a pension of at least £100. Mr. Acland put it at £114. This is good news, and the thanks of all teachers are due no less to the hard work and persistence of the Pensions Committee than to the Chancellor and Mr. Acland. The Teachers' Scheme has yet to be approved, but the Government stands pledged to add £1 per annum for each year of recorded service. Primary teachers are still a step in advance with a definite promise of an additional £200,000 towards pensions. They have fully merited it, and we congratulate them on the attainment of a boon too long deferred.

MR. MARSHALL JACKMAN writes to the *Morning Post* to remove misconceptions regarding the attitude of the N.U.T. towards the Holmes Circular and the Royal Commission on Civil Service Appointments. The N.U.T., he assures us, is fully alive to the advantages of a public-school and University education. It would not bar candidates with such antecedents; all it asks is that

every one should "start at scratch." It is with the Inspectorate that Mr. Jackman is mainly concerned, and we are heartily with him in his demand that experience of teaching in the schools to be inspected should be a determining qualification (we would go farther, and make it indispensable); but it seems to us absurd to ask that in making his selection the President of the Board shall take no account of University Honours, and that is the only meaning we can attach to "starting at scratch." Again, it would be almost as absurd to quarrel with the present Cabinet as with this Royal Commission because the majority of the members have been at some public school or at Oxford or Cambridge.

SIR WILLIAM ANSON'S contribution to the discussion of the Bill for abolishing "half-time" was amazing for an ex-Minister of education. He argued against the Bill and expressed views in favour of combining school work with paid industrial employment. He thought that an employment which aroused the intelligence of the child and brought out his character might be of greater educational value than the routine instruction given in school. Sir William needs to think the matter out and clear his mind. If the paid industrial employment is such as will develop the character and the intelligence, and if school work is mere routine instruction, then we find no difficulty in agreeing with the proposition put forward by Sir William. But these epithets beg the question entirely, and tend to confuse clear thinking on the subject.

WE have often stated our view that in the past the education given in the public elementary schools, as ordered by the Code, has been too bookish. Manual activity is a necessary part of education. Such a combination we now have in most schools. Therefore it is not correct to speak of this education as an unintelligent routine. On the other hand, the so-called practical training that is got by "half-timers" is in reality soulless, monotonous, deadening, and unintelligent. Setting boys to work for hours a day at one simple task demanding the minimum of intelligence is not the way to develop them. We must have the manual instruction given in a school where it is based on intelligence and not in a cotton mill where it is based on economy of production. The unanimous opinion of those who have to deal with "half-timers" in schools or institutes is that they are markedly less intelligent than those who continue their school course uninterruptedly. In spite of the opposition of some parents and mill-owners, and of Sir William Anson, the Bill has passed its second reading.

THE Conference on Diet in Schools, on which we report more fully in another column, has been productive of much good, because it has directed attention to a matter of great importance; but it cannot be maintained that the scientists have a generally accepted body of knowledge to put before the educational public. Give the growing boy or girl, with a good appetite, plenty of wholesome and properly prepared food, and the system absorbs what it needs, and healthy growth follows. It may be admitted that, partly from ignorance and partly from indifference, the food cooked in the kitchen of a boarding-school for boys is not always appetizing or suit-

ably prepared; it may also be admitted that the food taken between meals is generally unwholesome, and ought always to be a superfluity of naughtiness. These, however, are matters easy of remedy; if the diet is suitable, the tuck shop will languish. The real point is appetite. The main question for the managers of boarding houses is how to secure that the pupils shall come to their meals with a healthy appetite.

SIR PHILIP MAGNUS chose as the subject of his presidential address to the Secondary Schools Association the relations between elementary and secondary education. He pronounced the attempt of the Board of Education to bridge the gulf between the two by means of free places crude and unsatisfactory, and regretted that there was no prospect this session of amendment by way of legislation. Drastic changes were needed in the curriculum of both classes of schools. In the debate on the Employment of Children Bill, it was argued on the one side that the removal of children from school before the age of fourteen was indefensible, and, on the other, that the practical training they received in field or factory was a real factor in education. There was truth in both views, and the way to reconcile them was to give this practical training in school. A similar reform was needed in secondary education, and might be effected by the establishment of a sufficient number of higher elementary and modern schools.

THE remainder of the meeting was occupied with a discussion of the Insurance Act as it affected secondary teachers. Mr. Hankin complained of the needless division of the country into four, but their Committee hoped to surmount this difficulty by means of affiliated branches. The crux of the problem arose under Section 47 (payment during sickness). As things at present stood, the Association of Assistant Masters held that Governors were legally bound to pay a full term's salary to a master incapacitated by illness. In this view they were supported by high legal opinion, and they were prepared to test it in a Court of Law. There was a danger that the friendly feeling that now prevailed between Governors and masters would disappear when sick maintenance became a legal obligation. Under Section 47, Sub-section 1, the employer made himself responsible for six weeks' full pay during sickness, and he advised teachers to avail themselves of this provision. Mr. Somerville differed from his colleague, and preferred that Governors should pay salary during illness. The object of teachers had been to obtain the greatest amount of State aid compatible with the greatest amount of freedom. These could only be secured if salaries were paid by school authorities, and pensions jointly by the State and teachers; so only could teachers pass from school to school. Even when they had secured what the scheme aimed at, a retiring pension of £100 a year for men at sixty, and of £60 for women at fifty-five, the pecuniary position of English teachers would bear no comparison to that of Prussian teachers, and much more must be done if the teaching profession was to hold its own against that of the Civil Service.

LATE last month was issued the long overdue Memorandum of the Board of Education on Modern Language Teaching. This, it need hardly be

Board of Education on Modern Languages.

stated, is not the pigeon-holed document composed by a classical member of the Board to which we have more than once referred, but the Report of a Special Committee of the Board, assisted by external advisers. We must defer consideration of it to next month, and can now only note that the Board concedes the point so strongly pressed upon it by the Modern Language Association—the recognition of a school which takes for foreign languages only French and German. The paper may be ordered as "Circular 797," price 3d.

LEARNED opinion often utters gibes at Local Authorities who are accused of caring more about their school buildings than about their teachers and of spending freely on bricks and mortar what they deny to the living agent, without whose work the buildings are useless. At the present moment Londoners are contemplating with some pride an expenditure of hundreds of thousands of pounds on a magnificent group of buildings to be the home of the University of London. Lord Haldane and others, who justly lay claim to represent the best brains of the nation, are concerned in the movement. If the Senate would issue widely a report showing what professorial chairs are endowed and to what extent, and what is the estimated professorial income from fees, it is possible that, while London is in a generous mood, a few crumbs might be found for the teachers also. It is a fine thing to lecture in a fine building; it is a fine thing, too, to lecture with a mind free from the carking cares of poverty.

THE Institute of Hygiene has installed a cinematograph—the first, we believe, in England that has been set up for purely scientific and educational purposes. From the United States we learn that Mr. Edison has devised and made trial of a series of films to cover an educational course of eight years in school. The rapid growth of the cinematograph as a means of amusement suggests a comparison. If we had devoted the science, skill, and money to education that has been devoted to the entertainment of the people, our schools would be very different places from what they are to-day. The fact is, of course, that our standards of value are mainly commercial. There is "money" in providing amusements: in education the profits that accrue are distant, and not always visible to a short-sighted people. So we grudge the expenditure of money on education and grumble at the education rate.

AT a conference of Christian Workers on the Care of Children, Mrs. Shorey said that legislation should be introduced compelling every girl to go into domestic service for a period whether she was to marry a tradesman or a working man. This is a typical utterance of those who want to legislate for others, and who believe that children's lives can be saved by Acts of Parliament. It is true that girls who have been in domestic service sometimes receive a training that helps them to become efficient housewives and mothers. But, if every girl is to take a period of domestic service as part of her educational course, we must have inspectors of houses and of mistresses. Mrs. Shorey would probably object to this. There would need to be a code of regulations for

Domestic Service.

the behaviour of mistresses to their servants. It would also be difficult in an Act of Parliament to state at what point in the social scale compulsory domestic service ceased to be enforced. Mrs. Shorey was probably not thinking of legislation for her own class.

DR. PRITCHARD'S paper to the Child Study Conference on "The Instruction of the Young in Sexual Hygiene" deserves careful study. Both doctors

**Sexual
Hygiene.**

and teachers are for the most part agreed that "the conspiracy of silence" must be broken down. The controversy centres round the question who is the best person to give the desired information. Dr. Pritchard distrusts the parent and would lay this duty on the teacher. That may be necessary at the moment. But there are two considerations to be borne in mind. In the first place, it often comes too late at school. The sheltered life is impossible: knowledge comes. If not given gradually and in a reverent manner, it comes from tainted and unhealthy sources. It often comes early with a distressing shock. When "the conspiracy of silence" has been broken down and mothers have themselves been educated in a proper view of this matter, then the mother will easily give the first indications of this knowledge, which will be as easily supplemented by the teacher from time to time as it is needed.

IN a paper contributed by Miss Charlotte Mason to the Conference of the Parents' National Educational Union at Winchester occurs the phrase: "Mark-hunger and knowledge-hunger cannot coexist."

"Mark-Hunger." Few thoughtful persons will dispute this dictum. Yet in our secondary schools we still see the most elaborate systems for giving, recording, and collecting marks. One may hear lessons in which all the energies of the teacher and pupils appear to be devoted to the accumulation of numerical marks as estimating the pupil's knowledge or intelligence. Each pupil must have an opportunity of answering the same number of questions; the questions must be of the same difficulty. Concentration on the subject in hand is prevented, and an entirely false value given to the lesson. It is curious that, so far as we know, the mark system is adopted in English secondary schools alone. Competition there may be, and ambition to excel. Tests are admissible. But constant hourly assigning of marks is an indefensible institution.

IT is a hard thing to persuade Englishmen to "scrap" anything that they have grown accustomed to. We take a pride in our anomalous system of spelling, and

**Reformed
Spelling.**

as far as concerns school life, we are inclined to think that valuable discipline results from the struggles of childhood to surmount the difficulties. As a nation we are Tories, and especially is this so in the matter of eyesight. What we are accustomed to see is right. A word has a certain form to the eye; in any other form it looks strange. Like the Levite of the parable, we want to pass by with averted eye. Yet the amount of effort that is put into learning our curious system of spelling might make a great difference in the national economy if it were directed into helpful channels. Prof. Gilbert Murray is President of the "Simplified Spelling Society"; Mr. Vice-Chancellor Sadler and Miss Burstall are vice-presidents, to mention a few only. These names are a

guarantee that the work of the Society is genuine, and not a mere fad. We wish it rapid progress.

LORD LYTTON presided at a meeting the other day convened to advocate the education of boys and girls in the same school. The sanest argument in favour of co-education in boarding schools is that by this means the best substitute is found for a natural healthy family life.

Co-education.

The segregation of either boys or girls in an educational institution from which the other sex is excluded has always seemed to us an unnatural and an unhealthy plan. This argument applies to boarding schools alone. In day schools the family life continues at home. But, while we advocate this extension of family life into the boarding school, we do not therefore conclude that identical curricula are suitable for boys and girls. There should be differentiation. At the same time, traditional differences are often without scientific basis. There is no essential reason why girls rather than boys should learn the piano, or boys rather than girls should learn Greek.

IN the action for slander, *Ivens v. Griffen and Another*, tried last month before Mr. Justice Lawrence, the special jury awarded £200 damages. The plaintiff, Miss

**A Libel Case
and its Moral.**

Ivens, kept a girls' boarding school at Swanley, and the defendants were the parents of one of her pupils. It appeared in the trial that the parents blindly accepted the grossly exaggerated complaints of their daughter as to the bad food and accommodation, and confided their tale of wrongs to all and sundry, including a porter at the Swanley Station. The judge, in summing up, observed that children who had regularly five meals a day could not well be starved, and that parents who paid half-a-crown a day for board and lodging and tuition could not expect the same food to be provided as if they were staying at the Ritz Hotel. The case suggests two morals—one obvious, one less so. Parents must take with many grains of salt their children's reports of school life. Secondly, if a parent cannot afford more than thirty guineas a year for his child's tuition and board, he would do well to keep her at home and send her to a public day school.

LOCAL AUTHORITIES.

OF all subjects that are included in the school life of a child to-day none is of greater importance at the present time than the subject of handicraft.

Handicraft.

The Education Committee of the London County Council have just issued a report of a Conference dealing with the teaching of handicraft in the London elementary schools. The Conference consisted almost entirely of teachers and inspectors in the subject. The report is valuable, and will be widely read. It is written with insight, knowledge, and restraint. In the kindergarten the value of using the muscles of the hand is fully recognized. In the higher standards of the upper schools there is "manual work" in most cases; but between these two little has been done to develop the activity of the brain and to strengthen the formation of character by actual constructive work with the hands. Educational theorists are at one with teachers; the problem is "how to do it."

THE terms of reference to the Conference are instructive. They

Points referred to the Conference.

are: "To consider and report as to the establishment of a complete and continuous scheme of handicraft which shall cover the whole period of school life and deal with (1) the necessity for a scheme linking up the kindergarten work with the existing handicraft schemes; (2) the desirability of adopting forms of handicraft training other than wood and metal for elder pupils; (3) the correlation of the proposed scheme with other subjects of the curriculum; (4) The desirability of giving to handicraft an industrial bias in particular cases, as distinct from a purely educational aim; (5) the training of instructors to give effect to the proposed scheme, and their relation to the general organization of the school." The idea underlying the terms of reference is that the curriculum of the modern school has left almost untouched the development of the motor activities of the child.

THE Conference recommend, and support by careful argument, "that handiwork of some kind form a part of the training of every child during the whole of its school life." No definite scheme is advised, because definite schemes tend to become formal and valueless. Accepting the principle, each school will work it out on its own lines. Children themselves "show strong instinctive tendencies to handle, construct, adapt, design, and illustrate, for purposes of their own. In this way Nature teaches." "There is a firm conviction among the teachers that this kind of work [handicraft] improves the mental capacity of the children." On the second point, the Conference recommends a variety of materials, other than wood and metal, such as "cardboard, clay, plasticine, paper, light woodwork material, raffia and cane, wire and strip metal." In dealing with such materials as clay there is no mention of the dangers involved, though these must not be overlooked. Such substances, if care is not taken, may become sources of infection.

ON the subject of correlation the Conference has decided views.

Correlation with other Subjects.

"We think that such subjects as mathematics, geography, science, history, art, and drama can receive much assistance from handwork." The Conference does not think it advisable for boys and girls to specialize in definite trades before the age of fourteen years. There is a full report on the subject of the instructors. It is pointed out that these must be properly trained and educated, and must rank with other members of the staff. It seems quite clear that the specialist teacher is becoming more and more of a necessity in elementary schools. Time was when a trained teacher could undertake all the subjects of the curriculum. But the number of subjects has increased, and it is impossible for a teacher to be equally proficient in all. But, on the other hand, it must be remembered that when proper provision is made in schools for developing the constructive instincts of children, and when this system is continued, as it will be, into the training colleges, the teacher of to-morrow will be much more of a "handyman" than the teacher of to-day.

FROM the report of the Staffordshire Education Committee we

Boot-making Discarded.

learn that the curriculum, dietary, and arrangements of the industrial school at Werrington have been "overhauled." Instruction in boot-making has been discontinued. It is said to be "not economical, and to lead to no occupation for boys on leaving the school." Shoe-making and mending is, no doubt, one of the many minor industries that have been superseded by machine work. Boots are now turned out in factories, and the factory hand does not need to know how to make a boot. The pride of craftsmanship is taken from him; he does but "mind" a machine. In place of this instruction the Committee have appointed a whole-time instructor in woodwork and also an instructor in metal-work.

THE Coal Mines Act of 1911 requires that every fireman, unless

Instruction for Firemen.

engaged in a mine in which inflammable gas is unknown, must pass an examination before the end of the present year. The Staffordshire Education Committee lost no time in making the necessary arrangements for the desired instruction. But they found that the provision for Mining Instruction already in existence in the county was so satisfactory that it has only been necessary to appoint in addition three part-time instructors and to purchase the apparatus necessary for the classes in South Staffordshire. And in North Staffordshire one whole-time instructor has been appointed by the county and county boroughs conjointly.

Vocational Bias.

that information had been collected from forty villages concerning the occupations of children who left the elementary schools in the years 1904 to 1908. "The facts revealed," continues the report, "make it desirable to consider how far the school curricula form a suitable preparation for the life of the children." A special Committee will be appointed to confer with teachers and inspectors and to draw up a report. The matter is a thorny one. We may express one hope, and that is, that the Committee will, in considering this matter, endeavour, as far as possible, to deal with it from the point of view of the lives of the children, and not from the point of view of their future employers. The life of the Strasburg goose is dealt with from the point of view of the purveyor of *foie gras*, and not from the standpoint of the goose itself.

THE Education Committee of the Leicestershire County Council

Ambulance Classes.

have established the following special conditions of aid to classes in ambulance or home-nursing. There must be not less than twenty students in each class; and the class must be organized as a part of an evening school, and so be able to earn a Government grant. The class must be examined by the St. John's Ambulance Association. The fee proposed for the lecturer must be approved by the County Committee. The students are required to provide all books and materials; their fees are not returnable. In the case of a recognized ambulance class the Committee will pay one guinea towards the remuneration of the Leader who conducts the practice class; and, in the case of a recognized home-nursing class, the Committee will pay the special teacher at the rate of 3s. an hour.

SCIENCE NOTES.

At the meeting of the Royal Astronomical Society on May 10,

Rotation of Uranus.

Prof. Lowell announced the discovery of the rotation period of Uranus, which had not been measured before. The result is in striking accordance with that of the other large planets, the day of Saturn being 10 hours 38 minutes, while Prof. Lowell gives 10½ hours for the day of Uranus. The year of Uranus is equivalent to eighty-four of our years and his orbit very nearly in the ecliptic.

IT is probable that the use of the cinematograph for educational

The Cinematograph.

purposes will be extended considerably before long, and county education committees are giving attention to the subject. Studies in the movements of microscopic animals and of plants are readily popularized by the projection of films, which reproduce (at a speed sometimes excessively multiplied) the history of an amoeba's breakfast or the opening of a bud. The extraordinary interest evolved in a youthful audience by a cinematograph show of any description suggests that teachers have paid too little attention to the pedagogic value of motion. The attractiveness of movement has, as a rule, been lessened by the absence of natural colour and sound. Advance is being made in supplying these deficiencies, as was illustrated by Prof. Stirling at one of the Friday evening discourses at the Royal Institution last month. The method followed was that of Gaumont, showing action synchronized with concomitant sounds.

THE Public Schools Science Masters' Association are making

Practical Chemistry Examinations.

inquiries into the efficiency of laboratory examinations, and some dissatisfaction with the methods of examiners in practical chemistry is disclosed. One complaint, which is rather frequent, relates to the standard of purity of the substances supplied by the examiners for analysis or for quantitative exercises. We venture to point out that it is the duty of examiners to inform themselves as to the impurities present in the materials thus supplied, and to carry out tests with samples taken from the examination room, so as to be able to gauge the results obtainable by such processes as are actually employed by the candidates. The examiners will then be in a position fairly to value the work. Perhaps it may be suggested that only pure materials should be used; but the suggestion is not likely to be made by those best acquainted with the manufacture of chemicals and with the meanings (the plural is intentional) assigned to the trade description "pure."

THE Education Committee of the Wilts County Council report

IMPROVEMENT in laboratory examinations depends upon a clear

**Laboratory Tests
in Physics.**

view as to their aim. It is wasteful to set as practical exercises questions which depend for their value upon such knowledge as could be evinced in the written examination. As a method of finding out whether the examinee has pursued a course of intelligent practical training, it seems desirable that the practical examination, especially in physics, should be described as a "laboratory test," and should require the performance of laboratory work in accordance with fairly full directions. This plan brings the examination into closer union with the ordinary classwork, and we can say from personal experience that the results are favourable. If this idea were more frequently adopted by examiners the results would be less uncertain, and the order of merit of the candidates would be somewhat nearer that which the teachers would assign from their experience.

THE warm, sunny spring has had a very beneficial effect on the hatching and rearing of young birds in the Zoological Gardens, and there are nestlings of great interest to be seen at the present time—the

young storks, for instance, affording a spectacle somewhat rare in this country. At the moment of writing a large and important addition is being made, the collection presented to the King from Nepal having just arrived.

THE Exhibition recently held by the School Nature Study Union at the London Day Training College was decidedly successful. The attendance of visitors was very large, and the interest shown in the

objects displayed was of a discerning character. A strong feature of the exhibition was that the greater part of the work was done by the children, and that it consisted mainly of steady, continuous, seasonal work, and not of showy items. The general effect was, nevertheless, very effective as a display; perhaps because this was not aimed at. Another noteworthy feature was the striking exhibit of Nature-study publications contributed by leading firms of publishers. We notice that books dealing with natural history are far more informative and useful than used to be the case. There can be no doubt that Nature study—if it become, as should be the case, increasingly scientific as the boy or girl progresses up the school—forms a better foundation for science than is given by premature attempts to generalize as to the "properties of matter." Apart from the moral and æsthetic value of the work, the science teacher has good reason to applaud the work done by the School Nature Study Union.

DIRECT MORAL TEACHING IN ITS PSYCHOLOGICAL ASPECT.

II.

OUR reflections, up to this point purely theoretical, will naturally prove unsatisfactory to the person who is face to face with the practical problems of moral education, and who is inclined to demand that the theorist shall make some useful contribution towards the solution of these. There seem to be two outstanding difficulties to be met by those connected with the practice of moral education—the question of the age at which direct moral instruction ought to begin and that of the best method for such instruction to follow. Those who have to deal with the arrangement of school time-tables must decide whether the lessons in morals are to occupy a separate place alongside other subjects or whether they can be made incidental to other parts of the curriculum. It seems to me that our theoretical considerations do help to throw light on these questions of age and of the time-table. Suppose we concentrate our attention in the first place on the problem of the method of instruction. Is moral teaching to be placed in the time-table alongside history, mathematics, and all the other subjects, or is it to have a more casual character, to be introduced incidentally through the opportunities afforded by other subjects and by school life in general? Our psychological treatment seems to suggest the latter solution.

Let us keep in mind what we mean by direct moral teaching. It is the communication of ideas about morality from teacher to taught, this being done without any attempt on the teacher's part to conceal his design. Now, that such ideas may be effective, it was pointed out that certain conditions must be fulfilled. In particular the ideas must be under-

standable and attractive, and capable of appealing to the feelings, of affecting the pupils in a particular way. Two facts must be emphasized in this connexion. In the first place, during most of school life, and especially at the earlier stages, abstract moral ideas are *not* interesting to the pupils. Early moral teaching must follow the concrete way. The power of judging must be built up gradually, as the result of a series of actual moral judgments pronounced on acts and people within the comprehension of the children. The capacity to discriminate rightly grows through actually discriminating, and the love for the good comes as the result of understanding and admiring particular good acts. The right attitude towards human conduct which is what our teaching aims at, is the result of an experience of definite examples of conduct by which our pupils have been moved, and which they have themselves comprehended and judged.

Now it is obvious from what has been said that, in concrete moral instruction, those moral situations and characters ought to be used which are most capable of appealing to the pupils, for these have the best chance of proving effective. Where are these to be found? Naturally within the experience of the taught, narrow though it may be. When we speak of their experience for our present purpose, we must limit ourselves to such experience as the teacher can be sure of their possessing, for we are dealing with the difficulties that arise in schools in particular, and not with the wider problems facing the parent. The child's experience, like all experience, has two aspects. There is the experience of his ordinary everyday life, and there is the experience of his imaginative life which carries him beyond the confines of his particular environment and of the happenings in it. Both these aspects of his life afford numerous examples of concrete moral situations, they bring him into touch with moral personalities, and afford opportunities for taking up the attitude of moral judgment. Moreover, those examples have a vividness, an intensity, a living interest, which none merely culled from the experience of others can have. These are real to him, and their influence depends on the intensity with which they are realized. We assume that the materials chosen from literature and history for the training of the child's imagination are chosen as being the most suitable for the purpose in view. That being so, it would seem that here, and in the child's actual life, we find also the best material for moral teaching, and that we need not have recourse to other examples invented for our particular purpose.

But does all this really lead to a solution of our difficulty? Those who advocate the inclusion of moral teaching as a special subject in the curriculum, with its own special text-books and hours of instruction, would go thus far with us; but it seems to me that, if they accept the principle underlying all this, their method is not only uneconomical, but directly disadvantageous. It is certainly not economical, for it adds a new subject to the already full time-table, and it steals away another part of the well filled school day. But it is directly disadvantageous also, inasmuch as it deprives those examples and illustrations of which it makes use, of their peculiar effectiveness, by taking them out of their setting and not using them at the time when they are most vividly and intensely realized. As seen through the mists of memory, the actual event loses much of its clearness and its personal importance. A boy cuts his finger, another arrives late, an appeal is made by the teacher for confession of a fault, and these little happenings cause a flutter in the schoolroom. They are interesting, they are events for the children, and the time of their occurrence, when they are actually realized, seems to be the best time for using them to point a moral. At the moment, the moral can, so to say, be seen issuing from the event, and there is less danger of the feeling of unreality or apartness arising with regard to the moral application. So also with the imaginative world. The story of the sturdy little David going forth to meet the giant Goliath is one that, well told, never fails to appeal to the imagination of children, and what proper child can fail to respond to the charm of the great King Alfred? It is always possible for a good teacher to hold a class enthralled by the exploits of

Cœur-de-Lion or the deeds of Arthur and his Knights. Older pupils love tales of travel and enterprise, and can be made to appreciate human achievement in spheres such as those of science or political life. Now all these things come within the scope of subjects already well established in the curriculum. They belong there, and it is there they have their reality. They have to be dealt with there. Why go over the same ground twice for two different purposes? Those conditions which favour imaginative vividness also favour effectiveness. Here, again, the proper moral attitude ought to be the natural accompaniment of the living through of the situation, not an after product to be developed through a subsequent utilization of the material.

At an earlier stage of this article I said that two facts had to be emphasized in connexion with the arrangement of the curriculum. The one of these was the necessity for concrete material, which was shown to be abundantly supplied by the ordinary incidents of school life, and which we hold ought to be utilized under the best conditions for effectiveness, such conditions not being realized when moral teaching is made a separate subject. The second fact of which I spoke is the following: some pupils all through, and the majority of pupils at the last stages of school life, show a tendency to adopt not the ideas suggested to them, but opposite or contrariant ideas, so that not the ideas suggested, but their opposites, tend to become effective. This attitude of suspicion or opposition appears in various forms, but in particular it tends to assert itself against the felt moral influence of the teacher. The teacher's attempts to expound his own moral ideas often stimulate the spirit of rebellion. In dealing with this tendency it is well that the teacher should, as far as possible, avoid the assertion of his own personal point of view. Exposition of moral ideas there must be, and of *his* moral ideas too, but the fact that they are his need not obtrude itself unnecessarily. It seems to me that, in set moral lessons, it must be more difficult to avoid such assertion than in incidental moral teaching; for, in the first case, the teacher starts with the obviously didactic purpose of driving home certain moral truths which the pupils cannot but feel to be very much matters of his own conviction. In the second case, he is again obviously didactic, but he can be so with a "sweet reasonableness," based on the fact that the moral can be shown to arise naturally out of the situation. The moral can be shown to be forced upon the teacher, as on his pupils, by the very nature of things. A teacher intends, let us say, to give a lesson on courage. Starting out with this intention, he naturally gives the impression that he wishes to give *his* idea of what courage is; but if, in the course of his ordinary instruction, he comes across historical examples such as those already mentioned, they at once offer themselves as a matter of course, so to speak, as illustrations of a virtue the understanding and appreciation of which he keeps in the background of his mind as an aim all through his instruction. His moral teaching in this way becomes directly connected with life as his pupils know it and is not something identified simply with him and with school work, and therefore not necessarily an expression of authority to be opposed.

Coming now to the other great practical problem, that of the age at which moral teaching is to begin, we can see that its solution is closely connected with our treatment of the preceding difficulty. So soon as we give up the attempt to include moral teaching as a separate subject in the curriculum, the age problem becomes simpler. How soon can a child take up the attitude of moral judgment? Well, moral judgment can, of course, appear in many forms before it reveals itself as the reasoned out judgments of the philosopher, and the child very early shows an elementary sense of right and wrong. Long before school age certainly, he can discriminate, and it is equally certain that before school age he is already capable of asking why certain things are as they are, why the doing of particular actions should be required of him, and why others are avoided and condemned. The demand for an explanation is already there, an explanation simple enough to be understood, but sufficient for his stage of mental development. He cannot understand general principles of

morality, it is true, but he gropes in his own way after some comprehension of that which people praise and blame as good and bad. So, from the very start of his school life, there is the demand for instruction as well as the suitable material to convey it. Moral theory in forms adapted to meet the minds and experience of the pupils goes hand in hand from the beginning with moral practice. The discussion of the forms of instruction suitable for the different stages would form material for a separate article and cannot be undertaken here. Suffice it to say that moral ideas are a gradual growth, and their effectiveness depends on the degree to which they are founded on actual personal experience and are not simply artificial creations. The supply provided by the teacher must adapt itself to the demand on the part of the pupil, meeting the demand when it appears, and following it through its varying forms.

J. E. ALDERSON, M.A.

JOTTINGS.

THE Health Conference and Exhibition, 1912, will be held at the Royal Horticultural Hall, Westminster, on June 24 to 27 inclusive. The Exhibition will be open each day from noon to 9 p.m. The program includes for each day a professional discussion in the afternoon and a popular lecture in the evening. Among the subjects of special interest to teachers are: "The Prevention of Deafness in Children" (Mr. Macleod Yearsley), "The Health of Girls" (Miss Florence Stacpoole), "The Necessity for further Manual Training in Public Elementary Schools" (Dr. C. B. Moss-Blundell), and "The Teaching of Practical Domestic Economy in Schools" (Dr. Banks Raffle). Further particulars will be supplied on application to the Secretary, National Health Society, 35 Ludgate Hill, E.C.

THE arrangements for the Second International Moral Education Congress, to be held at The Hague, August 22-27, are nearly complete. The preliminary list of papers to be read falls not far short of two hundred, and the subjects range from "The Gurukula System of Character Building," by Kalyandas Jekisondas Desai, to "L'influence des spectacles de la nature et de la fréquentation des jeunes filles sur la formation des jeunes hommes," by M. Hyacinthe Loison. Among English contributors we notice Sir R. Baden-Powell, Vice-Chancellor Sadler, and the Salvation Army. We may remind our readers that applications for membership must be addressed to Fred Charles, Esq., 22 Park Crescent, Finchley, N.

THE Summer Meeting of the Association of Assistant Mistresses will be held, by kind permission of the Council and Head Mistress, at the Queen's School, Chester, on Saturday, June 22.

AT the Summer Meeting of the English Association on June 21, at 5 p.m., King's College, Strand, Mr. H. J. Newbolt will deliver a lecture on "Poetry and Politics."

THE Association of Head Mistresses will hold its Annual Conference on Friday and Saturday, June 14 and 15, at St. Paul's Girls' School, Brook Green, Hammersmith. The President of the Association, Miss Douglas, will preside.

THE twenty-first Ambleside Summer Course in Nature Study, Art, and Educational Handwork will be held from July 22 to August 31, under the direction of Mr. Joseph Phillips. Application for entrance to classes or for board and residence should be addressed to the Secretary, Rothay Holme, Ambleside.

IN last year's competition in Jackson's System of Upright Handwriting, Seaham Harbour Church of England School has swept the board, carrying off not only the Challenge Shield offered by the publisher, but also the first and second prizes in Class A and the first prize in Class B. Will the Head Master reveal the secret of his success?

MR. J. W. LONGSDON has been appointed Editor of the *Educational Times* in place of Prof. Murison, resigned.

WE are glad to find the position that we have from the first taken up with respect to the Holmes Circular accepted and confirmed by an able contributor to "Schools and Scholars" in the *Morning Post*. "The Holmes Circular has evoked so much passion and intemperate denunciation that the voice of reason has been drowned beneath it all, and many who disagreed with its terms have been driven to defend its authors against the blind fury of the narrow-minded extremist. But, if the protagonists of the National Union of Teachers had based their protest on the ground that no one should be appointed to the inspectorate who had not had at least ten years' experience of actual teaching, of which some more than nominal portion should have been spent in schools of the same type as he will be appointed to inspect, their position would have been unassailable."

THERE was an important Society omitted from our "List of Educational Societies" in March issue. The Classical Association of Ireland, with 300 members; Mr. J. Thompson, M.A., 40 Harcourt Street, Dublin, is the Hon. Secretary, and the President for 1912 is Mr. L. C. Purser, M.A., Litt.D., F.T.C.D. The Association has a modest Annual Subscription of 5s., and no entrance fee.

"A. S. O." in the *Morning Post*, gives a series of compositions written by children of seven or eight upon the theme, "If I were King." The first two are a striking exhibition of the sheep and the goat. (1) "If I were a king I would try and make peace; that is to say, I would try and stop all the battles. I would also try and make every man take part in work, so that each would help the other." (2) "If I were king I should live in a palace and be Happy all my life. My name would be called Edwin William 1st. The palace would be could (*sic*) Ruckingham Palace."

SEVERAL correspondents have pointed out the inconsistency in including under "Safe Novels" one of which the plot was pronounced to be of doubtful morality. The reviewer admits the inconsistency, but he would urge that in the presentment of the story there is nothing sensual or depraving. Those who take a stricter view are forewarned, and few would be prepared to taboo the tale of Dido and Aeneas or of "The Statue and the Bust" (referred to as a parallel) because of the doubtful moral.

WE regret to record the death of Mr. Edward Pinches on May 17 in his seventy-fifth year. Mr. Pinches began life as a private-school master, like his father, but in 1866 he abandoned teaching and was called to the bar. For years he shared chambers with his brother-in-law, Sir Edward Clarke, but he never practised and all his energies were devoted to education, and in particular to the College of Preceptors. For nearly fifty years he was a member of the College, and for twenty-five years treasurer, succeeding his brother in that office. It was under his management that the Building Fund was accumulated and the present spacious tenement secured. He represented the College on the first Registration Council, where his legal knowledge and sound judgment were fully appreciated.

FURTHER elections have been made to the Registration Council: University of London, Sir Henry Miers; Training Colleges, Prof. John Adams; Head Masters' Conference, Dr. Gow; Incorporated Association of Head Masters, Dr. McClure; Incorporated Association of Assistant Masters, Mr. A. A. Somerville; Assistant Mistresses, Miss E. S. Lees, Clapham High School.

THE Society for the Promotion of Roman Studies held its Second Annual General Meeting on May 14. Prof. Haverfield, the President, reported that the Society was prospering numerically and financially. In the year 1911, 350 new members had been enrolled, and there was a balance of over £1,000 at the bank. Miss Gertrude Bell gave a brilliant lecture with lantern slides on the Parthian palace at Hatna that she has recently explored.

THE Imperial College of Science and Technology have issued the Report for the year ending August 1911. The governing body are emphatic against incorporation with the University of London, and ask that students who have satisfactorily completed the association courses, or have duly qualified themselves by research work, should obtain degrees without further examination. The number of students in the Departments of Mathematics and Mechanics was 65, and in that of Physics 259.

THE College of Preceptors some months ago presented a memorial to the London County Council praying that private school pupils be admissible to Council scholarships, and that these should be tenable at private schools. The Sub-Committee of the London Education Committee, to whom the question was referred, recommended that no school should be recognized for the attendance of scholarship holders unless it had been inspected and reported efficient either by the Board of Education or by a University. This recommendation was opposed by Mr. Bray as contravening the Council's previous decision that it was not desirable to send their scholars to any private school. The best schools would not accept county scholars, and it was only cheap and struggling schools that would be open to them. Further, they had no power themselves to test the efficiency of a private school. After some discussion the Chairman of the Sub-Committee agreed to take the Report back for further consideration.

THE Governors of the Brompton (Cumberland) County Secondary School have appointed Mr. Herbert William Cousins, M.Sc., Head Master of Alston Samuel King's School, to the post of Head Master. There were 150 applications.

THE Governors of the Workington (Cumberland) County Technical and Secondary School have appointed Miss Beatrice Caroline Deeks, B.A. London, Mathematics and Classics Mistress at Norwich Municipal Secondary School, to the post of First Assistant Mistress. There were forty-five applications.

AT the annual meeting of the Parents' National Education Union, Dr. David, of Rugby, gave an address on Educational Ideals. First came the teaching of English, and he allowed that at present boys left school unable to express themselves correctly and clearly in their native tongue. Next he regretted the lack of public spirit shown by public-school men in declining to serve as town councillors, and still more as Poor Law Guardians. Lastly, he raised a protest against cockering. "Boys come back to school with their trunks full of tonic wine, all of which at Rugby goes down the sink."

A PRACTICAL demonstration of Cinematography as applied to educational subjects will be given on Saturday, June 15, at 11 a.m. at Cinema House, 225 Oxford Street. It has been arranged by the proprietors of the *Bioscope*, and admission is free to teachers.

THE death of Sir George White removes one of the few surviving veterans of the struggle for national education. He was associated with the Birmingham Education League, which is well known in connexion with the Act of 1870, and began his active work in the administration of education in 1874 as a member of the Norwich School Board. Since that time his service has been unbroken. Though he was a passive resister, vigorous in his denunciation of the Act of 1902, and a champion of the Free Church standpoint, he was prepared to accept the compromises proposed in 1908. In Parliament he brought to the discussions on education an unusually wide knowledge and experience of his subject and great aptitude in marshalling his facts.

Now that starvation wages is all the cry, it is a consolation to learn from Mr. H. A. Roberts, of the Cambridge Appointments Board, that the average salary of graduate engineers engaged in teaching varies from £170 to £1,000, and averages £400.

THE resolutions passed by the London Teachers' Association on the education of mentally deficient children are on similar lines to the Bill introduced in the House of Commons by the Home Secretary. First and foremost, all measures should be made compulsory; secondly, all mentally deficient children should be registered, and such as are educable be taught in special schools provided by the Local Education Authority; thirdly, such children on leaving school should be subject to the jurisdiction of the Commissioners or Board of Control, who should be responsible for the provision of proper care and control.

IN view of the King's promised visit to Harrow, Speech Day this year has been changed from the immemorial Thursday to a Saturday, June 15.

SIMILE AND METAPHOR.

By AMY BARTER.

SIMILE and metaphor are generally polished off in two paragraphs at the end of the English grammar, and pupils in the literary lesson are occasionally asked to turn a metaphor into a simile; but these are the very life blood of a language and a systematic study of them is essential not only for the full appreciation of literature, but also for the act of composition. It is, therefore, worth while for the teacher occasionally to spend some small part of the literature lessons in the systematic examination of selected examples. Very simple pictorial figures relating to everyday subjects will be found most suitable for the early stages, and the greater number of these will be taken from prose works, though poetry will supply a few. A class that is reading one of Robert Louis Stevenson's essays—"Across the Plains," for example—will find that an excellent starting-point. Stevenson's similes are delightful—terse, and with a touch of unexpectedness about them which gives them a certain quaintness. "The line of railway stretched from horizon to horizon like a cue across a billiard board." "The Bass Rock tilted seaward like a doubtful bather." "Trailing one paddle in the water like a wounded duck." "Streets that glow with colour, like cathedral windows." Charles Lamb will supply others—for example, "That foul gap in the bottom shelf" (of his bookcase) "like a great eye-tooth knocked out"; or Dickens: "His head was so much more like a strongly spiked wall than a head of hair that the best players at leap-frog might have declined him as the most dangerous man in the world to go over." Suppose the teacher takes the first of these figures, and, asking for suggestions from the pupils, draws on the blackboard in coloured chalks a rough representation, first, of the cue and billiard board, then of the railway. The examination of these sketches and the discussion which they will provoke will serve to make the essential characteristic of a simile fairly clear to the class—namely, that it is a comparison between two things unlike in most respects, but having at least one striking point of resemblance. Also, they will be led to recognize that one use of the simile is to give additional clearness to a description. Three or four other similes should be given for illustration in a similar manner as homework, and these should be examined and discussed in a subsequent lesson.

The next step will be for the pupil to make a set of similes himself, forming them on the model of those examined in class. The teacher will, at first, give the subjects for which comparisons have to be found. This is the more convenient method for class teaching, as the examination and correction are easier than is the case when scholars are left free to choose the subjects for themselves. These first crude attempts ought to prove of the greatest interest to the teacher. The comparison of the different images suggested by the same objects to various minds ought to bring out individual characteristics in a striking manner. The criticism of these efforts will be made mainly through the graphic representation of them which each scholar should be prepared to show. The teacher will reproduce the most interesting of these on the blackboard and invite the comments of the class.

Materials for another lesson might be taken from such a group of similes as the following, the first three of which are taken from Bacon's "Essays":—"Suspensions among thoughts are like bats among birds; they ever fly by twilight." "Virtue is like a rich stone, best plain set." "If a man be compassionate towards the affliction of others, it shows that his heart is like the noble tree, that is wounded itself when it gives the balm." "Fancy plays like a squirrel in its circular prison, and is happy" (Ruskin). "A vague fear, like a raven flapping its slow wing across the sunny air" (George Eliot). "Sweet are the uses of adversity, which, like the toad, ugly and venomous, bears yet a precious jewel in its head" (Shakespeare). In these the scholar will

quickly recognize a different type of simile from those already given, for he will find that when he tries to put his impressions in the form of a picture, only one side of the comparison can be thus represented. Investigation will show that this is because the comparison is between an abstract conception and a concrete image. The scholar will have advanced one more step in the understanding of the uses to which language may be applied in the expression of thought.

The pictorial element in the third group of similes is still further reduced. Suppose the following be taken:—"You don't suppose that my remarks are like so many postage stamps—only to be uttered once" (Oliver Wendell Holmes). "His eloquence still went on plapping, like water from a cistern" (Thackeray). "Men fear death as children fear to go into the dark" (Bacon). "My days are swifter than a weaver's shuttle" (Job). "Yet a little sleep, a little slumber, a little folding of the hands to sleep; so shall thy poverty come as one that travelleth, and thy want as an armed man" (Proverbs). "His relation to his son was like an aching limb" (George Eliot). The concrete element in these similes can only be partially rendered in graphic form, since in each case the main idea of the comparison is connected with some sound, action, or feeling which, in drawing, can only be implied.

The transition to metaphors is naturally quite easy. The scholars will soon discover that metaphors are simply similes in which one side of the comparison is implied, not expressed. "Charity will hardly water the ground where it must first fill a pool." "All rising to great place is by a winding stair" (Bacon). "Colours are the smiles of Nature" (Leigh Hunt). "It's hard work to tell which is old Harry when everybody's got boots on." "Kind Providence furnishes the limpest personality with a little gum or starch in the form of habit" (George Eliot). "In this flat swamp of convalescence left by the ebb of sickness, yet far enough from the terra firma of established health" (Lamb). "These hues of gold and azure, that hush of world's expectation as day died were still a Hebrew speech for me; nevertheless I was looking at the fair illuminated letters and had an eye for their gilding" (Carlyle).

As the lessons proceed the scholars may be led to see the value of the simile and the metaphor in adding force, beauty, or clearness to the sentiment expressed, and in heightening the impression of pathos, humour, mirth, reverence, &c., which it is intended to convey. They will come to their reading with an increased capacity for appreciation and enjoyment, and with some realization of the close attention which it is necessary to give to a really good piece of prose or poetry in order to obtain from it all that it can yield.

The tendency of such lessons as those suggested will not, as some teachers might fear, be to encourage the scholars in the attempt to produce high-flown poetical phrases in their composition. It will operate rather in the opposite direction. If boys and girls can be led to realize justness, appropriateness, and purpose as qualities which all good similes must possess, they will realize also that care and pains must go to the making of them. Again, the extreme simplicity, almost homeliness, of language which is characteristic of so many similes must have a wholesome effect.

The course of study thus begun may be almost indefinitely extended. For example, the collection and examination of all the similes and metaphors contained in a work which is being studied in class gives valuable help in bringing out qualities of style. The writer remembers the immense enthusiasm which was aroused in a certain class by the application of this method to the study of "Julius Caesar," and the wonder and admiration with which the scholars realized the marvellous way in which these figures of speech were made to aid the characterization and to accentuate the dominant feeling or purpose of a scene or speech.

Excellent essay subjects can be obtained from similes and metaphors. The writer can, from experience, recommend two: "If he is out fox-hunting he comes home with the brush and not with a spray of blackberries; but if, on

the other hand, he goes out blackberrying, he will return deeply dyed the true tint and not dragging behind him a languishing coil of seaweed" (Augustine Birrell on Leslie Stephen). "There's no pleasure i' living if you're to be corked up for ever, and only dribble your mind out by the sly, like a leaky barrel" (Mrs. Poyser in "Adam Bede").

If the teacher desires to develop the artistic or graphic side of the lessons, suitable examples are to be found in plenty. For example, Longfellow's "Autumn, like a faint old man, sits down by the wayside aweary," or Ruskin's description of a great breaker against rock: "One moment a flint cave, the next a marble pillar, the next a fading cloud," or George Eliot's "The actions of a little trivial soul struggling amidst the serious, sad destinies of a human being *are* strange. So are the motions of a little vessel without ballast tossed about on a stormy sea. How pretty it looks with its parti-coloured sail in the sunlight, moored in the quiet bay"—all give scope for imaginative treatment.

MEDICAL INSPECTION.

By "AN OLD FOGEY."

Rate-payer. Have the children in your school been medically inspected?

Teacher. Yes, some of them.

R. Is the inspection of any benefit?

T. To some extent; but it is not as useful as it might be.

R. Why is that?

T. Well, if the inspection is to be of any real benefit it is folly to deal only with children just admitted and those about to leave. Time and money is also wasted in collecting material for statistical reports, while the only aspect of the problem which really matters—the health of the children—appears to be a secondary consideration.

R. But is not a considerable expenditure already incurred on this work?

T. The whole of the expenditure is a charge upon the rate-payers, without any assistance from Government; but the amount, relatively speaking, is small.

R. What do you mean by that?

T. This: it is obvious that the physical condition of the child should be the first consideration, as the satisfactory development and exercise of its mental faculties depend upon its bodily health. In 1909-10, in England, about £22,000,000 was expended on elementary education. Of this total a little over £250,000 was applied to medical inspection and the provision of meals. If you agree that it is a mistake to expend large sums of money in cultivating the brains of children unless we satisfy ourselves, as a preliminary, that they are properly nourished, a much larger expenditure on this branch of the service should be inevitable.

R. But what about the parents? You seem to expect the State to assume responsibilities which properly belong to fathers and mothers.

T. If we compel the parent, whatever his views, to surrender his child for a particular process of mental cultivation favoured by the State, we cannot escape the obligation. I think, to see that the child is in a physical condition to suffer the process without detriment.

R. But surely a distinction may be drawn between providing schooling for the child which the parent may not be able to do, and maintenance which the parent can provide.

T. Possibly; but if it is folly for the work of the teacher to begin until the duty of the parent has been done, and the parent fails in his duty, what then?

R. He should be made to do it.

T. The alternative being that, if the labourer with his modest wage finds it impossible to send his children to school sufficiently clothed and adequately fed, you would either reduce his slender resources by the imposition of a fine, or deprive his family of support by sending him to prison.

R. It is a difficult problem.

T. Extremely so; and I think you will agree that, in compelling the parent to send his child to school, the State places itself under the obligation to adopt measures—when the parent fails to do so—of securing its physical health and well-being. Unless this preliminary condition is secured, the cultivation of a child's mental capacities is less profitable, and much more harmful, than attempting to extract sunbeams from cucumbers.

SCHOOLBOYS AS EXCAVATORS.

THE newspapers have called attention to a remarkable display of public spirit on the part of the boys of the George Dixon Secondary School, Birmingham. One hundred and seventy boys volunteered to devote the Easter vacation to the levelling of the school playing-field. If done by contract the work would have cost the burgesses at least £200. Mr. Cleave, the second master, gave up his holidays in order to superintend the operations. Nor was he the only master who sacrificed three weeks' leisure. This fact may well be borne in mind when teachers are said to be lovers of the lotus.

About two and a-half years ago the Birmingham Education Committee leased a sports field for the school. Hitherto there had been nothing but an asphalt playground. The field was in rough condition, but the authorities could not see their way clear to make a further grant. Masters and boys set to like young colonists and turned one portion of the wilderness into a respectable arena for "Rugger." The boys developed great prowess in the game; one of them won his way to international honours in the first season.

It was in the summer days that the limitations of the field were felt. The pitch had been cut into the slope, and, with a steep ridge surrounding, had the general appearance of a large dining-table. Players were handicapped, and cricket degenerated into a kind of parlour game. The boys decreed that the embankment should go. The obstinate nature of the subsoil, which is of bastard marl, made the task meet for Hercules. There was the question of drainage, but it was seen to under the guidance of the masters. Mr. A. H. Angus, the Head Master, and Mr. Cleave have explained that the planning of details proved to be of high educational value. It amounted to lessons in practical surveying. Estimates as to the quantity of soil to be removed and the most efficient means to adopt were worked out as part and parcel of the class lessons.

The Education Committee engaged an expert at a cost of £50. His sole part was to strip off the turf and relay it; the boys saw to the rest. They worked in relays of four—two "upper" and two "lower"—school boys—every day save Sunday throughout the whole Easter vacation of three weeks. The first "shift" began at 9.30 and continued until 12.30 midday; the next was from 1.30 to tea interval at 4 o'clock; then from 4.30 to 7 in the evening. The implements for the work were borrowed. The Harborne Industrial School near by provided a dozen wheelbarrows. Several of the George Dixon boys have fathers who are connected with the building trade, and from these the planks to make barrow railroads were importuned. Spades and pickaxes were loaned by a score of homes.

Mr. Cleave did not attempt to conceal the stubborn nature of the task, but he is proud of the response of the school—a response so eager as to leave no doubts of a successful issue. Mr. Angus and he made it quite clear that the work was purely voluntary on the part of the boys. It was a labour of love. The experiment may well turn out to be one of the most significant of recent times. Mr. J. L. Paton knows the value of the spade as a means of education; he, with many another educationist, will hear of the scheme with more than usual interest.

CONGRESS OF THE UNIVERSITIES OF THE EMPIRE.

THE following is the final official program of the Conference, with the names of Chairmen and readers of papers:—

Tuesday, July 2.

10 a.m.—Chairman, the Right Hon. the Earl of Rosebery and Midlothian, K.G., K.T., D.C.L., LL.D., Chancellor of the Universities of London and Glasgow, and Lord Rector of the University of St. Andrews, by whom the Congress will be opened. (1) Question of Division of Work and Specialization among Universities. Paper by Sir Alfred Hopkinson, Vice-Chancellor of the Victoria University of Manchester. (2) Inter-University Arrangements for Post-graduate and Research Students, including the questions of Reciprocal Recognition of Courses for Post-graduate Degrees, Co-operation in Post-graduate Courses and Specialization in Post-graduate Courses along special lines among Universities. Paper by Principal Peterson, McGill University of Montreal.

Wednesday, July 3.

10 a.m.—Chairman, the Right Hon. the Earl Curzon of Kedleston, G.C.S.I., G.C.I.E., D.C.L., LL.D., Chancellor of the University of Oxford. (1) The relation of Universities to Technical and Professional Education and to Education for the Public Services. Papers by Prof. A. Smithells, University of Leeds, and Mr. Stanley Leathes, C.B., First Civil Service Commissioner. (2) Interchange of University teachers; conditions of interchange. Paper by Dr. J. W. Barrett, University of Melbourne.

3 p.m.—Chairman, the Right Hon. A. J. Balfour, D.C.L., LL.D., M.P., Chancellor of the University of Edinburgh. (1) The problem of Universities in the East in regard to their influence on character and moral ideals. Papers by Sir Frederick Lugard, G.C.M.G., C.B., D.S.O., late Governor of Hong-Kong and Chancellor of the University of Hong-Kong, and Dr. J. C. R. Ewing, Vice-Chancellor of Punjab University. (2) Residential facilities, including colleges and hostels, in connexion with Universities. Paper by Mr. E. B. Sargant, Member of the Royal Commission on University Education in London.

Thursday, July 4.

10 a.m.—Chairman, the Right Hon. Lord Rayleigh, O.M., Sc.D., D.C.L., late P.R.S., Chancellor of the University of Cambridge. (1) Conditions of entrance to Universities and the possibility of equivalence and mutual recognition of entrance tests to Degree courses. Paper by Mr. P. E. Matheson, Oxford Secretary of the Oxford and Cambridge Schools Examination Board. (2) Action of Universities in relation to the after-careers of their students. Papers by Mr. H. A. Roberts, Secretary of the Cambridge Appointments Board, and Miss M. G. Spencer, Secretary of the Central Bureau for the Employment of Women.

3 p.m.—Chairman, the Right Hon. the Viscount Haldane, D.C.L., LL.D., K.C., Chancellor of the University of Bristol. Provision of courses of study and examinations for other than Degree students, including University Extension and Tutorial Class work and specialized courses both of a general and technical character for students engaged in professional, commercial, and industrial pursuits. Papers by Mr. J. A. R. Marriott, Secretary of the Oxford University Extension Delegacy, and Rev. D. H. S. Cranage, Secretary of the Cambridge University Extension Syndicate.

Friday, July 5.

10 a.m.—Chairman, the Right Hon. Lord Strathcona and Mount Royal, G.C.M.G., G.C.V.O., D.C.L., LL.D., Chancellor of the Universities of Aberdeen and McGill. (1) The establishment of a Central Bureau; its constitution and functions. Paper by Dr. G. R. Parkin, C.M.G., Organizing Secretary of the Rhodes Scholarship Trust. (2) The position of women in Universities. Paper by Miss H. M. White, Principal of Alexandra College, Dublin. (3) Representation of Teachers and Graduates on the Governing Body of a University. Paper by Sir James Donaldson, Vice-Chancellor and Principal of the University of St. Andrews.

The following is the provisional list of entertainments offered to members of the Conference:—

July 1.—British Academy, the Shakespeare Lecture by Dr. A. C. Bradley.

July 2.—Luncheon to Delegates at the Hotel Cecil by invitation of H.M. Government.

(Continued on page 380.)

IMPORTANT NOTICE

Mr. Heinemann wishes to call the attention of all engaged or interested in Education to his epoch-making publication—

THE MONTESSORI METHOD of Child Education.

By MARIA MONTESSORI. Illustrated. Crown 8vo, 7s. 6d. net.

After sixteen years of observation and experiment, Maria Montessori, the celebrated Italian physician and teacher, has evolved a method for the training of small children, which has been nationally adopted in Italy and Switzerland. In the slums of Rome she has established "Houses of Childhood," conceded by those who have seen them to be the model schoolrooms of the world.

The Journal of Education says: "A great body of intelligent, alert teachers in this country will find in the book a treasure-trove of wisdom and a manual of education. Never before has such a combination of genius, inheritance, training, and experience been united as in this woman."

Mr. HEINEMANN'S NEW SCHOOL BOOKS.

A BUSINESS READER FOR TOP CLASSES.
ELEMENTARY BUSINESS TRAINING.

By VICTOR H. ALLEMANDY. Crown 8vo, 1s. 6d.

THE MOST INTERESTING OF SCHOOL BOOKS.
EXPERIMENTAL DOMESTIC SCIENCE.

By R. H. JONES, M.Sc., F.C.S. Crown 8vo, 2s. 6d.

THE IDEAL SCHOOL READER.

SHACKLETON IN THE ANTARCTIC.

By Sir E. SHACKLETON, C.V.O.

(255 Pages. 47 Chapters. 50 Full-page Photographs. Clearly printed on good paper. Strongly bound. Crown 8vo.)
[JUST ADDED TO THE L.C.C. REQUISITION LIST.]

WM. HEINEMANN, 21 BEDFORD STREET, LONDON, W.C.

MR. MURRAY'S NEW BOOKS.

The special attention of all interested in new methods of teaching English is called to the two following books, which possess the merit of having been thoroughly tested in class before publication. Price 1s. 6d. each.

ENGLISH GRAMMAR.

For Junior Forms. By R. B. MORGAN, M.Litt., Whitgift School, Croydon. 1s. 6d.

As the author is convinced that the teaching of Grammar is largely a matter for the teacher and the blackboard, he has endeavoured to reduce all explanatory matter to a minimum. The exercises are drawn from the literature that most boys are familiar with, and in the early parts of the book the author has not hesitated to use for this purpose the Nursery Rhymes, "Alice in Wonderland," and similar literature. Most of the exercises are intended to be done orally, an exception being the constructive exercises at the end of each group. The terminology employed throughout the book is that recommended by the Joint Committee on Grammatical Terminology.

ENGLISH COMPOSITION.

For Junior Forms. By E. E. KITCHENER, M.A., Whitgift School, Croydon. 1s. 6d.

In this book the mother tongue is treated as a living and spoken language. It aims at developing the power of connected thought clearly and readily in speech and writing. This is worked out by means of synthetic and analytic exercises on sentence construction leading up to the ordinary rules of composition. Special attention has been given to punctuation and to repetition of *prose* passages, and a large amount of oral practice is included.

MATTER, FORM, AND STYLE.

A Manual of Practice in English Written Composition. By HARDRESS O'GRADY, Lecturer at Goldsmith's College. 2s.

A New Work by C. R. L. FLETCHER.

THE MAKING OF WESTERN EUROPE.

Being an attempt to trace the fortunes of the Children of the Roman Empire. By C. R. L. FLETCHER, sometime Fellow of All Souls and Magdalen Colleges, Oxford. With Maps. Demy 8vo. **The Dark Ages.** 300-1000 A.D. 7s. 6d. net.

Spectator.—"Mr. C. R. L. Fletcher gives us here the first volume of his attempt to trace the fortunes of the children of the Roman Empire. It is written in his highly individual, informal, and airy manner, which has already won a large following of delighted readers. . . . If ever there was a period which requires a process of simplification in order to make history intelligible or readable for ordinary brains, that period is the dark ages in Europe. The way in which Mr. Fletcher threads his way through the mazes of the divided and continually decaying Roman Empire is masterly. . . . We must repeat that what Mr. Fletcher has actually done is a wonder of lucidity."

ELEMENTARY GEOMETRY.

By A. E. LAYNG, M.A., late Head Master of Stafford Grammar School. Part I, 1s. 6d.; Part II, 1s. 6d.; Complete, 3s. Teachers' Edition, with Answers, 3s. 6d.

As regards the fundamental part, this book follows the lines indicated in the Circular on the Teaching of Geometry issued by the Board of Education in 1909.

The Theorems and Constructions enunciated in the Syllabus on Elementary Geometry issued by Cambridge University constitute the "book-work."

The order in which theorems are placed has been chosen with the view of grouping together, as far as possible, closely allied theorems: for instance, the three fundamental theorems relating to congruent triangles. Among the exercises are included nearly all the questions set in the Cambridge Local Examinations during the last eight years.

LIMEN.

A First Latin Book. By W. C. F. WALTERS, M.A., Professor of Classical Literature in King's College, London; and R. S. CONWAY, Litt.D., Professor of Latin in the University of Manchester. Third Revised Edition. 2s. 6d. Also in Two Parts, 1s. 6d. each.

ANTE LIMEN.

An Introduction to "Limen." Compiled under the Guidance of Professors WALTERS and CONWAY, by Miss R. H. REES, B.A. 1s. 6d.

Ante Limen has been written in response to requests received from teachers who are using *Limen* and approve of its methods, but desire as well a book suitable for younger beginners. The lines of the parent book have been closely followed, though the arrangement is different: the Reading lessons, Exercises, and Vocabularies have been arranged in three parallel divisions. The oral method is employed from the start, and the simple nature of the earliest questions ought to disarm any teacher who is diffident about his powers of using it.

"CLARI ROMANI" SERIES.

General Editor: W. L. PAINE, M.A.

"These books form an admirable idea. . . . The series is a distinct step in advance, and we hope soon to be in at the death of the common type of annotated school book."—SCHOOL WORLD.

1s. 6d. each.

AGRICOLA. By W. L. PAINE, M.A.

METELLUS AND MARIUS (Jugurthine War).

By A. J. SCHOOLING, M.A., Liverpool Institute.

JULIUS CAESAR.

By H. J. DAKERS, M.A., Manchester Grammar School.

CAMILLUS.

By C. H. BROADBENT, B.A., Bradford Grammar School.

AEMILIUS PAULUS.

By F. R. DALE, B.A., Leeds Grammar School.

AUGUSTUS.

By A. J. SPILSBURY, M.A., City of London School.

• *Easier Texts.*

JOHN MURRAY, ALBEMARLE STREET, LONDON, W.

July 2.—London School of Medicine for Women. At Home 4.30 to 6.

July 2.—Reception of Delegates by H.R.H. Prince Arthur of Connaught, and Conversazione at University of London.

July 3.—Dinners to Delegates from Overseas, Company of Fishmongers, Merchant Taylors, Clothworkers, Mrs. Sargent At Home, Claridge's Hotel.

July 4.—The Lord Mayor At Home, Mansion House.

July 5.—Earl Beauchamp At Home, Belgrave Square.

COLONIAL AND FOREIGN NOTES.

FRANCE.

The Vicar of Wakefield, it will be remembered, held "that the honest man who married and brought up a large family did more service than he who continued single, and only talked of population." The late M. Malouet respected teachers who begot children as well as instructed them more than those who practised their pedagogy solely on the offspring of others. Accordingly, by his will, he founded a prize, worth 3,000 francs, for the secondary teacher, having at least four children, who by his professional merit—whether of the scientific or the literary order—and by his devotion to his family should deserve a mark of public esteem. To weigh these three elements—professional merit, domestic virtue, and prolificacy—was an embarrassing task for the judges. They found many admirable teachers, faithful to the hearth, and in the Académie de Paris alone there were more than a hundred with from four to eight children. Ultimately they pronounced in favour of M. Chanzy, teacher of mathematics in the *lycée* of Nancy. Born in 1867, he is only forty-four. After a successful career as student and teacher, he was entrusted at Nancy with the class of students preparing for Saint-Cyr, and with his help three hundred candidates have been passed into the famous military school within twenty years. But it was his family that turned the scale in his favour: he has had fourteen children, of whom twelve are still alive, the

Le prix Malouet—
First Award.

eldest twenty years of age, the youngest four. His life a daily miracle of self-denial, he, the son of a basket-maker and without private fortune, has provided for his brood with exemplary care and affection.

France continues to deplore a certain decline of general culture, ascribed to the scientific tendency of the new education. It is the *baccalauréat* examination, which opens the gates of the University, that is now pointed to as revealing the weakness. The

reports of the Deans of Faculties in the Universities are plaintive. M. Legras, Dean of the Faculty of Letters at Dijon, terms the *baccalauréat* the single dike placed at the entrance to higher education, and laments that under the form of equivalents terrible breaches have been made in it. What strikes examiners most is the *passivity* of the candidates. "Il semble," writes M. Ducros, Faculty Dean of Aix, "qu'entre l'élève et les choses il y ait comme un écran, je ne sais qu'elle nuée de mots appris, de faits épars et opaques." Even in philosophy there is no reflection, no care for composition or logic, hardly any attempt at argument or discussion. "Tout se passe dans un brouillard, au pays des paroles gelées de Rabelais." The result of overloading time-tables, of demanding from the young an ever-increasing mass of positive knowledge, of initiating unripe minds into technical methods, has been in many cases to oppress the intelligence and to make the learner merely *passive*. In writing from dictation," says M. Legras, candidates will put without thought "*épancher* sa soif," or "*Napoléon au paroxysme de la gloire*"; in essays they confound *autant* and *au temps*, *par* and *part*. Again, their general knowledge is small. Some of them have never heard of the Three Kings from the East; some are puzzled by a mention of Goliath, Ceres, or Vulcan. Spinoza has been described by a commencing philosopher in the *baccalauréat* examination as a learned Italian.

We relate these things not to disparage French schools, which are in many respects admirable, but to console English teachers for their own failures. The "howler" is a weed that grows in every soil. Moreover, the experience of France has its lesson for us. Recognizing freely the claims of science in the field of education, we must, nevertheless, cling fast to literature, which is as needful in

Their
Lesson.

(Continued on page 382.)

The Best Books Bound in Beautiful Bindings.

THE CHOICE of BOOKS FOR REWARDS

has in the past been a difficult matter, but the **NEW CATALOGUE of BOOKS Bound in Leather and Fancy Bindings,**

just issued by the E.S.A. makes

the selection of Books for any given subject both easy and safe.

Only Books of undoubted excellence and of good taste by

STANDARD AND MODERN AUTHORS

are included in the Catalogue.

The Books are catalogued in order of price under their respective bindings, so that a selection of a book bound in any particular binding at a given price can be easily made.

Over 5000 Volumes in Stock at Prices ranging from 1s. 6d. to £5. 12s. 6d. each.

A selection of Rewards for every requirement is thus provided for.

THE NEW CATALOGUE OF REWARDS,

which contains carefully selected Editions of Books in the best styles of bindings, has the following notable features:—

It is the most comprehensive of its kind.

It contains a choice selection of Books in every branch of Literature, including Biography, Travel, Romance, History, Poetry, Adventure, Sciences, Essays, Belles Lettres, Fairy Tales, Natural History, &c., &c.

It contains the largest assortment of Bindings,

including Books bound in Full Morocco, Full-Calf, Tree Calf, Victorian Calf, Antique Calf, Padded Paste Grain, Paste Grain, Half Morocco, Half Calf, Quarter Vellum, French Morocco, &c., &c.

A Catalogue of Books in Cloth Bindings

is also published.

Both Catalogues will be sent free on application to

THE EDUCATIONAL SUPPLY ASSOCIATION, LTD., Stevenage House, 40-44 Holborn Viaduct, London, E.C.

BLACKIE & SON'S LIST

A "REGULAR" LATIN BOOK.

For Beginners. With terminations printed in red. By **R. A. A. BERESFORD, M.A.**, Head Master of Lydkate House Preparatory School, Hunstanton. **1s. 6d.**

A GREEK BOY AT HOME.

An original Greek story specially written for use with Rouse's "First Greek Course." By **W. H. D. ROUSE, Litt.D.**, Head Master of the Perse School, Cambridge. Crown 8vo, cloth, price **3s. 6d.** net.
N.B.—This book is in use at Eton.

A FIRST LATIN GRAMMAR.

By **E. H. SCOTT, B.A.**, Late Head Master of Boys' Secondary School, Barberton, Transvaal; and **FRANK JONES, B.A.**, Assistant Master, King Edward's School, Aston, Birmingham. Crown 8vo, cloth, **2s.**

A LATIN COURSE.

By **E. H. SCOTT, B.A.**, and **FRANK JONES.**
First Course, cloth, **1s. 6d.** Second Course, cloth, Illustrated, **2s. 6d.**

BLACKIE'S LONGER FRENCH TEXTS

From Modern French Literature. Printed in large clear type, with Brief Notes, Exercises, Phrase-list, and Vocabulary. Fcap. 8vo, **8d.** each.

Daudet—Le Petit Chose à l'École. Edited by F. W. M. DRAPER, B.A., B.-es-L., Assistant Master, City of London School.

Hugo—Durande et Déruchette (Travailleurs de la Mer). Edited by A. SAYLE, B.A.

Baudelaire—Le Scarabée d'Or. Edited by W. W. M'KECHNIE, M.A., Examiner in French to the University of St. Andrews.

Deslys—Le Mensonge d'un Ami. Edited by F. W. ODGERS, M.A., Royal Naval College, Osborne.

Modier—Contes de la Veillée. Edited by C. G. HOLLAND, M.A., Chief Modern Language Master, Sevenoaks School.

Complete List of the Series on application.

BLACKIE'S LITTLE FRENCH CLASSICS

Representing all important French authors from Montaigne to Bourget. Fcap. 8vo, **4d.** each.

Carnoy—Les Deux Bossus. Edited by ÉMILE B. LE FRANÇOIS.

Lamartine—Souvenirs d'Enfance et de Jeunesse. Edited by ERNEST WEEKLEY, M.A.

Daudet—Le Petit Chose vient à Paris. Edited by TAYLOR DYSON, B.A., Assistant Master, Nottingham High School.

Dumas—Napoleon à l'Île d'Elbe. Edited by CLÉMENTINE SAUNOIS.

Galland—Quatre Voyages de Sindbad le Marin. Edited by W. G. ETHURIDGE, M.A., Assistant Master, Westminster School.

Complete List of the Series on application.

A NEW FRENCH COURSE ON MODERN LINES.

AN INTERMEDIATE FRENCH COURSE.

Part I.—By JAMES M. MOORE, M.A., and JAMES DONALDSON, M.A., Assistant French Master, Royal High School, Edinburgh. **1s.** net. Dealing with the Article, Noun, Adjective, the Indicative of the Regular Verb, with a few Irregular Verbs.

Part II.—By JAMES M. MOORE, M.A., and JAMES DONALDSON, M.A., **1s. 6d.** net. With Grammatical Appendix, **2s.** net.

Part III.—By JAMES M. MOORE, M.A., and JOHN SLIGHT, M.A., French Master, Boroughmuir Higher Grade School, Edinburgh. **1s. 6d.** net. With Grammatical Appendix, **2s.** net.

A short *résumé* of the essentials of French Grammar and Syntax, with a developed course in the construction of French Verbs.

BLACKIE'S ENGLISH TEXTS.

6d. each. Blue limp cloth covers. Over 100 Volumes. To be used in correlation with the study of **English Literature and History.**

THE WARWICK SHAKESPEARE.

Edited by **Prof. HERFORD, Litt.D.** The best and most widely used edition of Shakespeare for School purposes. Price **1s.** and **1s. 6d.**

THE PLAIN-TEXT SHAKESPEARE.

THE GREATER PLAYS. TEXT ONLY. NO NOTES. Strongly bound in cloth. Price **4d.** each.

A New Edition of the greater Plays of Shakespeare, presented in a serviceable form, at a cheap price. The text follows the well-known **Junior School Shakespeare**, which omits everything that might be thought undesirable in class reading.

The Merchant of Venice.
Julius Caesar.
As You Like It.
King Henry V.

Coriolanus.
King Richard II.
King Richard III.
The Tempest.

Twelfth Night.
Hamlet.
King Henry VIII.
King John.

Macbeth.
King Lear.
Midsommer Night's Dream.

The above Plays may also be had in the **Junior School Shakespeare**, with Notes, price **8d.** or **10d.** each.

A GENERAL TEXT-BOOK of ELEMENTARY ALGEBRA.

By **A. E. LAYNG, M.A.**, late Head Master of Stafford Grammar School; formerly Scholar of Sidney Sussex College, Cambridge; Author of "Layng's Arithmetic," "Layng's Euclid," &c.

With or without Answers. 530 pp. Crown 8vo, **4s. 8d.**

This work is intended for students who have already studied the easiest portions of a course in Algebra for a year or so, and provides all that is required for a complete school course.

N.B.—At the suggestion of a large number of influential teachers, this Algebra is now also issued in Two Parts (with Answers), at **2s. 6d.** each, to be obtained separately.

Exercises only:—Exercises to Book I. **1s.** With Answers, **1s. 6d.** Exercises to Book II. **1s. 6d.** With Answers, **2s.**

Prospectuses giving full particulars of above books will be sent post free on application.

the developing of the mind as for the adornment of life. Not wisely should we desert the Muses for the sake of the herbarium and the test-tube.

GERMANY.

Indicative of progress in Germany is the organization at Köln of the Hochschule für kommunale und soziale Verwaltung as a separate department of the *Handelshochschule*. Its province is the Administration of Local Communities and of Societies in general; its teachers are drawn from the world of practice as well as from among the students of theory. A few of the lecture-subjects for the first term (which began on April 18) will show the range of instruction:—Office Practice in Local Communities (*Gemeinden*), Communal Law in relation to Public Officials, Introduction to Finance, Administration in the Colonies, the Law relating to Embassies and Consulates, Social Hygiene, Introduction to Political Economy, Statistics of Administration in large and small Communities, Insurance. The chief object in view is to provide well trained officials for local communities, for private societies, and for insurance departments. The new Insurance Act will, in 1913, require for its administration some thousand *Versicherungsamtänner* (insurance officials). Perhaps Mr. Lloyd George should have prepared the way for his insurance scheme by promoting the foundation of a *Verwaltungshochschule*.

The journals have lately been reporting an unusually large number of suicides among schoolboys. How far the school or the teacher was responsible in any given instance it is hard to determine. We should always like to hear *in camera* the evidence of the family doctor. Meanwhile the view of these matters taken by the outside public is shown from a passage in Lily Braun's "Die Emanzipation der Kinder." There was a boy, "der jugendstark dem Leben entgegengestürmt war"—who in the strength of youth was eager for the battle of life. The teacher, in front of the class, flung an angry word at him. "Das brannte auf seiner Wange, als wär's ein Peitschenhieb"—his cheek flushed as if he had received a cut from a whip. He was only fifteen years old, but his sense of honour was keen as a man's. To escape from the torture of his shame, he shot himself. The rebuke would indeed be strong that drove a

healthy English boy to seek relief in that form! A Magdeburg Court of Law has just settled a case with a special feature. The pupil of a Realgymnasium, feeling himself aggrieved, *wounded his teacher dangerously with shots from a revolver* before attempting to commit suicide. He goes to prison for four years. We, of course, blame the young rascal; but he hit on the true means of interesting pedagogic circles in the whole subject.

According to the official figures, there are now in Prussia 4,588 country continuation schools (*ländliche Fortbildungsschulen*). Of these, 2,913 have been established by the Communes (*Gemeinden*), 1,457 by private persons, 172 by the Circles (*Kreise*), and 46 by agricultural societies. In the case of 5,929 schools the State shares the cost. The Circles pay the expense of 22 schools, the Communes of 14, the State alone of 1,439 and private persons of 148. Six schools are self-supporting. The total cash expenditure (apart from rent and maintenance of buildings) is set down at 735,608 M., of which sum only 35,313 M. is covered by school fees. The total number of the pupils is 72,796; that of the teachers, 6,518. Among the teachers are 271 clergymen, 3 special instructors in agriculture, 6,193 primary teachers, 151 farmers, veterinary surgeons, &c. The reader will observe the large proportion of teachers drawn from the primary school (*Volksschule*). In 3,049 schools there is only one teacher.

HOLLAND.

The public schools in Holland may be described, in the received jargon, as "omnidominational"; religious instruction is given in them; but the children may not be separated according to confessions. Sectarian schools, in which religious instruction of more colour is imparted, have been founded numerously. Whilst the State places no obstacle in the way of such foundations, it regards them simply as private schools; they may attract many pupils and relieve the public purse of great expenditure, yet they can make no claim for support upon the State or the local community. Devout Catholics and Protestants complain that they have a double burden to bear: they must pay for the public and for their own schools. It is proposed to change the situation by means of a law that

JUST WHAT ALL TEACHERS HAVE BEEN WANTING!

A TREASURY OF POEMS

BEING

A Book of Verse for Boys and Girls.

Collected and Arranged by G. E. WILKINSON,
Lecturer in English Language and Literature at the City of Leeds Training College.

Crown 8vo, 176 pages, full cloth, net 1s. 3d. (postage 3d. extra).
Cloth back, paper boards, net 1s. (postage 3d. extra).

All the poems included are such as children can understand and appreciate. An attempt has been made to graduate the poems approximately in order of suitability to the increasing age of the children, the shorter and simpler ones being placed first. The book contains many poems suitable for infants.

A short but excellent introduction gives valuable Hints to Teachers on the best way of dealing with poetry.

LONDON: WILLIAM RICE, 3 BROADWAY, LUDGATE HILL, E.C.

private schools, as soon as they have a certain number of pupils, may demand a proportionate grant-in-aid. At a great meeting of Catholics, under the presidency of Deputy Baron van Wynbergen, a resolution to this effect was carried, and, as there is a Conservative majority in both Houses of Parliament, it is hoped that the desired Act may be passed. It is all very interesting and familiar, is it not? Holland seems about to follow England into the Sloughs of Religious Difficulty.

UNITED STATES.

The conscientious examiner of written work is always fearful that he may not have done exact justice to the candidates whose merits he has been testing. It is so hard to penetrate individuality through a manuscript. An American story furnishes at once an admonition to teachers and balm to examiners. Some teachers were urgent that promotion in schools should depend on an impartial estimate of written work. A Superintendent caused an unknown boy's answers to an arithmetic paper to be copied, and submitted them for judgment to the teachers themselves. The marks of 150 teachers ranged from 29 to 88 per cent. Indignant at their own divergence, they urged that *they ought to have known the boy before they marked his papers*. It is just this illumination that the outside examiner lacks.

In England professorships sometimes take the place of old-age pensions. Our kinsmen in the United States are enabled, be it by Mr. Carnegie or Mr. Rockefeller, to get rid of effete University teachers. Under the new pension law at the University of Chicago, any professor or assistant professor, if of fifteen years' standing, may retire at sixty-five, or may be retired by the trustees on a pension based on length of service. It must not, however, be less than 40 per cent. nor more than 60 per cent. of the annual salary. According to an estimate, the average cost of this plan will be 100,000 dollars. To defray it, 2,000,000 dollars will be set aside from Mr. Rockefeller's latest endowment of 10,000,000 dollars. We are almost persuaded that millionaires have their use.

We have written about the passing of the New York law (October 30, 1911), under which women teachers are to receive the same salaries as men. The effect may be stated briefly. In the grades

where formerly men received 2,400 dollars and women 1,500 dollars, men and women will receive 1,850 dollars, except that the men in such positions at the date of the passage of the Act will continue to receive the higher salary. In the high schools, men and women alike go to a maximum of 3,150 dollars, and in elementary-school principalships the maximum for both men and women is 3,500 dollars. For the argument that the State, in thus paying 1,850 dollars for a woman teacher who has hitherto been got in the labour market for 1,500 dollars, is committing a dangerous economic blunder, we have no ears. Is it a dangerous economic blunder to pay five shillings a day to a miner because men have been found to take their lives in their hands for less?

By "home-work" we mean the tasks, viewed with more or less favour by parents, which the school requires to be done at home. At Ontario, Oregon, they have conceived "home-work" in a new light, illuminative of modern tendencies in the United States.

The home must share with the school the responsibility of converting boys and girls into useful men and women. Every child has some domestic duties, "chores," and the like, to do; the parent must report to the school with what skill and diligence these are discharged. "Home-work cards" have been prepared on which father and mother, each in the proper department, mark E (excellent), G (good), F (fair), or P (poor) against the various "subjects," grouped thus:—(a) sewing and mending, bread making, general cooking, setting and serving table, washing and wiping dishes, washing and ironing; (b) sweeping and making beds, mopping and care of kitchen, care of younger children, making fires, getting water, coal, kindling, &c.; (c) feeding stock and poultry, milking cows, barn or yard work, garden or field work, errands; (d) cheerfulness, kindness; (e) order and care of clothes, cleanliness, bathing, &c., table manners, politeness; (f) keeping temper, doing before told; (g) modesty of language—at home, in the streets; (h) courtesy to parents, kindness to animals, care of playthings; (i) home study, ambition to succeed. English teachers in day schools will see what they must expect in the near future. Children will arrive in the morning with cards marked "Maud was weak in her dusting, but took her bath calmly," or "Tommy accepted a rebuke with patience, but flatly refused to milk a cow." Yet behind all this there is a great and deep idea.

GEORGE TOWNSEND WARNER, M.A.,

Sometime Fellow of Jesus College, Cambridge; Master of the Modern Side in Harrow School; Author of "A Brief Survey of British History," &c.

AND

C. H. K. MARTEN, M.A.,

Balliol College, Oxford; Assistant Master at Eton College.

With Maps, Time Charts, and full Index.

764 pp., super-crown 8vo, 6s. Also in Two Parts, 3s. 6d. each.

"It is to be hoped that this book will be widely used in the upper and middle classes of our schools. The want of a good school history on a level with modern standards of historical knowledge and educational method is a very real want indeed."—*Morning Post*.

LANDMARKS OF EUROPEAN HISTORY.

By **E. H. M'DOUGALL, M.A. (Oxon.)**, late Professor of History and English, Elphinstone College, Bombay. With many Coloured and Sketch Maps, Index, &c. **3s. 6d.**

HEROES OF THE EUROPEAN NATIONS.

From Early Greece to Waterloo. By **A. R. HOPE MONCRIEFF**. **1s. 6d.**

LANDMARKS IN ENGLISH INDUSTRIAL HISTORY.

By **G. TOWNSEND WARNER, M.A.**, sometime Fellow of Jesus College, Cambridge, Master of the Modern Side in Harrow School. **5s.**

READINGS IN ENGLISH HISTORY.

From Original Sources. Edited by **R. B. MORGAN, B.Litt.**, and **E. J. BALLEY, B.A.** Illustrated. Vol. I, B.C. 54 to A.D. 1154, **2s.** Vol. II, 1154 to 1485, **2s. 6d.** Vol. III, 1485 to 1688, **2s. 6d.** Vol. IV, 1688 to 1837, **2s. 6d.**

A BRIEF SURVEY OF EUROPEAN HISTORY.

A General Sketch of European History from Charlemagne to the present time. By **ARTHUR HASSALL, M.A.**, Student and Tutor of Christ Church, Oxford. **4s. 6d.**

"Mr. Hassall's book is a good piece of work."—*The Journal of Education*.

A BRIEF SURVEY OF BRITISH HISTORY.

By **G. TOWNSEND WARNER, M.A.**, Master of the Modern Side in Harrow School. With Tables, Summaries, Maps, Notes, &c. **1s. 6d.** Synopsis, **6d.**

BLACKIE'S CAUSAL GEOGRAPHIES.

REGIONALLY TREATED.

By **H. J. SNAPE, M.A.**, Senior English Master, King Edward VII's School, Sheffield.

Now Ready. **EUROPE.** Price **2s.**

GEOGRAPHY. Structural—Physical—Comparative. A TEXT-BOOK FOR ADVANCED STUDENTS.

By **J. W. GREGORY, D.Sc., F.R.S.**, Professor of Geology in Glasgow University.
With an entirely new Series of 22 Coloured Maps. **6s. net.**

THE STUDY OF PLANT LIFE FOR YOUNG PEOPLE.

By **MARIE C. STOPES, D.Sc.**, &c.
Second Edition, fully Illustrated. Price **3s. 6d.**

A NEW ENGLISH COURSE ON MODERN LINES.

A FIRST ENGLISH COURSE.

By **FRANK JONES, B.A.**, Assistant Master, King Edward's School, Aston, Birmingham; Lecturer in English at the Birmingham and Midland Institute; Joint Author of Scott and Jones's "Latin Course." Crown 8vo, cloth, **2s. 6d.**

FIRST ENGLISH EXERCISES.

By **FRANK JONES, B.A.**, Assistant Master, King Edward's School, Aston, Birmingham; Lecturer in English at the Birmingham and Midland Institute; Joint Author of Scott and Jones's "Latin Course." **1s. 6d.**

Reprinted from "A First English Course." For class use where the master prefers to give the grammatical exposition orally.

LETTERS OF GREAT WRITERS.

From the time of Spenser to the time of Wordsworth. Edited by the **Rev. HEDLEY Y. TAYLOR, B.A., M.A.**, Lecturer in English Literature to the Huguenot College, Wellington; sometime Examiner in English Literature to the University of the Cape of Good Hope. **4s. 6d. net.**
This volume contains 128 letters spread over three centuries. The letters are from some fifty different writers, some contributing upwards of a dozen letters, others only one or two. The editor provides introduction and full notes and the volume is handsomely produced.

WORDS: THEIR ORIGIN AND USE.

A Correlated Scheme of Spelling, Derivation, Reading, Dictation, and Composition. By **F. W. CHAMBERS** and **A. J. KER**. In Two Books, each with a companion Teachers' Book. **8d. each.** Teachers' Books, **1s. net each.**

A PREPARATORY COURSE OF LITERARY READING AND COMPOSITION.

Illustrated from Famous Paintings. Edited and arranged by **LEWIS MARSH, M.A.**, Assistant Master in the City of London School. Crown 8vo, cloth, **1s. 6d.**

COMBINED COURSE OF LITERARY READING AND COMPOSITION.

Illustrated from Famous Paintings. Edited by **LEWIS MARSH, M.A.** Carefully chosen Readings from English Literature, with Graded Exercises, forming a Complete Course of Instruction in English. **2s.**

Write for full particulars to **BLACKIE & SON, Ltd., 50 Old Bailey, E.C.**

CAMBRIDGE LOCAL EXAMINATIONS.

SPECIAL SUBJECTS FOR 1913.

The following list of publications issued by the University Tutorial Press gives Editions of works specially prescribed for the Cambridge Senior and Junior Local Examinations in 1913, and other works dealing with special subjects.

S. denotes Senior Examination, **J.** denotes Junior.

RELIGIOUS KNOWLEDGE.

- (S, J.) **Acts of the Apostles, Ch. I-XVI.** By Rev. W. H. FLECKER, M.A., D.C.L. 1s. 8d.
 (S, J.) **Gospel of St. Mark.** By Rev. T. WALKER, M.A., and J. W. SHUKER, M.A. 1s. 8d.

ENGLISH LITERATURE.

- (S.) **Chaucer.—Knight's Tale, with the Prologue to the Canterbury Tales.** By A. J. WYATT, M.A. 2s. 6d.
 (S, J.) **Milton.—Comus.** By S. E. GOGGIN, M.A., and A. F. WATT, M.A. 1s. Ready June.
 (J.) **Scott.—Marmion.** By F. ALLEN, B.A. 1s. 8d. Ready June.
 (S.) **Shakespeare.—As You Like It.** By A. R. WEEKES, M.A. 2s.
 (J.) **Shakespeare.—As You Like It.** By A. R. WEEKES, M.A., and F. J. FIELDEN, M.A. 1s. 4d. Ready June. [Junior Shakespeare.
 (S.) **Shakespeare.—Hamlet. Macbeth.** By S. E. GOGGIN, M.A. 2s. each.
 (J.) **Shakespeare.—Macbeth.** By S. E. GOGGIN, M.A. 1s. 4d. Ready June. Junior Shakespeare.

GEOGRAPHY.

- (S.) **Senior Geography, 1913.** Including Principles of Physical Geography, The British Isles, and Europe. By G. C. FRY, M.Sc. 2s. 6d. Ready July.
 (J.) **Junior Geography for 1913.** By G. C. FRY, M.Sc. Covering the Syllabus for 1913. 2s. Ready July.

LATIN.

- (J.) **Caesar.—Gallic War, Book IV, Ch. 20 to Book V, Ch. 23.** By LL. M. PENN, M.A. 1s.* (School Latin Classics.) Ready June.
 (S.) **Caesar.—Gallic War, Books IV & V.** By A. H. ALLCROFT, M.A. 2s. 6d.* Ready June.
 (J.) **Caesar.—Gallic War, Book V, Ch. 25-58.** By LL. M. PENN, M.A. 1s.* (School Latin Classics.) Ready June.
 (S.) **Cicero.—De Senectute.** By A. H. ALLCROFT, M.A., and W. F. MASOM, M.A. 1s. 6d.*
 (S.) **Horace.—Epistles I.** By F. G. PLAISTOWE, M.A., and J. F. STOUT, B.A. With Introduction and Notes. 1s. 6d. Ready June.
 (S.) **Vergil.—Aeneid, Book VIII.** By A. H. ALLCROFT, M.A., and B. J. HAYES, M.A. 1s. 6d.*
 (J.) **Vergil.—Aeneid, Book VIII.** By J. F. RICHARDS, M.A. 1s.* (School Latin Classics.) Ready June.

* Text, with Introduction, Notes, and Complete Alphabetical Vocabulary.

Complete Catalogue of Books suitable for the Cambridge Local Junior and Senior Examinations post free on application.

THE JOURNAL OF EDUCATION.

A MONTHLY RECORD AND REVIEW.

SCALE OF CHARGES FOR ADVERTISEMENTS.

PUBLISHERS' ANNOUNCEMENTS—

Whole Page	£5 10 0	One Column (½ page)	£3 0 0
Half Column (¼ page)	1 15 0	One-Eighth Page	0 17 6
Per Inch in Column, 8/-.			

SCHOOL ANNOUNCEMENTS—

Scholarships, Official Notices, School Transfers, Partnerships, &c.—6d. per line; minimum charge, 5s.
 Posts Wanted or Vacant.—30 words for 2s.; each 10 words after, 6d.; prepaid rate.
 Lectures, Classes, Non-Resident Posts, &c.—48 words for 3s.; each 8 words after, 6d.; prepaid rate.

An extra fee of ONE SHILLING is charged on advertisements with OFFICE ADDRESS.

If a receipt is required for an advertisement under 10s., a post card or a stamped envelope must be enclosed.

[Advertisers are reminded that "Letters addressed to INITIALS or to FICTITIOUS NAMES, or to a CHRISTIAN NAME without a SURNAME," at Post Offices are not taken in, but are sent at once to the Returned Letter Office.]

All Letters respecting Advertisements and Subscriptions should be addressed—"THE PUBLISHER, THE JOURNAL OF EDUCATION OFFICE, 3 BROADWAY, LUDGATE HILL, E.C.4." Money and Postal Orders, on the Post Office, Ludgate Circus, E.C.4, should be made payable to WILLIAM RICE; Orders and Cheques may be crossed "The London City and Midland Bank, Ludgate Branch." Postage stamps can only be received at the rate of thirteen to the shilling.

Notice must be given of all remittances through the Post Office from abroad stating full name and address of the sender; and all Foreign Money Orders must be crossed for payment through a Bank.

Date of publication of next issue will be found at top left-hand corner of front page.

LONDON: WILLIAM RICE, 3 BROADWAY, LUDGATE HILL, E.C.4.

DIET IN SCHOOLS.

THE Conference on Diet in Public, Secondary, and Private Schools, which was held on May 13 at the Guildhall, had been carefully schemed and organized by a Special Committee of the National Food Reform Association, to whose energetic Secretary, Mr. Charles Hecht, public thanks are due; and though on many details, and, indeed, on some first principles, there was a wide divergence of opinion, yet if it only leads to some realization of the general conclusion prefigured by the Lord Mayor, himself a distinguished doctor, the Conference will not have met in vain. "The food," said Sir Thomas Crosby, "should be ample, simple, varied, and well cooked; and the meal hours should be fixed and regular." How few even of our great public schools at present satisfy this simple requirement!

Mr. Malim, of Haileybury College, who occupied the chair at the first session, was apologetic for his order. The public schools, he allowed, had not been immaculate in the past, but they were not so black as the newspapers painted them, and the presence of their representatives showed they were ready to learn, and their medical officers had been pioneers in food reforms. He pleaded the economic straits of school authorities, due to the rise in prices, and the difficulty of providing a variety of food for five hundred boys. He denounced the growth of high living and plain thinking, and finally he urged that boys preferred food procured or prepared by themselves. The last observation was echoed by several subsequent speakers; and the tuck shop, which at Haileybury has been authorized and, so to speak, sanctified to school uses, still found belated defenders. Contiguity may perhaps account for the qualified support of the Head Mistress of Christ's Hospital Girls' School, Hertford.

Papers were printed beforehand and taken as read. In their collected form they make a substantial pamphlet, which we advise our readers to procure for themselves.

Dr. Clement Dukes's views are too well known to need reproduction. Here he emphasizes the importance of amount. "The young are constantly stinted in one or other essential

ingredient, such as sugar or meat, at the period of life when stinting is synonymous with stunting." Under "Monotony" he writes: "I have known complaining parents invited to partake of a meal and judge for themselves, and yet be unable to condemn, for the obvious reason that the quality of a single meal was not impugned, but the obnoxious fact of an unvarying repetition." Extras of all sorts—hampers and tuck-shops—he will not away with.

Dr. Dukes does not add to his scientific virtues lucidity of expression. Witness the following sentence:—"After development is completed, the chicken being born, and when growth alone has to be sustained and promoted as exemplified in milk, which may be taken as the standard food for growth in contradistinction to development, the proportions are reversed—one-third of casein and two-thirds of carbohydrates."

Dr. Hutchison, who followed him as opener of discussion, was an admirable interpreter, and there was no mistaking his meaning. He insisted on the extreme difficulty of producing a healthy growing child on a vegetarian basis. It implied a bulky, and therefore indigestible, diet. He had little faith in scientific standards of calories, proteins, &c. The safe rule was to provide a liberal table of mixed diet and trust to the healthy appetite of the child. "Pour avoir assez il faut avoir trop." Against over-feeding at this age Nature provided sufficient remedies. As to the bearing of diet on intellectual efficiency little need be said. If the whole body were well nourished the brain would take care of itself. Most of brain substance was laid down before school age, and brain work made little demand on body weight. Special brain foods were the invention of quacks. Digestibility was of more importance than the composition of foods. The bearing of diet on moral efficiency raised the question of the physical basis of character. Except in the case of active virtues, such as physical courage and energy, no constant relation could be traced between morals and physique. We read that when Kean was playing a tyrant he used to feed on pork, but some of the most bloodthirsty, savage nations were vegetarians. The over-stimulating effects of meat at the time of puberty had been grossly exaggerated. His advice to teachers was: "Don't play about with the diet. Morals are best catered for by others than the cook."

Dr. Hutchison's challenge to the vegetarians was taken up by more than one speaker. Admiral Johnson asked how the two precepts could be reconciled—to enforce a meat diet and to trust to the appetite of children. Young children, if left to themselves, would never touch meat. Mr. Rollo Russell stated that of all emigrants who ever landed in Canada the Doukhobors, strict vegetarians, had the healthiest children; and he asked, with bitter sarcasm, whether, as the Conference had suggested that children should dig their potatoes before eating them, they should likewise kill their beef and mutton. Dr. Eger seemed to hit the *juste milieu*. In his experience some 60 to 70 per cent. of children thrive equally on either diet; of the remainder about an equal number required a meat or a vegetable diet.

Mrs. Burn, sometime Medical Officer in Wycombe Abbey School, advocated the teaching of elementary physiology and personal hygiene as a compulsory part of every school curriculum. The subject is too thorny to be here discussed. We can only call attention to the elaborate syllabus of lessons appended to the paper. Dr. Reddie followed with a paper on "Abbotsholme," as a realization of the perfect combination of health, theory, and practice. England is the worst governed of the leading States of the world, and has, except for enlightened individuals, no theory. Germany has theory galore, but neglects practice. "I have listened to a lecture on school hygiene in a room where asphyxiation was imminent." At Abbotsholme: "The ample windows let in floods of light, and if the summer sun blaze too fiercely, a silken screen mitigates the glare. From every window he [the schoolboy] looks out on lovely scenery. The glistening floors reveal their weekly bath of fragrant turpentine, whose vapour destroys the deadly bacteria and perfumes agreeably the air." For every time and place the pupil finds "beautifully printed and framed 'Rules,' perfectly conceived and perfectly expressed, so that error is

impossible"; contrived a double debt to pay, to teach him "how to write and use our mother tongue and also the art of legislation."

Abbotsholme is a unique school, and, as we read Dr. Reddie's panegyric, we exclaim with Moore's Peri:

And, oh! if there be an Elysium on earth,
It is this, it is this!

But when he proceeds to tell us how our schools may be transformed into Abbotsholmes, we are not much the wiser. His conclusions do not tally with his premises. "Medicine should cease to be a private occupation and should become a public service. Every schoolmaster should be trained to study first and foremost the laws of health." But we were told at starting that "no school in England can have much chance unless it eludes the interference of public mismanagement by being a separate imperium. By good fortune this autonomy we possess. No bungling sanitary authority can touch us." We must leave it to Mr. Lloyd George to find *le mot de l'énigme* and reconcile the apparent antinomies.

It is something of a bathos to descend from the school "laid up in the heavens" to common earth and read Mrs. Stanley Hazell's practical suggestions for middle-class boarding schools. She urges that the catering for a whole school should be in the hands of one person, and that this person should be preferably a matron holding the full diploma of a recognized school of cookery. The master's wife has too many other duties to attend to, and a steward, however competent in other respects, as a rule knows nothing of cooking, which, as speaker after speaker urged, is *die Hauptsache*.

Lastly, Miss Michaelis showed how at King's College women are now being trained in hygiene and physiology, and so qualified for such institutional work.

If only by directing attention to flagrant and easily remediable abuses of diet, the Conference will have done much good, and we hope that it will be followed by another dealing with the feeding of elementary scholars. There were present faddists and Monsieur Josses not a few, but the principal readers of papers and speakers were able and disinterested men and women of science, and the reactionaries who contended that, like Sydney Smith, they had "strictly meditated the muse on a little oatmeal," were out of court.

SINGING IN SCHOOLS AND COLLEGES

By "CANTATRICE."

IN these days of overcrowded curricula and increasingly difficult public examinations, the voice of the singing teacher is apt to be drowned by the clamour of those who demand more and more time for those subjects which, under our present system of education, are compulsory for those who wish to gain certificates of any value.

Whilst giving all credit to those schools which regard the musical side of education seriously and devote to it at least a fair proportion of the time-table, it is an undeniable fact that in many schools, though singing remains on the time-table of the upper forms, the class is, as a matter of fact attended by only a small proportion of the girls—in other words, the bright pupils are drafted off for extra work in more important subjects—i.e. those that "count" in the public examinations.

Now these same bright girls, who for the last few years of their school life only attend the singing classes spasmodically, are in many cases the teachers of the future. Should they elect to become mistresses in elementary schools, where specialization is the exception and not the rule, it is as much a matter of course that they should teach singing as any other subject. How do we find them prepared for it? On the entrance of a large batch of students (drawn from various

educational centres) into a training college, questions as to the musical training they had received elicited the following. Many had not been in a singing class at all for two, three, or even four years. A few, a very few, could sing at sight well in Tonic Sol-fa and make a fair attempt in staff notation. A large proportion could read a certain amount of Tonic Sol-fa, but a bridge note spelt disaster, and a minor key was an unknown quantity. Here and there a student showed herself at home in Key C in staff notation, but any other key found her floundering hopelessly. The rest could scarcely stumble through the most elementary exercise in either notation, or had received no musical training whatever. Their first appearance in the choral class was equally discouraging, the tone was miserable, the singing lifeless, and the idea of following a beat infantile.

Out of this raw material the College lecturer is supposed to turn out, in two years' time, teachers capable of undertaking to give musical instruction to any standard, from the lowest to the highest. It is an easy matter to lift the dull and lifeless singing class into an enthusiastic body of choral singers, to raise the ideal from a sentimental ballad with a waltz refrain to Schumann and Brahms; but it is an impossibility in the time allowed to have to begin with the very A B C of the technical and theoretical side of music, and expect students to teach with any confidence or success a subject of which they justly feel they have but a smattering.

It may be said that the attitude of schools towards class singing is partly the fault of those who teach. It is a common and frequently a just complaint that the singing teacher cannot keep order, the children are bored, and the results inadequate; but who is responsible for this state of affairs? The various schools of music are turning out annually into an already overcrowded profession hundreds of capable, highly trained musicians. How is it that so few (and those usually the least capable) are drawn to this branch of work? The answer is simple enough. As a rule it does not offer a sufficiently attractive or profitable career to the ambitious young musician. The successful teacher of class singing must be a good musician, a well trained vocalist, and a lover of poetry. She must, in addition, possess a keen sense of humour, a strong dramatic instinct, and, above all, unbounded enthusiasm.

School work is excessively wearing and must be regular, therefore it cannot be combined with a public career. The work of a visiting teacher necessitates a continual rush from place to place and a heavy expenditure in cabs and fares. Singing classes in big schools often consist of a hundred or more children (no other class makes such a demand on the teacher's energy and powers of discipline) and in the week's work it is probable that more than a thousand girls and students will be instructed. For this strenuous work it is quite a usual thing to offer the munificent remuneration of 5s. per hour, with, mark you! no prospect of a rise when later the teacher's work will become increasingly experienced and valuable.

Amongst the arts music is usually ranked somewhat higher than dancing, yet is there any accredited dancing mistress who, after teaching fifty, much less a hundred girls, would feel her labours sufficiently rewarded by 5s. an hour? Yet this is the fee paid to singing teachers by the London County Council. Even if we grant that, after paying working expenses, the year's income will amount to a sum which should be a good start in life for any girl, what about the future?

It is not good in any career to have no goal at which to aim. The ordinary member of a school staff receives a gradually increasing salary, and may one day be a head mistress, the dancing mistress benefits by every additional pupil in her class; but the woman who specializes in class singing is more than likely to find herself at forty receiving exactly the same fees that were offered to her as an inexperienced girl of twenty. Surely, then, this is the reason why little or no attempt has been made by the music students of to-day to fit themselves for this work, and why at present the teaching of class singing is usually the last resource of the broken-down or inefficient.

REVIEWS AND MINOR NOTICES.

The Cambridge History of English Literature. Edited by A. W. WARD, Litt.D., and A. R. WALLER, M.A. Vol. VIII: *The Age of Dryden.*

The eighth volume of "The Cambridge History of English Literature" is a solid and respectable if not a very brilliant successor to the Milton volume. "The Age of Dryden" is a particularly awkward transitional period. The tide of literary development, though it flows steadily, is full of perplexing cross-currents, and such a period calls out the weakness and not the strength of the composite plan of the Cambridge History. It needs the presiding direction of one mind to make coherent history of such chapters as "The Early Quakers," "The Restoration Drama," "The Court Poets," "The Platonists and Latitudinarians," to name only a few. The principle of classification by subjects seems particularly questionable in this volume. It varies almost from chapter to chapter. Chapters I and II deal with single authors, Dryden and Butler; Chapter III with a narrow literary subject, "Political and Ecclesiastical Satire"; Chapter IV with the history of a religious movement, "The Early Quakers"; Chapter VIII, under the title "The Court Poets," concentrates upon the lives of a group of gay and profligate Courtiers.

We are aware throughout of a tendency, illustrated in the two last-named chapters, to recede from the purely literary aspects of the given subjects and to deal rather with the historical or social. Mr. Grubb, in his excellent chapter on "The Early Quakers," gives an interesting history of a remarkable band of men and women, but refrains from developing the hints contained in his tantalizing scraps of quotation of the literary values and bearing of their writings. Mr. Whibley, in his account of the Court Poets, spends himself too much upon their lives and personalities. Rochester's career and character is treated in seven pages, against the meagre two and a-half devoted to his writings. Again, the chapters on philosophical writers degenerate into mere summaries of subject-matter and analysis of thought. John Locke's position as a thinker is summed up with excellent judgment by Prof. Sorley, but his qualities as a writer are barely touched upon.

Some outstanding chapters in the volume call for notice. Prof. Ward's opening chapter in Dryden is a trifle ponderous, but containing a mass of knowledge, leavened by genuine enthusiasm. The appreciation of his style in verse is excellent; that of his prose style disappointing, for it fails to suggest the unique combination in Dryden of the Elizabethan colour and imaginative appeal with the ease and directness of the new "Classical" manner. Prof. Ward fails to satisfy us in his remarks on "Macfiecknoe" and "The Hind and the Panther." On the former he gives nothing but generalized statement, and misses the supreme humour of Dryden's most genial satire. On the latter he is instructive, without suggesting the poetic qualities of this masterpiece in the new verse. But the chapter is redeemed by a sane and satisfactory summing-up of Dryden's qualities and position. Mr. Tilley contributes an excellent chapter on "The Essay and the beginning of Modern Prose." He is specially interesting on the French influence, and in his exposition of the development in Cowley's prose. His final paragraph sums up admirably the historical and intrinsic values of the transitional prose, and the whole chapter shows sound discrimination and lively appreciation.

Prof. Saintsbury's punctual chapter on the Prosody of the period is perhaps rather less interesting than usual. But, apart from Milton, the period is in itself dull prosodically, and Prof. Saintsbury makes the best of it. He concentrates interest upon the historical development and shows how the loose and nerveless prosody of the later Elizabethans yields to the corrective and regulative influence of the stopped heroic couplet. He is excellent, in his liveliest descriptive manner, on the Pindaric Ode and on Dryden's couplet, and gives one more instance of his well known catholicity of taste

in his insistence on the intrinsic value of a prosodic mode that modern taste finds jejune. "It is no treason, it is only reason, to combine with enthusiasm for the prosody of Shakespeare and Milton and Shelley admiration for the prosody of Jonson, of Pope, and (above both) of Dryden."

The Restoration Drama receives full attention in three consecutive chapters. The first, by Prof. Schelling, fulfils expectation on the score of learning and scholarship, and it warms into life over Etherege and Mrs. Behn. The question of French and of Spanish influence is treated warily and suggestively. The other two chapters, by Mr. Whibley and Mr. Bartholomew, deal adequately with the remainder of Restoration Comedy and Tragedy. But we are left with the impression that the whole subject would have been better dealt with by one writer. The connexion of drama with social life and ideals, and the significance of dramatic forms as the expression of contemporary modes of thought, is especially important at this period, and it requires the concentration of a single mind on this aspect of the question to present in any coherent form the various dramatic phenomena dealt with in these three chapters.

The chapter on "The Progress of Science" has been fittingly entrusted to Mr. Shipley, whose contributions to science and to progress in our own day will not be forgotten by the rising generation of scientific men. The chapter gives an admirable condensed account of interesting men and movements, and suggests with some piquancy the strange anomalies that occur, only to delight the present-day student, in the lives and thought of seventeenth-century men of science. The following sentence is typical: "Although Pepys had no scientific training—he only began to learn the multiplication table when he was in his thirtieth year, but, later, took the keenest pleasure in teaching it to Mrs. Pepys—he, nevertheless, attained to the Presidency of the Royal Society." We could have wished for a fuller treatment of the scientific elements in Donne's poetry. "Space," says Mr. Shipley, "limits me to one quotation"; but we wish that his one quotation had not been the too familiar lines about the biting flea. Donne's fearless imagination has made finer use than this of his varied scientific knowledge.

The volume, as a whole, with its useful bibliographies and its careful scholarship, will be welcomed by all serious students as an invaluable guide to the by-ways of seventeenth-century literature.

The Montessori Method. By MARIE MONTESSORI. Translated from the Italian by ANNA E. GEORGE. With an Introduction by Prof. HENRY W. HOLMES. With thirty-two illustrations from photographs. (7s. 6d. net. Heinemann.)

Few English teachers, to our shame be it said, read Italian, but many have seen and more have heard about the Casa dei Bambini at Rome, and will welcome an excellent translation of the "Pedagogic Scientifica," enlarged by the authoress, and introduced in a warmly appreciative, but discriminating, preface by Prof. Holmes. The Casa is a combined *crèche* and *école maternelle*—not a school as we understand the word. The infants range from two to six; they spend there the whole day; they number from forty to fifty, and are under the charge of a single directress.

Mme Montessori starts from the same basis as Froebel—the child's activity and self-development—but the radical difference between her method and that of Froebel is that she deals with children, not in groups, but as individuals. Collective lessons have been almost abolished in the Casa, and each child is left to his own devices, provided only with the proper materials for occupation, and supervised by the directress. "Fais ce que voudras" is the device of the Casa. Work, Mme Montessori holds, is less important than freedom, and provided he does not annoy his neighbours the child may do or not do what he likes. One would have prophesied that this infantine Abbey of Thelema must have ended like Tolstoy's School of Yasnaya Polyana, but we have independent testimony that it is a home of peace, and, what is more, that the infants do learn by the new method to write, read, and cipher (this is

the order of the Casa) without compulsion and in a marvellously short time.

The fundamental principle is, as we said, Froebelian; but the method was evolved not from the kindergarten, but from the author's medical studies in the Psychiatric Clinic of the University of Rome, and from her work as directress of a school for feeble-minded children. Her originality consists in applying to normal infants the methods that she had found effective in teaching these defective children. For these methods she was mainly indebted to the works of Séguin, a French alienist doctor, who migrated to America and founded many institutions for idiot and feeble-minded children. Séguin's treatise (or rather treatises, one in French and one in English) we have never met with, and we cannot tell what were the bones upon which Mme Montessori has breathed and made them live. The metaphor is the author's, who quotes the whole chapter of Ezekiel and adds a still more daring Scripture parallel: "Thus the blind Saul before the glory of the sun exclaimed, 'This? It is the dense fog!'" We have not succeeded in verifying the quotation.

The other main departure from Froebel consists in the special—and, in our judgment, disproportionate—development of sense training. Do we really need separate exercises for the training of each sense, including taste and smell? Are we much advanced when we call the building of towers with bricks and the fitting of pegs into holes psychometric and esthiometric exercises? Need we call in science to make a child distinguish the difference between rough and smooth, flat and solid, hot and cold? To make use of the tactile sense in teaching the alphabet does, indeed, seem to us a distinct pedagogic advance, and the account of the children who wrote spontaneously will be to many teachers a revelation. We must remember, however, that it was Italian that they wrote, and a stronger argument for simplified spelling could not be found.

To sum up, there is much in the book to interest English infant teachers, though there is little that they can apply directly. The dietary, for instance, would not commend itself to our Food Reformers. We cannot afford to give our children the breast of chicken, nor are we prepared to exclude cheese in any form, or to restrict the vegetables to spinach, and for condiments to rue and garlic. The cost of a Casa is an unconsidered trifle. The book is loosely strung together, and we are often in doubt whether we are reading of what was, what is, or what might be. Mme Montessori is the apostle of auto-education, a true gospel, to which she has devoted her life, and in which we believe, however much we may dislike the barbarous nomenclature.

The Romance of Words. By ERNEST WEEKLEY. (3s. 6d. net. Murray.)

Mr. Weekley is Professor of French in University College, Nottingham, but there is nothing professorial or didactic in his pleasant, popular volume. He is content to give results, and rarely stays to indicate the process by which they are reached. Not only like M. Jourdain's professor, from whom he takes his motto, he makes as though his readers knew no Latin, but he makes no demand on their knowledge of phonetics. His chief authorities are, of course, "The New English Dictionary," in which he has collaborated, and, where this fails him, Skeat's "Etymological Dictionary." To the latter we think some ample acknowledgment was due—for instance, where whole paragraphs, as in pages 40 and 48, have been borrowed. The chapter on "Semantics" is original, though not, as Prof. Weekley imagines, a first attempt. Darmesteter and Bréal have both been translated into English. There are also a few new derivations which seem to us convincing. Thus "anlace" = Fr. *alêne*, Ger. *Ahle*, Eng. "awl." "Branks," the scold's bit, = "branchkes," from Norm. *branque*. "Akimbo" = "a-cann-bo," i.e. "with can bent," or like jug handles. "Lug sail" = "luck sail," cf. Fr. *voile à fortune*. "Oriel," Lat. *aulacolum*. "Patch," O.F. *peche* = *pièce*. "Petronel" = *pictroncla*, a flint piece. His new derivations of "caulk," "foil," "sallet," "tankard," we do not think he

has established, and that a meat "pie" is derived from the black and white of the bird—*credat Judæus!* The book is divided into chapters, but the charm of it is that it does not greatly matter where we open it; on every page there are facts not generally known, and, as the author boasts, from first to last no moral is enforced.

We add a few notes which may be of service for a second edition. Page 2: "The four words"; we can find only three. Page 10: *sabotage*, in the latest sense, does not mean scamping work, but malicious damage done by strikers. Page 12: Tammany was not "the patron saint of Pennsylvania." Page 28: "The fruit (Fr. *ananas*) was named from its shape" is misleading; *ananas* is a Brazilian word. Page 35: "'Porcelain' comes from *porcellano*, the name of the Venus-shell, a derivative of *porcus*, 'pig.'" The missing link, that the shell resembles in shape a hog's back, should be added. Page 50: "The 'educated' *h* of modern English is largely an artificial restoration." What rather needs explaining is why the *h* in "hostel," "humble," "herb" should have been dropped. Page 69: The derivation of "treacle" is only half given—that it was a hair of the dog that bit you. So under "budget" we miss Dr. H. Bradley's interesting discovery. Page 73: "Nice. Hardly possible to explain the modern sense." Skeat's conjecture that it was confused with "nesh" seems highly probable. Page 86: Fr. *matelot* is not *maat-genoot*, "meat companion," but *matte*, "berth." Page 90: There is no German equivalent for "a cat can look at a king." Is not "sieht doch die Katze den Kaiser an" near enough? Page 121: "Glaive" cannot be derived from Lat. *gladius*. Why not? The Gaulish *cladebo* seems to us most improbable. Page 133: "Tret" is rightly explained in Skeat as an allowance of four pounds in a hundred and four, not, as here, in a hundred. Page 142: "*Sou* is said to come from the Latin *solidus*." It does come from Latin *solidum*.

A History of French Literature. By C. H. CONRAD WRIGHT, Assistant Professor of French in Harvard University. (12s. 6d. net. Oxford University Press.)

A full and comprehensive history of French literature, written in English on the scale of Taine's "History of English Literature," has long been a desideratum. Prof. Saintsbury's work is not brought up to date, and in the later part is marred by the author's personal predilections. Prof. Dowden's admirable volume in "Short Histories of the Literatures of the World" is on a smaller scale, and it ends with the decline of the Romantic movement and the rise of Naturalism. Prof. Wright comes well equipped for his task. Educated, as he tells us, mainly in France, he has chosen as his life-work the study and teaching of French literature, and, what is a no less important qualification, he has a profound admiration for his subject, which, "taken, as a whole, overtops in richness, artistic quality, and historical influence all literatures since those of Greece and Rome."

The two great merits of the work are the close connexion maintained throughout between writers and their social and political environment (each author or group of authors is set in his proper *milieu*); and, secondly, the prominence given to the philosophic side of literature—metaphysical, religious, and social. We may instance the full account of Descartes, Le Maistre, Lamennais, Comte, and Bergson.

When compared with Taine's work, one striking difference is the absence of quotations *à l'appui*. Without these, it is not possible to discuss style in its more technical aspects, and this is hardly ever attempted. We look in vain for any account of the evolution of the alexandrine—a movement as important and as interesting as that of blank verse in English.

In the preface the author frankly expresses his preference for the Classical over the Romantic; for the seventeenth and eighteenth centuries over the *décadents* of the eighties and nineties—the novels of adultery and contemporary "dionysiac" authoresses. This prejudice, which most Englishmen will share, makes him less than just to recent poets, such as Verlaine, and in particular to the idol of the French, of whom we are shown little but the feet of clay. "Victor Hugo, far from

being of noble origin, as he tried to make people believe, was of thoroughly plebeian descent; his mind, instead of being Messianic and big with prophecy, was that of an inflated and conceited *bourgeois*; his language was that of a French Gongora." So begins the chapter on Victor Hugo, which in our judgment misses the mark no less than Swinburne's dithyrambs. Living writers are dealt with in a supplementary chapter, giving names in alphabetical order, with brief notices as in Meyer's "Schriftsteller Lexicon." The elaborate bibliography, 85 pages of small print, will prove an invaluable guide to the advanced student, and there is a full index of names. We miss an index of matter. The name of a work does not always suggest that of the author, and even when it does it is tedious to turn up a dozen references to find the one we need.

French Prose Writers of the Nineteenth Century and After. An Advanced Reader. By VICTOR LEULIETTE. (3s. net. Sir Isaac Pitman.)

The primary object of this Advanced Reader is to illustrate "important aspects of the History, Literature, Philosophy, and Civilization of France." There are twenty-five extracts, beginning with Brillat-Savarin's "Physiologie du Goût," "un des plus profonds parmi les livres frivoles," and ending with Jean Finot's "Français et Anglais." The selection of authors, as may be suspected from the two named, is not determined by their rank or importance, and any one drawing up a list of the ten greatest *prosateurs* of the last century would not be likely to find half of them among the twenty-five. This defect may be accounted for, if not justified, by the exclusion of the novelists. We agree with the editor in thinking that the English scholar is overdosed with French novels, and neglects more serious works; but a work cannot pretend to represent the intellectual life and art of the last century which ignores George Sand, Balzac, Dumas, Gautier, Zola, and Anatole France. Among historians we find Guizot and Thierry, but not Thiers and Michelet. Renan is quoted in the preface as a eulogist of French *netteté*, but we have no specimen of perhaps the most perfect stylist of the century. Sainte-Beuve is confessedly the prince of critics, but, instead of a *causerie du lundi*, we are given an extract from Stendal's tedious "Racine et Shakespeare." But "though much is taken, much remains." The passages chosen are carefully and conscientiously edited, and literary and historical references are fully explained. It is well that young England should see his country as Frenchmen see it, and the editor is at no pains to tone down M. Emile Boutmy's unflattering portrait of English insularity and self-sufficiency.

The Journal of English Studies. Vol. I. No. 1. (1s. net. H. Marshall.)

We welcome the appearing of what is justly claimed as a new departure in English periodical literature. It is a stigma on the mother country that for periodicals dealing exclusively with the study and teaching of English we must go to the United States, and that the very title of this journal suggests Germany rather than England. The title is indeed misleading, in that the journal appeals mainly to teachers, not to scholars, like *Englische Studien*, and its nearest native analogon, the *Modern Language Review*. The first number contains two excellent articles by teachers on "Oral Composition in Senior Classes" and "Shakespeare in School." Mr. William Archer again does battle for his Simplified Spelling, and Mr. J. M. Robertson begins what promises to be an interesting essay on "Bacon as Writer." We take it that the journal will appear monthly (this is not stated), and wish it a long life.

Talks on Health and Temperance. (7d. net. McDougall's Educational Co.)

This is a useful little book, well thought out and worth putting into the hands of every child of the Third Standard and upwards. It begins by a brief description of the human body, especially the functions of respiration and digestion. Under the heading of "Some Things we all need," the writer refers to the need of good cookery, proper chewing of the food, the mistake that is committed when food is washed down with fluid, the desirability of wearing loosely meshed linen or cotton underclothing. The statements are perfectly correct, but we should have liked to see these truths based on the reasons; reason stimulates thought and memory. For instance, the writer points out how necessary it is to have fresh air in all rooms, including the bedroom. Useful illustrations of ventilation are given. But why should not the writer point out to a child that his right development depends on a right air supply, that it has a great effect on digestion, and that in itself a good supply of air tends to render one invulnerable to cold—*i. e.* to a disordered mucous membrane? The Arctic and Antarctic explorers do not take cold at 40 degrees below

freezing-point. Warm and ill-ventilated rooms are the forcing ground of the "cold" bacillus. Stress is very properly laid on breathing exercises as a part of physical training, for, however pure and good the air may be, it is possible the individual may not take in enough to give him a fair share.

Nelson's Dictionary of Dates. Vol I. (1s. net.)

This portion of the "Encyclopædia Library," which is to be completed in three volumes, gives in a condensed form and at a price which the poorest reader can afford the information contained in Haydn's standard work. The matter is well chosen and well arranged. Thus, on the first pages we find, under "Abbeys," a list of the chief British abbeys, with dates of foundation; under "Abdication," a complete list of *rois en exil*; under "Abyssinia," six columns of history, ending with the proclamation of Lij Yaru as Emperor in 1911; an account of the discovery of Argon, and nine columns on the British Army.

First Aid in Accidents. By Sir JOHN COLLIE and C. F. WIGHTMAN. Sixth edition. (9d. net. Gill.)

The new edition has been enlarged by thirty pages. The chapter on Voluntary Aid Detachments hardly concerns teachers, but the full directions for roller bandages, in every way preferable to triangular, are a welcome addition. It would be hard to find so much sound practical knowledge packed in so small a compass, and costing so little.

Holiday Resorts. (1s. net. F. Hodgson, 89 Farringdon St., E.C.)

The twenty-ninth annual issue contains 146 pages of addresses at home and abroad, all of which have been personally recommended by members of the Teachers' Guild. The maps are a valuable addition, and a choice of information of various kinds makes the book almost indispensable to those who wish for a choice of holidays at reasonable prices.

Messrs. Blackie send us two more exquisite volumes in their "Red Letter Library"—THACKERAY'S *Book of Snobs*, with an introduction by Mr. CHESTERTON, and *Blake*, with an introduction by Mrs. MEYNELL. The latter volume includes the little known "Edward the Third." The price of each volume is 2s. 6d. net.

SOME PUBLICATIONS OF THE CHICAGO UNIVERSITY PRESS.
(English Agent, the Cambridge University Press.)

- (1) *The Life of Christ.* An Aid to Historical Study and a condensed Commentary on the Gospels. By E. D. BURTON and SHAILER MATHEWS. (Pp. 302. 4s. net.) (2) *The Life of Christ.* For the use of Classes in Secondary Schools and in the Secondary Division of the Sunday School. Adapted from the above by I. B. BURGESS. (Pp. 307. 4s. net.)

The above volumes form part of a series of "Constructive Bible Studies" edited by Prof. E. D. Burton. It is well known that systematic study of the Biblical literature on scientific lines is much more adequately organized in the United States than in our own country. The volumes under review are admirable specimens of what such manuals should be. The first (1) has proved its worth by the fact that it has already passed through several editions in America. The aim of the volume is explained by the editors as follows:—"It is our hope in some measure to promote the thorough, systematic study of the Bible, and in particular the historical study of the Gospels, along such lines as are ordinarily followed in constructive historical work . . . The reasons which in the past have denied to the Bible and to Biblical history what was freely granted to other ancient classics and to other ancient history are rapidly ceasing to exist . . . The Sunday school should have a curriculum of study as carefully and as intelligently graded as any other school, and this curriculum should include a thorough course of Biblical history. Such a course, covering both the Old Testament and the New, dealing with teachings as well as events, and recognizing relations of events as well as mere facts, should occupy not less than three or four years." We wish such a program could become a practical proposition in our own Sunday schools. The volume written by Profs. Burton and Mathews consists of an introduction ("Palestine during the last Two Centuries before Christ") and nine parts, as follows:—Part I, The Thirty Years of Private Life; II, The Opening Events of Christ's Ministry; III, The Early Judean Ministry; IV, First Period of the Galilean Ministry; V, Second Period of the Galilean Ministry; VI, Third Period of the Galilean Ministry; VII, The Perean Ministry; VIII, The Passion Week, IX, The Forty Days. The book is broken up into chapters, each chapter being headed by certain specified parts of the New Testament, which are to be carefully studied; then follow comments and explanations of difficulties, and finally suggestions and topics for study. In each case, after this preliminary discipline, the student is encouraged to write a chapter for himself (for which hints are given), and in this way gradually to construct his own life of Christ.

The method demands, first of all, "a mastery of the facts of the Scripture narrative," and, secondly, "interpretation of the Scripture material." The plan is one which might be pursued with great advantage either by individual students or by students working in class under a teacher. We cordially commend the volume to English teachers and students, and should much like to see it more widely known and used in this country.

The second volume indicated above (2) is an adaptation of (1) for less advanced students. Both volumes are well printed, and are enriched with some good illustrations of places in Palestine and with maps.

Studies in the Gospel according to Mark. For the use of Classes in Secondary Schools and in the Secondary Division of the Sunday School. By Prof. E. D. BURTON. (Pp. 248. 4s. net.)

This admirable volume contains the text of the Second Gospel divided into sixty-nine sections, each section being provided with brief explanatory notes and questions for written work. At the end there is a collection of "review questions for the whole Gospel," an analysis of the Gospel, and a dictionary, covering fourteen pages in double columns of small type, where explanations are given of words and place-names which require such. Thus words like "Christ," "baptize," "Chief Priests," "Pharisees," "Son of Man," and places like "Bethany," "Dalmanutha," &c., are lucidly explained. This is a most admirable feature. Such a handbook conscientiously worked through would prove to be a splendid discipline. It is immensely superior to our ordinary classbooks and manuals. There are four excellent maps.

A Short Introduction to the Gospels. By Prof. E. D. BURTON. (Pp. v, 144. 4s. net.)

This exceedingly useful volume is designed "to place before the student of the Gospels those facts concerning the purpose and point of view of each of them which are most necessary for an intelligent reading and study of them." The first three chapters deal with the Synoptic Gospels separately (each discussing the author, readers for whom the book was primarily intended, the purpose, other problems, plan); the fourth chapter deals with the relation of the Synoptic Gospels to one another; while a final chapter deals with the Fourth Gospel. It is interesting to note that, while the traditional authorship of the Fourth Gospel is accepted on the whole, yet it is conceded that "the book perhaps does not owe its present form" to the Apostle, but bears traces of later editorial revision.

A Handbook of the Life of the Apostle Paul. An Outline for Classroom and Private Study. By Prof. E. D. BURTON. (Pp. 100. 2s. net.)

This outline is divided into two parts: Part I deals with the Life of Paul; Part II with the letters, their occasion, and structure. The little volume is really a plan of study, with topics for investigation suggested, and hints and references given as to the carrying of this out. There are some useful analyses of the letters. The whole is admirably adapted for the use of classes and correspondence students, who may safely trust the skilled guidance of the accomplished author.

UNIVERSITIES AND SCHOOLS.

LONDON.

Convocation's Report to the Royal Commission was submitted at the meeting of Convocation, on May 7. Officially Convocation has buried its head in the sand like the ostrich—that is to say, it refuses to take note of the alleged conspiracy on the part of the Commission to abolish the external student, with whose interests Convocation is supposed to be specially concerned. Whether the implication is that the danger does not exist is not altogether clear, but the Report refers exhaustively to the origin of the Commission from the establishment of the Imperial College with ill defined relations to the University, and gives a lucid statement of the advantages to be derived from the incorporation of the college in the University. The inference appears to be that Convocation will be well satisfied if the Commission finds a solution for this particular problem.

Presentation Day, on May 8, calls for no special comment. In the absence of Lord Rosebery, the Vice-Chancellor, Sir William Collins, presided. The Principal's Report is an encouraging document, because it shows that the claims of University education in London are at last receiving attention from wealthy citizens. An imposing list of benefactions is published, amounting in hard cash and promises—and including benefactions to London colleges, such as King's College for Women and Bedford College for Women—to a capital sum of £650,000 during the past twelve months. Annual subventions from the Government and the London County

Council have also been substantially increased. The chief subject for anxiety, the Principal states, is the decline in Matriculation entries and its financial effect. The total admissions by all channels was in the past year 3,969, as compared with 4,255 in 1910-11, and the total number of candidates for all examinations was 12,263, as against 12,681 last year. The magnitude of the work of the University is further indicated by the number of internal students, which is now 4,578, and is steadily increasing.

Educationally the recent visit of M. Poincaré, one of the most distinguished mathematicians living, to give a course of lectures in advanced mathematics is noteworthy. The lectures were delivered in French and attracted a large and distinguished audience. This course was one of a long series of courses of advanced lectures, in the organization of which the work of the University on its teaching side has been widely appreciated.

The publication of Lord Haldane's letter to Sir Francis Mowatt reciting the history of his scheme for new head-quarters for the University of London, and practically admitting that it cannot go forward without the approval of the governing body of the University for the time being in office, has cleared the air a little, and the announcement that a special meeting of the Senate is to be held to consider the question suggests, perhaps, a more conciliatory attitude on their part. As to the site, there is no indication of official support for the British Museum scheme, but opinion is strengthening in favour of the Foundling Hospital site. The attitude of the Government towards any scheme of removal is extremely important, for it must be remembered that the Government has been responsible for the housing of the University since its establishment; and if the Government refuses to decide anything until Lord Haldane's Commission has reported, this may involve considerable delay. The scheme, however, is so important that some delay is both desirable and inevitable, in spite of the Commission's desire to see new premises ready for their reformed University.

OXFORD.

The announcement that a petition for a Commission has been presented to the Prime Minister from a considerable number of members of the University of Cambridge has done much to clear the air here. The positions of the two Universities in this matter have been curiously reversed. For a considerable time all proposals for a Commission have been confined to Oxford, and it was generally supposed here that, if Oxford demanded a Commission, Cambridge would repudiate the demand. Now we are lagging behind. The reason, of course, is the necessity of taking into account what the Chancellor has done and what he may still intend. There are many persons in Oxford who have come to the conclusion that the possibilities of reform from within are exhausted and that a Commission is essential, but there has been a considerable difference of opinion as to whether it would not be better to wait until the Chancellor's program has been carried as far as it can without external interference, and when a review of the whole situation might be easier. However, in the last two terms, as I have noticed before, dissatisfaction with the possibilities of working through Council, Congregation, and Convocation has grown apace, and a memorial is being signed in favour of a Commission of Inquiry. It is to be presented, not to the Prime Minister, but to the Chancellor. For the signatories do not want to suggest that they do not recognize the great value of all that the Chancellor has done for the University or that they do not hope for his co-operation.

The great amount of work done by the Chancellor and Council will not be thrown away, but rather be a foundation on which any Commission must build. A Commission is wanted, not because of scandalous abuses (such exist only in the imagination of those who do not know Oxford), but because with its present constitution the University is unable to develop as it would, and chiefly because the problem of how the University is to adapt itself to the modern conditions which have sprung up since the last Commission is too vast to be solved piecemeal. It demands a review of the whole situation. As things are, the University is handicapped in many directions through lack of money, and yet when it makes any appeal for help from the outside it meets the widespread opinion that the endowments which it and colleges already have are not properly used, and that it would be a waste to give more. The college system, we are sure, is in no danger. It cannot fail to approve itself on its main lines. It might rather very easily be endangered by haphazard legislation, if we go on changing one thing here and another there without really having reviewed the whole situation and seen where we want to go.

An instance of the need for such a review occurred in a Statute whose preamble passed Congregation on May 21. Since the Diploma Courses were started some years ago, requiring a course of

Diplomas.

one or two years, a large number of students have come to Oxford who do not intend to take a degree. They are therefore not welcomed by the colleges, who prefer men that are going to take a regular course. The natural alternative would be that they should become members of the non-collegiate body. A considerable number do, but many prefer to remain outside the University altogether. This new Statute proposes to establish a register of diploma students, who are, unless they are over twenty-five years of age, to be members of the University or registered women students or members of a society which exists for the purposes of higher study. The last clause is meant to include Ruskin College. Now this is obviously a Statute which raises the question whether the admission to the University ought to be only through the colleges, as also the question as to whether the non-collegiate body is satisfactory in its present form. But such questions have not been before Council. Council are only endeavouring, as was explained last Tuesday, to solve an immediate difficulty caused by the presence in the studies of the University of students who are not members of the University.

Council have published their proposals for the reform of the constitution of the University. They are most disappointing. Council, which is at present the most satisfactory part of the University organization, is to be radically reformed by the abolition of the three orders. There is nothing to be said for the present system as it concerns heads of houses, but we doubt if there is any advantage in taking away the order of professors. "Down with the professors!" is the one cry which will unite almost all sections of University opinion. Congregation is to be reformed on excellent lines, so that it will really be a house of teachers not of residents, but, unfortunately, all vested interests are to be preserved: that will mean that the character of Congregation will be altered by about 1950.

Convocation is not to be changed at all, either in composition or in powers, but there is to be, instead of the present voting on one day, a poll lasting three days. That does nothing to obviate the real difficulty that, valuable as it is, to have the opinion of resident teachers checked by some appeal to outside opinions, Convocation is quite unfit, from its size and composition, to give decisions of any value.

Another proposal to enlarge Convocation was brought forward a few weeks ago. It was proposed to reduce the fee for the B.A. slightly and for the M.A. from £12 to £2, so that most students would be able to take the M.A. The loss in fees was to be made up by raising undergraduates' fees £1, 10s. a year. The Statute was thrown out, mainly because members of Congregation were unwilling to raise undergraduates' fees, and because there was a general feeling that the Statute left untouched the real vice of the M.A. degree—viz. that it is, as Prof. Myres pointed out, a bogus degree, and selling it at £2 was no more creditable than selling it at £12.

The Vice-Chancellor has appealed to the colleges to help to put the School of Forestry on a permanent basis. The Government is withdrawing all the help which it gave the University, and which has enabled Oxford to build up a very good School of Forestry, now that other Universities, such as Cambridge and Edinburgh, have established Schools of Forestry. Sir William Schlich generously continues to give his services, and is endeavouring to secure—an adequate salary for whoever is to succeed him. It is to be hoped that the appeal will be successful.

ST. HILDA'S HALL.—The following Scholarships have been awarded:—To Hilda Jennings, of the Stafford High School, a Scholarship of £40 (in English language and literature). To Elizabeth Nina Macrae, of the Tottenham High School, a Scholarship of £40 (in modern history).

CAMBRIDGE.

I last wrote to you in the middle of March, when the Vice-Chancellor's publication of the memorial of the Divinity Professors, suggesting the desirability of throwing open degrees in Divinity to "members of the University who do not belong to the Church of England," had been followed up by the announcement of Graces by the Council of the Senate, which, if carried, would lead to the proper steps being taken towards the necessary change of Statutes. The report of the Council containing the proposed Graces was signed by all its members, and the phrase used was that "the Council would welcome" the change.

On April 25 the report of the Council was discussed in the Senate House. Archdeacon Cunningham led the attack. He referred his listeners to articles lately published for his opinion on the merits of the question and devoted himself at once to the sin of the

Council in stating that they "welcomed" the proposal, when their business was merely "to consider and prepare all Graces to be offered to the Senate." What was Divinity? he asked. Would a Mohammedan be able to present a thesis in Mohammedan Divinity? and so forth. That Mohammedan, flanked by a Jew on the one hand and an Agnostic on the other, has hag-ridden a good many minds during this discussion. Mr. Duncan-Jones pleaded for an alteration in the name of the degree, and the Rev. A. J. C. Allen, a local clergyman known for his gifts in newspaper controversy, added a Buddhist to the Mohammedan. The change was defended by the Divinity Professors, and, in a telling speech, by the Bishop of Ely, who "entirely agreed with the memorial of the Professors and with the report of the Council," and, having for many years foreseen that the present distinction would disappear, "rejoiced that the Professors of Divinity had taken the first definite step in that direction," convinced as he was that in the long run it would strengthen and widen the study of theology in the University.

On April 30 the *Reporter* contained another memorial addressed to the Vice-Chancellor, and dated April 26, 1912, requesting "the appointment of a Syndicate to consider and report upon the whole question and upon such alternative proposals as may be suggested." It was signed by the Bishop of Durham whose action at Durham has helped to raise the question, and a group of other prelates, mostly Suffragans; the Lord Chief Justice; quite a number of D.D.'s, few of whom are known to the public for any work the title of which would be familiar; and twenty or thirty other members of the Senate, who as such have a right to be considered.

The action of the Council was awaited with some interest. The *Reporter* of May 14 presented a further report, the gist of which was that the Council stuck to their guns—discussed one or two points which had been misconceived—and propose to bring forward the Graces in the Michaelmas term. This new report had not so many signatures as the former—for three members of the Council, not unknown in Cambridge for the value they set upon the virtues of caution, did not append their names. So there the thing rests till October, by which time the Senate, in the quiet phrase of the report, "should have ample time for consideration." It is pretty clear that some of the Senate's members are not going to devote the time to anything so slow. They mean opposition. It is whispered, too, that some people suspect the promoters of the Graces (who are credited with being terribly long-headed) of a certain malicious hope that the Graces will be thrown out; for it is quite clear that the country was not in the least thrilled by the defeat of the "Reforms" already proposed—viz. the financial rearrangements—and it might possibly occur that the rejection of the emancipation of the Divinity degrees would interest people and lead to a Commission.

And that is my next theme. A form of petition has been circulated by a committee to request the Prime Minister "that a Commission may be appointed to inquire into the Constitution of the University of Cambridge, the financial and other relations which exist between the University and the colleges, and the administration of funds voted to fellowships, scholarships, and exhibitions, and that power may be given to the Commission to make Statutes in regard to these matters." The request is based on the Senate's rejection, "without exception" of "various proposals for constitutional reform," and the unlikelihood of any further attempt of the kind being successful.

After some time this was circulated again with a list of signatures, containing about a third of the professoriate and about seventy other names, presumably residents, out of a register of residents which must be four or five hundred. It must be owned that, while among the professors on the first page of this petition there are names that carry much weight along with others that carry less, the list of other residents is not a strong one. One curious footnote appears; one gentleman signs "provided that the Commission shall meet in Cambridge and take evidence not only from officials"—a caveat of importance. For some people have a persistent idea that the Commission would be primed with a series of proposals, would hear chiefly the people who organize public opinion, and perhaps not representatives of all the colleges. It is noted that no suggestion is made that relations between one college and another should be examined, and it is thought that, if colleges are to continue, this omission is odd or suspicious.

When it comes to the main question as to whether there actually will be a Commission, some who are well informed are sure of it; while others say that, when some weeks since Oxford people approached the Prime Minister, he told them in effect that he had enough legislation on hand at present. If this is true, there will not be a Commission with power to make Statutes. Meantime a London graduate has issued a fly-sheet to the effect that, Liberal as he is, he would not, in view of the proceedings of the London

University Commission, wish to entrust this Government with the appointment of another. And there I must leave it. Perhaps before this letter appears in your columns—perhaps already—some of your readers will know more than I can tell them.

The Classical Board, led on by Prof. Ridgeway, and encouraged by voices raised in the Senate House, when its last scheme for the reform of the Classical Tripos was considered, has revised its ideas with some

Verse Composition. emphasis. What is practically a new scheme is issued with some surprising changes. Verse composition is made alternative with papers on syntax and philology. Verses are not popular to-day; very few, on the whole, of the younger classical teachers seem to write them, and the opinion is widely expressed—at least outside Cambridge, and often in it—that the accomplishment is waste of time. (One does not observe that all the people who make this criticism manage to do anything very signally more useful with their time—but perhaps this is cynical.) The accusation also lies that verses are apt to become under one type of teacher a school of false taste. Still, there is no denying that verse composition is to many classical scholars, old and young, good, bad, and indifferent as they may be, an intense pleasure, which they would be sorry to forgo. As to its educational value, American and German scholarship betrays the want of it, some English people fancy. And, if it is waste of time for the grown man, it may after all be a real school of literary expression for the younger. *Nec luisse pudet sed non incidere ludo.* This matter, too, will probably be deferred to next term.

As your readers will know from the public press, we have been informed, through Lord Esher, that a friend of the University, who stipulates that his name shall not be mentioned, has given £20,000 to found a Chair in Genetics, and has made it a condition that the professorship shall be called after Mr. Balfour. As we already have Balfour foundations, this has been followed up by a letter indicating that in order to mark out the fact that this one is to be named in honour of the ex-Prime Minister and not the man of science, his brother, it is to bear the Christian name as well as the surname.

WALES.

The annual extra-collegiate meeting was held at Llandrindod Wells, on May 18. In the absence of the Senior Deputy Chancellor, Lord Kenyon, the chair was taken by Colonel Pryce Jones, M.P., the Junior Deputy Chancellor. The Senior and Junior Deputy Chancellors were both re-elected, and the Vice-Chancellor *pro tem.* was appointed to represent the University on the Teachers' Registration Council. The Senate, apparently, finds the question of including geography as a matriculation subject a very difficult and thorny one, though why it should be so is not clear to an ordinary layman, for the importance of geography has been duly recognized by every other University college. The Senate of the University of Wales must be ignorant of recent developments in the teaching of this subject, otherwise it is impossible to understand their attitude towards it. There is some grain of comfort, however, to be derived from the assurance that they are still "considering the matter and hope to report to the Court at its next meeting."

With regard to research degrees for graduates of other Universities, the Senate is of opinion that two years should be the minimum period of research for the degree, as substantial work of a post-graduate character cannot, as a rule, be accomplished in a shorter time.

Prof. D. Hepburn, M.D., was appointed to represent the University on the General Medical Council.

Mr. W. Lloyd Parry, B.A., presided over the annual meeting of this Association, held at Llandrindod Wells. There was a long discussion on the question of pensions, in which some diversity of opinion was expressed as to the advantages of a purely Welsh scheme against a national scheme. Mr. Rhys Morgan, of Pontypridd, dealt very exhaustively with the prospects and difficulties of the whole matter, and it was finally agreed that a deputation should be sent to the Board of Education and the Treasury to express the views of the Association. No definite decision was arrived at as to the relative merits of a national scheme and a Welsh scheme, though it is probable that the former is the only scheme which will be found to be practicable and satisfactory.

Some slight changes in the Standing Orders were introduced, and a motion to widen the scope of the Association, so as to include all secondary schools in Wales, was postponed till the next meeting. As the Association deals mainly with the questions arising out of its close connexion with the Central Welsh Board, it is difficult to understand what is to be gained by altering its

(Continued on page 396.)

MESSRS. THOMAS NELSON & SONS'

Publications for the Secondary School.

A HANDBOOK OF GEOGRAPHY.

Vol. I.—General Geography. The British Isles and Europe.

By A. J. HERBERTSON, M.A., Ph.D.

(Reader in Geography in the University of Oxford.)

With numerous Maps and Diagrams.

500 Pages. Cloth. Price 4s. 6d.

This book has been written to supply the long-felt want of a work intermediate between the ordinary elementary School Geography and such a standard work of reference as Dr. Mill's International Geography.

It is designed for the use of students in pupil-teacher centres, training and other technical and professional colleges, the highest classes of secondary and evening schools, the junior classes of universities, and also for teachers. The special attention paid throughout the work to economic geography makes it particularly suitable for students and teachers in commercial schools and colleges.

Great pains have been taken to have the book adequately illustrated, and the work has been brought up to date.

HIGHROADS OF HISTORY.

Book IX.—Highroads of General History.

By E. M. WILMOT-BUXTON.

With numerous Illustrations in Colour and Black and White.

334 Pages. Cloth. Price 2s.

This book embodies an attempt to give young pupils, who have gone through a course of English history, some idea of the various great empires of the world from the earliest times down to the present day. The volume is simply written, and every opportunity is taken to connect the history with that which is familiar to Bible students, as well as with the history of England and Europe.

NELSON'S SCHOOL HISTORY OF GREAT BRITAIN AND IRELAND.

By G. W. PROTHERO, M.A.

Illustrated with Coloured Reproductions of Great Historical Paintings.

Maps and Illustrations in Black and White.

487 Pages. Cloth. Price 2s. 6d.

Nelson's School History is the most complete history text-book ever published for schools. It is a history not merely of England, but of the British Isles and the British Empire. Forty-eight historical pictures by well known artists have been reproduced in this volume.

COLLIER'S HISTORY OF ENGLISH LITERATURE.

New and Revised Edition with American Supplement.

Fully Illustrated with Reproductions of Great Historical Paintings.

836 Pages. Cloth. Price 3s. 6d.

Collier's History of English Literature has long been, and still is, a standard work on the subject. The book has been thoroughly revised, and the later portions largely rewritten to bring the matter up to date.

THOMAS NELSON & SONS, 35 and 36 Paternoster Row, London, E.C.;
Edinburgh, Leeds, Manchester, Dublin, Paris, Leipzig, and New York.

present constitution. We therefore anticipate a lively discussion at the next meeting. Dealing with the question of schedules and syllabuses, the Association expressed dissatisfaction with the action of the Central Welsh Board in delaying the circulation among members of the list of books, &c., required for its examinations until it was too late to consider them adequately. It was suggested that the Association could render valuable service to the Board by criticism and otherwise.

The officers were re-elected, and Messrs. R. W. Jones, Rhys Morgan, and Miss Holme, and Miss Mason (Bangor), were elected to vacancies on the Executive Committee.

Some difficulty has arisen in the counties of Glamorgan and Monmouth with regard to the allocation of the Development Grant in aid of Agriculture. The Commissioners have laid down the rule that where

Agriculture in Wales. a group of the authorities unite with a University college in one scheme, a grant of £1,000 a year will be made to the united district for advisory and research work and £1,200 a year for higher education in agriculture, but these sums will not be obtainable unless in conjunction with a University college. As no such scheme of co-operation exists between the above counties and Cardiff College, the Commissioners have attached them to Bristol University—hence the commotion. Monmouth has an agricultural institute at Usk, but this is not a University college, and therefore the only way these grants can be secured for South Wales is by co-operation between the County Councils and Cardiff College. Both the counties, having now realized the position, have taken prompt action, and have sent a deputation to the Board of Agriculture to endeavour to get the grant diverted to Cardiff College. The whole difficulty would vanish if the counties could be induced to co-ordinate their schemes and to place their agricultural education under the control of the college.

University College, Bangor, has taken the important step of establishing two advisory lectureships, the holders of which will devote themselves to the investigation of special problems affecting agriculture and the giving of scientific advice to farmers. These appointments have been made possible by the special grant from the Board of Agriculture.

The new lecturer in Agricultural Chemistry is Mr. G. W. Wellington, B.A. (Cantab.), and Dr. J. Lloyd Williams has been appointed Lecturer in Agricultural Botany.

The half-yearly meeting was held at Llandrindod Wells, on May 17, with Sir Edward Anwyl, M.A., in the chair. There was a somewhat acrimonious discussion on a motion by Alderman D. H. Williams, "That the Board re-affirms its desire that municipal secondary schools, aided and maintained under Part II of the Education Act, 1902, should be inspected and examined by the Central Welsh Board." The Board of Education have refused to insert this power in its amending scheme. Some strong expressions as to the action of the Board were used—especially in the speeches of members from the counties of Glamorgan and Monmouth who appear to have had special difficulties in dealing with the Welsh Department. Both these counties recommend the inclusion of their secondary schools of all types under the control of the Board, so as to unify their system of secondary education. They were against isolating their secondary schools, and placing them outside the national system. Principal Roberts, of Aberystwyth College, in supporting, stated that they were face to face with a vital principle, and that everything should be done to secure national unity. The Chief Inspector, Mr. O. M. Edwards, defended the action of the Department in a somewhat strong speech—for an official. But the difficulties he raised are undoubtedly real, and cannot be ignored, however strong the feeling may be in favour of concentrating all secondary education under the control of the Central Welsh Board. He denied resolutely that the Welsh Department had shown special favour to the municipal secondary schools, but he protested that it was unfair to regard them as outside the national system. The Local Authorities alone were responsible for the establishment of secondary schools outside the Welsh Act. If we may judge from the tone of the reply of the Chief Inspector, the Central Board will not secure the desired powers without a strenuous fight.

Central Welsh Board. liams, "That the Board re-affirms its desire that municipal secondary schools, aided and maintained under Part II of the Education Act, 1902, should be inspected and examined by the Central Welsh Board." The Board of Education have refused to insert this power in its amending scheme. Some strong expressions as to the action of the Board were used—especially in the speeches of members from the counties of Glamorgan and Monmouth who appear to have had special difficulties in dealing with the Welsh Department. Both these counties recommend the inclusion of their secondary schools of all types under the control of the Board, so as to unify their system of secondary education. They were against isolating their secondary schools, and placing them outside the national system. Principal Roberts, of Aberystwyth College, in supporting, stated that they were face to face with a vital principle, and that everything should be done to secure national unity. The Chief Inspector, Mr. O. M. Edwards, defended the action of the Department in a somewhat strong speech—for an official. But the difficulties he raised are undoubtedly real, and cannot be ignored, however strong the feeling may be in favour of concentrating all secondary education under the control of the Central Welsh Board. He denied resolutely that the Welsh Department had shown special favour to the municipal secondary schools, but he protested that it was unfair to regard them as outside the national system. The Local Authorities alone were responsible for the establishment of secondary schools outside the Welsh Act. If we may judge from the tone of the reply of the Chief Inspector, the Central Board will not secure the desired powers without a strenuous fight.

The Welsh Department have probably adopted their present attitude towards this demand because they fear that, if it is granted, all our secondary schools will ultimately conform to a common type; and, if all patriotic sentiment can be laid aside, it must be allowed that there is a great deal to be said in support of their contention. The secondary schools were established for the express purpose of educating children who finished their education about sixteen years of age, and were not, at first, at all events, intended to compete with the intermediate schools. But there is a real danger that if the Central Board is the inspecting and ex-

aming body the work in the two types of schools will be very similar, and that we shall have very undesirable competition between adjacent schools. The danger of this may not be so great in the counties, but in the boroughs of Swansea and Cardiff it would be real and serious.

In consequence of the King's visit to Cardiff, on June 26, it has been decided to postpone for one week, at all three centres, the June Matriculation Examination, so that it will now begin on Monday, July 1.

SCOTLAND.

The General Council of Glasgow University devoted the greater part of its spring meeting to another long discussion on the proposed inclusive fee. The discussion was rather a rambling one, and some of the speakers were in a mood of protest against the Treasury, the Carnegie Trust, and the University Court. In the end the report of the Business Committee, which maintained the policy of opposition already adopted by the Council, was accepted by a majority against a motion in favour of approving the action of the four University Courts. The Council's resolution was afterwards submitted at a meeting of the University Court. The Principal pointed out that any proposal to modify the scheme of inclusive fees which had been adopted by the four Universities was a proposal to rescind something which the Court had already done in agreement with the other Universities, and which had been intimated to the Treasury. It was agreed to reply to the Council, stating that the points to which attention had been directed will be brought up for discussion at another conference between the four Universities. Glasgow University Court has appointed Mr. Steuart Miller, M.A., to be Lecturer in Roman History and Antiquities, for a period of four years from next October. The foundation of this lectureship, along with that on Greek History, will make it possible to institute an honours group in Ancient History for the M.A. degree.

At Aberdeen University, Prof. Pringle-Pattison is delivering his first course of Gifford Lectures during the present term. Mr. Andrew Carnegie, the Lord Rector, will give his inaugural address on June 6.

The principal business at the spring meeting of the Edinburgh University General Council was the consideration of a proposal by Mr. Alexander Morgan, D.Sc., for the institution of a post-graduate degree in Education, with the title of Bachelor of Education. Following the analogy of the B.D. and LL.B. degrees, the new degree would be open to candidates who have already taken a degree in Arts or Science, and the normal length of the combined course of study for the two degrees would be five years in the case of ordinary graduates, and generally six years in the case of honours graduates. The subjects of study for the degree in education would be (1) logic or moral philosophy, (2) general psychology, (3) special psychology (half course), (4) principles of education, (5) history of education, (6) experimental pedagogy (half course), (7) comparative education—present-day school systems at home and abroad (half course), (8) school organization and administration. In addition, there would be required evidence of having undergone a sufficient course in the theory and practice of teaching, a reading knowledge of French, German, or Italian, and a thesis embodying the results of investigation in some part of the field of education. The whole of the teaching required can already be obtained either in the University or in the Provincial Training College. The Council resolved by a majority to transmit the proposal to the University Court. A degree on some such lines as these would be of considerable service to the teaching profession, and it is to be hoped that the University may find it possible to institute it.

Aberdeen Provincial Committee proposes to purchase the property of Hilton, Aberdeen, for the purpose of building four hostels, each to accommodate fifty students. The total cost of site, buildings, furnishings, &c., is estimated at £33,000, of which one-fourth would be payable by the Provincial Committee. The annual cost of maintenance is estimated at £1,360.

At a meeting in Edinburgh, on May 18, it was resolved to form a Geographical Teachers' Association for Scotland. Mr. G. G. Chisholm, Lecturer in Geography at Edinburgh University, was elected chairman of the Association, and Mr. T. S. Muir, Royal High School, Edinburgh, was appointed as secretary.

The second Secondary Education Congress, promoted by the Secondary Education Association of Scotland and the special associations in connexion with modern languages, English, history, mathematics, science, and art, was held at Edinburgh, on May 18. The Lord Advocate, Mr. Ure, gave the opening address, and the Congress afterwards met in various sections.

It is believed that the Education Department intends to alter

the method of conducting the qualifying examination for pupils of primary schools by introducing the system of individual tests, on the analogy of the Intermediate and Leaving Certificate Examinations. The Council of the Educational Institute have had the matter under consideration, and have passed the following resolutions:—(1) "The Council enter an emphatic protest against the introduction of a system of uniform external examinations for pupils at the qualifying stage, as they believe it would inevitably lead to a reimposition of the old 'standard' system, under which the country so long suffered." (2) "That should an external examination be introduced, in spite of the protest, teachers must not be expected to correct the papers." The Department has not made any official statement of its intentions; but it has declared that statements on the subject which have appeared in the newspapers are misleading in several important respects.

IRELAND.

At a meeting of the Senate of the National University, on May 24, the following appointments were made:—**The Universities.** Power, M.A., B.Sc., to be Professor of Mathematics in University College, Galway; and Henry J. Maloney, to be Professor of the Law of Real Property in University College, Cork, from October 1, 1912.

The Educational Supplement of the *Times* for May 7 contains an interesting article reviewing the progress of the National University from its foundation, the agitation for "compulsory Irish," the County Council Schemes, &c. Statistics go to prove that the University is on a fair way to success and has given a stimulus to higher education in Ireland, the number of students in the Dublin College being 755 this year, as against 527 in 1909-10, while the numbers in Cork and Galway have risen from an average of 216 and 105 respectively during the years 1898-1908 to 425 and 155 in the present year. In Connacht three counties have struck rates for scholarships, and in 1912 15 scholarships of £35 a year, tenable for three years at Galway College, are open to competition. In Munster, Kerry and Cork provide 14 scholarships, varying in value from £24 to £50, and tenable for three years at Cork College; while the Cork Council in addition gives 2 post-graduate studentships of £150 a year (tenable for three years).

Waterford, Limerick, Tipperary (North and South), offer a number of scholarships, tenable either in Cork or University College, Dublin. When the County Council Schemes are in full work, it is estimated that the National University will get over £12,000 yearly from them. In addition, Galway and Cork Colleges already give substantial sums (£1,500 and £2,200 respectively) in scholarships and exhibitions; and Cork College has recently benefited by the generosity of two Cork ladies—the Misses Honan.

The *Times* article concludes with a reference to the loss of time and money involved in the working of a federal University and the growing need for the development of the constituent colleges into independent Universities—a claim which is strongly put forward by Cork, though opposed so far by the President of the Galway College.

The vacancies left on the First Senate of Queen's University, Belfast, by the death of Sir Robert Hart and Mrs. Margaret Byers, have been filled by the appointment of Sir John Newell Jordan, K.C.B., K.C.M.G., Pro-Chancellor of the University, and of Mr. John Milne Barbour, M.A., D.L.

The sum of £25,000 has been placed at the disposal of the Vice-Chancellor by the Misses Riddell, of Belfast (already generous benefactors of the University), for the erection of a Hall of Residence for women students.

Trinity College, Dublin, has received a fresh instance of the interest always taken in it by Viscount Iveagh in a gift of £10,000 to be devoted to research work, apparatus, &c., in geology and mineralogy.

A Bill to amend the Intermediate Education Act has just been presented by Mr. Thomas O'Donnell, M.P. It empowers the Intermediate Board to dispense with public examinations, if they think fit, and make payments to schools dependent on the results of inspection or the number of pupils who have entered from elementary schools by means of free places; to establish and equip schools in places where they are needed and to equip existing schools; to keep a register of teachers who satisfy its conditions, fees being paid only to schools which employ registered teachers; to co-operate with the Department of Agriculture in making special grants for agricultural training; to give leaving certificates in secondary

OUTLINES OF INORGANIC CHEMISTRY. With Special Reference to its Historical Development. By E. B. LUDLAM, D.Sc., F.C.S., Head of Chemical Department, Clifton College. With Introduction by Prof. Sir WM. RAMSAY, K.C.B., F.R.S. 4s. 6d.

THE ELEMENTS OF INORGANIC CHEMISTRY. For use in Schools and Colleges. By W. A. SHENSTONE, F.R.S. With nearly 150 Illustrations and a Coloured Table of Spectra. Revised and Partly rewritten by R. G. DUKKANT, M.A., Assistant Master at Marlborough College. 5s.

London : EDWARD ARNOLD, 41 & 43 Maddox Street, Bond Street, W.

schools which will entitle the holders to enter the Universities without further examination. The County Councils will be empowered to raise a rate not exceeding 3d. in the £ for secondary education.

The work done for Irish secondary education by the Department of Agriculture and Technical Instruction since its initiation in 1900 was reviewed by Mr. George Fletcher, F.G.S., in an address to the Royal Society of Arts in London, at the end of last month. The Department works in co-operation with the Intermediate Board, having its own Inspectors and dispensing its own funds. In the present year there are 278 schools (with 14,516 individual pupils) taking the science courses, as against 154 in the first year; in 62 of these schools domestic economy is taught, and in 66 manual instruction. The total amount of grant earned in 1900-1 was £2,366; during the past session it was £27,955. The lecturer spoke highly of the work done in the schools.

The question of National Insurance is occupying the public mind at present, and a meeting of the Women's Branch of the Secondary Teachers' Association was held at Alexandra College, Dublin, on April 20, to consider its effect on women teachers, Miss White being in the chair. Miss Buchanan, P.L.G., explained the working of the Insurance Act and spoke particularly of the Irish Health Insurance Society, of which she was a member, and the advantages it offered to women teachers. Miss Cunningham, of Trinity Hall, following, advocated the Secondary and University Teachers' Insurance Society as especially likely to meet the wants of women teachers. There were, indeed, inevitable drawbacks in Irish teachers joining an English society, but apart from these the society promised to work successfully; Irish teachers would not have to pay the extra 2d. demanded of English ones and would not receive the medical benefit.

The subject of registration was dealt with by the same Association at a subsequent meeting in the Dominican College, Eccles Street, on May 10, when Miss Scott and Miss Boardman gave addresses. Both speakers emphasized the necessity of registration in order to raise secondary teaching to the level of a profession and secure adequate salaries. Miss Boardman described the conditions prevailing in France, where teachers were Civil servants and special training as well as a University degree were necessary qualifications both for women and men—where, on the other hand, favourable conditions of work, salaries which seem Utopian in Ireland, security of tenure, and pensions on retirement were part of their lot. She also spoke of the state of affairs in Germany. She considered that the schemes of registration so far suggested by different bodies in Ireland put the standard of qualification too low; that adequate remuneration could only follow adequate qualification.

On the other hand, we are informed that provision has been made in the Estimates for this year for an increase in the grant to the Irish National Teachers' Pension Funds and that new rules (which will not be retrospective) will be drawn up with regard to them as soon as possible.

Mr. Birrell, who has had sundry questions on the subject of Irish education to answer in the House during the past month, mostly from members who fear that the passing of the Home Rule Bill will be followed by the extinction of the Protestant in Ireland and the abolition of Belfast University, took occasion recently (May 8) to disclaim the responsibilities of the Chief Secretary as Minister for Education in Ireland. The absolute control of Irish education lay with the National and the Intermediate Boards; the functions of the Chief Secretary, who was not a member of either and was excluded from their meetings, were solely to answer questions in the House about their working, and to see that when any member of them died his successor was chosen from the same religious denomination; in all essential matters he was a mere gramophone.

The question of school attendance and the unsatisfactory working of the Irish Education Act of 1892 in this respect was dealt with, on April 26, by Mr. Frederick W. Ryan in a paper read before the Statistical and Social Inquiry Society. The average daily attendance in Dublin was 87 per cent. of those on the register. The lecturer dealt with the causes of the evil—the prevalence of juvenile street trading in Dublin, the insufficient number of school inspectors (there are eighteen to control the attendance of 45,000 children), the home conditions of the pupils, most of whom belonged to families leading often an almost nomadic existence in one-room tenements; and the low standard of parental responsibility encouraged by the Act as it stood; and suggested as remedies the enforcement of a small weekly or monthly fee on parents or a national school tax and the establishment of continuation schools for juvenile workers.

MESSRS. METHUEN'S NEW BOOKS.

PRACTICAL GEOMETRY FOR SCHOOLS.

By SIDNEY A. SWITZER, Art Master and Honours Medallist in Geometry, Examiner to the Examinations Board of the N.U.T. Fully Illustrated. Crown 8vo, 2s.

This up-to-date text-book is the result of twenty years' practical experience. It is designed to assist Art Students generally, and is suited to the requirements of candidates taking the Board of Education, Oxford and Cambridge Local, and College of Preceptors Examinations. The problems are well graduated; suggestive dimensions are inserted in their enunciation; and they are all illustrated. Each page is self-contained, so that there is no turning over in the study of any one problem. Each page has a corresponding set of exercises. These exercises are mostly original.

QUALITATIVE ORGANIC ANALYSIS.

By F. B. T. THOLE, B.Sc., F.C.S., Lecturer in Organic Chemistry, East Ham Technical College. With an Introduction by A. E. DUNSTAN, D.Sc., F.C.S., Head of Chemical Department, East Ham Technical College. With Diagrams and Illustrations. Crown 8vo, 1s. 6d. [Text-books of Science.]

This book is reprinted, with additions, from the authors' "Practical Chemistry for Technical Institutes" in such a form as to be self-contained. It deals with Organic Qualitative Analysis, both of simple compounds and mixtures. A large range of organic derivatives is dealt with, and the author confidently believes that the scheme will carry a student through the Organic Section of his Honours Degree Course.

A complete list of melting and boiling points is given, the substances being classified into their groups. Throughout, conciseness and compactness have been aimed at, so that the student will have the information needed always at hand in an accessible form.

AN INTRODUCTION TO QUANTITATIVE ANALYSIS.

By S. J. M. AULD, D.Sc. (Lond.), Ph.D. (Würzburg), F.I.C., F.C.S., Head of the Chemical Department, South-Eastern Agricultural College, Wye. With many Diagrams. Crown 8vo, 5s. [Text-books of Science.]

This book is a carefully selected study of the elements of Quantitative Analysis, providing a thorough introductory course whereby the student is prepared for his more specialized analytical work, details and considerations of which are best obtained from the standard treatises and monographs.

Duplication is largely avoided by giving alternative methods for subsequent estimations of the same type. The book is brought quite up to date by the inclusion of well-attested modern methods. Special features are a theoretical chapter on indicators, and a description of exact laboratory methods for the determination of equivalents, &c.

The text-book contains all the inorganic quantitative work required for the Board of Education Examinations and the later and final B.Sc. Courses.

PHYSICO-CHEMICAL CALCULATIONS.

By JOSEPH KNOX, D.Sc., Lecturer on Inorganic Chemistry, Aberdeen University. Cr. 8vo, 2s. 6d. [Text-books of Science.]

This book is intended for students of physical chemistry, as a supplement to the theoretical matter of lectures and text-books. Here the theory is applied to the solution of practical problems. The book contains eleven chapters, dealing with the main subdivisions of physical chemistry. Each chapter consists of a short introduction dealing with the theory required for the solution of the problems, a series of typical problems with complete solutions, and a list of problems for solution with answers. Practically all the problems have been taken from the original literature of the subject, and by a careful study of the solved problems the student should learn much. The large collection of problems for solution should prove useful to teachers.

A FIRST YEAR PHYSICAL CHEMISTRY.

By T. P. HILDITCH, D.Sc. Lond., F.I.C. Crown 8vo, 2s.

[Text-books of Science.]

An attempt to render this branch of Chemistry more easy to those commencing its study. The more elementary outlines of the subject are treated, as far as possible, from the standpoint of practical use in solving chemical problems; accordingly, the first part of the book is devoted to characteristic properties, such as density or refractivity. Later chapters include introductions to the physico-chemical theories of gases and of solutions, and the more important applications of these theories to pure chemistry. The book should prove useful to Inter. B.Sc. and Final (Pass) B.Sc. candidates, as well as those taking Board of Education examinations.

METHUEN & CO., LTD.,
36 Essex Street, Strand, London, W.C.

THE LONDON Central Institute for Swedish Gymnastics,

16, 17, & 18 Paddington Street, Marylebone, W.

Telephone: 872 Mayfair.

The School World says: "This college for men students . . . will provide a first year's course fitting students for posts in elementary schools, and a second year's course enabling the graduate to take charge of any school of whatever standing. Anatomy, physiology, theory of movements, hygiene, and kindred subjects necessary for a complete grasp of physical training will be taught by experienced teachers. This will be a noteworthy addition to the facilities for training in this subject. . . . this new college has been most cordially welcomed by the Parliamentary Secretary representing the Board. . . . As a sign of progress, and in the hope of a better future for the physique of the youth of the nation, the new 'Central Institute' will be cordially welcomed."

PUPILS ARE NOW RECEIVED.

The Institute also undertakes the instruction in Physical Exercises on the Swedish System for Schools in the neighbourhood.

Recreative Classes—Gymnastics and Fencing—are held in the afternoons and evenings.

For particulars apply to the Principal—

ALLAN BROMAN,

From the Royal Central Institute of Gymnastics, Stockholm.

ORA MARITIMA SERIES.

Edited by Prof. E. A. SONNENSCHNEIN, D.Litt. (Oxon.).

Each of the Readers in the Series (illustrated with pictures and maps) consists of a continuous story written in the language to be studied, and so constructed as to form the basis of a systematic study of Grammar. They thus combine the interest and vitality of a real story with a thorough training in the fundamentals of the language concerned.

The terminology recommended by the Joint Committee on Grammatical Terminology in their Report of 1911 is adopted in the new volume and the new edition of "Am Rhein."

NEW VOLUME NOW ON SALE.

EN VACANCES. A French Story for Beginners. With Grammar and Exercises on the Elements of the regular Accidence. By M. I. EBBUTT, M.A., and ANATOLE LE DU, Professeur Agrégé de l'Université. Cloth 8vo, price 2s. (subject to discount).

This volume has been added to the Requisition List for Senior Departments by the London County Council.

"The merits of the Ora Maritima Series need no commendation from us. It will be remembered that the scheme of these books is to present a simple but interesting story, of which each chapter is devoted to the inculcation of some particular grammatical feature, and (as far as may be) no other grammatical feature is included unless it has been learned by means of a preceding chapter. In the present instance the subject chosen is the life of a French family during the summer holidays, and we think the authors may rest assured that their work in no ways falls short of the high standard which the earlier volumes of the series have set."—*Secondary Education*, March 15th, 1912.

"A thoroughly intelligent and interesting method of teaching the French language. Each chapter of the story (composed expressly for the purpose) deals with, and confines itself to, one or more particular grammatical features of French, and thus the young pupil is led on step by step, taking the comparatively uninteresting grammar part in small doses. The same method, called the *Ora Maritima* system, has been used successfully in the teaching of elementary Latin and Greek."—*The Guardian*, January 13th, 1912.

PREVIOUS VOLUMES.

1. **ORA MARITIMA.** A Latin Story for Beginners. With Grammar and Exercises on the Elements of the regular Accidence. By the Editor of the Series. **Seventh Edition, 1912.** Cloth 8vo, price 2s. (subject to discount).

Adopted as a prescribed subject for the Cambridge Preliminary Local Examination of 1912.

"*Ora Maritima* is just A1, clearly right in conception and admirably executed."—P. A. BARNETT, H.M. Chief Inspector for the Training of Teachers.

2. **SUPPLEMENTARY EXERCISES to ORA MARITIMA.** By Miss M. L. STAFFORD SMITH, M.A., Head Mistress of the Durham High School for Girls. Limp Covers, price 1s. (subject to discount).

3. **PRO PATRIA.** A Sequel to "Ora Maritima." With Grammar and Exercises to the end of the regular Accidence. By the Editor of the Series. **Second Edition.** Cloth 8vo, price 2s. (subject to discount).

"We have adopted both *Ora Maritima* and *Pro Patria* in our Latin classes at Manchester Grammar School."—J. L. PATON, High Master of the Manchester Grammar School.

"I have had both books prescribed for use in our earliest standards. They were acknowledged by the committee which passed them to be unequalled for the interesting way in which they present the subject. I think no praise is too high for them."—W. G. WEDDERSPOON, M.A., H.M. Inspector of European Schools and Training Colleges, Burma.

4. **THE GREEK WAR OF INDEPENDENCE.** A Greek Story for Beginners on the same lines as "Ora Maritima" and "Pro Patria." With Grammar and Exercises to the end of the regular Accidence. By C. D. CHAMBERS, M.A. A new edition will be issued immediately. Cloth 8vo, price 3s. (subject to discount).

"Felicitous in design and able in execution."—*The Journal of Education*.
"It gives reality and interest to the early study of Greek."—*Educational Times*.
"We strongly recommend the book to all schoolmasters."—*The Oxford Magazine*.

5. **AM RHEIN.** A German Story for Beginners. By Professor K. WICHMANN, Ph.D. **Second Edition, 1912.** Cloth 8vo, price 2s. (subject to discount).

"The adventures of Siegfried, related by Professor Wichmann in that simple and graceful narrative style to which both the story and the German language lend themselves so well, will commend themselves to the schoolboy."—*Modern Language Teaching*.

The Publishers will be happy to send a free copy of any of the volumes in this series to teachers who make application for them with a view to their introduction.

KEGAN PAUL, TRENCH, TRÜBNER & CO., Ltd.,
Broadway House, Carter Lane, London, E.C.

The accounts recently furnished to Parliament of the Ireland Development Grant for the financial year ending March 31, 1912, show that out of available assets of £197,455. 14s. 8d. the following sums were dispensed on Irish education:—To the Department of Agriculture and Technical Instruction, for technical instruction, £7,000; and to the Commissioners of National Education, for scholars in training colleges under private management, £4,375; making a total of £11,375.

SCHOOLS.

CHELTEMHAM LADIES' COLLEGE.—The Summer Term began on May 3. On the two preceding days an Entrance Scholarship Examination was held and scholarships of £30 a year for three years were awarded to K. Dawes and J. Poignand. Fifty-three new pupils entered, of whom four came from South Africa, two from Australia, one from the United States, and two from Germany. The death of Mr. Domenico Barnett, for forty-five years a member of the Music Staff, necessitated the appointment of a pianoforte teacher. Mr. Percival Garratt has been appointed. The biennial meeting of the Guild of Former Pupils of the College will be held at the end of June. Addresses will be given by the Principal and by Dr. C. R. Parkin, C.M.G. Members of the Guild will act "Achilles in Scyros," by Mr. Robert Bridges, for which the music has been composed by Dr. Rootham, of Cambridge. On Empire Day, May 24, an address was given by Mr. Howard Kennedy. On Foundress Day, June 1, an account of Miss Beale's work will be given by Mrs. Griffiths, a former member of this Staff. Mr. Henry Newbolt has undertaken to give two lectures on Poetry in July. Arrangements are being made for a demonstration to be given, probably on November 23, in the Princess Hall, by M. Jaques Dalcroze, of Hellerau, Dresden. Assisted by a party of his students, he will explain his system of rhythmic gymnastics.

HARROW, THE COUNTY SCHOOL.—The School continues to increase in numbers and now contains 212 boys and eleven masters. The latest addition to the staff is Mr. H. Weaver, B.Sc., of the Caterham School. The Scout Troop, which has attracted considerable attention because of its attempt to make Scouting an adjunct to school work and games, contains over 170 boys. At present an interesting experiment is being carried out; the boys are camping on the

school ground in small batches. They attend school in the usual way, but have to look after their own beds, food, and boots. A successful Parents' Night has been held; 255 anxious fathers and mothers came to interview and to criticize, all in the kindest of moods.

PRIZE COMPETITIONS.

The Translation Prize for May is awarded to "Cairngorm." *Proxime accessit* "Illumined."

The winner of the Translation Prize for April is Allen H. Powles, Esq., Newnham Terrace, Cambridge.

Dix ou douze années, dans le milieu du 18^e siècle, virent se déployer plus de talents divers, s'accomplir plus de destinées littéraires, se consommer une révolution littéraire plus importante, qu'il ne s'est jamais vu peut-être en aucun pays et dans un espace de temps beaucoup plus long.

Jusque dans les plus blâmables excès de cette école, on doit reconnaître l'inévitable réaction de la liberté de penser trop longtemps comprimée. Il y a peu de modération à prétendre de l'esclave qui brise ses fers. La pensée, au 18^e siècle, ne s'exerce pas, elle se venge. Et que de griefs suscitait ou réveillait imprudemment tout ce vieux monde prêt à crouler! L'exaspération naturelle à toute tyrannie qui s'en va, la ténacité désespérée qui s'acharne à tout conserver précisément parce que tout lui échappe, enfin cet effet d'optique qui, sur un fond toujours plus lumineux, multiplie et, pour ainsi dire, rend plus visibles les ténèbres, tout cela justifie l'indignation, peut excuser la violence et l'exagération, explique l'injustice et la mauvaise foi chez les agresseurs du passé.

Surtout on comprend qu'un esprit imperturbable de méthode et la patience des déductions, n'aient pas caractérisé la philosophie d'une telle époque. Les philosophes du 18^e siècle ne sont pas de paisibles rêveurs : entourés d'un ordre de choses ou plutôt d'un désordre qui les blesse, ils en appellent à la raison, à la justice, à la nature ; ils sont les hommes du présent, les champions d'intérêts vivants. Leur philosophie n'est point proprement scientifique ; mais, au milieu d'eux, une école qui peut mériter ce titre, conduit méthodiquement aux mêmes résultats qu'ils poursuivaient avec une ardente préoccupation. C'est l'école de Condillac, qui, rapportant uniquement aux sens l'origine de nos idées, et réduisant le rôle de l'âme à une *sinécure* mal dissimulée, dirige vers le matérialisme les esprits déjà matérialistes par anticipation.

By "CAIRNGORM."

Some ten or twelve years in the middle of the eighteenth century witnessed the unfolding of more varied talent, the making of more literary reputations, and the consummation of a more important revolution in the realm of literature than has perhaps ever been seen in any country and in a much longer space of time.

Even in the most culpable exercises of this school, we must recognize the inevitable reaction from the too lengthy suppression of the liberty of thought. We can demand but little moderation from the slave who breaks his chains. Thought in the eighteenth century did not merely try its powers, it took its revenge. And how many grievances were not aroused or imprudently brought into being by that old world which was so soon to crumble away! The exasperation natural to every species of decaying tyranny ; the desperate tenacity which strives to preserve everything merely because everything is escaping from its clutches ; last of all, that optical illusion which makes shadows stand out more plainly and appear more numerous when seen against a background which keeps becoming brighter—all that justifies the indignation, excuses the violence and exaggeration, and explains the injustice and bad faith so often found among those who attacked the past. We can easily realize that the philosophy of such a period was not characterized by untiring method and patient deduction. The philosophers of the eighteenth century were not peaceful dreamers ; surrounded by an order or rather a disorder of things which grieved them, they appealed to reason, justice, nature ; they are men of the

present, champions of living interests. Their philosophy is not, properly speaking, scientific ; but among them was a school which might deserve this title, and which led methodically to the same results which they pursued with ardent zeal. This was the philosophical school of Condillac, who referred the origin our ideas to the senses alone, degraded the function of the mind to an ill concealed *sinécure*, and thus directed towards materialism minds already materialistically inclined.

We classify the 185 versions received as follows :—

First Class.—Accinctus, Jappy, Sapiens, Illumined, Gustave, Unsigned, Lorelei, Pix, Kennanmore, Margherita, Muguët, Katty-Ann, Cairngorm, Menevia, Dunboy, Tom Brown, J.E.M., E.A.M., W.B.D., Augusta Crawley.

Second Class.—Charity, Hélène, Ethelreda, Rosemary, Pierette, Plumtree, Cymro, H.F.L., Hyacinth Vere de Vere, Machin, H.C.B., Veritas, Acanthus, Amarylly, String cutter, Magdel, Old Savilian, Sirach, Daphne, Vigoriensis, Taugenichts, La Pensée, Ailsie, Claire, Oxoniensis, Ephur, Nutcracker, Florizel, Infelix, Espérance, Agnotus, Hibernia, Hump, Agabus, Lima, S.M.M., C.M.B., Griffonneuse, Chingleput, Frances, Dane, Zero, Mergy, Martin, W.H.S., Lyne, Lucretia, Aline, Shimnab, La Folie, Caterina, C.W., Moriando vivo, Oxonia, Palmer, Fortes et fidelis, Great Western, Tacitus, Lilac, Roys, Andromache, Entente cordiale, Ady Taddy, Goodman.

Third Class.—Borealis, Terraux, Mort, Côte d'Emeraude, En Avant, Mars, Sunny Jim, Rursus, L.W., Belcaro, Lesbia, N.G., Kalamake, Yerog, M.P., Patience, T.T.C., Norris, Johan, Karin, Annulus, Greenfinch, Parisien, Ger, Ouida, Primrose, M.J.G., Smaragdus, Hawthorn, Péra, Den, Kussie, Gorse, Ever the same, S.G.D., Tiers, Mus Ridilulus, Japxy, Poum, Hesperus, C.C.S., C.E.M., L.A.B., Logan, S.C., C.E.G., Corcaig, A.D., Boiteux, Gemma, Aixoise, Alberta, Dumps, A.A., Sphinx.

TRANSFER AND PARTNERSHIP DEPARTMENT.

MESSRS. GABBITAS, THRING, & CO., having upon their books at all times a large number of thoroughly *bona fide* Boys' and Girls' Schools for Transfer and Partnerships in such Schools to negotiate, as well as the names of a very large number of Purchasers, both ladies and gentlemen, are able, with their thirty years' experience, to negotiate the Transfer of Schools of all types confidentially and efficiently.

The Transfer Department is in the hands of one of the Principals, who personally attends to all instructions.

Valuations are carefully made.

No list of any kind is issued—all instructions being strictly confidential—but each Client receives individual attention on receipt of detailed particulars.

No commission is charged to purchasers.

Walter, E.A.T., Pollen, Unda, R.L.M., Ponto, Swallow, Colomba, Nix, P.G.A., Nonsuch, Porgie, Carter, U.N.

In the Vinet there was one "growler" on which a number of liners made shipwreck—"the exasperation *against* any tyranny." "The fulfilment of more literary destinies" occurred with damnable iteration, instead of "more authors who accomplished their predestined task," or, less literally, "more successful literary careers." "By any country in a far longer period of time"; "and" is superfluous. Reaction "against" or "from," not "of," is the natural construction. "Is breaking" or "breaks," not "has broken" or "has just broken." "Thought in the eighteenth century seeks rather to avenge itself than to try its wings," or "retaliation rather than free play occupies the thought of the eighteenth century." "Griefs," for "grievances" or "wrongs," is a howler. "The optical illusion [not "effect"] which, as the background grows lighter and lighter, multiplies the shadows and makes darkness visible." "So to speak" is not needed in English, but "to multiply darkness" would be a strained phrase. "Aggressors of the past" is ambiguous. *Blessed* requires something stronger than "hurts," "annoys"—"wounds them to the quick," "outrages." "It is the school" is a gallicism; "this was" or "I refer to." "An ill disguised sinecure," or its equivalent, was almost universal; to make the sense clear we need rather "with hardly an attempt at concealment," "in scarcely veiled language."

Prizes of One Guinea each are offered for the best translations of the following passages from French and Latin:—

Des confidences particulièrement dignes de foi nous ont guidé dans le cours de ce récit. La partie du public dont l'intérêt passionné s'attachait naguère au mystère dramatique d'une brillante existence parisienne peut donc lire ces pages avec confiance: elle y trouvera la vérité même sur le caractère et la destinée d'un homme qui nous paraît être une des physionomies les plus expressives de son temps et de son pays.

Dire d'un scélérat qu'il était né scélérat, d'une femme légère qu'elle était née courtisane, c'est une vaine et triste parole qu'on entend chaque jour et qu'on lit partout. Cette banalité a l'incon-

venient de renverser en passant quelques notions de morale encore accréditées dans la foule. Si l'homme n'est responsable de ses actes que devant la gendarmerie, à la bonne heure; mais, tant que l'humanité ne se sera pas rendue tout entière à cette croyance aussi élevée que salutaire, il faut tâcher de se persuader et de persuader aux autres qu'il n'y a point de fatalités de naissance. Cela est tout au moins encourageant pour les pères qui se donnent la peine d'élever leurs enfants, et pour les gens de bien qui se dévouent à l'éducation populaire.

Tu vero felix, Agricola, non vitae tantum claritate sed etiam opportunitate mortis. Ut perhibent qui interfuerunt novissimis sermonibus tuis, constans et libens datum excepisti, tanquam pro virili portione innocentiam principi donares. Sed mihi filiaque eius praeter acerbiter parentis erepti auget maestitiam quod assidere valetudini, fovere deficientem, satiari vultu complexuque non contigit. Excepissemus certe mandata vocesque quas penitus animo figeremus. Omnia sine dubio, optime parentum, assidente amatissima uxore superfuere honori tuo; paucioribus tamen lacrimis compositus es, et novissima in luce desideravere aliquid oculi tui. Si quis piorum manibus locus, si, ut sapientibus placet, non cum corporibus extinguerentur magnae animae, placide quiescas, nosque domum tuam ab infirmo desiderio et mulieribus lamentis ad contemplationem virtutum tuarum voces, quas neque lugeri neque plangi fas est.

Initials or a nom de guerre must be adopted by ALL competitors, but the prize-winners will be required to send real names for publication.

All competitions must reach the Office by June 16th, addressed "Prize Editor," THE JOURNAL OF EDUCATION, 3 Broadway, Ludgate Hill, E.C.

Those in the First Class are entitled on application to a copy of "Essays, Mock Essays, and Character Sketches."

Translations sent with an addressed and stamped envelope and six penny postage stamps will be returned corrected. Foreign postage stamps are not accepted.

Translations will not be returned unless both these conditions are complied with.

GIRLS' SCHOOL TRANSFERS.

MESSRS. GABBITAS, THRING & CO.,
36 SACKVILLE STREET,
PICCADILLY, W.
(Established 1873.)

TRANSFERS OF AND PARTNERSHIPS IN GIRLS' SCHOOLS.

Messrs. GABBITAS, THRING & Co. have a large number of Girls' Schools on the books of their Transfer Department, but issue no list of such Schools. On learning a Purchaser's qualifications and requirements, they will send to her notices of opportunities likely to suit her.

The following are a few of the Schools now on their books:—

No. **TRANSFER** of good-class Boarding 4,973. School at a favourite health resort receiving regularly Pupils from Orphan Association maintained by certain Banks, which always has at least 10 Pupils at the School. Now 26 Boarders. Prospectus fees from 40 to 60 guineas, paying from 26 to 50 guineas. Gross receipts nearly £700. £600 or near offer for Goodwill and for furniture, the furniture being probably worth about £500.

No. **TRANSFER** of licensed Boarding 4,968. House of a Girls' High School, situated at Inland Health Resort. Vendor giving over owing to death of relative. House opposite the School containing 23 rooms, leased at £135, terminable in June 1914. Now 10 Boarders and 3 Mistresses. Purchaser must be approved by Principal of School. For Goodwill and furniture only £400.

No. **TRANSFER**, owing to death, of old-established Boarding and Day School at South-West Coast Resort in delightfully situated house, containing about 20 bedrooms, with grounds, 23 Pupils. Prospectus fees for Boarders 75 to 90 guineas. Receipts at the rate of over £900 per annum. Price for goodwill and all school and household furniture, &c., £1,000.

GIRLS' SCHOOL TRANSFERS.

No. **TRANSFER** of large Day School in a 4,964. healthy suburb of an important Irish City, containing about 80 Day Pupils at prospectus fees of £2.5s. to £4.10s. per annum, with considerable extras. Prospectus fees for Boarders £40 per annum. Gross receipts £300. School very flourishing and good opening. Price £200 for Goodwill and furniture.

No. **PARTNERSHIP** in flourishing School 4,963. for Gentlemen's Daughters in the Home Counties. Partner required to assist in extension. About 12 Boarders and 30 Day Pupils. Prospectus Fees of £75 to £100 and about £30 per annum respectively. To be divided into different departments in separate houses. Present profit about £300, and pupils being refused.

No. **PARTNERSHIP** in old-established 4,954. Boarding and Day School, at a South Coast Resort. Inexpensive School, but strictly for the daughters of gentlemen. Senior Partner proposing to retire. About 15 Boarders and 8 Day Pupils. Prospectus Fees 60 guineas for Boarders and 9 to 18 guineas for Day Pupils. Gross receipts and profits increased the last three years. For last year about £950 and £250 respectively. For half share of Goodwill £250, and £250 for household furniture.

No. **TRANSFER** of Junior School for Boys 4,948. and Girls in connexion with well-established and high-class Boarding and Day School in a suburb of a Midland Town. Established by the Principal recently, for little Boys and Girls up to 11. The Principal of the Senior School would continue to interest herself.

No. **OPENING** for **STARTING** high-class 4,918. Girls' School in very desirable surroundings in conjunction with a lady of much successful experience who owns a suitable House and Grounds, and who would arrange to build for the purposes of the School, when desirable.

No. **TRANSFER** or **PARTNERSHIP** 4,880. with a view to **succession**. Flourishing School for Boarders only, at a favourite South Coast Resort. Steadily full, with rather over 30 Girls. Prospectus fees of 90 guineas, besides extras. Gross receipts about £4,400 last year. Average annual receipts of last four years about £4,000. Net profits for those periods over £750 and over £720 respectively. Goodwill of half share £1,000.

GIRLS' SCHOOL TRANSFERS.

No. **PARTNERSHIP** in Boarding and Day 4,874. School in residential locality close to important Midland town, containing 7 Boarders and about 25 Day Pupils and Day Boarders. Prospectus fees 60 to 75 guineas and 15 to 42 guineas respectively. Gross receipts about £1,000. Profits between £200 and £300. Goodwill of half share £250.

No. **TRANSFER** of Boarding and Day 4,656. School for Gentlemen's daughters in residential seaside district in the Northern Midlands, containing 6 Boarders and between 30 and 40 Day Pupils. Boarders pay from 45 to 80 guineas and Day Pupils from 9 to 50 or more guineas per annum. Gross receipts over £1,400, and profits nearly £200. One term's fees for Goodwill, or a lump sum of £300.

No. **TRANSFER** of Boarding and Day 4,501. School in the best part of a Northern University Town. Very old-established, containing 4 or 5 Boarders and about 45 Day Pupils and Day Boarders. Prospectus fees 75 to 85 and 6 guineas to 19 guineas per annum. Receipts very steady at about £1,000 a year. Goodwill £500.

No. **PARTNERSHIP**, possibly to **succession**, in Boarding and Day School in healthy Northern Suburb of London. A few Boarders paying on the average about £60 per annum, and about 40 Day Pupils, and Day Boarders, paying fees varying from 9 guineas for the youngest up to 28 guineas per annum, and considerable extras. Gross receipts over £1,000. Goodwill by capitation fee.

No. **TRANSFER** on very favourable terms 4,300. of Upper Middle Class Boarding and Day School, with Kindergarten, in an important Western town, containing about 10 Boarders and over 40 Day Pupils and Day Boarders. Fees of 30 to 40 guineas, and 4 to 12 guineas respectively, exclusive of extras. Gross receipts and average profits about £600 and £120 respectively. For Goodwill and furniture £300, of which only one-third need be paid down, or capitation fee.

Further information will be sent to applicants, but Messrs. GABBITAS, THRING & Co. will require **full particulars** before arranging introductions to their clients. **No charge is made to Purchasers.**

MOTORING FOR TWO FROM TEN SHILLINGS A WEEK.

By **MAJOR C. G. MATSON**,
Author of "The Modest Man's Motor Car."

The author shows how it is perfectly feasible, by means of a Voiturette, a Runabout, a Three-wheeled Sociable, a Quad Car, or Cycle Car, for the man who can manage, somehow or other, to allot ten shillings a week to making trips by road, to cover, with a passenger, from 3,000 to 6,000 miles and upwards a year.

COURS DE VACANCES

de Bayeux et de Granville-sur-Mer

(Normandie).

Organisés sous le Patronage de L'Alliance Française

MATHEMATICAL AND SCIENCE MISTRESSES.

Mathematical Mistress for high-class Boarding School in the Home Counties. Mathematical Tripos or equivalent, experience, and Churchwoman. Able to play games. Res. £70 to £100.—A 30902.

Assistant Mistress for high-class Boarding School in the Midlands, to teach Botany for Matriculation, Modern Geography, with some Chemistry and Physics. Good qualifications and experience essential; Churchwoman. Res. £70 to £80.—A 31097.

Assistant Mistress for Public Secondary School in South Africa, to teach Botany to Matriculation standard, Junior Latin, English Grammar, and Scripture. Nonconformist and good experience essential. Res. £110 and passage.—A 30510.

Mathematical Mistress for Church of England Public Boarding School. Degree or other good qualifications in Mathematics. Experience and Churchwoman. Res. £90 to £100.—A 31267.

Assistant Mistress for Public Secondary School, to teach Mathematics and Latin to Intermediate Arts standard. Mathematical Degree and experience essential. Non-res. £130.—A 31424.

Lecturer for Day Training College on South Coast, to teach good Mathematics and Geography on modern lines. Degree, with experience and Teacher's Diploma, essential. Non-res. £150, increasing.—A 30714.

Lecturer in Botany for Training College in the Midlands. Degree, experience, Churchwoman. Res. £70 to £90.—A 31439.

Science Mistress for Public Secondary School in Surrey, to teach Chemistry, Physics, Mathematics, Geography. Degree and experience essential. Non-res. £130.—A 31619.

MODERN LANGUAGE MISTRESSES.

Senior French Mistress for large Public School in Canada. Res. £100.—A 31137.

French Mistress for Church of England Day School. French acquired abroad. Degree or equivalent and experience. Non-res. £120.—A 31315.

Modern Language Mistress for County Secondary School in the North-west of England, to teach French and German acquired abroad. Degree or equivalent and experience. Non-res. £120, increasing to £150.—A 31357.

Modern Language Mistress for large Public School in the Midlands, to teach German throughout the School, with French. English Degree or Cambridge Tripos. Non-res. £100 to £120.—A 31487.

KINDERGARTEN MISTRESSES.

Kindergarten Mistress for large Public Day School in London. Good qualifications and experience, able to accompany Class Singing. Non-res. with good salary.—B 31542.

Kindergarten Mistress for Public High School in the Eastern Counties. Higher N.F.C. Certificate and experience essential. Res. £60.—B 30579.

Junior Form Mistress for Secondary Co-educational School in Home Counties, to teach usual form subjects, with Nature Study, Needlework, and Drawing. Higher N.F.C. Certificate with experience. Non-res. £100, increasing to £140.—B 31389.

ART MISTRESSES.

Art Mistress for large Public School in Canada. Good qualifications and experience. Res. £100 to £120.—B 31144.

Art Mistress for Public School in Kent, to teach Drawing, Painting and Needlework. Res. £50.—B 31552.

MUSIC MISTRESSES.

Senior Music Mistress for important High School in the Eastern Counties, to teach Pianoforte, Harmony, and Class Singing, with knowledge of Ear Tests, &c. Good training. Diploma and experience essential. Non-res. £150.—B 30966.

Music Mistress for Public High School, to teach Pianoforte, Theory, and Class Singing to the whole School. Candidates should be trained to teach Pianoforte and Singing and have a Music Diploma. Churchwoman. Non-res. varying from £90 to £180 according to number of pupils.—B 31499.

Music Mistress for Training College in London, to teach Pianoforte, Theory, and able to train teachers of singing, ear-tests, etc., and play organ for chapel services. Very good qualifications and training in modern methods essential. Churchwoman. Res. £80, increasing to £100.—B 31582.

GYMNASTICS AND GAMES MISTRESSES.

Gymnastics Mistress for important high class Private School. Mlle Osterberg's training and experience essential. Res. post with good salary.—B 31500.

Gymnastics Mistress for important Public School in the South-west of England, good at Games, Dancing, and Remedial work. Osterberg training essential. Res. £70 to £90.—B 31449.

TECHNICAL MISTRESS.

Domestic Science Mistress for Public High School in the Eastern Counties. Res. £60 to £80. No supervision. B 31632.

FOREIGN MISTRESSES.

Senior French Mistress for high-class Private School near London. Brevet Supérieur and experience in first-class English Boarding School essential. Res. post, good salary.—F 31630.

German Music Mistress for high-class Private School on South Coast, to teach German and Music. Res. post, good salary.—F 31550.

STUDENT-TEACHERS.

Messrs. TRUMAN & KNIGHTLEY always have on their books a large number of Vacancies for **Student-Teachers** on mutual terms or at moderate premium.

LADY MATRONS AND HOUSE MISTRESSES.

Messrs. TRUMAN & KNIGHTLEY assist qualified **Lady Matrons, Housekeepers, and House Mistresses** to find appointments in Boys' and Girls' Schools.

Ladies desiring further information of any of the above and of other suitable Vacancies should write fully to Messrs. TRUMAN & KNIGHTLEY, stating their age, qualifications, &c., and enclosing copies of their testimonials.

NO CHARGE OF ANY KIND is made to applicants unless an engagement be secured through this Agency, when the terms are reasonable. Prospectus, terms, &c., will be forwarded on application.

SCHOOLS FOR SALE and PARTNERSHIPS.—See page 364.

FROM GINN & COMPANY'S LIST

AN ILLUSTRATED SCHOOL GEOGRAPHY

By A. J. HERBERTSON and A. E. FRYE.

An adaptation by Professor Herbertson of Frye's "Complete Geography" for use in English Schools. The book contains nearly 700 Illustrations and Diagrams, about 50 Outline and Relief Maps, and 16 pages of fully coloured Maps. Large 4to in size, 263 pages. Price 6s.

PHYSICAL GEOGRAPHY

By W. M. DAVIS. A scholarly, practical text-book, emphasizing man's physical environment as determinant of man's social and political modes of life. 428 pages. With Illustrations and Maps. Price 5s. 6d.

ELEMENTARY PHYSICAL GEOGRAPHY

By W. M. DAVIS. Based on the author's "Physical Geography," with the addition of practical exercises and more space devoted to the atmosphere. 401 pages. Illustrated. Price 5s. 6d.

PRACTICAL EXERCISES IN PHYSICAL GEOGRAPHY WITH ATLAS.

By W. M. DAVIS. TEXT.—148 pages. Price 2s. ATLAS.—50 pages. Price 1s. 6d.

The object of this manual is to provide a series of systematic and disciplinary Exercises in Physical Geography, in order that the student may approach this subject through practical work in the laboratory as well as through lessons in a text.

Books suitable for the University Local Examinations, 1913.

RECOMMENDED FOR STUDY.

General History

By P. V. N. MYERS. 794 pages. Price 7s. 6d.

A complete outline in one volume of the world's history from that of the Eastern Nations to the present time. Accepted and recommended as the best brief course in general history. Half-morocco. Contains 30 maps and over 160 illustrations.

Part I.—**A Short History of Ancient Times.** 388 pages. Price 4s. 6d.

Part II.—**A Short History of Medieval and Modern Times.** 488 pages. Price 4s. 6d.

An Introduction to the History of Western Europe

By J. H. ROBINSON. 714 pages, with maps and illustrations. Price 7s. 6d.

Gives a clear and interesting account of the all-important movements, customs, institutions, and achievements of Western Europe since the German barbarians conquered the Roman Empire.

Two Volume Edition, dividing at the Sixteenth Century.

Vol. I.—368 pages. Price 4s. 6d.

Vol. II.—364 pages. Price 4s. 6d.

The Development of Modern Europe During the Last Two Hundred Years. An Introduction to Current History.

By J. H. ROBINSON and C. A. BEARD. These volumes will meet the demand for a history of recent times which shall explain the social and economic as well as the political development of our own age.

Vol. I.—**The Eighteenth Century, The French Revolution, and the Napoleonic Period.** 374 pages. Price 6s. 6d.

Vol. II.—**Europe since the Congress of Vienna.** 433 pages. Price 6s. 6d.

English Literature

Its History and Significance for the Life of the English-speaking World. By WILLIAM J. LONG. 582 pages. Fully illustrated. Price 5s. net.

A direct, simple, and interesting account of the great English writers, their works, and the literary periods in which they are included. The quotations, outlines, summaries, historical introductions, complete indexes, and a good working bibliography will be found of inestimable value to students.

The Classic Myths in English Literature and in Art

By C. M. GAYLEY. New Edition, Revised and Enlarged. 597 pages. Price 6s. 6d.

A scholarly and attractive manual of mythology, with a fresh section on the history of myth. Contains over 200 illustrations.

COMPLETE CATALOGUE POST FREE ON APPLICATION.

BOOKS SENT ON APPROVAL TO TEACHERS.

GINN & COMPANY, ST. MARTIN'S STREET, LONDON, W.C.

Supplement to THE JOURNAL OF EDUCATION.

No. 515.

JUNE 1, 1912.

Cambridge University Press

Principia Mathematica: Volume II

By A. N. WHITEHEAD, Sc.D., F.R.S., Fellow and late Lecturer of Trinity College, Cambridge, and BERTRAND RUSSELL, M.A., F.R.S., Lecturer and late Fellow of Trinity College, Cambridge. Royal 8vo, 80s net

The aim of the work is to show the dependence of Mathematics upon Logic by deducing from purely logical premises the elementary propositions of its various branches. The first volume was concerned with Mathematical Logic and Prolegomena to Cardinal Arithmetic. The second volume contains Parts III, IV, and V, dealing respectively with Cardinal Arithmetic, Relation-Arithmetic, and Series, with a Prefatory Statement of Symbolic Conventions. In the third volume the authors will deal with Measurement and the Principles of Geometry.

Lord Rayleigh. Scientific Papers: Volume V. 1902-1910

By JOHN WILLIAM STRUTT, Baron RAYLEIGH, O.M., D.Sc., F.R.S., Chancellor of the University of Cambridge.

In continuation of the four volumes already published—Vol. I, 1869-1881. Vol. II, 1881-1887. Vol. III, 1887-1892. Vol. IV, 1892-1901. Royal 8vo, 15s net each

"Lord Rayleigh's work in its many phases is so well known that a brief notification of the fact that his papers have been collected and published by the Cambridge University Press is almost all that is called for. Every physicist will realize that his library is incomplete without these four splendid volumes and that he will find in their pages the details of many of the most striking advances in his subject during the past twenty years."—*Nature*

Lectures on the Differential Geometry of Curves and Surfaces

By A. R. FORSYTH, Sc.D., LL.D., Math.D., F.R.S. Large royal 8vo, 21s net

Curves in Space—General Theory of Surfaces—Organic Curves of a Surface—Lines of Curvature—Geodesics—General Curves on a Surface—Differential Invariants—Comparison of Surfaces—Minimal Surfaces—Surfaces with Plane or Spherical Lines of Curvature; Weingarten Surfaces—Deformation of Surfaces—Triply Orthogonal Systems of Surfaces—Congruences of Curves.

Algebra for Beginners

By C. GODFREY, M.V.O., M.A., Head Master of the Royal Naval College, Osborne, and A. W. SIDONS, M.A., Assistant Master at Harrow School. Crown 8vo, with answers, 2s 6d, without Answers, 2s (Ready shortly.)

In this book the authors have followed the lines laid down in the Report of the Mathematical Association Committee on the teaching of Elementary Algebra and Numerical Trigonometry (1911); they are also indebted for valuable ideas to the Board of Education Circular on the teaching of Geometry and Graphic Algebra (Circular 711, March, 1909). The book will also be found to fit in with the Algebra Syllabus suggested by the Head Masters' Conference.

Numerical Trigonometry

By J. W. MERCER, M.A., Head of the Mathematical Department, Royal Naval College, Dartmouth. Crown 8vo, 2s 6d

This book is an attempt to indicate the kind of work that can profitably be done by boys of from 13 to 15 who, having no particular mathematical bent, yet take very kindly to numerical problems connected with Geometry, Physics, Mechanics, &c. The range of such problems is greatly increased if the learner has an elementary knowledge of Trigonometry.

Examples in Numerical Trigonometry

By E. A. PRICE, B.A., Assistant Master, Royal Naval College, Osborne. Crown 8vo, 2s

This book is primarily a collection of graduated examples in Arithmetical Trigonometry and is intended to supply those pupils who do not devote much time to Mathematics with materials for applying Trigonometrical Ratios and their tabulated values in practical computation.

Catalogue of the Acropolis Museum

Volume I, Archaic Sculpture. By GUY DICKINS, M.A., Fellow and Lecturer of St. John's College, Oxford. Crown 8vo, 10s 6d net

"A scholarly piece of work, which should be invaluable to students. The introduction contains some careful notes on such points as material and technique, subject and meaning, and costume. There are illustrations in the text of the various exhibits, critical descriptions, and full references to authorities concerning them."—*Athenaeum*.

A Short Syntax of New Testament Greek

By Rev. H. P. V. NUNN, M.A., St. John's College, Cambridge, sometime Lecturer at St. Aidan's College, Birkenhead. Crown 8vo, 2s 6d net

"An excellent manual, designed for students in theological colleges and those who take up Greek at the end of their school life or later, with a view to reading the New Testament. Deviations from classical Greek are indicated, also Latin parallels, and the whole begins sensibly with a section on English Grammar. . . . A treatise which should be widely used."—*Athenaeum*

A First-Year Latin Book

By JOHN THOMPSON, M.A., formerly Scholar of Christ's College, Cambridge; Head Master of the High School, Dublin. Fcap 8vo, 2s

This book is intended to meet the requirements of the Curricula Committee of the Classical Association, and contains work for one year arranged for a class of which the average age is twelve. The vocabulary contains 500 to 600 of the commonest words, and only words and forms of most frequent recurrence are included. Words and forms once introduced are frequently repeated, and a variety of methods are used to fix the lesson firmly in the learner's memory. It is intended that the greater part of the work should be done *ex vivo*.

Caesar in Britain and Belgium

Simplified text (45 pp.), with Introduction (30 pp.), Notes (28 pp.), Exercises (27 pp.), and Vocabulary (23 pp.), by J. H. SLEEMAN, M.A., Lecturer in Latin in the University of Sheffield. With 12 illustrations, map, and plan. Extra fcap 8vo, 1s 6d

This book follows out the recommendations of the Curricula Committee of the Classical Association for the second year of Latin study and provides a text in which long sentences have been broken up or curtailed. The introduction gives an account of Caesar's life and times, together with a brief account of Roman Military institutions. The notes are mainly grammatical, and the grammatical terms recommended by the Joint Committee on Grammatical Terminology have been adopted. The exercises are based upon the text, but do not follow it slavishly. The vocabulary contains well under 1,000 words, but there is no English-Latin vocabulary.

Graduated Passages from Latin Authors for First-sight Translation

Selected and supplied with short notes for beginners. By H. BENDALL, M.A., and C. E. LAURENCE, M.A. Crown 8vo. In four parts, 1s each

Part I, Easy. Part II, Moderately Easy. Part III, Moderately Difficult. Part IV, Difficult.

Silva Latina: A Latin Reading Book

Chosen and arranged by J. D. DUFF, M.A. Fcap 8vo, 2s

Passages selected mainly from Cicero, Livy, Virgil, Ovid. No passage included that is not, of its kind, excellent, or that presents any serious difficulty in language or matter. In order to make the extracts more accessible and attractive to the inexperienced reader, (1) a preatory note has been added to each passage; (2) whole sentences have been omitted where desirable; (3) the punctuation has been completely revised, and a large number of commas added (a comma, to a novice, being often as good as an explanatory note); (4) the long vowels have been marked; (5) brief explanatory notes are added at the end of the text.

Prospectuses of the above-named books will be sent on application. Applications from teachers for specimen copies should be addressed to F.E., Cambridge University Press, Fetter Lane, London, with a statement as to the number of copies likely to be required if the books are adopted for class use.

Cambridge University Press

The Revised English Grammar

By ALFRED S. WEST, M.A., Trinity College, Cambridge.
Extra fcap 8vo, 2s 6d

A new edition of *The Elements of English Grammar*, based upon the recommendations of the Committee on Grammatical Terminology.

The Revised English Grammar for Beginners

By ALFRED S. WEST, M.A. Extra fcap. 8vo, 1s

A new edition of *English Grammar for Beginners*, based upon the recommendations of the Committee on Grammatical Terminology.

Key to the Questions contained in West's Revised English Grammar and Revised English Grammar for Beginners.

By A. S. WEST, M.A. Extra fcap 8vo, 3s 6d net

A leaflet containing a summary of the changes made in the above books, together with a short account of the work done by the Committee on Grammatical Terminology, will be sent post free on application.

English Composition: with Chapters on Précis Writing, Prosody, and Style

By W. MURISON, M.A. Crown 8vo, 4s 6d Or in two parts, 2s 6d each

Part I, Uses of Words, Figures of Speech, Sentence and Paragraph Construction, Punctuation.

Part II, Essay, Paraphrase, Précis, Style, Prosody, Kinds of Literature.

"Mr. Murison's book is one of the soundest books on the subject we have seen for a long time. The arrangement is a model of clearness and comprehensiveness. . . . It is a great treat to be able to recommend a book on English composition so unreservedly."—*School World*

Outlines of the History of the English Language

By T. N. TOLLER, M.A., Professor of English in the Owens College, Manchester. Crown 8vo, 4s

"No better proof could be afforded of Prof. Toller's thorough mastery of English in all phases of its development than the production of the work under consideration. It is distinguished by uniform accuracy of information, the spirit of scientific research, and a high and just appreciation of the educational value of English. Teachers and students will find in this new book nothing which they will have to unlearn afterwards."—*School World*

Silas Marner

By GEORGE ELIOT. Edited, with introduction and notes, by F. E. BEVAN, Classical Tripos, Newnham College, Cambridge; Head Mistress of the County High School, Carlisle. Crown 8vo, 1s

[*English Literature for Schools Series*]

The present edition contains an introduction on (a) Life and Work of George Eliot, (b) The Mechanism of a Novel illustrated by Silas Marner, (c) The Characterisation, (d) Humour, (e) Style, (f) Bibliography, together with a few pages of explanatory notes.

Erckmann-Chatrian. Waterloo

Edited by A. R. ROPES. Contains a historical introduction, notes, and vocabulary. Reissue, with vocabulary, 2s

Exercises on Erckmann-Chatrian's Waterloo. By A. WILSON-GREEN, M.A., Senior French Master, Radley College. 1s

Texts with Vocabularies

Énault. *Le Chien du Capitaine*. 9d

Perrault. *Fairy Tales*. 9d

Souvestre. *Le Serf*. 9d

"These tasteful little books will be welcomed by teachers of French. They contain the text without note or comment of any kind. Each volume has a vocabulary arranged on a singularly helpful plan."—*Educational News*

—*Educational News*

Prospectuses of the above-named books will be sent on application. Applications from teachers for specimen copies should be addressed to J.E., Cambridge University Press, Fetter Lane, London, with a statement as to the number of copies likely to be required if the books are adopted for class use.

The Cambridge Historical Readers

Edited by G. F. BOSWORTH, F.R.G.S.

An entirely new series, comprising an Introductory Book of Greek and Roman Stories, a Primary Book of Biographies and episodes in British History, and three books of British History on the concentric plan and correlated with Geography. In five books:—

1. **Introductory**, pp. viii + 156 1s 0d
(Stories of Greece and Rome)

2. **Primary**, pp. viii + 242 1s 0d
(Stories of Great Men and Women in British History)

3. **Junior**, pp. viii + 279 1s 6d

4. **Intermediate**, pp. xii + 260 1s 6d

5. **Senior**, pp. xii + 294 2s 0d

(The last three deal with the history of Great Britain and Ireland, and the Dominions beyond the seas, and are on the concentric method)

Each book contains a coloured frontispiece and numerous illustrations, maps and plans.

"These five books are intended primarily to meet the suggestions on the teaching of history set out in New Code and Circular 599, and should speedily command attention from teachers. The author has succeeded in presenting his facts in such a style that the pupil must be dull whose interest cannot be awakened. . . . The volumes are copiously illustrated throughout with excellent pictures, maps and plans of battlefields being given when necessary. The printing is well done in large type on good paper; and the price is most reasonable."—*Athenaeum*

Great Britain and Ireland: A History for Lower Forms

By J. E. MORRIS, D.Litt., Bedford Grammar School. With 100 illustrations and plans. In one volume, or in two parts (divided at 1603). Crown 8vo, 3s Parts, 1s 8d each.

"Dr. Morris has made a great step forward and deserves warm congratulations. . . . Dr. Morris's book will serve for many others than the junior forms of schools. It is very short, considering what a lot it contains, and always goes straight to the point. . . . Dr. Morris has written a good piece of school literature, and his camera has made it a work of art as well."—*The Journal of Education*

A History of England for Use in Schools

By ARTHUR D. INNES, M.A. With 13 maps and 8 plans. Or, in three parts:—Part I, to 1509 A.D. Part II, 1509–1714 A.D. Part III, 1689–1901 A.D. A separate part is also issued containing the period "From the Wars of the Roses to the Death of Elizabeth." Crown 8vo, 4s 6d Parts, 2s each

"Mr. Innes writes with great spirit and vividness, as well as with simplicity and lucidity, and he is remarkably well furnished with the latest results of historical inquiry. Appended are six admirable summaries—constitutional, ecclesiastical, Scottish, Irish, Indian, and Colonial; half-a-dozen careful genealogical tables; a glossary of technical terms, political phrases, &c.; a chronological summary, and an index."—*Educational Times*

Stories from Chaucer

Re-told from *The Canterbury Tales*, with an introduction and notes, by MARGARET C. MACAULAY. With 29 illustrations from the Chaucer Society's reprint of the Ellesmere MS, the Loutherell Psalter, &c. Crown 8vo, 1s 6d Without introduction and notes, 1s

The plan of this book is to some extent new. Usually the tales have been given in an isolated form, and thus they lose much of their interest as part of a larger work, but here an attempt has been made to exhibit the general scheme and conduct of *The Canterbury Tales*, including the Prologue and some of the conversations of the pilgrims on the road, which form so interesting a feature of the original.

Life in Shakespeare's England

A Book of Elizabethan Prose. Compiled by J. DOVER WILSON, M.A. With 7 illustrations. The Cambridge Anthologies Series. Crown 8vo, 3s 6d net

"In *Life in Shakespeare's England* selections from Shakespeare himself, from his dramatic contemporaries, and from the memoirists, letter-writers, and pamphleteers of the period, arranged under such headings as England, Country Folk, Sport, Dress and Fashion, Witchcraft, Houses and Housekeeping, Books and Authors, &c., give us indeed the very mirror of the time in which Shakespeare lived. The extracts have been admirably chosen, and the book is a most enjoyable one."—*Glasgow Herald*

THE FUTURE OF OUR PUBLIC SCHOOLS.

A U.U. ESSAY.

A YEAR ago an able essay read to this society dealt with the past generation, 1876-1911*; to-night I am asking you to consider what the future may look like thirty years hence, when the latest recruits of the U.U. are hoary veterans like those of us who have lived through the changes enumerated in that essay. What changes are likely to come whether we wish for them or not? What changes would we welcome, and further to the utmost of our power? What are the terrors of the timid, and what are the dreams of the daring? Will our two veteran Plantagenet foundations, together with the younger growths of Tudor times, and the later products of the Victorian era, continue to monopolize the name of Public Schools? Will this truly British anomaly survive the advance of democracy? Will our centres of secondary education continue to be divided into boarding schools and day schools, and will that division correspond, as it does roughly now, to a line of social demarcation? Will the great secondary schools continue in the main to take Classics as the foundation of their curriculum, or will these be relegated to an inferior position, and the mother tongue and modern languages, and the sciences of reason and observation, take their place in the first rank? These questions seem roughly to resolve themselves into two—first, as to residence; secondly, as to curriculum; and here, again, we may consider what is possible and what is desirable, what our successors may get, and what we should wish for them.

What is possible? Kidd in his "Social Evolution," written some twenty years ago, said that the nineteenth century had given men equal political rights: the work of the twentieth century was to consist in giving to all equal social opportunities, the English equivalent of "*la carrière ouverte aux talents*." If we accept this dictum as true it seems clearly to follow that the best secondary education must be included among these opportunities.

Assuming, then, that the democracy will have the desire and the power to obtain this, under what form will it wish to receive it? Three courses here appear to be possible. The attack on educational privilege may follow the lines of religious liberationist policy, and the public schools may be "disestablished," that is, deprived of their existing privileges and exemptions; and "disendowed," that is to say, their revenues may be made public property. Again, the public schools may be left untouched, as monuments of the obsolete or obsolescent, and a richly endowed system of secondary education, more suitable to a democratic age, may be developed out of our existing county schools. Or, lastly, the public schools may be modified by an extension to them of the free places now claimed by legal right in other secondary schools, which would obviously put an end to the social separation that at present exists, and of which Mr. G. L. Bruce and other educational experts and reformers have written in no sparing terms.

What, then, would be the attitude of the democratized public schools, or the new democratic schools, as to residence and curriculum? George Eliot once stigmatized prophecy as the most gratuitous form of folly, and so much remains to be said on these two points, under the head of "Desirability," that they may, perhaps, be prudently passed over under the head of "Possibility." Adapting the words of Clough, we may say:

There is no God, the wicked saith,
And surely it's a blessing;
For what he might have done with us
We'd better not be guessing.

It has been suggested as possible that democracy may disestablish and disendow our public schools, or endow other more modern centres of secondary education; or, again, it may claim their existing privileges for those born in humbler circumstances. But, setting aside the subsidiary changes that

might follow on these vital ones if they were forced on us from outside, I will ask you to consider the development and changes which we should regard as desirable, and which we would voluntarily promote, if it lay with us to shape the future of our public school education.

Here the first question that confronts us is that of residence. Should we wish the public schools of the future to continue, in the main, to be boarding schools, or should they develop the day-boy element? Much has been written of late by educationists, distinguished and undistinguished, on the unnatural and indefensible character of the boarding school; and, on the other hand, a few years ago a notorious halfpenny paper drew a sketch of the ideal public school, whose boys were to consist solely of boarders, while the buildings were to be situated in a lonely district, far from any town. Surely an agreement with Aristotle that virtue lies in the mean is preferable to embracing either of the extremes here recommended to us. It may be true enough that our boarding-school system is medieval in its origin, as Burke said a hundred and twenty years ago, and that ideally the child should grow up in close touch with its parents; but if, like "Candide," we have come to see that we do not live in an ideal world, we may agree with him in saying: "*Il faut cultiver notre jardin*." Many parents have neither the leisure nor the capacity to direct the education of their children, and many children are the better for the lessons of independence, and become more attached to "the kindred points of heaven and home" by the separation from the latter for two-thirds of the year, although all of us would probably regret the tendency to send children at an early age to a school so large that they are in danger of losing the individual attention that is then so needful for them. Moreover, under present conditions, parents have a considerable choice between boarding and day schools, or schools that admit day boarders; so that, on this point, we may say with Plato, *Αἰτία ἐλομένην θεὸς ἀναίτιος*, the responsibility for the choice lies with the parent.

On the other hand, the entirely isolated boarding school, which has been suggested as an ideal, seems to be a revival of a monastic type that is wholly undesirable both for masters and boys. A master at such a school would surely be Lamb's typical modern schoolmaster, obsessed by boy morning, noon, and night, and evolving the solution of every problem for his boys out of his inner consciousness, as the German once evolved the camel. He would be almost entirely cut off from adult society, with no conversation but the gossip of the common room, and none of the fresh air of the larger life of the community to save him from being mentally and morally asphyxiated. The boys, too, might be brought up among stimulating natural surroundings, but they would run the risk of becoming imbued with that spirit of selfish isolation which is a danger to the public-school boy and, through him, a danger to the country, at the present day. But, if the boarding-school system on reasonable lines is to continue during the next generation, how are we to overcome what all will, I expect, admit to be one of its chief defects—the class isolation that it so largely entails? I would answer that this might be accomplished partly by the combination of the day boy with the boarder system, and partly by an honest and united effort on the part of head masters to ensure that scholarships are awarded to boys of ability and of character, who really need them, and not to the sons of comparatively, and often positively, wealthy parents, who treat them as prizes, and sometimes use them as pocket money.

It was suggested not long ago at a well known public school that no boy should be admitted as a candidate for a scholarship whose parents did not possess at least one motor-car of twenty horse-power. This was looked upon as "a satire," but it was meant for "a serious observation" in view of recent facts. The system of free places to which I have alluded as possibly being thrust upon us from without might be developed voluntarily from within. A few years ago there existed at one public school a practice of allotting one or two free places in each boarding house to boys of character, by the choice of the house master, with the sanction of the head. It is to be regretted that the iron heel of the governing body

* Published in our April number.

crushed the life out of this tender plant, which seemed, however imperfectly, to be an embodiment of the principle which I hold to be sound. By this means the right kind of boy was assisted, and the school benefited as well, without any of the evils of early specialization and cramming entering into the question. This, no doubt, was an experiment on a small scale, but it was an experiment in the right direction. At any rate, I believe that, if the public-school system is to survive and do good work, it will have to adapt itself on these lines to the spirit of the age.

But what would we desire to see as the curriculum of the future? We live, surely, in a scientific age. Is it true that when science "comes in at the door" letters "fly out at the window"? Must we say:

Ill fares the land to hastening ills a prey,
Where things accumulate and thoughts decay.

If we turn to the men of science, to know how we are to prepare ourselves for war, their trumpets give a very uncertain voice. Prof. Ray Lankester would require all candidates for matriculation at the Universities to pass an examination in seven subjects: English, Arithmetic (with algebra and geometrical drawing), Latin, French or German, outlines of English, Roman, and Greek history (including outlines of archæology and ethnology), Chemistry (very elementary, but including some practical work), and outlines of Astronomy and Geology.

On the other hand, Prof. Punnett urges that all science should be deferred till the boy comes up to the University, stating that "the primary function of the schools, in so far as learning is concerned, should be to give a sound literary training to all alike in the earlier stages." He goes on to suggest that boys should come a year earlier to the University, and holds that "the best literary training is gained from the literature of Ancient Greece, and that this is best fitted to serve as an introduction to citizenship in the fullest sense of the word."

"In the multitude of counsellors," says the Hebrew proverb, "there is safety"; on the other hand, we may be warned by the fable of the Miller, his Son, and the Ass, and the unfortunate adventures of that well meaning but too pliable pair. In the coming generation, if the public schools survive, they will continue to send many boys to the University, yet a large number will also leave them to go out directly into practical life. But, whatever be the career for which the boys are preparing, I hold that our successors will do wisely to fight against premature specialization; they will let the literary boy have such a knowledge of the elements of science that he may be able to understand and appreciate the world of production as well as the world of speculation, and they will see that the scientific boy has such a grounding in literature that he may be able to give his thoughts lucid expression; in either case they will save him from growing into the man who, as Stevenson says, "swallows the universe like a pill."

And in dealing with literature they will not forget that "the letter killeth, but the spirit giveth life": that the true study of literature, as of history, not only sharpens the wits and develops the critical faculty, but also leads to the formation of ideals which are of infinite value to the individual, and through him to the community at large. This is being recognized at the present day, and will be recognized more clearly in the future. Less time is and will progressively be devoted to composition and verbal imitation, and more and more attention is and will be paid to intelligent and wide reading.

But what as to the vexed question between ancient and modern literature? On this topic, which might well occupy a whole essay by itself, a very few words must suffice. I think our successors will be wise to remember that the vessel they are filling is not of unbounded capacity, or, rather, that the organism they are developing is limited in its potential energy. The experience of the last quarter of a century has taught some of us that those whose mental eyes are not strong enough to bear the sunlight of the classics—and these, I believe, are a large percentage of those who come to public schools—may yet gain enough to guide them towards the Delectable Mountains by the moonlight of the literature of modern

Europe; nor need we say of them, as of Aeneas and the Sibyl, "Ibant obscuri lunae sub luce maligna."

But here I would express a hope that there will be more methodical teaching of English in the future. We all recognize the value of the mother tongue, but do we all see how its teaching has hitherto suffered from being entrusted to the ordinary well educated man? Every other department of our teaching—classics, history, modern languages, mathematics, or natural science—has its specialists; English alone is left to the tender mercies of the general practitioner. I do not say that the specialist alone should teach English, but he should be there to advise and assist and direct his colleagues, so that it may no longer be said of this subject, "Dans le pays des aveugles les borgnes sont rois." The Universities have not yet realized the need. It will be for our successors to put forward an effectual demand, and the supply will arise to meet it.

This leads me to touch briefly on a kindred subject—that of the training of teachers in general. Hitherto, its advocates have been *voces clamantium in deserto*; thirty years hence they will be regarded as the supporters of a truism. Secondary education must follow the lead of primary in this respect, and its teachers will cease as a body to be the only professional men who have had no technical training, while their profession will no longer run the risk of being regarded as the refuge of the destitute.

With the prospects of co-education I will not attempt to deal. The example of America does not seem wholly encouraging in this respect. All honour to those who have acted as pioneers in this field in our own country, but I venture to think that a more hopeful augury may be drawn from symptoms like the amalgamated debate recently held by men and women students at Oxford, and I look forward to better results from competition on parallel lines than from any possible combination of the sexes, at any rate for secondary education.

Hitherto, in speaking of the curriculum of the future, I have dealt exclusively with "music" in the Platonic sense: I will try to say a few words on the vexed question of the future of "gymnastic" in public school education. Here my hopes lie in the limitation of competition. Some of us may remember the lament of one who has now passed "beyond the veil," and become a head master, that at the school with which he was then connected racquets had been killed as a game when it was found that they could win the Public School Cup.

My meaning may be made clear by an illustration. All will admit that cricket, as now played, is for many boys a very dull form of exercise. A boy who has no hope of excelling is often condemned to play the game for a large part of his leisure time in the pleasantest part of the year, and he comes to regard it as only less ineffably tedious than compulsory attendance at chapel. An ingenious friend has proposed the following solution of the difficulty, which has been tried with excellent results. The batsman's innings is limited by time, and not by his capacity to keep up his wicket. The total score of the side is divided by the number of times that its members have been technically "out." It will be seen that this plan affords encouragement both to the "slogger" and to the patient "stone-waller," and that all have an equal opportunity of healthy enjoyment and of indulging that "genial sense of youth" which is too often lost sight of under the present system. I do not suggest that this should supersede the present plan, nor do I deny for a moment that we owe an enormous debt to our games both physically, mentally, and morally; but I throw it out as an indication of the lines on which I hope our successors will proceed in the endeavour to correct the exaggerated competition which in some games has crushed out the elements of healthy amusement and recreation.

It may be urged by some objector that, if some of the reforms indicated as realizable in the course of the next generation were put into practice, our public schools would cease to be the nurseries of English gentlemen. The question then arises whether we should say of this product "Nascitur non fit" or "Fit non nascitur." It was remarked quite recently of a

young man who was going out to mission work in Canada that he could not come from a public school because he was not a gentleman. The speaker, labouring under a common delusion, would evidently have defined a gentleman as "one who dresses for dinner and whose parents probably pay the super-tax." If our public schools thirty years hence have caused such ideas to become as extinct as the dodo, the better it will be for them and for the nation; and the trend of recent events seems to show that unless they thus move with the times they will rapidly disappear.

I am well aware that the changes suggested hitherto may be classed with what Bacon calls "vaine opinions, flattering hopes, false valuations, imaginations as one would," and that I have not indicated such changes as might turn the flank of the critics like the writer in the *Times Educational Supplement* of September 1910, who denounces our public schools as out of touch with the nation at large, their head masters as timid and ineffectual, and the assistant masters as mediocre to start with, and afterwards hopelessly deadened by years of monotonous work, with no definite taste beyond a mild liking for golf.

In reply to him I would say that I look forward to a sound and general system of inspection, which will be good for Inspectors and inspected alike: that I have great hopes of the improvement of head masters as a body from the extension of the practice of electing laymen to the most important posts, not because the layman is necessarily superior to his clerical brother, but from the obvious widening of the field of choice. I look forward also to an improvement in the position of assistant masters from the universal introduction of pension schemes, which will put them on a level with other Civil servants, and to some more equal distribution of emoluments. Having been myself what was once called a "publican" for over twenty years, it would ill become me to suggest that the incomes of my successors should be curtailed; but the limitation of the tenure of boarding houses will make succession more rapid, and the recognition of the post of house tutor, as carrying with it an additional emolument, to be supplied by the colleague whom he assists, might help to remove the present inequalities.

In more hopeful moments I even look forward to the day when those who have earned distinction in our profession may be recipients of some of those honorary titles which are showered so plentifully on those whom a well known peer has stigmatized as "conscientious mangold-wurzels." With the training of teachers, too, will come an awakening of interest in problems of life and mind, and a time when the staff of every public school will hold meetings, not to discuss the propriety of calling a woollen jersey a "sweater," but to deal with questions ranging from "Abiogenesis" to "Socialism," and from the "Letters of Queen Victoria" to the "Letters from Upton." As a further antidote to the stagnation which the writer in the *Times* professes to discover and deplore, our successors will enjoy a Sabbatical term, or a Sabbatical year, to be spent, not in lowering their handicap at golf, but in increasing their knowledge of men and life and manners by travel. The present writer feels no scruple in advocating such a reform, having himself enjoyed the privilege, now, alas! more than twenty years ago.

I have endeavoured to lift the veil that hangs over the future of our public schools, in view of what may happen against our will, and of what would happen if we could have our own way. No doubt my anticipations may be entirely falsified by the facts, as were two hasty judgments in the following case. Twenty-five years ago a boy who was fielding at long leg was condemned as a "waster" by his captain for climbing a tree in pursuit of a rare caterpillar. During the same week his essay on "England as it will appear in 1912" was condemned by his form master as belonging to the fourth class, composed of those which had neither ideas to express nor language to express them. That boy is now the man in charge of the construction of the naval base at Rosyth.

But, whether these anticipations be realized hereafter or not, I have much sympathy with Renan, when, in the preface to his last work, "Feuilles Détachées," he writes: "You

young men will live to see many problems solved, such as the development of William II and the issue of the Socialistic movement; but I have no wish to be disturbed in my grave by a whisper of their solution. The future of knowledge is secure. Error founds nothing, and no error will last long. Let us set our minds at rest. Before a thousand years are over the earth will have found the means of supplying the place of its exhausted coal, and to a certain degree the place of its diminished virtue."

THE CHARM OF THE CLASSICS.

By F. ST. JOHN THACKERAY.

BY the death of Alfred John Church literature has lost one who, if not in the highest rank of scholarship, yet deserved very highly of all lovers of the Classics. The merit claimed by Horace of playing the part of a whetstone, able to make steel sharp, though it cannot cut, he abundantly earned. His stories from Homer and Virgil and Ovid, from the Greek tragedians and from Livy, to mention only a few of his numerous books of this character, have done much to popularize Greek and Latin authors. And through them, even without a knowledge of the original languages, the genius and spirit of the Classics has been largely transmitted.

And how much does this represent! What a boon such volumes have been to countless boys and girls! How often, alas! has the experience of many been the opposite—their introduction to classical writers causing repulsion rather than attraction, and this, owing to some faulty method of imparting knowledge, some want of tact, some failure to leave the right impression at a critical time, or some fatality in leaving the wrong one, which often unfortunately becomes indelible. The debt of the last generation to such an admirable diffuser of classical lore was no slight one, and especially so at a time when study has had to contend with a powerful movement in favour of games; the cult of athletics having advanced to such a point as gravely to imperil the interests of learning, and to disturb the balance in education. The *παρρηγορ* has with far too many schoolmasters become the *εργον*. To them Plato speaks in vain, bidding them "trace out the nature of the fair and the graceful, that our young men, dwelling as it were in a healthful region, may drink in good from every quarter whence any emanation from noble works may strike upon their eye or their ear, like a gale wafting health from salubrious lands, and win them imperceptibly from their earliest childhood into resemblance, love, and harmony with the true beauty of reason."

The gradual development of a sense of charm in classical reading in a boy who has passed the first rudimentary stage is a delicate and vital part of the tutor's function. It calls for judicious treatment and generous allowance for mistakes, for encouragement far more than fault-finding. Anything like harshness, ridicule, sarcasm, or scorn will easily wither up the first openings of the flower in a young scholar. To draw out and foster the nascent intellect as much as possible, to set before it the charm of the unknown region on which it is entering, to suggest the treasures that it offers to search—how few teachers succeed in this! How few even set it before them as an object far more desirable for their pupils than a record innings at a school match, and hereafter possibly at Lords!

And how subtle are the beginnings of this sense of charm! The exact moment cannot be fixed, any more than "those blind motions of the spring that show the year is turned," or the feeling of the first stroke of the swimmer when the joy of accomplishment and the conscious sense of power have cast out fear. A day comes when the use of Liddell and Scott or the Public-school Grammar is no longer regarded as a piece of drudgery, but when they are referred to with interest for

comparison or illustration; a day when the faculty of wielding the Greek or Latin language is felt as possible, though as yet distant, and shown in composition, however crude or tentative at first; a day, above all, when we admire and love a grand passage not because we were told it is beautiful, but from our own genuine appreciation of τὸ καλόν, when the masterpieces of antiquity, speeches—e.g. in Aeschylus or Sophocles—the defeat of the Athenians in the Harbour of Syracuse, as described in the glowing words of Thucydides, or the close of the Agricola of Tacitus, fix themselves in the memory once for all, and become a veritable κτήμα ἐς αἰεί.

Is not this opening out of a new world, with all its unknown grandeur and multiform interests, and the pleasure of gradual conquest; is not the leading on of the intellect to higher and higher ground, a task at least equal to the highest training in muscular prowess, so much in fashion at the present day? It is hardly too much to say that, if in early youth this spirit of worship of mere athletic success gets hold of a boy, if he comes to regard the amusements of boyhood as the adequate end and object of his life, he is forfeiting what he would give anything hereafter to recover. He is laying up for himself a middle age of dullness and an old age devoid of the best and most soothing consolations for the inevitable decay of mere physical strength.

Highly, then, should those trainers of the young be esteemed, and steadily should they be supported, who, at the risk of losing some popularity, lay a solid and secure foundation for true literary taste, in the great models of the ancients—works not written in a hurry for people who read, if they do so at all,* in a hurry, but the outcome of extreme pains—works that are the perfection of good sense, for a want of familiarity with which nothing can compensate. These are the true benefactors of the coming generation. Not that any neglect of a due physical training, on which the stamina of our race so largely depends, is for a moment contemplated. "Il faut entretenir la vigueur du corps, pour conserver celle de l'esprit." Alfred Church was a keen and enthusiastic cricketer, but he knew how to keep his devotion to the game within proper bounds. But what is to be thought of those who, as is the practice in so many preparatory schools, in equipping their young charges for the business of life, begin by instilling into little boys scarcely taller than their pads a preposterous adoration for athletic triumphs, destined to become rooted and to last on for several decades?

What reason for wonder is there if, when no pleasure in Latin or Greek literature has been cultivated, no advance made, no zest shown, no voice heard to guide and encourage at school, there should be a movement in favour of remitting the very moderate requirements in those languages at the Little-go Examination? Masters, whose qualifications for their post have been estimated by records of a splendid innings at Lord's, "have their reward" to the full. They may turn out vigorous specimens of humanity, but it is too often at the price of starving their higher wants. They have failed to draw out of their pupils the capacity for delight in the charm of classical literature. For there is "an immortal strength in the stories of great actions"—such as those of Achilles, Prometheus, Clytemnestra, Dido, Jason, and Medea—in the fine Roman legends of the Sibylline books, of Mettus Curtius and Horatius Cocles—in the history of Hannibal and Julius Caesar, of Antonius and Cleopatra. What boy's heart is not stirred by such lines as *Διὸν ἀριστεύειν καὶ ὑπείροχον ἔμμεναι ἄλλων* or "Dulce et decorum est pro patria mori"?

Surely one chief part of a tutor's office is to set before his pupils the contemplation of noble actions, and help them towards delighting in it—to lead them on to penetrate themselves with the study of excellent models and to catch their spirit. "I know not how it is, but their commerce with the ancients appears to me to produce in those who constantly practice it a steady and composing effect upon their judgment not of literary works only, but of men and events in general."

It is now nearly sixty years since those words were written at Ambleside by Matthew Arnold.* Is their value and their truth less than it was then? Is not the lesson that they contain as much needed as ever at the present day?

ENGLISH IN SECONDARY SCHOOLS.

By FRANK J. ADKINS.

AS specialization eats ever farther and farther into the heart of the secondary school, and as the standard of attainment in every subject handed over to the specialist continues to rise, we become conscious of weaknesses in the general training of the scholar; and we shall have to consider sooner or later whether, after all, these weaknesses do not outweigh the gain in knowledge resulting from the specialist system. First, there is the disproportion and discontinuity of the boy's training; but, worse than this, one finds that not infrequently excessive application to one subject or set of subjects has so cramped a boy's general interests, so retarded the growth of his general ideas, that he becomes staid and wooden, resourceless and tongue-tied, even in the subjects in which he has specialized. Recently, for example, among a number of essays set in a scholarship examination, I came across one on "Mathematical Infinity." I asked a class which had gone far in mathematics to plot the subject out, and found, without surprise, that not one knew how to start it. I had at last, out of the fullness of my ignorance, to show these boys—clever, willing boys with real mathematical ability—how I should tackle the subject. It is with relief and satisfaction that I find the General Paper and the Essay playing a more considerable part in the award of scholarships: subjects in their settings, not only in themselves.

Specialization is for ever sending its roots deeper into the school. In his search for promising material the specialist will hunt through the forms of the junior school and net his victim while it is still unconscious of special aptitude. Thus even the youngest boys are tempted to sectionalize their work, and to develop one section at the expense of others; and if they have come from elementary schools the violence of the contrast between the methods they have been used to and those they find prevailing in their new school is not good for them. Particularly is this the case in the English subjects. Many a boy fresh from an elementary school can give points in expressing himself to boys in the sixth, and, though the aphasia of the older boys is doubtless largely due to the self-consciousness of adolescence, yet a little enforced practice in speech and writing soon produces an improvement even at the top of the school.

It would appear, then, that—at any rate, in the lower forms, and particularly when these forms are composed largely, if not entirely, of boys from the elementary schools—the English should be formative rather than informative. In the age of habit-forming it is obviously of more importance that a boy should acquire sound methods of reading, speaking, and writing—arts at the base of the whole of his subsequent work—than that he should know intimately all the notes in his particular edition of "The Lord of the Isles" or the relationships between the characters in a Shakespearean play.

If, however, we are to develop these powers we must enjoy a free hand as to the course we pursue. No supposed necessity for getting through a certain number of pages or books must prevent us from engaging in the work which, because it is fundamental, is only too likely to remain hidden from view. In other words, set books should form no part of any examination, internal or external, for junior children. The set-book papers should be replaced by tests of the pupils' power to read intelligently and critically. A piece of prose should be set for summarizing, a piece of verse for interpretation and

* J. S. Mill on Education.

* Preface to Poems, 1853.

illustration—not for paraphrase in the old, evil sense of the term, but for a free and, if possible, a critical rendering of its main themes with the thoughts they suggest as corollaries.

No reading can be regarded as thorough which is not in the nature of a constant challenge to the thought of the writer. The boys must be trained to make, whether aloud (in the earlier stages) or to themselves (in the later), a running commentary on what they read. Thus will they achieve the real end of reading, which is to "mark, learn, and inwardly digest." Each piece of poetry or book of prose has served its purpose when it has afforded this exercise, though the fact that it is more difficult to forget than to remember a passage so read might commend the method even to those who have examinations always in mind.

The training in method rather than the assimilation of matter might be carried a step further still, and if textbooks—say the history books—were read in a workmanlike way, with underlining, marginal notes, cross references, time charts, and genealogical tables made up from the text (not copied from prepared diagrams already in the book), summaries, indexes, and so forth, not only would the boys have received just the training they need, but rarely get, in the use of books—a training essential for success in the upper school, and still more in after-school study—but it is probable that their grip of the actual subject-matter of the textbook will be firmer than it would be if the history were "taught" in the usual way and "got up" as home work by each of the boys according to his lights. Although reading of this description will be slow at first, it will be sure from the beginning, and it will not be long before the pace at which it is taken accelerates of itself, without any loss of thoroughness.

"Henry V" is a play which is being a good deal studied just now, and portions of it give just the sort of practice we have in mind. "Summarize, with the text open before you, the arguments between Henry in disguise and the three soldiers on the subject of death in battle." "State Canterbury's reasons for urging Henry to war with France; what do you think of these reasons?" "What estimate do you form of Henry's character from (1) the speech in which he tells Canterbury to beware how he excites the warlike passions of the king and his people; (2) his prayer before Agincourt; (3) his comments on the list of killed, English and French; (4) his speech beginning 'Upon the king'?" Such questions naturally suggest themselves in the course of any honest and thorough reading of the Play; they prove interesting to the boys, the best of whom take them up readily, while the majority follow the resulting discussions more closely than they could follow the teacher's exposition. Such questions might therefore well form part, if not the whole, of the papers set on the Play, full credit being given for honest attempts, even if erratic. Unfortunately orthodoxy, rather than honest independence of thought, pays best in examinations; the more parrot-like you force yourself to be when answering questions the better you succeed: "All thought abandon, ye who enter here" should head each paper.

Plain texts should no longer be tabooed as dishonest, now that dictionaries, mathematical tables, and other books of reference—to say nothing of a recently issued schoolboys' diary full of tables of all sorts—are admitted; indeed, questions demanding a ready and intelligent use of the text would be of a higher type, and therefore a better test of capacity than those which can be answered entirely from memory. We should aim at testing the pupil's power of working with books—the secondary-school method—rather than the knowledge he has gained (for the moment) from books.

So much for reading. But it is clear that reading of the critical type is largely mixed up with talk, discussion, argument, amplification—all pre-eminently *social* exercises—and so we come to composition on its most natural side—namely, talk. The more boys can be made to talk, clearly, cogently, and temperately in all lessons, the better. Pedantic accuracy as regards grammar is less important than fluency and a right choice of words. The ready speaker is always at an advantage

in after life: he can stand up for himself, and, as regards composition, it is quite unusual to find a boy who speaks easily writing lame English. Indeed, if boys can be trained to say through to themselves, from beginning to end, the sentence they are about to commit to paper, their composition gains in strength and clearness at once. It is astonishing to note how freely a boy will alter his written composition as he reads it aloud when called upon to do so; and the power of self-criticism he thus exercises when it is too late he can be easily trained (by the encouragement of speech in the classroom) to apply for the prevention, rather than the cure, of faulty sentences.

But mere ease and readiness of language will never by itself produce results of any value in English composition. The value of an essay is measured by the quality of the ideas it contains. An essay full of ideas will bear successfully a considerable burden of errors in language, whereas a featureless essay gains but slight recognition, however perfect the composition may be; since in such a case the perfections are taken for granted, or at any rate their nature is not such as to arrest the reader's attention; they simply help him to discover, with the minimum of effort, the emptiness of the whole exercise: ideas of good quality are the first essential.

It is, then, useless to begin to write till one has something to write about—a platitude more honoured in the breach than in the observance—and essay planning must form a regular part of the training in English if good work is to result. But there are other values than that of mere information gathering in the planning of an essay. The one justification of an outside written examination is its test of the generalship, sense of proportion, and general level-headedness of the examinee. Many a clever boy has done badly in examinations through knowing too much of his subject, and therefore wasting time on details that are not worth setting down. A training which will enable a boy to envisage his task as a whole, deal with it proportionately, reject unnecessary detail, and finish it within a given time, is a training of self-evident value; and if his practice in skeleton essay building leads him to sketch short skeletons of every written answer he attempts, the gain to all concerned is obvious. There is no need to dwell on the moral value of a cool, deliberate attack upon a question compared with the panic-stricken plunge into the midst of it that one finds only too often in these days of over-pressure and consequent crudity.

I will conclude with a few notes of a more detailed nature. Grammatical terminology is needed for the study of foreign languages; also for the rational correction of errors in English. There is no need to shun the subject as a purely formal one: properly treated, it is full of life. Graphic analysis is one of the liveliest of school exercises, and a useful discipline in itself. As formal grammar is but rarely taught to-day in elementary schools, boys from these schools have to be taught the subject in outline from the beginning. The correction of compositions is relatively useless unless done in the presence of the writer—and while he is actually writing if possible—since so much of what we call correction is in reality the remoulding of weak sentences rather than the putting right of actual mistakes; and this remoulding is obviously most effective while the subject is still plastic, hot from the writer's brain. It is thus a good method to set the class to work on an essay previously talked over and sketched out in skeleton, and for the master to go from boy to boy as he writes. A section of the essay just done dictated occasionally extempore by the master will often give the better boys an insight into the possibilities of alternative forms of words, and will, moreover, enforce the connexion between speech and writing, to the advantage of the latter. A valuable exercise in exact expression and intensive thinking is provided by the framing of definitions, with the teacher in the part of Socrates. Professionalism, or Leisure, or Liberty, and dozens of other terms, will each give ample exercise in the fitting of thoughts with words, and the patching up, as the exercise proceeds, of the holes discovered in the earlier attempts at definition. A good definition is, moreover, an excellent launch to an essay.

The occasional reading aloud of prose of high imaginative

power, like Lord Dunsany's "Dreamer's Tales" (George Allen, 6s.), will help to strengthen the one faculty without which no essay worthy the name can be written—constructive imagination. As regards recitation, it is probably better to read over frequently a considerable number of chosen pieces than to learn laboriously, and therefore with probable disgust, a smaller number of lines. As songs are learnt by being sung, so poems will be learnt by being read, and with enjoyment all the time. There is no need to dwell upon the importance of debating societies; for there the boys learn to stimulate each other and gain ideas for themselves—*i.e.* not merely from the master. A school Shakespeare Society which presents a play once a year is most valuable. The training in elocution, deportment, and presence, as well as in co-operative effort and inventive ingenuity afforded by a school play is inestimable. We are in the midst of a dramatic revival which Mr. Galsworthy terms the "Third Renaissance." It behoves the schools to make full use of this welcome breaking down of old prejudices. But where is the time to come from for all this? It will come largely from the turning of informative lessons in literature and history into training lessons, to the ultimate gain of the subjects so converted, even from the examination point of view, and it should also come from the enlightened self-interest of the specialists, who must surely realize that a real command of the machinery of thought and expression—*i.e.* English—will increase the efficiency of their own work and put π per cent. on the value of every paper worked in their own subjects.

CORRESPONDENCE.

CHRISTIAN EDUCATION OF WOMEN IN THE EAST.

To the Editor of *The Journal of Education*.

SIR,—It is well known that vast movements are rapidly transforming the countries of the East. Amid this transformation new problems are emerging, and one of them is now acknowledged on all hands to be supremely important—namely, the kind of education which Eastern women shall receive to enable them to take their right place in these new movements. Shall they receive a merely Western education, and bring to their nation an ideal of human life which is not interwoven with the old national ideals, or shall they still remain true to the best of that which their nation has always desired for women, and yet add to the older ideal the new social and intellectual freedom and the stronger religious life which Christian education can give? As women leave their seclusion and exert a new influence, is this influence to find expression in a materialistic or in a spiritual interpretation of life? With the entrance of Western science and Western civilization the old faiths are rapidly losing their power for guidance and restraint, and nothing could be more disastrous at the present time than the diffusion in the East of the merely material benefits of Western civilization, apart from spiritual ideals, in the atmosphere of which all that is best in modern progress has developed.

While serious desire on the part of Eastern girls and women for education has opened the way for the action of Government as well as for private enterprise, and schools of varying character are springing up in all directions, it is more and more clearly recognized that unless all the education given in the East is influenced by the religious spirit, and aims at the training of character as well as of intellect, the education given becomes rather a peril than an advantage.

Facts such as these constitute a strong appeal to the leaders of women's education in England. Only those who have had to guide modern educational thought can understand the need for sound principles by which to direct the new, and sometimes vehement and confused, aspirations of the races undergoing this rapid transformation. Hence the need for many more women of the highest educational faculty to guide this work in the East. Moreover, in the solution of all these problems far more help than in the past must be given by those who are guiding education at home.

The urgency of the crisis has led to a special effort during this year to bring the situation, with all its opportunities, to the notice of thoughtful women in England. An Advisory Council has been formed, on which are the names of almost all the Heads of the Women's University Colleges in this country, as well as those of some prominent Head Mistresses of girls' schools; and meetings have been held at a number of educational centres, and have been addressed by Dr. Michael Sadler, Lord William Cecil, Prof. Adams, Miss de Sélincourt (Principal of the Lady Muir Training School at Allahabad), Miss McNeile (Head Mistress of the High School, Benares), and others.

The aim of this effort is not to form any new organization or society, but to enlist fresh interest in the work of the various Mission Boards, which have led the way in modern education for boys, and are now called upon to contribute to the still more difficult work of the new education to be given to girls.

For the further consideration of this subject a Conference will be held at Oxford from September 4 to 10, at which it is hoped that, in addition to some of the speakers mentioned above, the Bishop of Oxford, Prof. Cairns of Aberdeen, Miss Small (Principal of the Missionary College, Edinburgh), Mr. A. G. Fraser (Principal of Trinity College, Kandy), the Principals of the Cambridge Training College and of St. Mary's College (London), the President of the Association of Head Mistresses, and others will take part. Miss de Sélincourt will be very glad to receive suggestions or offers of help, or to give further information with regard to the forthcoming Conference. All communications should be addressed to her at 26 Belsize Grove, London, N.W.—Yours, &c.,

A. W. RICHARDSON,
 Vice-Principal Westfield College.

DR. ROUSE ON RIVALRY.

To the Editor of *The Journal of Education*.

DEAR SIR,—I read in "T. H. H.'s" letter (*Journal of Education*, page 308): "The fact remains that rivalry is about the only force which will induce the average English boy to do the best with the faculties with which Nature has endowed him." I hope I shall not be alone in protesting against this belief. In my own experience I have found that the boy's will is engaged on the side of intellectual work whenever the work is properly presented and not beyond his powers, by which last I mean easy enough to be done by him at his then stage, but yet needing a distinct effort to do it. Without the effort there is no pleasure; if the effort is too great for him he will not try.

The more I learn of what good teachers can do, and how they do it, the more I am convinced that if the "average boy" does not want to learn it is his teacher's fault, and not his own. I hardly ever meet a man or woman teacher who is not convinced that our public examinations—Locals, Matriculations, and all that horrid brood—stand in the way of all good education.—Yours truly,

W. H. D. ROUSE.
 Gonville and Caius College, Cambridge,
 May 5, 1912.

CHANGED REGULATIONS FOR OXFORD NON-DEGREE COURSE.

To the Editor of The Journal of Education.

SIR,—May I, through your columns, draw the attention of head mistresses and other persons who are preparing girls for Oxford to some slight changes that have been introduced into the regulations for qualifying examinations accepted for the non-degree course?

A Higher Certificate will be accepted if it includes the necessary subjects, even though these subjects have been taken in different years, and, as before, if only one language appears on the certificate, a second language taken in the Oxford Higher Local may be added. Similarly, the necessary subjects, if taken in the Oxford Senior Local, need not have been passed in the same year. These arrangements will simplify the conditions of admission and put the qualifications obtained through the Oxford Senior Local and the Higher Certificates on the same footing as those obtained through the Oxford Higher Local. Students who are aiming at the degree course should be careful to consult the list of exemptions from Responsions published by the University in June, as various changes have been made.

After October 1, 1914, the examinations qualifying for admission to the examinations for degrees in music will be the same for women as for men.

The new regulations have been approved by the University and have appeared in the *Gazette*. They will be ready for distribution at the end of June and will come into operation on October 10, 1912, so that they will affect students coming into residence in Michaelmas Term.—Yours faithfully,

ANNIE M. A. H. ROGERS,
Hon. Secretary to the Association for the
Education of Women in Oxford.

Clarendon Building, Oxford, May 17, 1912.

PROPORTION OF STAFF TO SCHOLARS.

To the Editor of The Journal of Education.

DEAR SIR,—In the May number of your journal a short note occurs on the pamphlet recently published by the Association of Head Mistresses on "The True Cost of Secondary Education for Girls," which is so worded as to imply that a staffing rate of one assistant mistress for twenty girls is, though a minimum, still a possible one. A perusal of Section C of Part II of the pamphlet shows clearly that this is not the meaning of those who are responsible for its issue, and I think it important that no impression should be left on the minds of either teachers or administrators that so influential a body as the Head Mistresses' Association considers one mistress per twenty girls an adequate staff.

Seven years' experience as head of one of the new secondary schools, where afternoon school is compulsory, has convinced me that any less generous scale than one mistress for every seventeen girls means both scamped work and over-strain. That the Executive of our Association holds exactly the same opinion is clear in the pamphlet referred to above, and I should be glad if you will give publicity to this letter, so that the disastrous impression produced by last month's "Jotting" may, in part, be removed.

I may add that the rate of 1 to 17 has been given as the minimum possible for good work by one of the Board of Education Inspectors once to me and again in my presence. Attempts to economize on staff invariably end in failure, owing to the over strain and ill health produced; but Local Authorities learn slowly, and meanwhile schools and teachers suffer.—I am, Sir, yours faithfully,

CHARLOTTE M. WATERS.

County School for Girls, Bromley, Kent,
May 16, 1912.

UNIFORMITY OF STANDARD FOR BRITISH AND COLONIAL CANDIDATES.

To the Editor of The Journal of Education.

DEAR SIR,—Now that most of the high schools in our smaller colonies are provided with centres for University, Local, R.A.M., and R.C.M. Associated Board, and Royal Drawing Society examinations, and enter candidates largely for these examinations, it would be interesting to have some reliable information as to how these colonial candidates compare with candidates from English schools.

There seems to be an idea amongst some teachers that "the standard is not the same," especially with regard to musical and art examinations. Surely, if the same certificates are granted, the same quality of work must be demanded from home and from colonial candidates alike? Will some one, with knowledge of centres in England and abroad, please write and help to clear up this doubt?—Yours faithfully,

FLORENCE E. WINTER.

The Drayton High Schools,
Newport, Mon.

SUFFRAGE FOR WOMEN.

To the Editor of The Journal of Education.

SIR,—May I, as a reader of *The Journal* from its first number onwards, have permission to criticize your note on "The N.U.T. and the Political Liberty of Women"? From your remark one would infer that the opposition to the suffrage for women came chiefly from men, though, at the Hull meeting, one of the warmest opponents of the motion was a woman teacher of unquestioned experience and professional standing.

It is difficult to ascertain the general opinion of the most representative women of the nation, but there is ample evidence that, in addition to the large number who are entirely indifferent to the question, there is also a large number of thoughtful and earnest women who are opposed to the present movement as inimical to the best interests of women and of the race. Your journal would not be the place to enter into arguments on either side, but I think you will allow my protest as to a statement suggesting, unwittingly, inaccuracy in a matter of fact.—Yours, &c.,

Dun Erin, Chalfont St. Peter.

MARION MACDONALD.

[It may not be true of the country at large, but undoubtedly at the N.U.T. meeting the opposition to suffrage for women came chiefly from the men.—ED.]

AMERICAN WRITERS ON EDUCATION.

To the Editor of The Journal of Education.

DEAR SIR,—To the three names of good American writers on education mentioned in the April *Journal* at least two should be added—viz. ex-President Eliot, of Harvard, for the last twenty or thirty years the acknowledged premier educator and greatest intellectual force in the United States, and Prof. John Dewey, of Columbia (formerly of Chicago), the philosophical thinker *par excellence* among American educational writers, as Dr. Snedden is the outstanding practical administrator. Apart from the writings of these men and the others you have mentioned, a recent work on "The Principles of Education," by Dr. Henderson, of Brooklyn, can be strongly recommended to English readers.—Yours truly,

A. WATSON BAIN.

The High School, Montreal, May 2, 1912.

"THE PLAY'S THE THING."

IT happened that Miss Finlay-Johnson's delightful little book on "The Dramatic Method of Teaching" fell into my hands a few days after I had heard a lecture by Mr. Louis Parker on another aspect of the same movement.

Miss Finlay-Johnson's book is written with engaging candour and filled with telling photographs of actual scenes and games carried out with convincing *naïveté* and make-believe by the lucky boys and girls of the little school at Sompting. As soon as I looked at the book I could not help saying: "This is the very thing a teacher wants; it shows how to begin; it gives a magic wand that will stir the sullen depths far down within those inattentive imps of negligence before whom he vainly pours out his best endeavours so many weary afternoons—while their mayhap eager little minds are far, far away from him and his lessons."

I read on how children, once dull and listless, invented ways and means of teaching themselves not only history, but such more unlikely matters as geography and arithmetic. All this was delightful, but I still read on seeking something else. It is not for nothing that the iron has entered our souls; we are not easily convinced that all play will make Jack a sharp lad, however true it may be that all work will make him dull. The something else I sought was what used to be called results and to be measured in the marks inflicted under torture in examination vaults. And this something I did not clearly find. Whereupon it became apparent that the book evidences more than a reform or new method in teaching; it shows that there has come to life a new method in inspection. Unless memory plays one false, there have been games in school before to-day, but they were judged too frivolous by the ruling powers. Now that we have lived to hear of a better method or criterion of inspection, there is hope that we may live to hear also of better methods of examination—methods that will test not only how much can be poured into the hollow parts of a child's mind, but will find

out what are the strength and the flexibility of its solid structure, the part that cannot be stuffed. It is, of course, this intimate framework of the child's mental constitution that is nourished and trained by the spontaneous exercise of learning through games in school under the eye of an alert teacher.

And all that is, at any rate, part of the meaning of the title of Mr. Louis Parker's recent lecture to the members of the London Schools Musical and Dramatic Association in the theatre of the Guildhall School of Music. In introducing him, the Hon. Mrs. Alfred Lyttelton said an audience of teachers would, of course, admit that "the play's the thing," but still had to ask how the argument looks from the different standpoint of an experienced dramatist.

"The play's the thing," said the author of "Pomander Walk," not merely to catch the conscience of the king, as Hamlet puts it, but to catch also the wandering attention, to direct the fancy, and to fix the ideals of that greater king the child.

The great enemy to dramatic art, and to those excellences of character high dramatic art could foster, is the absence among us of a real theatre-loving and theatre-respecting audience. The ordinary Englishman does not take the theatre to be an essential element of social and national culture that cannot be neglected with impunity. He has to be dragged to the play almost by main force, and he only lets himself be dragged there on semi-solemn occasions of family state. It must be admitted that the theatre is more expensive to visit than it should be. In America, where everything else is ruinously dear, the price of admission to a theatre is reasonable. When the Englishman is at a play he is apt to model himself upon the lady novelist's hero—a stern-visaged man with, if possible, iron-grey hair, fixed square jaw, sitting silent and impassive in grim determination never to be amused, or at least to give any sign of amusement. The real Englishman is alienated from the theatre by the over-emphasis which the exigencies of advertisement magnates contrive to give to the personality of the actor, to the fashion of the clothes he or she wears, and to the pettiest details of his or her toilet. Possibly we need in England what one American University already provides—a Professorship of Dramatic Art. If the holder of that chair tries to promote the writing of drama, the result is to be dreaded; but, if he trains his pupils to listen with true critical appreciation to the highest art of the stage, the beneficial effect on the nation's welfare and happiness will be immediate and far-reaching. For twenty years Mr. Parker was himself a schoolmaster, and during that time he realized more and more clearly the futility of trying to make a whole schoolful of boys perform with either profit or pleasure. When, however, he made it his endeavour to fit them to enjoy the best, say, of Beethoven's sonatas, then indeed he did accomplish something and earned his pupils' lasting gratitude.

There is another American institution now well established and of great value—the Drama League. This League appoints a competent committee to witness and report upon every new play. The names of the members of the committee are not published, so that they cannot be reached and unduly influenced by interested persons, and they do not accept free seats. In order to be scrupulously fair they do not give notice of an intended visit, and they do not criticize first-night performances, which frequently are not quite all that authors and actors desire. The reports they issue are eagerly awaited and acted upon by the large membership of the League.

If we had in this country some such enlightened means of guiding public opinion, there might be no need for a Dramatic Censor. But, as things stand, a Censor is still essential and ought to be supported by public opinion; for, while it is quite true that no managers or authors actually connected with the English stage desire to have anything to do with objectionable performances, there is nevertheless a large number of outsiders who are only too eager to use any opportunity that may offer for making profit out of the basest of human impulses.

The members of the Association were a little taken aback when Mr. Parker claimed as qualification for addressing them that he knew nothing about the detailed aims of their society.

But they soon found that this was only his modest way of disclaiming authority in pedagogic realms. He urged that the society might help not ineffectually in some such social service as that of the American Drama League.

When Mr. Parker went on to describe his recollections of the Stepney Children's Pageant of 1909, there were those in the audience who despaired of ever being themselves so intelligent, so industrious, so alert, so responsive, and so obedient as it appeared some of their scholars had then been. There never were in Mr. Parker's experience any actors to compare with those young actors in these respects, and he felt confident that even examination results would show how much more information about the history of their native metropolis they had gained than other children could gain from books. And yet examinations could hardly test the higher qualities of real importance for after life that must have been acquired at the same time—courage, courtesy, a pleasant bearing, clear enunciation, the correction of disagreeable local peculiarities or vulgarities, with the preservation, on the other hand, of good local dialect, and, above all, that true patriotism which is inspired by a sympathetic understanding of the noblest characters and highest deeds in our national history.

To quote the final choral ode in the Stepney Pageant :

What heroes thou hast bred,
O England, my country !
I see the mighty dead
Pass in line,
Each with undaunted heart
Playing his gallant part,
Making thee what thou art,
Mother of mine !

J. C. M.

THE TEACHERS' GUILD OF GREAT BRITAIN AND IRELAND.

[By a resolution of the Council of June 19, 1884, "The Journal of Education" was adopted as the medium of communication among members of the Teachers' Guild; but "The Journal" is in no other sense the organ of the Guild, nor is the Guild in any way responsible for the opinions expressed therein.]

The Council met on Friday, May 17, 1912. Present: The President, Canon H. Wesley Dennis, in the chair; Miss H. Busk, Miss M. Cocking, Miss F. Edwards, Miss B. Foxley, Mr. H. B. Garrod, Mr. R. W. Hinton, Mr. J. L. Holland, Mr. H. Holman, Miss M. R. N. Holmer, Mr. P. B. Ingham, Miss H. Martin, Miss E. Newton, Mr. F. Storr, Mr. J. Wise.

Delegates were selected for the International Moral Education Congress at The Hague.

A letter and resolutions from Mr. T. Allen on the tenure of head masters were considered. It was proposed from the chair and agreed to refer the matter to the Education Committee, asking them to consider the Clauses of Schemes of the Board of Education relating to Tenure, and to send up to the Council a resolution on the subject.

The Annual Report was considered in detail and, with a few verbal alterations, adopted.

The General Secretary reported that during the year seventy-two new members had been elected in the London Centre as against twenty-eight for the corresponding period of 1911.

Miss Foxley announced that she had been able to form a new Centre at Cardiff.

The report of the Executive Committee was received.

The resolutions of the Conference of Representatives of the College of Preceptors, the Teachers' Guild, and the Private Schools Association, as amended, were considered. A further amendment was made, the Report being then adopted as follows:—

REPORT OF THE CONFERENCE OF REPRESENTATIVES OF THE COLLEGE OF PRECEPTORS, THE TEACHERS' GUILD, AND THE PRIVATE SCHOOLS ASSOCIATION.

As amended at the Council Meeting of the Teachers' Guild on Friday, May 17, 1912.

(A) That, in the opinion of this Conference, the following recommendations should be urged by the bodies here represented upon

(Continued on page 430.)

CAMBRIDGE MANUALS

General Editors: P. GILES, Litt.D., Master of Emmanuel College, and
A. C. SEWARD, M.A., F.R.S., Professor of Botany in the University of Cambridge.

PRICE **1s** NET

bound in cloth; in lambskin 2s 6d net

A series of small volumes on literary, scientific, and other subjects, dealing with various aspects of thought, and describing the results of the most recent research. Each volume is specially written by an acknowledged authority who is at pains to make his views intelligible to those who have no previous acquaintance with his subject.

BOOKS BOUGHT AT GOOD PRICES.

those who are interested in or directly concerned with the administration of secondary education :—

1. That both on general grounds and in the special interests of educational experiment, it is desirable that efficient private schools should be preserved.

2. That, in order that private schools may fulfil their function in our educational system, it is essential that the independence of those schools which do not desire recognition by the Board of Education or by Local Authorities should be safeguarded.

3. That (i) scholarships awarded by any Local Authorities should, subject to the usual limitations as to income, age, and place of residence, be open to all pupils without regard to their place of education; and (ii) that, subject to the approval of the Local Authority, successful candidates from private schools should be allowed to hold their scholarships at such schools.

4. That the general standard of purely educational efficiency required for recognition by the Board of Education from private schools should not be lower than that which is required from schools publicly aided or maintained; but that every reasonable consideration with regard to demands as to structure and equipment should be made.

5. That there is need for the continued existence of small private schools of a preparatory character near to the homes of young children, and that Local Authorities would do well to grant some form of recognition and assistance to such schools, where they can be shown to be doing useful service under proper hygienic conditions.

(B) As a result of the discussions that have taken place at the various meetings of the Conference it seems desirable to ask the bodies represented to make representations in the proper quarters so as to secure :—

1. That before further public provision for secondary schools is made in any area, a Council in exercising their powers shall have regard to any existing supply of efficient schools or colleges as required by Section 2 (2) of the Education Act, 1902. (It appears to the members of the Conference that this section of the Act has not been duly enforced in the past.)

2. That the grants paid by the Board of Education for pupils under the age of twelve at secondary schools should be extended

to include all such pupils whether previously educated in elementary schools or not.

N.B.—The Conference is of opinion that their resolutions should form the basis of a series of articles in the public Press, and that in due course a joint deputation should bring them before the President of the Board of Education.

A draft scheme for the federation of sectional subject associations was received and considered.

It was proposed by Miss Foxley, duly seconded, and agreed that the scheme be generally approved, but that details should be matters of negotiation. It was further agreed that Mr. H. B. Garrod be asked to carry out the preliminaries.

Two grants have been made from the Benevolent Funds.

The General Secretary reported that, owing to the death of one of the recipients, her executors had asked to be allowed to refund the amount of the grant to the fund. In the second case, the greater portion of the grant had been repaid.

Several changes were recommended in the book of "Holiday Resorts"—the insertion of two maps (one of the cathedrals of England, the other of mineral water health resorts), a short list of lady guides, and a form of application for membership of the Guild. The question of publication of the book was referred to the Finance Committee, with power to act.

The report of the Special Committee appointed to consider the position of the Guild was received and adopted. The chief points in the report were : (1) Efforts are being made to further develop the London Centre by means of special meetings in various districts. (2) The formation of the Secondary, Technical, and University Teachers' Provident Society, in co-operation with four other associations. Special meetings are being held to make the Society and the Guild known both in London and also in the provinces. (3) The recommendation to form a series of loan collections. This question was referred to the Education Committee. (4) The alteration of capitation fees, both in the London and provincial centres. (Full information as to these alterations will be sent to the local secretaries in due course.)

The Council then considered the question of the selection of a representative of the Teachers' Guild upon the Teachers' Registration Council. It was proposed from the chair, and carried unanimously, that Mr. F. Storr be selected.

The next meeting of the Council was fixed for June 7, 1912, at 7 p.m., when Committees for the year will be appointed.

Sur la Côte d'Azur.

A Castle, with every modern comfort, surrounded by large pine woods, overlooking the sea, $\frac{3}{4}$ mile from the Grande Plage. Excellent air and delightful climate Summer and Winter. Tennis Lawns, &c. Splendid Excursions.

letter, and in her Reading Society. For information
about her Meetings for the Study of Literature apply
by letter.—143 King Henry's Road, London, N.W.

TEACHERS' DIPLOMAS.

The COLLEGE OF PRECEPTORS holds Exam-
inations of Teachers for the Diplomas of Associate,
Licentiate, and Fellow of the College in London,
Birmingham, Bristol, Dublin, Leeds, Liverpool,
Manchester, Newcastle-on-Tyne, and Plymouth. The
Associateship and Licentiate Examinations are
held twice a year, viz., in January and in August-
September. The Fellowship Examination is held
only in January. The Theory and Practice of Edu-
cation is an obligatory subject for each grade. For
Regulations apply to the SECRETARY, College of Pre-
ceptors, Bloomsbury Square, London, W.C.

PRELIMINARY EXAMINATIONS FOR MEDICAL, DENTAL, AND PHARMACEUTICAL STUDENTS.

The COLLEGE OF PRECEPTORS holds Pre-
liminary Examinations in March, June, September,
and December. All the Examinations are held in
London, Birmingham, Bristol, Cardiff, Edinburgh,
Leeds, Liverpool, Manchester, Newcastle-on-Tyne,
and Nottingham. For the June and December
Examinations there are other Centres, including
Blackpool, Brighton, Cheltenham, Croydon, Ealing,
Exeter, Glasgow, Inverurie, Margate, Plymouth,
Portsmouth, Sheffield, Southampton, Southport,
Sunderland, and York. In March there is a Centre
at Inverness, and in September at Aberdeen. For
Regulations, apply to the SECRETARY, College of
Preceptors, Bloomsbury Square, London, W.C.

UNIVERSITY DEGREES.

Applications should be sent to the HEAD OF THE DEPARTMENT.

MADAME

BERGMAN ÖSTERBERG'S PHYSICAL TRAINING COLLEGE, DARTFORD HEATH, KENT, FOR RESIDENT STUDENTS.

The College, the first of its kind in England, was opened in 1885, with the view of training educated women as Teachers of Scientific Physical Education.

The Course of Training conducted by a large and competent staff of teachers, extends over two years. It includes the study of Anatomy, Physiology, Hygiene, Anthropometry, and Theory of Movement. In practical subjects instruction is obtained in Ling's Swedish Gymnastics, Dancing, Outdoor Games, and Medical Gymnastics and Massage. At the end of the Course, examinations are held and certificates of theoretical knowledge and practical efficiency in teaching are awarded to successful students.

The College, which provides 50 separate bed-sitting rooms and several large studios, is situated on very high ground, gravel soil, on the confines of an extensive heath, half an hour from town. It stands in its own fine grounds of fourteen acres, which contain an Outdoor Gymnasium, Running Track, Cricket and Hockey Grounds, Lawn Tennis Courts. The Indoor Gymnasium, 70 ft. by 35 ft., and the Medical Gymnastic Room, 50 ft. by 25 ft., lofty and well ventilated, are fitted up in the most perfect style, all the apparatus having been designed and executed in Stockholm.

The immediate neighbourhood offers over one thousand children for the students' practice as teachers. Hundreds of posts have been obtained through this College, a list of which is to be obtained with the Prospectus.

Students admitted in September.

For particulars apply—THE SECRETARY.

MADAME

OXFORD AND CAMBRIDGE UNIVERSITY TRAINING COLLEGES.

THE PUPIL TEACHERS' UNIVERSITY SCHOLARSHIP COMMITTEE invite applications for SIX SCHOLARSHIPS provided by the DRAPERS' COMPANY, each of the annual value of £25, and tenable for three years at Oxford or Cambridge.

Candidates must be Pupil Teachers, Student Teachers, or Bursars, who will be eligible for admission to a University Course at a Training College in 1913, according to the regulations of the Board of Education.

Six Scholarships tenable from October 1912 were awarded on the results of an Examination in February 1912. The six Scholarships above referred to will be awarded on the results of an Examination to be held on **October 4-5, 1912.** Successful candidates will go into residence in Michaelmas term 1913. The Board of Education allow a Student-Teacher to sit at this Examination, although he may be in his Student-Teacher Year.

In addition to these Scholarships, and in connexion with the Committee's Examination, the following Exhibitions are offered by the Authorities of certain Colleges:—

At OXFORD.

One Exhibition of £50 at Brasenose College (3 or 4 years).

One Exhibition of £25 from the Oxford Elementary Training College (3 years).

At CAMBRIDGE.

Three Exhibitions, each of value £30 to £40, for 3 years.

One from Emmanuel College, £40.

One from King's College.

One from Trinity College.

THE VICTORIA UNIVERSITY OF MANCHESTER.

DEPARTMENT OF EDUCATION.

THE University provides complete Courses of Training for Graduate Students proposing to qualify for appointments in Secondary Schools.

(1) SIX BURSARIES are offered, giving free tuition in connexion with the Course of Training under the Board of Education Regulations for the Training of Teachers for Secondary Schools. Candidates must have completed the course leading to a University Degree.

(2) TWO or more ADVANCED STUDENTSHIPS in EDUCATION are offered to Graduates who, in addition to the degree, have completed with credit a course of post-graduate training in Education and desire opportunities for further study and research. These Studentships are of the annual value of £50, and include the discharge of duties for a portion of each week as Class Teacher in the Fielden Demonstration School.

(3) The University also receives every year about one hundred students who have completed their education at a Secondary School (fifty men and fifty women) and who are prepared to spend four years at the University under the Regulations of the Board of Education for the Training of Teachers for Elementary Schools. Under these Regulations the first three years are spent mainly in academic work for a degree and the fourth year in professional training. A few of these places are reserved for students prepared to be specially trained to qualify for appointments as teachers of young children.

For further particulars and forms of application apply to the REGISTRAR, The University, Manchester.

BEDFORD KINDERGARTEN TRAINING COLLEGE.

14 THE CRESCENT, BEDFORD.

Head Mistress: Miss AMY WALMSLEY.

A thorough training is given at the above College to Students preparing for the National Froebel Union Examinations.

Opportunity for Class Teaching is afforded in the Kindergarten, Transition, and Preparatory Classes of the School.

House of Residence for Students—Shenstone Lodge, Ashburnham Road.

For terms and particulars apply to the Secretary, C. B. HALLILEY, 26 Mill Street, Bedford.

BEDFORD PHYSICAL TRAINING COLLEGE. LING'S SWEDISH SYSTEM.

Principal: Miss STANFELD.

(President of the Ling Association of Gymnastic Teachers, Teacher of Gymnastics in the Cambridge Teachers' College, Froebel Educational Institute, Bedford Kindergarten College, Bedford High School, &c.).

The object of the College is to train Students to enable them to become Teachers of Gymnastics and Games in Schools.

The Course of Training extends over two years, and includes the Theory and Practice of Gymnastics on the Swedish System, Massage and Medical Gymnastics, Anatomy, Physiology and Hygiene, Dancing, Lacrosse, Lawn-tennis, Hockey, and Cricket.

An educational centre like Bedford affords special facilities for practice in Teaching and professional coaching in Games. Swimming and Boating in the summer.

There is an increasing demand for Teachers thoroughly trained on this system.

For Prospectus apply—37 Lansdowne Road, Bedford.

LIVERPOOL GYMNASIUM TRAINING COLLEGE,

BEDFORD STREET, LIVERPOOL.

LING'S SWEDISH SYSTEM.

Principal: Miss IRENE M. MARSH.

For Ladies as Gymnastic and Games Mistresses, and Medical Gymnastic Teachers and Masseuses.

THE Course is two years, and includes a large number of subjects, making the training very valuable and enabling each Student to specialize in some particular branch.

It includes Educational and Remedial Gymnastics, Fencing, Rowing, Swimming, Dancing, and Games. Also it includes extra subjects such as Needlework and Elocution.

Lectures and lessons are given in Anatomy, Physiology, Pathology and Orthopedics, Ambulance, Home Nursing, Theory of Movement, &c.

For prospectus apply—COLLEGE SECRETARY

THE INCORPORATED GYMNASTIC TEACHERS' INSTITUTE. (Founded 1897.)

SCHOOLS FOR SALE AND PARTNERSHIPS.

Messrs. TRUMAN & KNIGHTLEY, Ltd., Educational Agents, 158-162 OXFORD STREET, LONDON, W.

MESSRS. TRUMAN & KNIGHTLEY always have on their books a large number of thoroughly genuine Schools for Sale and Partnerships to negotiate, as well as the names and requirements of numerous would-be purchasers, and therefore can offer unusual facilities for satisfactorily negotiating the TRANSFER of SCHOOLS and arranging PARTNERSHIPS. All communications and inquiries are treated in the strictest confidence. The following are a few selected from their list:—

GIRLS' SCHOOLS.

SOUTH COAST.—DAY AND BOARDING SCHOOL FOR GIRLS, with preparatory class for little boys; house five minutes' walk from the sea. Receipts, £260; goodwill, to include school furniture, £50.—T 2001.

PARIS.—The Principal of a first-class Educational Home in Paris desires to dispose of her connexion; 7 boarders paying fees from £150 to £200 per annum. Profit about £300. Accommodation for 10 pupils. A thorough introduction and excellent references given.—T 2006.

STAFFORDSHIRE.—Good-class **BOARDING AND DAY SCHOOL FOR GIRLS**, with Kindergarten; 14 boarders and 36 day pupils. Premises consist of two large houses connected by a covered way and standing in delightful grounds. Receipts over £1,500, profit £300. Principal must retire owing to ill-health and would accept the small sum of £200 for goodwill.—T 2,000.

LONDON.—The Principal of a nice-class **KINDERGARTEN AND JUNIOR SCHOOL** for Boys and Girls, in a fashionable West-end district, desires to dispose of her connexion. There are 38 pupils. Receipts £656, profit about £200. Capitation fee accepted for goodwill. This is a particularly good opening for a lady who is a trained Kindergarten teacher.—T 1,193.

LONDON.—House of **RESIDENCE FOR STUDENTS** near Kensington, with 13 students now in residence, whose average receipts amount to £26 per week. Students are all over 20 years of age, and are girls of good families.—T 1,188.

ESSEX.—Good-class **BOARDING AND DAY SCHOOL FOR GIRLS**; 74 pupils, of whom 8 are boarders. Receipts £1,321, profit £302. Delightful premises built regardless of expense.

Grounds of nearly an acre, with good tennis and croquet lawns. The school can be bought at a bargain as only £300 is asked for goodwill, or one term's capitation fees.—T 1,186.

SURREY.—Very flourishing **GIRLS' HIGH SCHOOL**, with Kindergarten; old-established. 85 pupils, 16 of whom are boarders. Receipts £1,200, net profit £300. Splendid schoolroom accommodation for 120 pupils. Good residential neighbourhood, with plenty of scope for increasing present number of pupils.—T 1,189.

HOME COUNTIES.—Large, old-established, and very successful **BOARDING AND DAY SCHOOL**. Principal retiring. 50 boarders, 100 day pupils. Gross receipts over £3,000. Profit £500. Fine premises with field for games. Capitation fee accepted on all pupils transferred. Personally inspected and strongly recommended.—T 1,158.

LONDON, N.—Old-established **BOARDING AND DAY SCHOOL**, with Kindergarten. Principal retiring from the teaching profession. 5 boarders, 60 day pupils. Gross receipts over £1,000. Entire goodwill only £400.—T 1,157.

LANCASHIRE COAST.—Good-class **BOARDING AND DAY SCHOOL**, old-established. 25 boarders, fees £50 per annum; 30 day pupils, fees £15 per annum, exclusive of extras. Specially built premises. Receipts £2,300, net profit over £600. Genuine opening.—T 1,130.

LONDON, N.—Large and flourishing **PRIVATE DAY SCHOOL**, with Kindergarten. 165 pupils. Fees 4s to 12 guineas per annum, exclusive of extras. Specially built school premises, including large assembly hall and gymnasium. Receipts £1,166, profit £330. Entire goodwill, £700.—T 1,168.

NO CHARGE TO PURCHASERS.

Full particulars of the above and others may be obtained on application. Intending purchasers are invited to write stating their requirements. Address—158 to 162 OXFORD STREET, LONDON, W.

RIVINGTON & CO.'S NEW BOOKS.

FIRST LESSONS IN LATIN GRAMMAR AND TRANSLATION. By W. GREENSTOCK, B.A., Assistant Master at Malvern College. Author of "A Primer of Greek Exercises." Crown 8vo, 2s. 6d. *Just ready.*

This book forms an introduction to continuous narrative and contains 115 exercises, with Latin-English and some English-Latin sentences illustrating graduated lessons of Accidence and Syntax. All the necessary grammar and rules are given in the book, and the vocabulary is based on Caesar. Questions on grammar, parsing, and frequent revision of previous exercises are special features of the book.

GRAMMAIRE FRANÇAISE PRATIQUE BASÉE

SUR LA MÉTHODE INDUCTIVE. By W. G. HARTOG, M.A. New and Revised Edition. Crown 8vo, 3s. 6d. complete.

Part I, forming a Complete Elementary Grammar, may be had separately. 2s. 6d.

FIRST FRENCH COURSE. By A. R. FLORIAN, M.A., Head Master of the Priory County School, Shrewsbury. Author of "A First Book of German Oral Teaching." Crown 8vo. With Illustrations. 2s. 6d.

The First Course, consisting of 88 Lessons, is intended for beginners. Whilst retaining the essential feature of the *Direct Method*, plenty of Oral Practice, the book lays special stress on Grammar.

There are illustrations of French life, suitably adapted to the text.

SECOND FRENCH COURSE. The Text consisting of extracts from "Les Mousquetaires," specially adapted and forming a complete narrative. With *Questionnaires*, Grammar, Exercises, and a complete Grammatical Section and Vocabulary. By A. R. FLORIAN, M.A., Crown 8vo, 2s. 6d.

The above books have both been placed on the London County Council's requisition list for Senior Departments of Public Elementary Schools.

FLORIAN'S FRENCH GRAMMATICAL READERS.

Crown 8vo, 1s. 6d. each. *[In July.]*

Series A.—**Le Blocus.** Par ERCKMANN-CHATRIAN.

Series B.—**Nouvelles Génévoises.** Par RODOLPHE TOFFER.

L'Evasion d'Edmond Dantès. Par ALEXANDRE DUMAS.

Le Capitaine Pamphile. Par ALEXANDRE DUMAS.

Other Volumes to follow.

These Readers are issued in two series each containing 30 lessons, the lesson being immediately followed by a *Questionnaire* and Grammatical Section. At the end of the book come Exercises, a Grammar, and in Series A, a Vocabulary. In Series B there are no vocabularies, but French notes are added.

Each of the two series has a definite scheme of grammatical instruction, though the same order is not necessarily observed in each book.

SINGLE TERM FRENCH READERS.

SIX ELEMENTARY BOOKS OF GRADUATED DIFFICULTY. SUITABLE FOR A FULL TERM'S WORK, ALLOWING TIME FOR REVISION AND EXAMINATION. Edited by B. MINSEN, M. & A., Assistant Master at Harrow School.

TERM I, FOR BEGINNERS, 8d. This contains easy French sentences on simple concord, plural of nouns, feminine and plurals of adjectives, auxiliary verbs and regular verbs of the first conjugation, with a few easy pieces of continuous French, and sentences for translation into English. There are also added full vocabularies English-French and French-English. *[Shortly.]*

MASSARD'S SERIES OF FRENCH READERS

according to the New or Direct Method. *[In July.]*

Junior Series. With Vocabularies. 1s. 6d. each.
LA MARE AU DIABLE, par GEORGE SAND. QUATRE CONTES, par PROSPER MÉRIMÉE. LETTRES DE MON MOULIN, par ALPHONSE DAUDET. Other Volumes to follow.

Senior Series. No Vocabularies. 2s. each. BUG-JARGAL, par VICTOR HUGO. PÊCHEUR D'ISLANDE, par PIERRE LOTI. COLOMBA, par PROSPER MÉRIMÉE. Other Volumes to follow.

The notes are all in French, but no hesitation is shown in giving the English equivalent, where this is found advisable. To the notes of each chapter has been added a short *Recapitulation* for the revision of grammar, idiomatic expressions, and lexicology, as well as a passage for retranslation, and in the *Senior Series* will be found a list of *Sujets à développer*, drawn from the subject matter of the texts. As regards form, it has been thought desirable to have the Notes bound separately from the text, but are not sold separately. It is felt that this arrangement will be of material assistance to the student in his preparation.

ENGLISH GRAMMAR AND COMPOSITION.

Part I. First Year Course. 1s. Part II. Second Year Course. 1s. 6d. By GEORGE A. TWENTYMAN, B.A., Assistant Master at Manchester Grammar School.

OLD TESTAMENT HISTORY. A continuous narrative from the Creation to the time of Christ. Illustrated by typical selections from the text of the Hexateuch, the text of the Historical Books, and the text of the Prophets. Suitable for the Upper Forms of Schools or for the general student. With Notes, Maps and Plans.

By the Rev. A. R. WHITHAM, M.A., Principal of Culham Training College. Crown 8vo, One Vol., 4s. 6d.; or, in Two Parts, 2s. 6d. each:—

Part I. The Creation to the Death of Saul.

Part II. King David to the Time of Christ.

[In the press.]

JUNIOR SCHOOL BRITISH HISTORY.

By ARTHUR D. INNES, Author of "A School History of England," &c. Small Fcap. 8vo, with Maps, 2s. 6d.

CONTENTS.—Before the Norman Conquest: 1066—The Making of a Nation—National Growth—The Tudor Period—Under the Stuarts—The Georgian Era—From George IV to George V.
"It is written in better style than most text-books of the sort, and takes more cognisance of (a) literature, (b) social conditions."—*Preparatory Schools Review*.

"It is really an interesting and concise history, well adapted for juniors, carried out on the same lines as the author's 'Outline of British History.' There is good reason for thinking it will be acceptable to junior class-rooms."—*School Guardian*.

"This is an excellent little 'History' for junior forms, and is based on the author's 'Outline of British History.'"—*Secondary Education*.

AN OUTLINE OF BRITISH HISTORY.

By A. D. INNES. Crown 8vo, 4s. 6d.

CONTENTS.—Section I.—Political Outline to 1558—The Anglo-Saxon System—Feudalism—The Growth of Towns—The Rural Population—Industry and Commerce under the Tudors—The Great Transition—Mediaeval English Literature.

Section II.—Political Outlines, 1558-1760—Imperial Expansion—Ireland—Scotland—Capital and Commerce—Town and Country and the Poor Law—National Finance—The Elizabethan Age—The Age of Puritanism—The Era of Rationalism.

Section III.—Political Outlines, 1760-1910—Ireland—Colonial Expansion—India—The Industrial Revolution—Laissez Faire—State Intervention—Combination—Literature under George III and George IV—The Victorian Era.

"It is needless to say that Mr. Innes has set before himself a very difficult task, but he has done it well. The book is well arranged, clear, and comprehensive."—*Morning Post*.

"The treatment is interesting and scholarly throughout."—*Scotsman*.
"The leading idea has been well conceived and skilfully carried out."—*Glasgow Herald*.

"Mr. Innes has a rather unusual gift and neat arrangement and lucid expression, and he is able also to take comprehensive and balanced views. The chapter on India is particularly good."—*Guardian*.

ENGLAND'S INDUSTRIAL DEVELOPMENT: A Historical Survey of Commerce and Industry.

By A. D. INNES. Crown 8vo, 5s. net.

The book traces the development of England, from a self-contained agricultural community, or group of communities, into a maritime, commercial, and colonising nation, ultimately transformed by coal and steam into the first manufacturing state in the world.

THE STORY OF ENGLAND. A History for Junior

Forms. By W. S. ROBINSON, M.A., Author of "An Illustrated History of England." In Four Parts. With numerous Illustrations, Maps, and Plans. Crown 8vo.

Part I. From Early Times to 1272. 2s.

Part II. 1272 to 1603. 2s.

Parts I and II may be had in One Volume. 3s. 6d.

Part III. 1603 to 1760. 2s.

Part IV. 1760 to 1910. *In the press.*

NOTES ON BRITISH HISTORY.

By WILLIAM EDWARDS, M.A., Head Master of the Middlesbrough High School. Crown 8vo.

Part I. Prehistoric Times to Richard III. 1485. 2s. net.

Part II. The Beginning of Modern History, 1485 to 1660. 2s. net.

Part III. From the Restoration to the Treaty of Versailles, 1660 to 1783. 2s. net.

Part IV. From the Treaty of Versailles to the Death of Queen Victoria, 1783 to 1901. 4s. 6d. net.

Parts I to IV may be had complete in One Volume. 10s. 6d. net.

The notes comply, to a considerable extent, with the suggestions as to the teaching of History contained in the recent circular of the Board of Education. They deal with the leading events of European History, the great inventions of the Middle Ages, and the geographical discoveries of the sixteenth century.

JUNIOR BRITISH HISTORY NOTES.

By the same Author. Crown 8vo.

Part I. B.C. 55 to A.D. 1485. 1s. net.

Part II. 1485 to 1660. 1s. net.

Part III. 1660 to 1783. 1s. net.

Part IV. 1783 to 1901. 2s. net.

These are adapted for Junior Scholars from the "Notes on British History."

FIRST BOOK OF GERMAN ORAL TEACHING

on the Direct Method, written throughout in German. By A. R. FLORIAN, M.A., Author of a "First and Second French Course." Crown 8vo, 3s. 6d.

The lessons are followed immediately by questions, grammar, and exercises. The grammar is reduced to essentials but is thoroughly dealt with. Besides the lessons there is a selection of pieces for reading and of poems. Reproduction exercises have been added in a separate section.

RIVINGTONS' DIRECT METHOD GERMAN

TEXTS. Edited by Professor D. L. SAVORY, M.A. In Twelve Volumes. Small crown 8vo. Each Volume, 1s. 6d.

A complete list sent post free on application.

OCCASIONAL NOTES.

MR. PEASE'S reference to the Registration Council in the course of his annual statement presents a striking contrast to Sir Robert Morant's White Paper and shows that a better mind inspires Whitehall. He evidently looks forward to the Council's being a good deal more than what its name implies. It will not merely keep a register of teachers; it will be a body representing the whole educational profession which the Board can from time to time consult far more effectively than the present anomalous Consultative Committee. The institution of an Educational Council, on which all the sections of what is a very heterogeneous profession shall be represented and which shall be able to speak with authority on educational questions, has been the aspiration of a whole generation of teachers, and it was formally endorsed by the Bryce Commission. The Registration Council will to a great degree, we may hope, fulfil the functions of such a council. It will be representative and it will be too large for any particular section or interest to dominate. The President's "comfortable words" deserve to be quoted textually:—"One of the great advantages of this step [the re-establishment of the Teachers' Registration Council] is that we shall be able from time to time to consult the representatives of the profession upon matters which we propose to change, or which we have changed, in connexion with the work of the Board. It is most important that we should work in touch with the teachers, and I hope that the work of the Registration Council will remove any possibility of misunderstandings which in the past have unfortunately arisen."

Mr. Pease on the
Registration
Council.

ONE of the most important passages in Mr. Pease's speech, as a sign of the times, was that in which he threw cold water on examinations in technical education. The Board, he said, do not want students during the early stages of technical education to feel that they are bound by syllabuses and examinations.

Examinations
for Student
Teachers.

Even the higher grade examinations he did not seem to consider necessary, though they were to be continued. But the thing to which he attached most value was a certificate signed by the principal of the college to the effect that the student had attended a course of training for a number of years and had completed it satisfactorily. We shall not be accused of any fondness for examinations if we put in a caveat here. We doubt the wisdom of leaving either schools or institutions to brand their own herrings. Sooner or later such branding would probably cease to command public confidence, and large varieties of standard would arise. For the rest, Mr. Pease's principle represents the ideal of a great number of teachers—no interference by external examiners during the pupils' school life and an examination at the end of it.

THE glut of elementary teachers which existed not long ago appears to be rapidly changing into a deficiency. Whereas not very long ago there were demonstrations of the unemployed in Trafalgar Square, now the Minister talks about a threatened shortage. There can

Shortage
of Teachers.

be no doubt that the superfluity existing at certain times of the year was in a large measure the result of the system under which all the students leave the training colleges at the same time of the year. This makes a glut in the autumn which is not inconsistent with a shortage in the summer. If the Board's policy of encouraging variety in the training-college year is successful, we shall probably hear less about unemployment. The threatened shortage Mr. Pease hopes to meet in the only way it can be met—namely, by making the service more attractive. In particular, pensions are to be improved. How badly this is needed is shown by the fact that the maximum pension attainable by a teacher is £59 for men, and £40. 14s. for women.

THERE were a few other points of interest in the statement. More women Inspectors are wanted, and their number is to be raised from twenty-eight to forty-one. The Board are doing what they can to promote the teaching of modern languages. Mr. Pease, however, failed to say what they were doing to encourage the study of German. The Board accept the report of the Consultative Committee on examinations, and hope to confer with the Universities on the best method of meeting the suggestions made. The provision of school playgrounds is being pressed. Statutory Committees for assisting children on leaving school in the choice of employment are coming into being, and some thirty schemes have been approved. On the continuance of education after the school age, however, the Minister had little to say beyond the expression of a pious hope that employers would compel the boys in their service to attend school on one or two afternoons a week.

IN listening to the debate of the Head Mistresses on Training one felt that the Bill was in Committee,

while the discussions of the Head Masters on the same subject have left the impression of a first reading. Half the speakers had themselves been trained, whereas a trained head master is a black swan. To continue the metaphor we might characterize the resolution moved by Miss Gray as a wrecking amendment. It professed no hostility to training colleges, but, if adopted, it would in fact substitute apprenticeship for professional training. We heard again the arguments which in the days of our youth we profanely christened as the doctrine of apostolic succession and "the silk purse and the sow's ear." The modern mistress, we were told, will have heard the best lessons given by the best teachers, will unconsciously have absorbed their methods and carry on the tradition. By teaching one becomes a teacher. A week of practice is worth a year of theory. Without Personality (with a big P), both theory and practice are of no avail. On the other hand, the testimony to the value of training of those mistresses who had themselves taken the full college course was clear and unqualified. The one charge to which the training colleges lay themselves open is that they will not or cannot weed out students who show no aptitude for their future work. We do not deny that a good training may be given in a school, but it must be specially organized for the purpose. To put the duty of training on the existing staff would be no less unfair to the staff than to the student teacher. The conference was well advised in resolving that the Bill be considered this time twelve months.

THE Conference also considered the cognate subject of the Teachers' Register, and passed, with slight amendments, a well considered resolution drafted by Mrs. Bryant, in which we find little to criticize. It takes, however, for granted what seems to us the crux of the whole problem, the possibility of framing a Register by sections. This, it will be remembered, was pronounced in the White Paper as *ultra vires*, but we believe ourselves that it will be found quite compatible with the single list required by the Act. The resolution most wisely confined itself to principles, and left the working out to the Registration Council. It was content to affirm the triple test for admission: academic qualification, training, and experience. We rejoice to learn from Mrs. Bryant that the N.U.T. will raise no objection to a high standard, something higher, we may take it, than what is required for a Government Certificate. As to what may be called the jail-delivery clause, we feel doubtful. Five years is better than two, and ten would be better than five. No teacher of less than ten years' standing can plead that he had no warning that training would be required. At any rate, some distinctive mark should be attached to the "ten-year man."

THE Universities of Cambridge and London are instituting examinations in modern languages, which can be taken by persons who are not pursuing a University course. They are designed especially for teachers with whom such languages are a secondary subject. The two examinations will be on the same lines and will be of a very practical character. Translation to and from the foreign language, an essay in that language, and phonetics will be the principal subjects, and there will be an oral test, which we hope we may

assume will be stringent. The examinations will be certainly useful. The country is being flooded with certificates in modern languages of all sorts and kinds, given by societies and organizers of holiday courses, and the value of many of them is problematic. Modern languages are largely taught, especially in the early and middle stages, by teachers who have taken a degree in some other subject, and they have at present no means of obtaining any incontestable certificate of their attainments. To these the new examinations should be welcome, as they should be also to head masters and other appointing authorities, who have at present no means of gauging the linguistic attainments of candidates for posts.

A WEEKLY contemporary, in a vivacious article, calls attention to the ever-increasing "flood of books." It is indeed almost terrifying to read that the output of printed books has doubled since 1901, and we have visions of the British Museum spreading over a square mile of London. With our contemporary's view that the mere multiplication of books indicates no real spread of culture or of thirst for knowledge we sympathize, and we recognize that he is not far from the truth when he says that "the first stage in popular literary education naturally evokes a superstitious desire to amass quantities of low-grade intellectual and emotional experience." We might put it more briefly by saying that we educate our children just enough to make them enjoy emotion, but not enough to make them enjoy thought. The great difficulty, no doubt, in the way of schools is that the vast majority of their scholars leave before the age at which enjoyment of thought begins and at which it is possible to distinguish books of solid worth from trivialities. Still, we feel inclined to ask whether schools are giving the kind of literary training which will fit children when they grow up for solid reading. What is wanted is the development of the capacity to read what requires mental effort, and the desire to read, not merely for enjoyment, but for instruction. But in schools literature is too generally regarded principally as a source of pleasurable emotion. Fiction and poetry are the staple diet; not mental effort, but interest, is the object aimed at, and in many cases this principle is carried to such lengths that teachers hesitate to call upon the pupils to make much serious effort lest it should weaken the interest of the book. Hence children when they leave school read nothing but the *Daily Mirror* and the penny shocker.

BUT this is only a small part of the question. There is another side of it which is at least equally important. The appreciation of solid literature—and by literature we do not mean merely fiction and *belles-lettres*—is not a quality which can be developed by itself, or trained by some particular teacher employing some particular "method." It is rather only one function of a vigorous mind that enjoys strong food, and a healthy character that loves knowledge and serious thought. It has only a slight connexion with literary taste. The man who prefers solid history to the "chatter about Harriet," with which the circulating libraries load their shelves, shows usually not so much an appreciation of good style—for the chatters often write extremely well—as a preference for the great over the petty. And the mistake many

Solid
Literature.

teachers make lies in thinking that the cultivation of a sense for style is the important thing, whereas what is really wanted is a sense for what is great in feeling and action. Such a sense can be the outcome only of the whole upbringing, not of lessons in any particular subject.

Medical Entrance Examinations. THAT distinguished body the General Medical Council, or, at any rate, its President, Sir Donald MacAlister, has come to the conclusion that secondary education in England is chaotic. A remedy is to be found, he advises, in a State-leaving certificate, such as they have north of the Tweed. The Government is not only to examine, but also to accredit the teaching. Meanwhile certain recommendations have been adopted relative to a higher standard for the preliminary medical examinations. You cannot please these doctors. If a University insists on a high standard at its matriculation, it comes in for incessant abuse from the profession, their argument being, as Sir Clifford Allbutt put it to the Council, that the examination test was fallible and by it men who might bring great credit to the profession were excluded. When, on the other hand, they discover that medical students seem ignorant of Latin, French, "or anything that an educated man was expected to know," they abuse the schools.

Medical Education. WE feel disposed to take the battle into the enemy's camp. Readers of the medical evidence before the Royal Commission on University Education in London can come to no other conclusion than that medical education in this country is absolutely unprogressive. An important scheme for the concentration of preliminary medical teaching in London was wrecked some years ago because of dissensions among the doctors. Since then practically no progress has been made in the better organization of medical education in London, nor do the medical profession show much anxiety on the matter. We have no right to speak on medical questions of a professional character, but it is significant that a law-case recently had to be adjourned in order that expert evidence on a disease called *status lymphaticus* might be obtained from Germany.

Consumption. THERE is one medical question in which all teachers are interested—that of tuberculosis, its origin and character. There again, according to Prof. Karl Pearson, doctors differ. Dr. R. W. Philip holds that there is ample evidence that tuberculosis exists in the majority of school children—as many as 90 per cent. it has been suggested by Continental investigators. Are we to exclude 90 per cent. of the children from school? Prof. Pearson says that to anyone who approaches the problem of tuberculosis from a neutral standpoint it is fairly clear that medical knowledge on the subject is almost complete "chaos." Strange that he should select the precise word which the doctors, in the same number of the *Times*, use to describe the condition of our secondary schools.

Promotions in our Elementary Schools. WE are glad to see that the London County Council is making some alterations in its regulations about what are called "double promotions" in elementary schools. The system as it exists is a veritable scourge to the schools. Actuated partly perhaps by the wish to meet the Board of Education's requirements

about the size of classes, but probably impelled mainly by some crude and hazy notions about economy, the Council some time ago adopted a policy of compelling the head teachers to move children up sufficiently rapidly to keep the top standards full throughout a year. Instead of promotions taking place once a year only—the only sound system—they have taken place twice, with the result that the upper standards have been swamped with half-prepared children. The writer of this note has himself seen a fourth standard in which there were twenty boys who six months before were amongst the infants. It is needless to say that the teachers have been in arms against the ukase ever since it was promulgated. The Council's changes in its rules are by no means so drastic as we should like to see; but still they are in the right direction, and give greater liberty to the school staff. The case is a good illustration of how an administrative body bungles when it interferes in a purely technical question. If the Council's teachers are not competent to classify their pupils, there is only one thing for the Council to do—namely, dismiss the whole lot and get a new set. Interference like this with any other professional men is almost unthinkable. No Local Authority would venture to dictate to its doctors how adenoids and ringworm should be treated.

Spelling Reform. HAD Miss Gavin proposed a resolution for the adoption in schools of the Simplified Spelling Society's scheme, with its digraphs and trigraphs, we doubt whether she would have carried a dozen votes, but she succeeded in bringing home to the Head Mistresses the absurdities of our present spelling, the nuisance that they are to school-children and foreigners, and the difficulties they put in the way of the spread of English as an international language. If the missionaries of the Society can induce people to care a little less about exactitude in spelling, they will achieve something. Rigid uniformity in spelling is a thing of quite modern growth (Elizabethans spelt even their own names in two or more ways), and it is in reality no more necessary to human intercourse than rigid uniformity in pronunciation. There are already a considerable number of words in English—such as "honour," "programme," "rhyme"—that may be spelt in two ways. No one, as far as we can see, would be a penny the worse if their number were multiplied ten-fold—unless, indeed, it were the examiners, who might find part of their occupation gone. That a tide-waiter or an Indian civilian should be plucked because he spells "posthumous" without the *h*, or even "parliament" without the *i*, is a relic of mandarinism.

Archæology and History. TEACHERS of history ought to feel some interest in the various Bills for the preservation of ancient monuments which are now before Parliament. Archaeology has won a place in the schools as the handmaid of history, and excursions to view ruins and buildings of historical interest are a recognized part of the educational work of elementary schools. This is all to the good, as long as it is borne in mind that these things illustrate history, but do not teach it. They are the externals of the nation's story, and as such help to bring many elements in that story home to children; but they do not teach its inwardness, which is the really difficult thing to teach. Children do not understand the part monasteries played in the life of the country, still less the movements of thought and

feeling which brought about their destruction, very much better for having seen a ruined abbey. The boy who has been over the model of the "Revenge" at the Earl's Court Exhibition will know better how Drake fought, but he will not understand the mixture of crusader, patriot, and buccaneer that Drake was a whit more clearly. He will realize better what Drake did, but not a bit better how Drake felt. And to make him understand how Drake felt is the really difficult task. Still, the external, concrete fact may help to awaken interest in the forms of human life and activity which produced it, and we cannot afford to neglect any means of awakening interest.

PREPARATORY departments to secondary schools—are they a boon or an evil? The question is continually arising, and every new proposal to establish such a department is denounced as an attempt to form a select and exclusive elementary school. In our view the question

Preparatory Departments.

is primarily educational, or, at any rate, must be argued in these days solely from an educational point of view. At what age should the curriculum of a child whose school education will be continued to the age of seventeen or eighteen differ in scope and character from that of a child who will leave school at thirteen or fourteen? This abstract question has to be considered in relation to the accepted fact that elementary-school children cannot be selected for scholarships with any approach to scientific accuracy or even justice until they reach the age of eleven or twelve, and there must therefore be a large influx of pupils into secondary schools at this age. It is surprising how the years go by without any general principles being enunciated on this and kindred questions. Perhaps the explanation is to be found in our national dread of uniformity or in the instability of social conditions.

CAMBRIDGE has lost in the past month two worthies who might well furnish a modern Plutarch with a Parallel Life. Both attained to threescore years, both spent and were spent for their University, both won high rank as scholars; but in temperament and manners they formed a striking contrast. Ernest Stewart Roberts in the memorial volume, which was his latest work, named Dr. Caius as the second founder of the College; he himself is not unworthy to be remembered as a third. In the *Times* obituary it is recorded that out of a total of twenty-seven Fellows seven hold University professorships. These and all the other distinguished sons of Caius would own the debt of gratitude they owe to Mr. Roberts whether as a coach, a lecturer, or a tutor, and in any case as a counsellor and friend. Arthur Verrall laboured hardly less strenuously, but he was to the end both as a teacher and a writer a free lance. Though rooted at Cambridge he never suffered the thinnest incrustation of donnishness, and appeared to the newest of freshmen a *bon camarade*. He brought to ancient literature an open eye and snapped his fingers at scholiasts and pundits. Paradox after paradox came from his teeming brain, some wild and wanton, as his Horatian cryptogram; others no less sound than brilliant, as his "Euripides the Rationalist." And behind his gay humour and bohemianism there was a core of Roman virtue that showed itself in his devotion to his old school and his college, and his long and lingering illness was borne with Stoic fortitude.

LOCAL AUTHORITIES.

THE circular of the Board of Education announcing that the new edition of the Code for Elementary Schools will contain changes tending to give greater responsibility and liberty to Local Education Authorities

Devolution.

must be applauded. The changes indicated are not, perhaps, of much importance, but short and hesitating as the step may be it is in the right direction. It is nearly ten years since the Education Act of 1902 was passed. "Under our plan," said Mr. Balfour in the House of Commons, "we create a single master of the whole of the primary educational machinery in each district, and that master is an absolute master." Again, referring to the managers of schools, he said: "If they have been in the habit of complaining of the minute and petty interference of the Board of Education at Whitehall—interference which is alleged, rightly or wrongly I know not, to have thrown a quite unnecessary burden upon many schools—let them remember that interference from Whitehall will no longer be with individual schools; it will be with the County Council. It is the County Council which will receive the Imperial subvention; it is to the County Council that all complaints will have to be made; it is by the County Council they will have to be remedied."

BUT for nearly ten years the policy of the Board has been not to

After Ten Years.

"decentralize education," but to divest Local Education Authorities of any interest in "education" and of any "authority" in dealing with it. They have been permitted to retain, however, the "local" privilege of raising by means of local rates the enormous increase in expenditure which has taken place during the decade. Mr. A. F. Pease and Mr. Selby-Bigge are to be congratulated upon the desire, manifested by the circular, to recognize that Local Education Authorities are entitled to some measure of confidence and consideration. It indicates, perhaps, the beginning of better things.

THE President of the Board of Education in presenting the Education

The President and "Results."

Estimates claimed that the sum required—rather more than £14,500,000—was "amply justified by its purposes and results." Mr. Pease could not be expected to say anything else, and in any event whatever the value, or otherwise, of the results he is in no sense responsible. But later on, perhaps, he will make it his business to ascertain, not from permanent officials or from representatives of the teachers, how far the view he has expressed is supported by public opinion in this country. And if he comes to a different conclusion, we believe he will have the courage to say so. About the time when Mr. Pease was congratulating his Department in the House of Commons, Sir Melvill Beachcroft, at a conference at Southend, was discussing whether we get value for our money in elementary schools. He suggested that the time had come for the huge expenditure to be justified by its results. "Did the present system of public education fit the average boy and the average girl for the life he or she had to lead? That was the real question which in these days needed to be answered." And Sir Melville suggested that the answer was, as regards the minority, Yes; for the majority, No.

IT is significant, but far from reassuring, that the removal of Sir

Agricultural Education.

Robert Morant from the Board of Education was followed immediately by the announcement that the interests of agricultural education were to be controlled by the Board of Agriculture and Fisheries. The Board of Education Act of 1899 was passed for the purpose of vesting in a single authority the superintendence of matters relating to education in England and Wales. This Act of 1899 contemplated the transfer to the Board of Education of the educational functions conferred on the Board of Agriculture by the Act of 1889. During the past twelve years the tendency has been in this direction, but now it is "as you were" before 1899 and a Board of Agriculture with new schemes of agricultural education, a longer purse, and consequently greater potentialities for disturbance.

TO the Local Authorities, perhaps, it is unimportant which department of the State is responsible to Parliament for the control of public education. The permanent officials of the Board of Agriculture, the Admiralty, or the Lunacy Commission would probably do quite as well as any others. But what the Local Authorities ought to regard as important, and ought to insist upon, is that their educational administration shall be regulated by a single body of permanent officials, acting under one Minister of the Crown. The difficulties of co-ordination are serious enough when those entrusted with different branches of the educational

Divided Authority.

work are acting in concert and are responsible to the same chief. Under independent, and possibly rival, Government departments co-ordination is out of the question. As far as agricultural education is concerned we may now anticipate new regulations, additional officials and Inspectors, and the appropriation of public resources with a view to increasing the burdens of the rate-payer.

It is the natural ambition of a Minister of the Crown to mark his tenure of office by passing a new Act or inaugurating an administrative change. The President of the Board of Agriculture did not shine when responsible for Education, and he is anxious no doubt to appear as the inventor and patentee of an educational system which will arrest rural depopulation and shed the light of science throughout the dark byways of English agriculture. To aggravate the complexities of local government, England and Wales are to be divided into twelve provincial districts, and each district is to possess a Representative Agricultural Council. The precise functions of this Council have yet to be disclosed, but it will be supposed to correlate and, to some extent, control the agricultural education in the county areas comprising the province. As a condition of a grant from the Development Fund, County Councils will be required to appoint agricultural organizers and remodel their schemes of agricultural education in conformity with the views of the Board.

The New Light.

It is an attractive pursuit, of course, to regard England and Wales as a clean slate, and to propose a new administrative system, a new staff of officials, and new types of teaching institutions on the assumption that the people pursuing a particular industry are ignorant and, therefore, unsuccessful. But the old problem remains. And it will be solved by economic change rather than by educational process. If it pays to do a thing, people will very soon find out how to do it.

The Old Problem.

THE decrease in the number of candidates for the profession of elementary teaching is a serious matter for Local Education Authorities. While the staffing regulations of the Board are more exacting, it is less easy for the average boy or girl to qualify. Moreover, if the intentions of the Board are carried out, in the year 1914 a large number of supplementary teachers will cease to be available in schools for older scholars. (Of the teachers now employed nearly 10 per cent. are "supplementary.") This question is one which affects more particularly the sparsely populated administrative areas with a large number of small schools. A school of sixty children is frequently more efficiently staffed with a head teacher and two "supplementary" than with a head teacher and one "uncertificated." Unless the cost of maintaining small schools—already a heavy charge—is to be largely increased, the Board of Education will be obliged to modify its staffing intentions to meet the requirements of rural areas.

The Supply of Teachers.

THE deputation to the Board of Education from the County Councils Association urged the desirability of an inquiry into the whole question of the supply and preparatory training of teachers. Mr. Pease expressed the opinion that a Departmental Committee would be attended with too much delay. He promised, however, to consider carefully the points raised, and later on to arrange for an informal conference with representatives of the Authorities. This method of dealing with the matter ought to be productive.

County Councils Association.

At the Annual Meeting of this important Association the following resolution was referred to the Executive Committee:—"That, with a view to securing a better supply of candidates for the teaching profession, a special grant be given by the Board of Education of half the maintenance of all scholars sent by the Local Authority to a secondary school and allowed maintenance by that Authority analogous to the proportion of bursar grant at present allowed." There are three objections to the adoption of the course suggested by the resolution. It would mean that a child at the age of twelve or thirteen would be earmarked for the teaching profession; that the general payment of a maintenance allowance, in addition to free secondary education, would tend to recruit the supply of elementary teachers exclusively from the class of wage-earners; it would add considerably more than £200,000 to the cost of the preliminary training of teachers, half of which would be paid out of the rates.

Association of Education Committees.

THE sum of £60,000 placed at the disposal of the Board of Education by the Treasury for "grants in respect of medical treatment" is, of course, to be utilized for the purpose of stimulating Local Authorities to increase their expenditure on medical inspection, or to embark upon

schemes for treatment which are now optional. The County Councils Association are only prepared to accept the proposals "as a temporary instalment of the grant already promised," and it is unable to recommend Authorities to incur expenditure for medical treatment. The Worcestershire Education Committee has already decided to make no application for a grant under the new regulations, because it might be regarded as a waiver of their claim to a grant for medical inspection, and it would commit the county to further expense.

SIR GEORGE NEWMAN would probably agree that this grant is not to be regarded as in any sense fulfilling the old promise. Any Authority fulfilling the requirements of the Code regarding medical inspection is entitled to share in the grant in so far as any part of its scheme is concerned with treatment, as distinguished from inspection. That is to say, if the Inspectors test the eyesight of children and prescribe glasses, if they re-examine children, or if school nurses have been appointed to "follow up," the Authority is in a position to make a claim, and will probably receive something like 50 per cent. of their expenditure on these services.

The Grant.

THERE can be no question as to the futility of medical inspection unless it is associated with remedial measures—a fact now generally recognized by Local Authorities. The annual cost of a school nurse is less than half the cost of a medical inspector, and for practical purposes her work is probably of much more than double the value. The remarks on school buildings generally made by the medical experts suggests a condition of affairs extremely uncomplimentary to the Inspectors to the Board of Education. The School Medical Officer for Devonshire has presented to the Authority for that area a special report embodying recommendations for remedying or preventing unhealthy conditions in the schools. Needless to say, the requirements are numerous and comprehensive, and one of the members said he was astounded when he read the report, and "hoped they would not be called upon to be a committee of grandmothers." The trouble is, however, that what was good enough for our grandparents falls far below the standard demanded for their grandchildren.

Devonshire.

THE Director of Education (Mr. Coffin) has completed his first year of service in Bradford. At their last meeting the Education Committee showed their appreciation of his work when, upon the motion of the chairman and by a unanimous vote, they increased his salary from £800 to £900 per annum.

SCIENCE NOTES.

THE Departmental Committee on the Science Museum and the Geological Museum has just issued the second, and final, instalment of its report, and the prospect of an early attainment of a valuable addition to the existing establishment appears good. The scheme of buildings proposed is simple in outline and convenient in arrangement, while it doubles, or more than doubles, the space available. For many years we have wanted provision for the adequate illustration of all branches of physical science, pure and applied, and of the scientific and economic work of the Geological Survey. We hope that shortly this ideal will be realized in close proximity to the other great museums at South Kensington. Teachers would welcome an extension of the historical collections, which already contain unique examples representing discoveries which have laid the foundations of modern science.

THE Dundee meeting of the British Association will offer many attractions—educational, scientific, and social. The attendance of foreign savants is likely to be large, physiology being strongly represented. The presidency of Prof. Schafer doubtless contributed to this feature. Shipping problems and wireless telegraphy will be prominent in the engineering section, and the geology of Scotland will not only receive attention in the form of papers and discussions, but will give rise to excursions of unique interest. We know that people can live at Dundee or Edinburgh without becoming geologists, but we cannot explain how they do it. Zoologists will have an excellent time, and a popular element will be a cinematograph exhibition of whale-fishery. The geographers will be occupied with problems of Africa and the Antarctic, while the chemists will devote most of their time to research in organic chemistry. The meeting will last from the first to the second Wednesday in September. The address of the Association is Burlington House, London, W.

British Association at Dundee.

Digitized by Google

THE program of Section L, the Section of the Association devoted to Educational Science, is practically completed.

Section L. The President, Prof. J. Adams, has selected "The Possibility of Objective Standards in Education"

as the subject of his address. We may venture the surmise that Dr. Adams will consider the claims of "educational science" to the title of "science," and we hope he will establish those claims, for it is a hindrance to progress that any well meaning expert in, say, Medicine or Engineering, should presume to advise the teaching profession on the art of teaching. Leaving certificates, vocational teaching, and the teaching of mathematics will be among the topics of direct interest to science masters and mistresses.

THE British Ordnance Survey Officers are revising the Principal

Ordnance Survey.

Triangulation of the United Kingdom, and are making a comparison of the work of 1835 with that made possible by modern appliances. Base-lines are being measured by the use of tapes 100 ft. and 300 ft. long, made of invar. The tapes are suspended under constant tension in catenary from tripods, by which method temperature connexions and compensating bars are eliminated.

WE have received the report of the Council of the City and Guilds of

City and Guilds Institute.

London Institute, dealing with the administrative and financial aspects of a work of great national importance by reason of its encouragement of technical education. We note that the City Companies have already contributed over £800,000, and we are prepared to say that few better investments have been made for the benefit of British industries and health. One point of weakness is to be found, and it is a deplorable one: we refer to the neglect of the provision which is made for Art. The lecturers and equipment are good—the students far too few.

"VERY objective in its treatment, it skillfully utilizes the familiar, and works Socratically; it is demonstrative rather than informative, giving the reader the delicious

Ideal Science Textbooks.

illusion that he is himself at work building up the science of plant physiology; it has a masterly simplicity of style, showing what a lot can be made of relatively simple experiment."—These words are a quotation from an able review of Prof. Timiriacheff's "Life of the Plant," which has just been issued in an English translation. We give them partly to call attention to a book which many teachers will find useful, partly as a good, concise statement of what a school science book should be. *O si sic omnes!*

A GOODLY supply of india-rubber stoppers and tubing is one of the

Synthetic Rubber.

great advantages which science teachers of to-day possess over their predecessors. But, unfortunately, rubber is perishable and expensive. Any reduction in its cost will therefore be welcome to those in charge of laboratories. The recent success in synthesizing rubber will, of course, have a wide effect; but we may for a moment refer to the gain in our own little sphere of action, where the substitution of india-rubber for cork or glass effects a great saving of time. The first announcement of the discovery was made by Prof. Harries of Germany, but it then transpired that an English patent had been taken out three months previously. Briefly the English process is as follows: (1) starch is obtained at less than 1d. per pound, (2) by fermentation of the starch fusel oil is made by the process invented by Fernbach (Pasteur Institute), (3) a cheap method of obtaining isoprene from the alcohol was found by Dr. Matthews, (4) isoprene is converted into rubber by the action of sodium. In July 1910 Dr. Matthews left some metallic sodium in contact with isoprene, and on returning in September found a solid mass of rubber. The value of a long summer holiday is clearly vindicated—especially for scientific workers.

How London journalism, with one or two rare exceptions, treats education was exemplified last month by the reports of the annual conference of the Teachers of Domestic Subjects. It was held in Battersea Polytechnic, the Duchess of Sutherland occupied the chair, the Principal of the Polytechnic (Dr. Rawson) welcomed the delegates, and excellent papers and addresses were read or made by Dr. de Moulpiéd, Mr. J. Wilson, M.Sc., Mrs. Pember Reeves, Miss Cropper, and others. The Duchess, as President of the Association, made a brief, amusing, and suitable address. One of our chief London daily papers, professing to report the conference, devoted just five inches to this introductory speech, while passing over entirely every name, paper, or address which occupied the attention of a conference numbering 1,200 members.

THE CIRCULAR ON MODERN LANGUAGE TEACHING.

THE Board of Education's Circular on modern languages, if not a very profound study of the subject, is a useful and well considered document. It adds nothing to the stock of thought on the subject, but it gives a good bird's-eye view of the position of the question, contains a great deal of useful advice, and cuts with a vigorous pruning-knife at some of the wilder growths of latter-day language teaching. It recognizes the peculiar difficulties which hamper the progress of French and German—the inadequacy, for instance, of the present course of work for a University degree to qualify students for professional work—and the general lack of training. Here we are glad to note that the Board have under consideration schemes for enabling young teachers to profit by the help of skilled specialists. Then the seriousness of the position of German is at last frankly and fully recognized. "German is completely disappearing from the curriculum of schools in which it formerly found a place, and in many schools where it is still taught the number of pupils who learn it is rapidly decreasing; this is particularly noticeable in the case of girls' schools." The reasons given for this decay seem to us inadequate; the Circular does not mention the most potent cause—namely, public sentiment. If the friends of German are ever to bring about a German revival, it will only be by persuading the man in the street that the language is at least as much needed for practical purposes as French, and by convincing the more highly educated public that the history and literature of Germany are as educationally valuable as those of France. This is especially true now that the Board are placing Latin and German practically on terms of equality. The Circular makes it quite clear that, where there are two or three schools in a district, any one of them is free to discard Latin and concentrate its efforts wholly on modern languages, if opportunity for learning Latin is provided at one of the others; and it is further stated that the Board hold that the supply of education in a district is incomplete unless there is at least one available school in which two modern European languages are taught. Head masters and mistresses in big towns have now got their chance, and we hope some of them will be bold enough to throw the classics overboard and devote their energies to giving a sound and well planned modern education, the various parts of which will be in harmony with one another.

On what is said about the organization of work we need not dwell; the Board do but give their imprimatur to principles which have been long accepted by teachers. We are glad, however, to observe an exposure of the common fallacy that the least qualified teachers should be given the lowest classes. On the question of specialist v. form teacher the Circular has little to say, and we regret the absence of any discussion of the effect on the teacher of continuous, uninterrupted language teaching—an important question too much neglected by the authorities. It is, however, suggested that it might be better in many cases for a member of the staff to combine history or English with the teaching of one foreign language rather than attempt to teach two foreign languages, but the difficulty of keeping up two languages is the only reason given.

In the chapters on "Method" the balance is held pretty evenly. Extremists on neither side will be pleased, but the general body of teachers will be glad that the Board assume no pontifical airs and make no attempt to dictate or dogmatize. For the earlier stages they are inclined to approve generally the principles of the New Method. "Mastery of the sound-system of the new language" must be the learner's first objective, and a correct pronunciation cannot be acquired by imitation only. But the writers merely skirt the edge of the question whether phonetics should be taught systematically to children, and whether a phonetic script should be used. In the elementary stage the instruction should be mainly oral: little written work should be required. Composition should be confined to the reproduction of what has been orally taught, and the acquirement of vocabulary is of special im-

portance. The case for teaching in the foreign tongue is inadequately discussed, but the fetish of "no English" gets a knock on the head. The attitude taken up on the question of grammar is a little hazy, but apparently the Board think that children who begin French at nine or ten may be content with unsystematic grammar evolved from the reading text for a year or two, while they are clear on the point that systematic grammar should be begun not later than twelve. So much for elementary stages; in the middle and later stages the Circular recognizes that much variety of treatment is possible. There is a definite pronouncement in favour of translation of French and German, "as an important exercise in literary composition," though there is no attempt to define the stage at which it should be begun. The same position is taken up on the question of the translation of English into foreign languages. At a denunciation of the triviality of the French texts read in the higher forms of many schools, and of the substitution of "unseens" for books in others, we clap our hands heartily. For the "human phonograph" the Board have no respect, and in exposing the errors of schools "where the acquisition of conversational facility has been wrongly conceived to be the principal aim of the teaching," the authors of the Circular use unusually vigorous language.

The principal defect we find in the document is that there is no adequate discussion of the direction which should be given to the work of the highest forms in the most advanced schools. True, it is said very well that modern sides have often not set a sufficiently high ideal before themselves, and as the right ideal "a liberal education based on the literature, history, and thought of modern and medieval Europe" is suggested. An admirable ideal, but is it practical? If all children began French at nine and German at eleven, if modern sides were as homogeneous as classical sides, and if their members were equal in mental calibre to their classical compeers, if as much time was given to French and German as to Latin and Greek, and if a variety of other conditions were fulfilled—it might be. As things are, it is hardly possible for a modern-side education to be all-embracing, and its organizers have to choose what path they will follow. One may elect to read history with his pupils, another poetry, drama, and *belles lettres*. Some discussion of these various possibilities of the higher teaching of French and German we should have welcomed, as we should also a chapter on the mental training that the study of languages gives.

Some interesting particulars of the modern language work done in eight selected schools are appended, and Mr. von Glehn, in his statement of the work done at the Perse School, gives a sketch of the theory of the New Method, which is the only attempt in the whole pamphlet to discuss first principles.

The schoolmaster in Meredith.

No less an authority than Sir Lauder Brunton, M.D., when addressing the proposed National League for Physical Education and Improvement, has commented on the devotion and self-sacrifice which animals exhibit in order to protect and save their progeny from injury or death. One of the London dailies related a curious illustration of this. At a class where the teacher was showing the better way in infant management, a strong point was made of the advisability of testing baby's bath with a thermometer. "What's the sense of it?" said Me-as'-as-buried-six; "I don't want none o' them tricky things," eyeing the thermometer glumly, "I know what the bath's like. If the bily turns red, it's 'ot; if he turns blue, it's cold."

REVIEWS AND MINOR NOTICES.

The Evolution of Educational Theory. By JOHN ADAMS, Professor of Education in the University of London. (10s. net. Macmillan.)

This is the first volume of a series entitled "The Schools of Philosophy," planned and edited by Sir Henry Jones, Professor of Moral Philosophy in the University of Glasgow. The object of the series is to present the history of philosophic thought, not as a series of independent units but as progressive stages of evolution. To commence such a series with a treatise on applied philosophy may seem illogical, but the order of the volumes was doubtless determined by other considerations, and a referendum of teachers would undoubtedly have confirmed the editor's selection of Prof. Adams. He has all the learning that we expect to find in our premier Professor of Education, and he has, moreover, what is more important, that broad outlook on life and letters that enables him to see things in perspective, to present education as one aspect of civilization. Add to this the art of putting old problems in a new and original light, sometimes by an epigrammatic turn or a striking illustration, more often by an apt quotation and his pregnant comments thereon. The first chapter, which deals mostly with definitions, reveals some of these qualities. He distinguishes *teach* and *educate*. To teach implies something taught. Even when Gideon taught the elders of Succoth with thorns and briers he taught them something. He could hardly be said to have "educated." We badly need some word other than "pupil" as the correlative of "educate." Prof. Adams invents, or rather resuscitates, "educand," a word found in William Petty's "Advice," though not in the Oxford Dictionary. We prophesy that "educand" will soon become as familiar in our ears as "educationist," which is less than a century old. While we are on the subject of words we may note another "neologism"—"awareness," a useful word as free from the connotation of "consciousness," but recurring here with unnecessary frequency. The language throughout is delightfully unpedantic, and, instead of coining "long-tailed words" like Dr. Stanley Hall, Prof. Adams seeks rather to avoid them. Once or twice we find a "would" where a Southerner writes "should," and a doubtful concord—"Making all due allowance . . . their priests cannot be supposed," &c., but these are the only holes we have to pick.

To return to the matter, all English textbooks, from R. H. Quick's "Educational Reformers" downwards, proceed chronologically. Each theory, or stage of education, is treated in connexion with some great thinker or school of thought. Here each theory is made the starting-point, and its relation to the development of educational theory as a whole is shown. In previous histories of education there is rarely any clue to the labyrinth. Under such headings as Chinese, Hebrew, Greek, Christian, Scholastic, Rabelais, Comenius, Herbert Spencer, the student is informed what was studied and how it was studied in divers times and places, and what were the views and influence of certain educational reformers: but little or no attempt is made to connect the tributaries with the main current or to show their bearing on the problems of the day. No wonder that it is a moot question whether history should be a compulsory subject for a teaching diploma. Here the ground is cleared by Prof. Adams's generalization that before the Renaissance the history of education presents practice without theory; that it was only with the Renaissance that education became self-conscious and based its theory on practice. Stated thus baldly, this generalization sounds paradoxical, but it is duly qualified in the text; and Greece, or rather Athens, stands out as a specular mountain in the plain.

For such a treatment of the subject a clear definition of the problems involved and of the terms employed is essential, and this we get in the first chapter. This is done by well chosen dichotomies, some familiar, and some improvements on popular nomenclature. Thus, education is subjective or ob-

jective, human or cosmic (in place of formal or informal), specific or general, individual or collective, integral or sectional. Its two aims (following Herbart) are self-realization and many-sided interest. Individuality is a datum, character is mouldable: personality lies half-way between the two. Heredity and environment are also included among the educator's data (Prof. Adams is a thoroughgoing Weismannian), but here there is some inconsistency, for later on we are told that environment is to some extent in the power of the educator. These are the bare bones, but the reader must consult the text to see how they can be made to live. If we might venture on a criticism, Prof. Adams is too much inclined to empty his sack; not that he ever gives us chaff for grain, but more than is required for his immediate object. The paragraphs on theory and practice might be curtailed without loss to the argument, and the dissertations on the various meanings of "Nature" might, with a little expansion, form a separate lecture or essay.

We pass to the body of the work, a discussion of Humanism, Realism, Naturalism, Idealism, Materialism, and Atomism, all leading up to the supreme problem of the day: Formal Discipline as opposed to Specific Education.

Prof. Adams's attitude to the future may be described as tempered optimism. The science of education is still in its infancy and only beginning to employ quantitative methods. Even now we can to some extent measure a boy's mental aptitudes, and we may hope before long to determine his personal equation—to draw, so to speak, his horoscope—and settle how far and in what direction he is educable, and by so enabling him to realize himself we shall best fit him for social needs. The ideal of democracy will best be attained not by the *Einheitschule*, by any process of levelling down, or, if you will, of levelling up, but by a change in public sentiment, which will gradually obliterate the social distinction between the mechanical and the so-called intellectual. We shall still educate our classical scholars, but they will no longer form a caste of Brahmins. For teachers as a profession Prof. Adams advances no immoderate claims. In his republic there are no philosopher-kings. We cannot hope to breed Egerias. The rank and file will, when trained for their work, be granted a status not lower than that of the other learned professions, but they must be content to serve and exercise their individuality within strictly defined limits. The organization and curriculum of each school will be determined by middlemen, the educational engineers, as they are here called—an ideal that is to some extent realized in the American school superintendent. These will serve as intermediaries between the philosophers and the workers, as a link between theory and practice, and such posts should not only act as prizes to those who have entered the profession, but attract our best wits to enter it. Whether they are to be appointed by the State, and how far they are to be subject to State control or independent, as are the Judges, is not determined.

There is one notable omission, doubtless intentional. Principal N. M. Butler has somewhere laid down that the purpose of education is to transmit to the child his inheritance—physical, scientific, literary, æsthetic, and religious. Of the last and, according to Dr. Butler, the greatest, there is not here a word, and hardly a hint.

Our sole object has been, by indicating the contents, to send the reader to the volume itself; but, as a bare analysis is of necessity dull, if not repellent, we may in conclusion enliven it, and perhaps make the book more attractive, by quoting a sample of the epigrams in which it abounds:

The twentieth century is supposed to know these things [the recent discoveries of science], but its knowledge is in most cases confined to an awareness of when to press a button (even if we hold the Platonic doctrine of anamnesis).

After all, an educator is necessary to bring out all that is implied in our undeveloped character. Reminiscence leaves room for some outsider to jog our memories.

Each age demands a new statement of educational theory, just as it demands a new translation of a great classical work.

The public-school master has an uneasy feeling that the technical man may be a sort of Christian gentleman, though, to be sure, not quite in the same way as the public-school boy.

In our passage from the old specific education of the prehistoric times to the new specific education of the present we have, in fact, boxed the compass.

The Charterhouse of London: Monastery, Palace, and Sutton's Foundation. By W. F. TAYLOR. (7s. 6d. net. Dent.)

Among famous schools Charterhouse is probably unique in its connexion with a house that had in turn been a ducal palace and a monastery, besides being, in its latest stage, a double institution, eleemosynary and educational. It is of the old home of the School, now removed to "fresh woods and pastures new" in Surrey, that Mr. Taylor's interesting volume treats, and of its 274 pages 174 are concerned with its conventual state. The School, of course, has its own history and its own historians. The book with which we are here concerned has for its subject the story of a group of buildings which for upwards of five centuries has occupied a useful and, at times, a prominent place in the life of London.

The story of Charterhouse is a fascinating story, and one episode in it was in the highest degree tragic. The House of the Salutation of the Mother of God, outside the northern boundary of the city, was built, shortly after the Black Death, on a plot of ground known as "No Man's Land," which the Bishop, Ralph de Stratford, had converted into an extra graveyard for the many thousands of the victims of that visitation, and on an additional thirteen acres and one rood, which Sir Walter Manny acquired for the same purpose. De Stratford's successor in the See, Bishop Michael de Northburgh, appears to have been the real founder of Charterhouse; for by his will, in 1361, he made provision for the founding and completion of "a certain house of the order of the Carthusians," though, ten years later, Sir Walter Manny, who had disposed of his land to Bishop de Northburgh, obtained a royal licence for the founding of a double monastery of twenty-four Carthusian monks on his two plots of ground, No Man's Land and New Church Hawe, originally the gifts of the two Bishops of London. Thus it is that Manny became the reputed founder, and the beautiful fragment of his tomb, now recovered and preserved in the chapel, proves the extent to which he was honoured as a benefactor.

For 164 years—that is, from A.D. 1371 to 1535—the Brothers of the Chartreux (Shakespeare's name for them) lived the life of solitaries, each in his own house, cultivating his little garden plot, and employed in literary or manual work, meeting his fellows only at the hours appointed for the performance of the *divinum opus*, the recitation of the Psalter, the worship of the Mass, at one weekly meal in the Fraternity, and for the weekly *spatium*, when the community took the air abroad. In none of the monastic orders was the rule observed so faithfully and consistently as was the rule of St. Bruno of Grenoble in all the houses subject to the Grande Chartreuse, and this house of the Order by Smithfield preserved the tradition of loyalty. Among its latest associates was the Blessed Thomas More, whose greatest delight it was to go into retreat with the Carthusian Fathers.

The tragic story of the downfall of Charterhouse has been inimitably told by Froude, and the memory of it is impressed upon the Church by the beatification of its Prior, John Houghton, with the other English Martyrs. In the second period of its vicissitudes we see it as a great town house, in the possession of Lord North and the Duke of Norfolk. Of its development as Howard House we see the survival in the altered Guesten Hall, the staircase, and the splendid suites of rooms now occupied by the officials of Sutton's Hospital.

The third period, dating from 1611, restores to pious uses this ancient House of the Salutation: it becomes a hospital for decayed gentlemen and a school for foundation boys. In its fourth period, the present one, it exists where it is solely as a hospital, much as the readers of "The Newcomes" can picture it, save that there is no longer the pleasing, though pathetic, association of Sutton's boy scholars with the broken veterans of his bounty.

All this history Mr. Taylor has related in a very agreeable fashion in a volume worthy to be included in the quite

extensive bibliography of books on Charterhouse. The author did wisely, perhaps, in confining himself to a mere sketch of the educational side of the foundation, but we confess we should have appreciated a fuller treatment of the buildings. The thirty-eight illustrations, which vary in merit, are from photographs by himself.

A Short History of the Scottish People. By DONALD MACMILLAN, M.A., D.D. (10s. 6d. net. Hodder & Stoughton.)

In recent years the revival of interest in the study of History has extended in full force to Scottish history. As Dr. Macmillan says, there have been productions large and small; and now he strikes in between these two classes with a substantial volume of manageable dimensions and popular character, so as to catch that somewhat elusive personage, the general reader. We should have thought that Prof. Hume Brown had sufficiently met the case; but there is no reason why Dr. Macmillan should not have his chance in open competition. He does not marshal his facts so well, and his style is not so good; but the general reader will seldom take note of such technicalities, and will probably prefer his more free and popular treatment. Besides, he has furnished himself with special recommendations that may well attract those that have already plodded all the way with Hume Brown. His steady aim has been to write the History of the People—the evolution of the nation. Accordingly he takes the broad view, troubling himself little about minor details so long as he presents the main facts determining the lines of progress. Having at last got the different races gradually amalgamated into a nation, he shows how the nation developed the features—religious, political, and personal—that have given it a character of its own. He depicts the struggles that secured free institutions. He describes in special chapters the social conditions that prevailed at different epochs, amassing large quantities of varied details; and these chapters form very valuable sections of the volume. The narrative closes at 1843, not without precedent.

The consolidation of the different peoples into a nation, the developments down to the death of Alexander III, and the sketch of "Medieval Scotland" constitute a very careful and readable opening. In the earlier pages Dr. Macmillan follows the multitude in speaking about Celts, Goidelic and Brythonic, and tells us that the Celts came from Gaul; but is there any authority beyond repetition of a blunder for calling the folk "Celts" at all? The period of the War of Independence is disappointing: the author has been slack in the study and criticism of the authorities and has but feebly utilized the opportunity for narrative effect. He offers grounds for mitigation of the blame that attaches to Wallace for cruelties in his foray in the northern counties of England after the battle of Stirling, but he would have found much stronger grounds of exculpation even in English chronicles. It seems far from clear that a historian should continue to speak roundly of the "murder" of Comyn by Bruce. How was Randolph Bruce's "nephew"? Is the story of Randolph's chaplet anything better than an unintelligent scribe's embellishment? The repetition of the monkish estimate of the number of the combatants at Bannockburn is simply absurd. The line of the Jameses, with the turbulence of the great nobles, is pictured with much stronger grasp of the materials. As to the complicity of Mary in the murder of Darnley, Dr. Macmillan is unable to commit himself to an opinion; but he decides that she was "a moral failure." Yet we cannot but think that there is still room for a more thorough and independent examination of the whole position of Mary. The remainder of the volume maintains generally the higher level. Altogether the work is a substantial popular sketch, and may be strengthened on its weaker points in another edition. There are five useful maps.

The Wife in Ancient and Modern Times. By ERNEST J. SCHUSTER. (4s. 6d. net. Williams & Norgate.)

"The following pages reproduce the substance of a lecture delivered in the German Athenæum." The lecture, on a rough

computation, must have taken two hours and a half to deliver, and it is a compliment to the author to say that the book belies the preface. There is nothing to suggest the lecturer except that he wears his learning lightly, and puts his wide knowledge not only of English, German, and Canon law, but also of Greek and Roman literature, in a popular and eminently readable form. From the barbarous Mosaic laws of marriage he passes to the equally barbarous code of Athens, modified in the latter case by the humanizing influences of literature and a highly civilized society. He shows how, under Republican Rome, the married woman obtained independent management of her own property, and at a later stage the legal right to divorce a husband on the sole ground of infidelity; and how the effect of Canon law, though it established the generally sound principle of the indissolubility of the marriage tie, was perverted so as to rob the wife of both these rights. Lastly, it is pointed out how defective the present law of divorce is in England as compared with France, and still more with Germany. Dr. Schuster is no advocate of free unions, and would maintain the sanctity of the marriage tie; but he protests against the law which delivers a woman, body and soul, into the hands of a man, though he may prove a reprobate, and even a felon; and he shows by what painful struggles woman has won for herself the limited equality of rights that she now possesses.

As we were writing this we happened to come across the case of Mrs. Gray, the mother of the poet, as submitted to counsel. Dorothy Gray, *née* Antrobus, kept a milliner's shop with her sister Mary, and after her marriage continued to carry on the trade, providing from the profits for the education of her son at Eton and Cambridge. The "case" sets forth that Philip Gray, "almost ever since he hath been married, hath used her in the most inhuman manner by beating, kicking, punching, and with the most vile and abusive language; that she hath been obliged this last year to quit her bed and lie with her sister." It further mentions that, to revenge himself, he threatens to ruin her and his only son by forcing her to leave the shop and live with him and by disposing of his wife's moiety of the business. We know from Gray's letters what manner of woman his mother was, and can accept her statement as the simple truth. Asked what remedy she has, the eminent counsel replies: "If Mrs. Gray should leave her husband's home and go to live with her sister, her husband may, and probably will, call her, by process, in the Ecclesiastical Court to return home and cohabit with him, unless she can show cause to the contrary." The alleged cruelties, if she could prove them, would be sufficient cause; but, on the whole, counsel advises her to bear, as best she can, her present ills. If her husband proceeds to extremities and brings an action for restitution of conjugal rights, she will stand a better chance as a defendant than she would as plaintiff. We have wandered far from Dr. Schuster's book, but a single concrete instance will bring home to our readers the justice and cogency of his main argument.

"Home University Library."—*The English Language*.

By L. PEARSALL SMITH. (1s. net. Williams & Norgate.)

We have yet another book which, like Mr. Weekley's "Romance of Words," reviewed last month, is an outcome of the great Oxford Dictionary. It differs in so far as the subject is not words, but language, that it treats not only of vocabulary, but also of accidence, and is less concerned with tracing words to their origin than with their rise and development in English. Mr. Pearsall Smith takes the well recognized periods of English history from the Teutonic invasions of the fifth and sixth centuries down to, but not including, the present day. "Modern English" here signifies the language as it emerged at the beginning of the seventeenth century, and all that is included in that deservedly popular book "The King's English" lies beyond his purview. His own style is so clear and unaffected, that we should have welcomed an additional chapter on what for brevity we may call modern journalese.

That, in spite of back currents and eddies, the history of the language has been one of constant progress, most would agree, but when Mr. Pearsall Smith reports each loss of inflection,

each change from synthesis to analysis as an unmixed gain, he overstates the case. Poetry, at any rate, has suffered, and we have lost in force and conciseness what we have gained in precision. In so far as they can express in one word: "He shall have been written in," "let them rise up," Greek and Latin are superior to English. For some modern changes, as "the house is being built," "the man I saw," "yesterday's hat," there is nothing to be said. The latter phrase sounds as if it were taken from Ollendorf, nor "would we all speak of *riding* in an omnibus." Our use of "shall" and "will" differs from that of Shakespeare, but it is not true to say the differentiation of the uses is a modern achievement.

The last chapter, on "Language and Thought"—in other words, on Semantics—is the longest and most original. The following is a sample:—

It is a commonplace to say that the dominant conception of modern times is that of science, of immutable law and order in the material universe. This great and fruitful conception so permeates our thought that it is difficult to realize the mental consciousness of a time when it hardly existed. But, if we study the vocabulary of science, the words by which its fundamental thoughts are expressed, we shall find that the greater part of them are not to be found in the English of a few centuries ago; or, if they did exist, that they were used of religious institutions or of human affairs; and that their transference to natural phenomena has been very gradual and late.

For the masterly illustration of this thesis by the words, "order," "regular," "arrange," "law," "evolution," and their derivatives, we must refer the reader to the text. It is a book which, unlike several recent books on linguistics, is not only thoughtful, but provokes the reader to think for himself. Thus he will ask himself how the hypothesis that but for the Teutonic invasions we should now probably be speaking some Romance dialect squares with the fact that the invaders found a Celtic race whose language bears scarcely a trace of Latin influences.

Ethics and Education. By J. HOWARD MOORE.

(3s. net. G. Bell.)

This book comes to meet a specific demand, but it will prove of interest far beyond the area for whose immediate needs it was called forth. A few years ago the State of Illinois passed a law requiring the teaching of morals for thirty minutes each week in all its public schools. Whereupon there ensued something approaching consternation and revolt among the teachers "perplexed by the necessity of teaching something they knew nothing whatever about" as Prof. Moore damningly puts it. The writer, Instructor in Ethics at the Crane Technical High School, Chicago, started at once to stem the rising tide of revolt by gradually building up, as the result of his own teaching of ethics, a body of theory and practice of which the theoretical portion is now before us, to be followed shortly by a course of study and instruction in ethics for the four years of the high school. Appended to the present volume is an outline graded course of ethics teaching for elementary and high schools, together with a useful list of books on ethical culture, among which those of the English Moral Education League are prominent. There is ethical and tonic quality in this book. We feel on every page the presence of an intrepid pioneer at confident grips with the primal realities. There is no blinking of facts and no desire to skirk difficulties, and yet we note at times too easy an optimism. "We can produce fine men just as easily as we can fine cattle and carnations"; "it would require no more ingenuity to make divine men than to make green roses," trip too lightly on the tongue. The author's philosophical basis for moral education, in his conception of the Larger Self and a Universal Mutualism, is suggestive, but the acceptance of this will not prove so trippingly easy as the effort required for its statement. The author does, however, succeed in confronting us with the root problems, and his bold statement of them will help towards their solution. What we most relish in this writer is his fine scorn of our practice hitherto of moral education. "We have transformed the reap-hook into the harvester, and the loom into the factory, but in the manufacture of men and women we are using the same old machinery and the same old recipes that have been used by mankind for hundreds of years. . . . It is time we were devoting a little of our inventive genius to the improvement of human characters." Our author is a modern of the moderns who does not mince matters. "Man did not come from the skies; he came from the jungle." "The time has come for a new Evangelism. The eyes of the universe are on the school." "A hundred years from now, when ethical culture has won a permanent place in our educational pro-

grams, and has books and outlines and teaching experience and habit behind it, men will look back upon our blindness on this subject to-day with something like amazement . . . Think of men drawing salaries as educators who understand so feebly the function of education that they object to giving even six minutes a day to the science of civilizing people!" It is a book well worth grappling with.

The Century and the School, and other Educational Essays.

By FRANK LOUIS SOLDEN. (5s. 6d. net. Macmillan.)

Reverent hands have gathered together these educational essays from the manuscripts left behind by the late Superintendent of the Public Schools of St. Louis. Such pious collections have usually a deep interest for the immediate circle of the author's friends and fellow workers, but are not necessarily of any value for a wider public. It may be said, however, of these essays—especially of the opening one after which the book is entitled, of the closing one, "Folk Lore and Fairy Tales," and of the racy, genial, and subtle study of "Educational Ideas in Dickens's Novels"—that they reveal a writer of wide experience as an administrator, of real *savoir faire* as a practical teacher, and of exceptional ethical power. He is a man of large range, for he is not only typical of his century and country in his concern for the more technical side of education, but manifests a profound interest in its humanistic and ethical and religious aspects. He is also delightfully human, as his *penchant* for Dickens testifies. With sanity and vision he perceives that the demands of the century upon the school are both of a practical and of an ethical character. The school must adapt itself to the ethical and generally human aims of the school of all time, but to these ethical aims the peculiar demands of the century must be added. As to the immediately practical task of the school to-day, the author is a sagacious counsellor and craftsman. But coupled with his high technical qualifications he possesses also an ethical insight which enables him to see and express the deeper issues involved in public education. He perceives also "that side of education which no age can transform and no century can alter; that side of education which does not prepare for the macrocosm of life without, but which seeks to build up a world within," and that the ethical task which the century demands from the school is "an appreciation of those treasures that are higher than life itself."

- (1) *Outlines of School Administration.* By A. C. PERRY, Ph.D. (6s. net. Macmillan.) (2) *Annals of Educational Progress, 1910.* By J. P. GARNER, Ph.D. (4s. 6d. net. Lippincott.)

Two remarkable samples of the American genius for compiling facts are before us. (1) In the first, "Outlines of School Administration," Dr. Perry, taking as his subject the practice of education as divided into the three problems—the organization, management and supervision of schools, and a school system—transports us breathlessly from the United States to Bolivia, England to Uruguay, bewildering us with figures and comparative time-tables and disappointingly failing to give any adequate account of tendencies and results, types of teachers and children, methods of teaching, &c., either in the United States, to which most of his space is devoted, or elsewhere, while the question of teachers, their status and training, is disposed of hurriedly in a few meagre pages at the end of the book. It is impossible to touch on the author's laboriously compiled statistics. Something may, however, be said as to his short account of English education. For those of us who consider England oppressed by an iron code, it is pleasant to find Dr. Perry quarrelling with our education as unorganized and decentralized. "The chief characteristic of [English] school organization is its lack of organization: the individual is everything, provided it is the individual in his proper place." This is due to the "sturdy sense of individual rights locked within a rigid mold of caste." In the United States each city prescribes for its own needs, usually in minute detail by means of syllabuses and time allotments for each course of study. We are told nothing of the effect on the teachers. Perhaps it is this that is partly responsible for the American cry: "What is wrong with the public schools?" In comparison with the cut-and-dried time-tables of New York, Boston, Milwaukee, &c., England is in a state of blessed freedom. May we be delivered from such centralization!

(2) The other volume is more frankly a compilation; but, although it has more to offer in the way of classification of tendencies, it is, perhaps, only valuable for its many and various facts, ranging from forest fires to the height of school desks in countries from Argentina to Liberia. Both books are of use for those with a taste for miscellaneous facts mainly concerning American education. In the latter volume some uniformity of spelling seems desirable. Are we to believe Lord Rosebury (page 197) or Lord Roseberry (page 296)?

Education by Life. By Various Writers. (3s. 6d. net. Philips.)

A discussion of the problem of the school education of younger children. The editor is Miss Henrietta Brown Smith, Lecturer in

Education at Goldsmiths' College. The idea and original plan of the book were conceived, and developed to some extent, by the late Miss M. M. Penstone. The various writers have been selected mainly on account of their wide practical experience of the particular subject with which each deals. The Editor contributes an introductory chapter and further sections on "Industrial Handwork" and "Games." The introductory chapter supplies a concise and admirable summary of the most universally accepted of Froebel's principles, points out that most educators accept these, and that a good many endeavour to practise them, but frequently fail to do so owing partly to the fact that "many of Froebel's disciples take his applications rather than his principles, with an uncritical and indiscriminating eagerness." The principle mainly emphasized here is that education must not be regarded as a *preparation* for life, but rather as life itself: indeed the motto of the book is Pestalozzi's—"It is life that educates." The aim of the entire book is, in short, to regard the various subjects of the curriculum rather as aspects of life than as subjects; to indicate methods of teaching which, so far as these experienced and practical educators can discover, are methods of life. Miss Minhinick, of the Pestalozzian School, Plymouth, contributes chapters on "The Personality of the Teacher" and "Literature." The sections of the latter chapter on (1) "Stories and Story Material" and (2) "Poetry" are wide in range, sure in insight, and of great practical suggestiveness. Miss E. R. Murray, of the Maria Grey Training College, contributes chapters on "Religious Teaching and Religious Development" and on "Reading and Writing." If the spirit and suggested practice of the former could be seized and realized, there would be no "religious difficulty" in education. The further chapters on "The Health of Children," by Miss A. Home; "The Baby Room," by Miss E. B. Cole; "The Cultivation of Artistic Tendencies in Young Children" and "Method of Approach in Nature Study," by Miss C. von Wyss; "Early Work in Number," by Miss A. J. Wark; "Music," by R. T. White, Mus.Doc.; and "Suggestions as to the Basis of History Teaching and of Geography Teaching," by Miss C. Legg and Mr. J. F. Unstead respectively, are each of real practical value. All these specialists are, with one exception, women, in whose hands the education of younger children so largely and so wisely lies. Educators, whether mothers or teachers, will find this book probably the most comprehensive and authoritative manual of practical suggestiveness for the education of young children. Most useful, too, is the select and carefully compiled bibliography at the foot of each chapter.

Common-sense Dietetics. By C. LOUIS LEIPOLDT, F.R.C.S. (2s. 6d. net. Williams & Norgate.)

This book is a very long way from bearing out its title. If the reviewer were permitted to rechristen it, he would style it "Dietetics for Confirmed Gourmands." The book is of convenient size, reasonable price, and well printed; but it cannot be said to contain a fair résumé of the information about diet which is now available. It is, indeed, impossible to lay down hard-and-fast lines, and the old dictum "One man's meat is another man's poison" still holds good. Nevertheless, investigation has reached certain conclusions that cannot be disregarded. One of these is that the mixtures of some foods is injurious to a considerable number of persons—e.g. green vegetables and fruits, starchy substances eaten with acid, sweetened fruit. Everybody has not a delicate digestion, it is true; yet the decline of physique and good looks among large sections of our people, the decayed teeth of our children (there are elementary schools in London examined by dentists who found 90 per cent. of the children suffering in this way), the enormous number of rejections by the Army doctors, the decline in the development of the jaw and the prevalence of the arched palate, the rising figures of sickness which all the Friendly Societies have to show, every lustrum proving health to be more indifferent: all these circumstances should be known to writers on diet, well in the front of their minds, and their books should at least give hints of what path we are to tread to mend matters. Now and again Mr. Leipoldt seems on the point of saying something really useful and pointing out a more excellent way: "Custom and habit largely regulate our dietetic conventions at present, and we are apt to forget that both may lead to the acquisition of tastes and inclinations which are detrimental to health." A valuable observation, but immediately followed by some vague sentences that no rule can be laid down. On the same page simplicity and frugality are commended; towards the end of the book (in which the reviewer flounders without an index) very spicy menus are highly approved—menus only possible to those wealthy clubmen who are what our writer terms *gastrosophs*. Mr. Leipoldt commends some author, name not given, for the valuable statement that "most people mistake the doctrine of variation in their mode of living. They have great variety at the same meals and a great sameness at

different meals." He is right in saying that a drink such as a cocktail before a meal dulls the palate and makes the consumer insensible to the fineness and delicacy of succeeding dishes. Yet he nullifies this useful remark by (in a different place it is true) commending vinegar, salty foods, beef essences, all of which stand condemned so far as research in diet has gone at the present moment. Stress is rightly laid on the importance of slow cooking, evenness of temperature, absence of hurry; there is also a well deserved word on the importance of steaming vegetables. When Mr. Leopoldt treats of food preservatives one might expect a word of condemnation for several of these. A congress held during the St. Louis Exhibition a few years ago affirmed that all preservatives except salt, sugar, and curing by smoke are injurious to the powers of assimilation, and that the public should be safeguarded by a law compelling all food to bear the name of the preservative used. Mr. Leopoldt actually informs us "a small percentage of boracic acid is probably harmless"; yet our slow-moving Government has black-listed it, and after June 1, 1912, its use in "preserving" milk and butter will be illegal. When the whole of these injurious substances are swept out of the dietary of all classes, we believe a considerable improvement will take place in the public health. Countries that are better run than ours do not permit them, and it is well known that to some extent England is a dumping ground for certain classes of food, more as a result of insufficient legal protection than lax inspection. We fail also to see where the common sense comes in when four solid pages are devoted to aberration of appetite, such as persons eating buttons, fish-hooks, quills, and a lead inkstand. Such feats have their place in tit-bit literature, but not in dietetics, and to our mind this and several other spaces might have been put to better use.

Athletic Training for Girls. Compiled and edited by C. E. THOMAS. With Illustrations. (3s. 6d. net. Pitman.)

This is a useful book dealing with hockey (to which the largest space is given), lacrosse, cricket, net-ball, lawn tennis, golf, fencing, sculling, punting, swimming, besides a few indoor games. Some of its chapters are by different authors—as that on Gymnastics, by Miss Annie Hildyard; Net-ball, by Miss B. H. Grieve; Golf, by Miss M. E. Stringer; Lawn Tennis, by Mr. M. J. G. Ritchie; and Fencing, by an anonymous gentleman. The qualities to be gained by means of games are tabulated as discipline, pluck, perseverance, self-reliance, quick perception, decision, unselfishness, and *esprit de corps*. Miss Hildyard puts the case for the Ling system very clearly. The London School Board declared for the Swedish system in 1878. The Board of Education summarily dismisses all other systems and declares that the aim must be the general development of the body as a whole. It is well to know that the British Army officials adopted the Swedish system in 1907, and we believe that the Navy, too, shows a preference for the exercises. Admirable reasons are given for Ling's system, and the effects of various exercises on the different muscles and organs are detailed. The chapter on costume is eminently practical. There is no doubt that the short skirt is not half short enough; it is not pretty, it hampers movement to such an extent that those who wear it, when their opponents are dressed in the infinitely more becoming tunic to the knee and tights, are severely handicapped. One wonders if it is pure accident that shows us a plain, frowning woman wearing the first-named costume, whilst a good-looking girl with shapely limbs has been chosen to illustrate the advantages of the tunic. Mr. Ritchie also dwells on the disadvantage of costume under which women play tennis as compared with men. The illustration of the lady playing golf and another of the lady tennis player in skirts far too long have convinced the reviewer that the time is ripe for a sumptuary law demanding that the elegant tunic be worn by all feminine athletes. If it were a compulsory school dress up to the age of eighteen, or an ordinary everyday dress up to the age of eighty, the community would gain in every way. Stout persons of either sex might be compelled to wear a toga to the ankles.

Health Readings. By C. J. THOMAS, M.B. (1s. 6d. Methuen.)

These are plain and, with few exceptions, very sensible talks on the rudiments of physiology and domestic science planned for elementary schools. The book would be better for some illustrations, but the competent teacher will know how to supplement it by the blackboard. There are some counsels of perfection that will, we fear, seem a mockery to the elementary pupil. "To be healthy we must have a bath-room in our house, with plenty of water to wash." "People suffering from colds . . . should never think of visiting other people." Would any police magistrate accept a cold as excuse for non-attendance? Mr. Gladstone's rule of "thirty-two bites at each mouthful—one for each tooth" could hardly be enforced even on children who have only their milk teeth to consider. These, however, are accidental excrescences, and hardly affect the body of the teaching, which is practical and appropriate to the age of the readers.

Herbert Kynaston. A Short Memoir, with Selections from his Occasional Writings. By the Rev. E. D. STONE. (3s. 6d. net. Macmillan.)

Dr. Kynaston was an elegant scholar. He was bracketed Senior Classic in 1857 and was at the same time stroke of the Cambridge Eight. He had a natural gift of wit which found expression even more readily in Greek and Latin than in English. Some of his classical compositions well deserve to be rescued from oblivion, but his was one of those lives that are happy in having no history, and the brief memoir by his Eton colleague is eked out by tributes which read too much like testimonials. The Dean of Lincoln's contribution is an exception. The fact that Kynaston failed as a head master at Cheltenham is frankly acknowledged; but his failure is partly to his credit. The school was out of joint, and he was not the man to set it right. He was too simple-minded, too sincere and unsuspicious. We turn to the second part, and here, while all reaches a high level, the Latin versions are pre-eminent. In the three "Idylls" of Theocritus the metres chosen ill represent the liquid flow of the Greek hexameter. With the Anthology he is more successful, and we should like to quote the epigram from "Paulus Silentiarius," but space will allow us only to draw from the Latin. Here is the first stanza of Lyte's "Abide with me":

"Christe, mecum commorare,
Vesper cadens obumbrare
Diem coepit tenebris;
Ope qui juvas egentes,
Unus qui levas dolentes,
Inopes precamur, flentes,
Commorare, praesto sis."

This is on a par with Gladstone's "Christus pro me perforatus," and higher praise we cannot award it. Admirable, too, is the version of Tennyson's "Go not, Happy Day" in Catullian glyconics. Many scholars have attempted "Crossing the Bar," but none has equalled the version of the second stanza.

"But such a tide as moving seems asleep,
Too full for sound and foam,
When that which drew from out the boundless deep
Turns again home."

"Sed fremitum spumamque premens, similisque sopori,
Labatur aestus amplior.
Cum maris immensi quae pleno e gurgite fluxit
Vis refluat in sedem suam."

We will end with two specimens of the lighter vein. Mr. W. Hobbouse's departure from Oxford to Durham produced the following epigram:—

Τίς βόδς οὐκ ἤκουσε Πόρον, καὶ ἐπώνυμον ἔστυ;
συμφέρεϊ οὐχ ἱκανῶς τοῖνομα, φροῦδος Ὁ ΒΟΥΣ.

The following, which explains itself, was addressed to Dean Lake:—

"In Athenæum's Hall a sleek divine
Left his umbrella, walking off with mine.
So some Q.C. takes silk and casts away
The frayed alpaca that has seen its day.
'Excuse me, friend,' said he, 'a mere mistake.'
'A mere, indeed! You surely mean a LAKE.'"

Recommendations of the Classical Association on the Teaching of Latin and Greek. (1s. net. Murray.)

Teachers of Classics will welcome the publication in book form of five Reports of Committees, which, even if they are members, they have probably not preserved. They deal respectively with the spelling and printing of Latin texts, the pronunciation of Latin and of Greek, the teaching of Latin in secondary schools, and a four years' Latin course for schools with leaving age sixteen. We rejoice to find the principle of one language at a time, and of grammar as ancillary to reading fully recognized. Whether French or Latin should be the first foreign language is left an open question.

L'Avènement de Bonaparte. Par ALBERT VANDAL.
Two vols. (2s. net. Nelson.)

The "Collection Nelson" continues, month by month, to reproduce the masterpieces of French literature in the most convenient shape at the most moderate prices. This said, there is little for the reviewer to add, and we pick out these particular volumes because Lord Rosebery's brilliant introduction gives us a handle. Writing a few weeks before the sudden death of the author, he pronounced M. Vandal the first of living historians. "A une grande exactitude dans le détail, il joint la largeur de vue, la puissance dans le développement du récit, le don du portrait frappant, l'imagination sympathique qui groupe et illumine les faits, le toucher magnétique qui donne la lumière et la vie à chaque

(Continued on page 458.)

MR. MURRAY'S NEW BOOKS.

The special attention of all interested in new methods of teaching English is called to the two following books, which possess the merit of having been thoroughly tested in class before publication. Price 1s. 6d. each.

ENGLISH GRAMMAR.

For Junior Forms. By R. B. MORGAN, M.Litt., Whitgift School, Croydon. **1s. 6d.**

As the author is convinced that the teaching of Grammar is largely a matter for the teacher and the blackboard, he has endeavoured to reduce all explanatory matter to a minimum. The exercises are drawn from the literature that most boys are familiar with, and in the early parts of the book the author has not hesitated to use for this purpose the Nursery Rhymes, "Alice in Wonderland," and similar literature. Most of the exercises are intended to be done orally, an exception being the constructive exercises at the end of each group. *The terminology employed throughout the book is that recommended by the Joint Committee on Grammatical Terminology.*

ENGLISH COMPOSITION.

For Junior Forms. By E. E. KITCHENER, M.A., Whitgift School, Croydon. **1s. 6d.**

In this book the mother tongue is treated as a living and spoken language. It aims at developing the power of connected thought clearly and readily in speech and writing. This is worked out by means of synthetic and analytic exercises on sentence construction leading up to the ordinary rules of composition. Special attention has been given to punctuation and to repetition of *prose* passages, and a large amount of oral practice is included.

MATTER, FORM, AND STYLE.

A Manual of Practice in English Written Composition. By HARDRESS O'GRADY, Goldsmiths' College. **2s.**

This book treats English Written Composition in an original manner, and is intended as a help to, and not a substitute for, the teacher. It is suitable for use in the higher forms of schools and students in colleges. Great stress is laid on the broader aspects of the subject, on the need for sincerity in description and discussion, on form as essential to the successful presentation of the matter. Style is treated rather from the point of view of logical sequence, vividness, and clearness. The book is chiefly remarkable for the number of exercises and questions to which answers must be given in writing.

ELEMENTARY GEOMETRY.

By A. E. LAYNG, M.A., late Head Master of Stafford Grammar School. Part I, **1s. 6d.**; Part II, **1s. 6d.**; Complete, **3s.** Teachers' Edition, with Answers, **3s. 6d.**

As regards the fundamental part, this book follows the lines indicated in the Circular on the Teaching of Geometry issued by the Board of Education in 1909.

The Theorems and Constructions enunciated in the Syllabus on Elementary Geometry issued by Cambridge University constitute the "book-work."

The order in which theorems are placed has been chosen with the view of grouping together, as far as possible, closely allied theorems: for instance, the three fundamental theorems relating to congruent triangles. Among the exercises are included nearly all the questions set in the Cambridge Local Examinations during the last eight years.

LECTURES SCOLAIRES.

Edited by W. MANSFIELD POOLE, M.A., Head of the Modern Language Department, Royal Naval College, Osborne; and E. L. LASSIMONNE, *Officier de l'Instruction Publique*, Senior Master, Royal Naval College, Osborne.

This new series of reading books, divided into three grades, consists for the most part of new and interesting stories hitherto unpublished in England, and specially written for the young by the best French authors.

One of the chief features of the books is that the questions are facing the text. These questions are divided into two parts, the first being questions on the meaning, while the remainder deal with the grammar of the page facing them. Both the questions and the notes at the end of the book are written entirely in French.

"... have proved themselves trustworthy adjuncts to the teaching of French, and we welcome the newest additions."—*Secondary School Journal*.

NEW ADDITIONS ARE UNDERLINED.

Série Élémentaire. 1s. each.

For Preparatory Schools and the Lower Forms of a Public School (ages 11 to 13).

Le Touchard d'Or. Adapté de l'Anglais de NATHANIEL HAWTHORNE.

***Guillaume le Tisserand.** ALBERT WOLFF.

Le Chêne Parlant. GEORGE SAND.

La Souris Blanche. HÉGÉSIPPE MOREAU.

Les Voisins des Campagne. HENRI MONNIER.

Série Intermédiaire. 1s. 6d. each.

For the Top Form of a Preparatory School and Middle Forms of a Public School (ages 13 to 15). For the following Exams.:—Navy, Oxford and Cambridge Junior Locals, Public School Scholarships, &c.

Un Homme à la Mer. Extraits adaptés des Aventures de Robert Robert et de son fidèle compagnon Toussaint Lavenette. Par LOUIS DENNOYERS.

Ce Gredin de Pritchard! Anecdotes Extraites de "L'Histoire des mes Bêtes." ALEXANDRE DUMAS (Père).

Un Aiglon. Anecdote Extraite de "La Cape et l'Épée." AMÉDÉE ACHARD.

***Le Parchemin du Docteur Maure et l'Oncle d'Amérique.** ÉMILE SOUVESTRE.

Série Supérieure. 1s. 6d. each.

For the Higher Forms of a Public School (ages 15 to 17). For the following Exams.:—Oxford and Cambridge Senior Locals, Sandhurst, Woolwich, London Matriculation, &c.

Gil Blas chez les Brigands. Par LE SAGE.

Noiraud, Guignol, et deux Cyclones. LUDOVIC HALÉVY.

Le Meuron Rouge. Adapté de l'Anglais de Madame la BARONNE ORCZY.

Martin Paz. JULES VERNE.

* Both the texts and the questions in these books are easier than the others of the series to which they belong.

JOHN MURRAY, ALBEMARLE STREET, LONDON, W.

page, enfin les qualités innées qui distinguent le grand historien des arides chroniqueurs perdus dans les dates et les détails." We need only add that the abridgment, or rather curtailment (it still runs to nearly a thousand pages), has been judiciously effected so as to leave no perceptible gaps.

Profilis Anglais. Par SAINTE-BEUVE. Notes de HARDRESS O'GRADY. (1s. 6d. net. Dent.)

The five causeries on Franklin, Marie Stuart, Gibbon, Chesterfield, and Cowper make a capital reading book for higher forms, and the preface on Sainte-Beuve by M. André Turquet is a brilliant specimen of French criticism, though the shadows are faintly indicated. We confess that the notes seem to us a superfluity. They are simply paraphrases of words according to the New Method. "*Le siècle*—période de cent ans; *tâcher de*—essayer de" are the first two. There are endless allusions that will puzzle a Sixth Form boy—"Marc Antoine corrigeant Raphaël, un intuitif comme Ernest Hello, Werther, Carabin" on the first few pages. Surely it is here that he needs the annotator's help, not to be told that *le cuivre* is "un métal," and that *le ventre* = "l'estomac."

The Works of John Caius, M.D. With a Memoir of his Life by JOHN VENN, Sc.D. Edited by E. S. ROBERTS, Master of Gonville and Caius College. (18s. net. Cambridge University Press.)

This monumental volume was compiled in commemoration of the four-hundredth anniversary of the second founder of Caius College and its Master, 1559-1573. John Caius was the most learned physician of his day, and his whole fortune was spent on the enlargement, adornment, and endowment of his College. His foundation has endured, and his heritors could have chosen no more pious memorial; but his written works have little value except for the antiquary. The reformers of Greek pronunciation will not appeal to his authority, and his claim to the superior antiquity of Cambridge over Oxford shows more zeal than discretion.

Robert Browning: a Selection of Poems (1835-1864). Edited by W. T. YOUNG. (2s. 6d. Cambridge University Press.)

Mr. Young speaks modestly of his work as only an introduction for the student who is beginning the study of Browning. It is more than this, and one at least who has read and re-read Browning for full forty years finds something to learn from Mr. Young's appreciation of his poetic genius and philosophy of life. The

students he addresses can, however, hardly be those children of a larger growth to whom he lectures at the Goldsmiths' College. Neither "Saul" nor "Bishop Blougram's Apology" is a poem for pupil-teachers, and he would be a bold teacher who discussed them with a mixed class of Calvinists and Unitarians, Protestants and Catholics; otherwise the selection is good—poems at once characteristic of Browning's various manners and offering no great difficulties of interpretation. Only we miss a specimen such as "Artemis Prologuizes" to show how perfectly Browning could reproduce the spirit of Greece. To descend to particulars, the notes err in defect rather than in excess—a fault on the right side. In the "Lost Leader" we need not suppose Browning to have reckoned Shakespeare as a democrat—the sentiment is semi-dramatic—and attention should rather be called to the halting rhythm. The last line of the poem does seem to us to need a note. Does "first by the throne" refer to the Lost Leader or the speakers? and if the latter, as the context would seem to imply, does it mean more than first in point of time? In spite of Dr. Berdoe, we have no doubt that "the great text in Galatians" is iii, 20, "Now a mediator," &c., and, for the consequences of a misunderstanding, the reference to Deuteronomy is no more appropriate than one to the curse in "Tristram Shandy" or in the "Ingoldsby Legends." In "A Grammarian's Funeral" the quotations from Wanley, to which special attention is called in the preface, do not seem to us to throw any light on the genesis of the poem. For the mythical commentator who mistook *Hoti* for a Chinese mandarin we would substitute the recent Oxford editor who explained *Calculus* as the Differential; and Mr. Young has not settled the business of the enclitic *De* by telling us that "it gives slightly varying significances." In "The Statue and the Bust," ll. 233-4 were picked out by a Dublin professor as an instance of wilful unintelligibility; but to us the meaning appears perfectly plain and not to need the alternative explanations here offered. To put down a gold coin when you are playing with counters is an absurdity that would furnish an epigram. The last line of "Bishop Blougram" has puzzled us and seems to call for a note: "And studied his last chapter of St. John." Has Gigadibs read his Bible through from Genesis to the Revelation, or has he ceased to trouble himself with the problems of the metaphysical Gospel or of the Apocalypse? Most of all we miss a note

(Continued on page 460.)

RALPH, HOLLAND & CO.'S NEW BOOKS.

THE STORY THREAD.

By EDITH KIMPTON, M.A., A.K.O.

A series of interesting stories from English Literature starting with the Legend of Beowulf, and covering broadly the whole of the ground down to modern times.

Suitable as an introduction to the study of English Literature for children in the lower forms of Secondary Schools and the middle standards of Elementary Schools.

Illustrated with 21 Line Drawings by PETER CAMPBELL.

Crown 8vo, 155 pp., cloth.

Price 1s.

Extracts from Press Notices.

"A collection of stories from the best sources in English Literature, past and modern, retold in charming and simple form, adapted for children's reading, and illustrated with pen-and-ink drawings."—*Pull Mall Gazette*.

"In every way calculated to sow in the young the seeds of a healthy literary taste."—*The Scotsman*.

"An agreeable book for children. It tells unpretentiously many of the great myths and stories that have enriched our literature."—*The Athenæum*.

"Miss Edith Kimpton has not only a sound knowledge of her subject, but taste in selection and a style of writing which is excellent for her audience. . . . As a reading book in schools or as a gift book for a child we can imagine nothing better."—*Westminster Gazette*.

Inorganic Chemistry.

By S. W. BURNELL, LL.B., B.Sc., Chemistry Master, Walthamstow County Secondary School and Technical Institute, and A. J. DICKS, B.A., B.Sc., Head Master, Walthamstow County Secondary School and Technical Institute. Joint Author of "Plant Study in School, Field and Garden." Containing 102 valuable Diagrams and Illustrations. Price 3s. 6d.

The Monsoon Region. (Just out.)

Being Book V of THE JUNIOR SCIENTIFIC GEOGRAPHY. By ELLIS W. HEATON, B.Sc., F.G.S., Head Master of the Tynemouth Municipal High School. Crown 8vo, cloth, 88 pp., with Maps, Diagrams, and 12 Photographic Illustrations. Price 10d. net.

The following are the Books of the Junior Series already published:—

Book I.—The Junior Physical Geography.	1/3 net.
" II.—The British Isles.	1/- net.
" III.—The British Empire.	1/- net.
" IV.—The Mediterranean.	1/- net.
" VI.—The Atlantic Seaboard of North America.	

(Ready in July.)

For the JUNIOR LOCAL EXAMINATIONS of Oxford and Cambridge and the SECOND CLASS COLLEGE OF PRECEPTORS' EXAMINATIONS.

Questions and Exercises in Geography.

(Based on Heaton's "Scientific Geographies.") I.—The World. General, Mathematical, Physical, and Economic Geography. Price 6d. net. II.—The British Isles. Price 3d. net. III.—Europe. Price 4d. net. By ROBERT J. FINCH, Senior Geography Master, Hornsey County School.

This series of questions has been prepared in response to a demand for sets of typical questions to test the progress of the student, and at the same time to fit him for dealing with geographical problems in the examination room.

Specimen questions from recent examination papers have been included by special permission of the various examining bodies indicated in the text. In Book I there is also a full Introduction containing hints on answering questions, notes on common geographical errors, and specimen answers to typical questions.

Old Ballads of England and Scotland.

With Introduction, Historical Notes, and Full Glossary, by ROBERT ARMSTRONG, Secondary School, Gateshead. Crown 8vo, cloth. Price 1s.

A Book of Northern Heroes.

By A. J. DICKS, B.A., B.Sc., Joint Author of "Plant Study in School, Field, and Garden," Principal of Walthamstow County High School. A Reading Book for the Lower Forms of Secondary Schools and the Upper Standards of Elementary Schools. Price 1s.

A Book of Southern Heroes.

Uniform with the above. Crown 8vo, 181 pp., cloth. Price 1s.

DENT'S NEW EDUCATIONAL WORKS

MODERN LANGUAGES.

THE BEST FRENCH PLAYS. Each Volume limp cloth. Fcap. 8vo. Price 3d. net.

This new series is designed to meet the need of teachers for a cheap, unannotated series of French Dramatic Texts for rapid reading in class, and it is hoped that these books will meet their requirements. The first six titles are now ready.

SEDAINE: LE PHILOSOPHE SANS LE SAYOIR.

MUSSET: ON NE SAURAIT PENSER A TOUT.

MME DE GIRARDIN: LA JOIE FAIT PEUR.

LABICHE: LA GRAMMAIRE.

LABICHE ET MARTIN: LE VOYAGE DE M. PERRICHON.

MARIVAUX: LE JEU DE L'AMOUR ET DU HASARD.

FRENCH WORD GROUPS. Based on Dent's Pictures of the Seasons. By R. GUERRA, Modern Language Master, Bristol Grammar School. Crown 8vo. Price 1s.

FRENCH TEXTS.

La Bruyère: Caractères. With Notes by H. O'GRADY. Fcap. 8vo, cloth. Price 1s. 6d.

Sainte-Beuve: Profils Anglals. With Notes by H. O'GRADY. Fcap. 8vo. Price 1s. 6d.

Dumas: La Tulipe Noire. With Notes by H. O'GRADY. Fcap. 8vo, cloth. Price 1s. 6d.

Mérimée: Colomba. With Notes by H. L. HUTTON, M.A., Chief Modern Language Master, Merchant Taylors School, London. Price 1s. 6d. [In preparation.]

DER SILBERNE SCHILLING and other Tales. Edited by WALTER RIPPMAUN, M.A. Price 1s. 4d.

A new Second Year German Reader, uniform with "Der Golden Vogel" and "Eisenhans," previously published in the Series.

MATHEMATICS.

ARITHMETICAL EXAMPLES. For Secondary Schools and the Upper Forms of Primary Schools. Arranged by W. S. BEARD, sometime a Master in Christ's Hospital. Price 2s. 6d. With Answers, 3s.

This book contains a carefully graduated course of examples in Arithmetic adapted to the requirements of pupils in Secondary Schools. Prominence is given to the various branches of Commercial Arithmetic, and there are numerous practical exercises in connexion with Statistics, &c. At the end of the book Miscellaneous Problems and progressively arranged Test Papers for general revision are inserted; many of the later papers have been set in recent University Local and Matriculation examinations.

A KEY TO THE PUBLIC SCHOOL MODERN BOOK-KEEPING. By RANKIN WENLOCK, F.R.G.S., Commercial Master at the County High School, Barry, Glam. Cloth. Price 1s.

The Key is intended to be used as a supplementary volume for class work, and an Appendix is included containing the Elementary and Intermediate examination papers for 1912 of the Royal Society of Arts.

SCIENCE.

A LABORATORY NOTE-BOOK OF PHYSICS. By the Rev. S. A. McDOWALL, M.A., Assistant Master at Winchester College. In Two Volumes. Part I, Elementary. Part II, More Advanced. Crown 4to. 2s. 6d. net each.

Part I is also issued in Sections, in limp cloth, as follows:—

- I. **Measurement and Hydrostatics.** 9d. net.
- II. **Heat.** 1s. net.

III. **Light.** 1s. net.

IV. **Magnetism, Electrostatics, Current Electricity.** 1s. net.

OXFORD LOCAL EXAMINATIONS, 1913.

AS YOU LIKE IT. Edited by Miss FLORA MASSON. With eight Illustrations by DORA CURTIS. 1s. 4d.

HAMLET. Edited by OLIPHANT SMEATON, M.A. With Illustrations by PATTEN WILSON. 1s. 6d.

OLD MORTALITY. By Sir WALTER SCOTT. Edited, with Introduction, Notes, and Glossary, by A. J. GRIEVE, M.A. 1s. 4d.

THE LAY OF THE LAST MINSTREL. By Sir WALTER SCOTT. Edited by J. W. YOUNG, M.A., Head Master, Pupil Teachers' School, Bradford. Crown 8vo, cloth, 1s. 4d.

MILTON'S MINOR POEMS. Edited by EDMUND DALE, M.A., Litt.D. 1s.

CAESAR'S GALLIC WAR. Books IV and V, in one volume. Edited by Dr. JOHN MARSHALL, Rector of High School, Edinburgh.

The Publishers will be happy to entertain applications for Specimen Copies from Responsible Teachers.

LONDON: J. M. DENT & SONS, LTD., ALDINE HOUSE, BEDFORD ST., W.C.

on the really obscure lines at the end of "O Lyric Love." They puzzled so good a Browningite as Sir Frank Marzials, and Browning himself acknowledged the obscurity by supplying an interpretation.

Poems Old and New. By A. H. BEESLY. (1s. net. Longmans.)

This small volume, wherein is gathered all that the late A. H. Beesly wrote in verse except the one long poem of "Danton," to his many old friends and pupils is redolent of Marlborough, the place he loved with a whole heart, where for close on forty years he worked, as strenuous in playing fields as in class-room, and where he passed his declining years in the house he had built for himself. Even the ballads that have no connexion with the school are instinct with the dare-devil pluck that appeals to the schoolboy—Lieutenant MacMunn who carries the rum to the besieged in Sedan, and the Shoemaker Admiral:

"Sir Christopher Mings was a shoemaker's son,
He clouted a shoe ere he sighted a gun;
His mother was born aboard of a hoy,
And she suckled her lusty sailor boy."

It is Rockley Wood that inspires the longest and best of the lyrics, and the last poem is a touching tribute to Marlborough's great Bursar, J. S. Thomes. We would like to have quoted "The Nationalist's Appeal," a plea for justice to Ireland, no less forcible in 1912 than it was in 1893; but we must content ourselves with some stanzas from "Stone-broke," a perfect vignette.

Two battered handles,	And old and ill.
A heap of stones,	"The House! No, better
A hayband wrapping	To die instead,
The hurdles' bones.	Or go on living
A sack in tatters,	On nought but bread."
And in it thrust	
Straw half rotten	
And grass half dust.	
Then through the autumn,	The last stone broken,
A grey old man	He did not stir,
Began to hammer	He seemed a watcher
Ere day began.	Or listener.
	He sat, nor heeded
And through December	The cold snows blown,
He hammered still,	His own heart broken,
Though cold and ragged,	Himself a stone.

CHEMISTRY.

Modern Science Reader, with special reference to Chemistry.

By R. M. BIRD. (5s. net. Macmillan.)

This little book is a collection of articles which have appeared recently in various journals devoted partially or wholly to scientific matters. The essays are written in a style which will enable those who are possessed of but little chemical knowledge to read them with interest and profit, and yet the information is accurate and up to date. As an adjunct to the textbook reading of the senior boys in a secondary school it should serve a most useful purpose in arousing interest in the commercial applications of the science they are studying, and in directing their attention to the nature of the research work which has been and is being carried out in many branches of chemistry. It will suffice to mention modern explosives, artificial silk, the oxyhydric process of cutting metals, natural and artificial perfumes, radioactivity and unsolved problems of chemistry as typical examples of the twenty-eight articles included in the volume. Here and there one encounters statements which should be amended in a future edition—e.g., on page 120 one reads "sound would become visible to a man moving fast enough towards its vibratory origin." Such a sentence shows confusion between the modes of propagation of sound and light. Again on page 13 we read of "a force equal to the power of a thousand horses." Every teacher of mechanics knows the difficulty of enforcing on his pupils the proper use of such terms as "force" and "power," and it is important that books which are intended for the use of beginners should be beyond reproach in such matters. We strongly recommend this little volume as worthy of a place in the library of all secondary schools.

A First Year Physical Chemistry. By T. P. HILDITCH. (2s. Methuen.)

Students who are beginning the subject of physical chemistry will appreciate the value of this book, inasmuch as it is of very moderate dimensions and takes cognizance of the fact that the average chemical student is frequently, at this stage of his career, not equipped with the mathematical knowledge necessary for the understanding of the larger and more complete textbooks of the subject. It is clearly written, well illustrated, and is suited to the needs of students who are preparing for examinations of Intermediate Science standard.

Just Published. In Crown 8vo. Handsome Cloth. Price 6s. net.

LOCAL GOVERNMENT HANDBOOK ON

EDUCATION.

By H. OSMAN NEWLAND,

F.R.Hist. Society; Mem. Comm. Sociological Society; Lecturer in Civics and Commercial History, London County Council, &c.

CONTENTS.—Evolution of Education—Administration of Education in England—Administrative Acts—Nature Study in the Schools—The Half-Time System—Scholarships and Elementary Teachers—Secondary Schools and their Teachers—Evening Technical and Industrial Schools—The Universities—Education in Scotland, Wales, Ireland, France, Germany, Scandinavia, India, and other Countries—Eugenics—Women in the Schools—Religious and Moral Instruction.

GRIFFIN'S OPEN-AIR SERIES.

Illustrated by Drawings from Nature by S. ROSAMOND PRAEGER, and Photographs by R. WELCH.

Handsome cloth, 7s. 6d. Second Edition, Revised.

OPEN-AIR STUDIES IN BOTANY. SKETCHES OF BRITISH WILD FLOWERS IN THEIR HOMES.

By R. LLOYD PRAEGER, B.A., M.R.I.A.

"BEAUTIFULLY ILLUSTRATED. . . One of the MOST ACCURATE as well as INTERESTING books of the kind we have seen."—*Athenaeum*.

With 12 Full-page Illustrations from Photographs. Second Edition, Revised. Cloth, 8s. 6d.

OPEN-AIR STUDIES IN GEOLOGY: AN INTRODUCTION TO GEOLOGY OUT-OF-DOORS.

By GRENVILLE A. J. COLE, F.G.S., M.R.I.A.

"The FASCINATING 'OPEN-AIR STUDIES' of Prof. Cole give the subject A GLOW OF ANIMATION. . . Cannot fail to arouse keen interest in Geology."—*Geological Magazine*.

Beautifully Illustrated, with a Frontispiece in Colours, and numerous specially drawn Plates by CHARLES WHYMPER. 7s. 6d.

OPEN-AIR STUDIES IN BIRD LIFE: SKETCHES OF BRITISH BIRDS IN THEIR HAUNTS.

By CHARLES DIXON.

"Enriched with excellent illustrations. A welcome addition to all libraries."—*Westminster Review*.

London: CHARLES GRIFFIN & CO., Exeter St., Strand.

THE SOUTH OF ENGLAND SCHOLASTIC AGENCY,

51, Obelisk Road, Woolston, Southampton.

(HAYWOOD & CO.)

Schools transferred; Partnerships arranged; English and Foreign Assistants introduced; School Matrons, Chaperons, Companions, &c., registered for appointments; Holiday Tutors and Governesses; Prospectuses filed; Special Distributions of School Prospectures in the U.K. and abroad; Parents and Guardians supplied with Prospectures of English and Continental Schools; Introductions given to Continental Professors, Pastors, and Families receiving Pupils or Boarders; Vacation Letting of School Residences, Vicarages, &c. Letters of enquiry must contain reply stamp.

AGENCE SCOLAIRE DU SUD DE L'ANGLETERRE,

51, Obelisk Road,
à Woolston, Southampton (Angleterre).

Directeurs: HAYWOOD et OIE.

Cette agence recommande aux familles en Grande-Bretagne, Amérique et dans les Colonies anglaises—(a) de bonnes écoles (Françaises, Allemandes, Belges, Suisses), (b) des professeurs, des pasteurs et des familles de bonne position sociale qui reçoivent un ou deux élèves ou pensionnaires désirant se perfectionner dans la langue française ou allemande; aide des professeurs et des institutrices à obtenir des engagements; présente des associés aux directeurs; fournit aux parents voulant envoyer leurs enfants en Angleterre des renseignements nécessaires; présente aux familles des précepteurs et des gouvernantes; met en circulation, par séries de cent, les prospectus des écoles en rapport avec cette agence, etc.

Personnes désirant des renseignements doivent nous envoyer un timbre international. S'adresser comme ci-dessus.

DUSTLESS SCHOOLS

For the Anhydrous, economic and effective LAYING of DUST and DIRT not only during each Sweeping, but also throughout all the intervening periods — which is of greater hygienic importance — the Unequalled ODOURLESS, or POWERFUL GERMICIDAL

USE

FLORIGENE

(A Registered Name suggested by FLOOR-HYGIENE)

On all School, Laboratory, &c., Floors and Linoleums of every description
In Schools—**VERY EARLY** in **SUMMER VACATION** for best results.

NOT MORE THAN THREE TIMES A YEAR, as each application lays the dust and dirt for two to twelve months, according to wear. It costs little, and is easily applied. Not sticky—the dust, &c., absorb the "Florigene" from the impregnated floors and become "weighted." The ordinary daily dry sweeping alone required to clean during each term, without sprinkling of any kind.

"Florigene" is an aid to the prevention of throat and other diseases, and has been awarded the BRONZE MEDAL of the ROYAL SANITARY INSTITUTE.

Two well-known SCHOOL MEDICAL OFFICERS have jointly reported on the advantages of "Florigene"—as the result of bacteriological experiments in four departments—as follows:—

1. Economy of labour in cleaning the room.
 2. Prevention of the rising of dust once deposited; hence a healthier atmosphere for breathing.
- They also favour its more general adoption, especially in rooms where drill is carried out. "Florigene" is also strongly recommended by many other high authorities.

"Florigene" has been used for many years on the floors of The Royal Naval Colleges, H.M. Science and Art and other important Government Buildings; also in numerous Colleges, Schools, Laboratories, Libraries, Museums, Offices, &c., throughout the United Kingdom and Colonies with approval.

Send for particulars, Medical Reports and Testimonials to the Sole Manufacturers—

All Letters respecting Advertisements and Subscriptions should be addressed—
 "THE PUBLISHER, THE JOURNAL OF EDUCATION OFFICE, 3 BROADWAY, LUDGATE HILL, E.C." Money and Postal Orders, on the Post Office, Ludgate Circus, E.C., should be made payable to WILLIAM RICE: Orders and Cheques may be crossed "The London City and Midland Bank, Ludgate Branch." Postage stamps can only be received at the rate of thirteen to the shilling.

Notice must be given of all remittances through the Post Office from abroad stating full name and address of the sender; and all Foreign Money Orders must be crossed for payment through a Bank.

Date of publication of next issue will be found at top left-hand corner of front page.

LONDON: WILLIAM RICE, 3 BROADWAY, LUDGATE HILL, E.C.

AUSTRALIAN UNIVERSITIES.

IT was a common remark in Australia that, when a new township was being formed, the first building erected was a public-house, the second a smithy, the third a chapel, and the last a school. It is a pleasant commentary on this to be able to add that, as soon as ever the population of these united townships admits, it proceeds to found a University, and the latest of these is that of Western Australia. The vast area of this territory comprises nearly one-third of the whole Australian continent and is equal to one-fourth of Europe, Great Britain and Ireland included. It is, fortunately, at present on the high road to prosperity. The remarkable gold discoveries attracted settlers, and Sir Newton Moore stated a few days ago at the Western Australian dinner that he is receiving from the State no fewer than two hundred approved applications a week for passages for nominated emigrants. The majority of these are from settlers who have succeeded in establishing homes in the State and are now sending home for their friends or relations to join them. Agriculture, horticulture, and vine-growing are increasing fast, and the amount of ground taken up for pastoral purposes is growing greater year by year. In a short time, it is hoped, the transcontinental railway uniting Western Australia with the flourishing Eastern States will be finished. Fremantle is to be made the second naval base in Australia. Perth, the seat of the new University, is to be improved by the erection of many new buildings, and no expense is to be spared to render it a worthy capital of a flourishing community. It is hoped and believed that the establishment of the new University may be followed by the opening of new secondary schools, and it is to be expected that some good openings may present themselves in this flourishing State for qualified teachers from the Old Country. The new University to be established in the capital of Western Australia is to be mostly devoted to science, though the humanities will not be neglected.

There is a vast field open to scientific inquirers in the Western portion of Australia. The whole of the Northern

portion of the State has to be rendered fit for human habitation. One of the methods effecting this end is the employment of irrigation, whether by means of artesian wells or by the formation of dams. The prevention of tropical diseases will be an important question, as much of the northern part of West Australia lies under the tropics, and science must lend its aid to individual energy in the approaching struggle of the white race to render a White Australia a possibility.

The influence of a University on the community in the Overseas Dominions is very great: far greater than that of the new Universities on the towns in which they are situated. The medical schools at these Universities supply the bulk of the medical practitioners in the capital; the School of Law trains the local solicitors and barristers; the School of Engineering, the engineers; and the School of Arts, the future schoolmasters of the colony. The Universities likewise insist upon a high standard of matriculation, and this examination serves as the entrance examination for the Civil Service, by which arrangement economy is consulted and the possibility of favouritism in any form is excluded. It will thus be seen that the local Universities in colonial towns draw to themselves the sympathies of many classes of the population, and do much to promote local patriotism. It has often been suggested that learning is not much valued in the Overseas Dominions, because the literary output is comparatively restricted. This conclusion is not warranted. The fact is that the majority of the students who frequent the Universities in new countries have to work hard in their professions to gain their daily bread, for the colonies are no places for idlers of any kind. But it is also true that round the Universities have clustered many artistic and literary clubs, where intellectual studies are pursued and eagerly debated; French and German societies, musical associations, and Congresses for the discussion of medical and sanitary subjects. The time and the leisure for producing literature may come in time, but the process of settling a new country involves haste and pressure of every kind, and Pegasus is rarely out of harness.

There are now six Universities in existence on the Australian continent, including the comparatively small one in Tasmania. There are four University Colleges in New Zealand, which united form the New Zealand University. The large number of Universities and colleges will render easier the problem which has hitherto presented difficulties to the University teachers—how to find competent external examiners for degree and other examinations. In some cases it has been deemed necessary to send all the candidates' papers to England for examination—a process which is at once costly and unsatisfactory, as it excludes the possibility of *viva voce* examination, which is clearly essential in any examination for modern languages. The fact that several Universities are established in different parts of the continent is also a sufficient reason for endeavouring to make each of these institutions assume as its speciality a different branch of learning; for instance, a strong school of tropical languages might well be formed in Brisbane, where a University has recently been founded; while that of Western Australia offers good opportunities for a school of engineering. It is of good omen for the future of democracy beyond the seas that all the Universities, without exception, have been supported, morally and financially, by the Labour Parties in the different States where they are situated. It is of equally good omen to find that the clergy of the different denominations have accepted the Arts course of their local University as offering a fit training for candidates for the ministry. They provide for the theological training of the pupils by the establishment of denominational colleges of residence attached to each University. These colleges are becoming gradually enriched by the benefactions of philanthropists, and they are to be reckoned as some of the stateliest buildings in Melbourne and Sydney.

It is to be hoped that all of these Australian Universities may be represented at the coming Congress to be held in London in July, and that our older Universities may find that they have something to learn from their sisters over the sea, as well as many lessons in experience wherewith to aid their future development.

JOTTINGS.

THE Summer Festival at Stratford-upon-Avon will be held this year from August 3 to 31. Mr. F. R. Benson and his Company will appear nightly at the Shakespeare Memorial Theatre, and during the day lectures on Shakespeare's plays and the drama will be delivered by Mr. Benson and others. A school of folk song and dance will be held under the direction of Mr. Cecil Sharpe. Inquiries and applications for coupons should be addressed to Miss Rainbow, Box Office, Stratford-upon-Avon.

THE Cambridge Summer Meeting for University Extension students will be held from July 27 to August 20. The main subject of study this year will be the British Empire. The inaugural address will be delivered by Lord Selborne, and single lectures will be given by Lord Strathcona and Sir George Reid. Among other entertainments there will be a performance of "Çakuntala," under the direction of Mr. William Poel. Forms of entry and further information will be supplied by the Rev. D. H. S. Cranage, Syndicate Buildings, Cambridge.

WE may remind teachers whose names are in Column B of the old Register that applications for the return of the guinea fee must be made before the end of August. The applications should be addressed to "Secretary, Board of Education, Whitehall," and should state registered number, service with dates, and in the case of retirement the date of retirement.

THE trustees of King William's College, Isle of Man, will appoint this month a Head Master, to enter on his duties in September. The salary is £600, with a capitation fee which at present amounts to £330.

BY the retirement of Mr. Arthur Burrell, the Principalship of the Borough Road Training College, Isleworth, is vacant. The salary is £600 with a house.

SINCE our last issue the following have been nominated by their respective bodies as representatives on the Teachers' Registration Council:—University of Oxford, Dr. Strong, Dean of Christ Church; University of Bristol, Dr. J. Wertheimer; University of Leeds, Prof. Smithells; Teachers' Guild, Mr. F. Storr; National Union of Teachers, Misses Broome, Cleghorn, and Conway; Messrs. Bentliff, Croft, Jackman, and Sharples.

MR. PEASE'S announcement that he intended shortly to appoint thirteen additional women Inspectors is a payment on account of a debt to women long overdue. "At present [we are quoting the President], although the majority of the population is female, we have only 28 women Inspectors as against 370 men Inspectors."

IT is proposed to raise a memorial to the late Miss Rosa Morison (Lady Superintendent of Women Students, University College, London), and a Committee has been formed, with Lord Reay as President and Provost Gregory Foster as Chairman. Those who wish to take part in the memorial should communicate with the Hon. Secretaries, University College, Gower Street, W.C.

HIS MAJESTY has granted the use of the Royal Arms to the Royal Drawing Society, of which he is already the Patron.

OF the twenty-seven Wranglers of this year one was educated at Harrow and two at St. Paul's. No other of the great public schools can claim any.

THE next combined examination for fifty-seven entrance scholarships and a large number of exhibitions at Pembroke, Gonville and Caius, Christ's, St. John's, and Emmanuel Colleges will be held on December 3 and the following days. Forms of application for admission to the examination may be obtained from the Masters of the six colleges and must be returned on or before November 23.

MR. E. H. S. WALDE has been appointed to succeed Canon Swallow as Head Master of Chigwell School. Mr. Walde was educated at Charterhouse, was a Scholar of Hertford College, Oxford, and is at present an Assistant Master in Berkhamsted School.

THE Vacation Term for Biblical Study will be held at Oxford from July 27 to August 17. The subject chosen this year is "Christ in Israel, in the Gospel, and in the Church." The inaugural lecture will be given by the Bishop of Oxford, and single lectures have been

promised by Profs. Margoliouth and Macalister, Principal Selbie, and Canon Scott Holland. The total cost to students will not exceed £2 a week.

HERR MARIANO HERGGELET has published a pamphlet to prove that a war between Germany and England is inevitable, though it may be postponed for a year or two. With the international horoscope we are not concerned, but our German observer discourses also on the defects of the modern Englishman, and believes *inter alia* that there are not above a hundred full-blood Englishmen who can speak German or can read a German letter. We confess, to our shame, that we are bad at German, but not so bad as all that. Herr Herggelet might have found his impossible century at one of last season's German Plays.

THE Simplified Spelling Society announce an Essay Competition. Three prizes of fifteen guineas are offered for the best essay on "The Educational Advantages of Simplified Spelling"—(1) by Teachers in Schools (Men); (2) Teachers in Schools (Women); (3) Non-Teachers. The essays must not exceed five thousand words, and must reach the Secretary of the S.S.S. on or before October 1.

MR. HENRY CLAY, B.A. (University College, Oxford), and Mr. R. S. Dower, M.A. (Trinity College, Cambridge), have been appointed University Lecturers in the Department of Economics, Leeds University, with special reference to the new courses of instruction in Social Organization and Public Service.

CORRESPONDENCE.

EXPERIMENTAL DOMESTIC SCIENCE.

To the Editor of The Journal of Education.

DEAR SIR,—In December last you were good enough to publish a letter from me, in which I tried to show the dangers of attempting to use the complex physical and chemical changes met with in cooking and cleaning as the basis of training in scientific method. A book recently published by R. H. Jones, Dalton Scholar of Manchester University, and Head of the Chemical Department, Harris Institute, Preston, seems to me to justify my fears. The preface states that the book is "intended for domestic science schools and girls' schools generally," and that it is based upon the view that "science can be directly and adequately taught in the kitchen, and that a previous training in elementary science is not indispensable." I should like to draw attention to a few of the statements and to the way in which unjustifiable inferences are drawn from the experiments, and leave your readers to judge for themselves.

As examples of loose phraseology and dogmatic statement I quote the following:—"Distilled water contains nothing, and is quite soft"; "fruits contain, as a rule, 80 per cent. of water, and this is in a pure condition"; "infants and young children require very little solid in food or solid food"; "a colourless liquid collects: it is water"; "milk contains representatives of each [the essential food-stuffs], and is therefore a perfect food"; "if, in describing milk, we say it weighs 2 oz., 6 oz., or 2 lb., these three different weights convey no clear meaning." Possibly not to a student trained on the lines suggested in this book, but a very obvious meaning to the average common-sense person. In an experiment on milk the student is allowed to assume that all loss in weight on heating at 100 degs. is due to loss of water. In the same chapter we find the following paragraph:—"The specific gravity of milk is often referred to as 32, 31, 29, &c., the actual specific gravities being 1.032, 1.031, 1.029, &c., respectively. If any one of the former numbers is denoted by G, and the total solids by T, and the percentage of fat by F, we can say that $T = .25 G + 1.2 F + .14$." What will the ordinary beginner make of this? Here an empirical formula is introduced without any explanation of the reason of its existence or of the manner in which such relations are established.

What idea of the nature of scientific proof can the student gather from experiments in which one property, and that a property shared by many other substances, is used to determine the identity of a substance? In Chapter II there

are several experiments illustrating this point. In one experiment the presence of tannin in tea is demonstrated. On repeating with coffee and cocoa, one is told that "almost similar results are obtained, and so the presence of tannin in each is demonstrated." In the same chapter we find another experiment with cocoa. On heating, cocoa is found to give rise to fumes which turn red litmus blue. This, we are told, is "an alternate method of testing for protein." Is sal-volatile, then, protein? I would ask.

The following experiments are suggested in answer to the question, "How would you demonstrate to children that there is more nourishment in 1 lb. of bread than in 1 lb. of turnip?" I quote the exact wording of the experiments. "(a) Heat a little of the dry bread in an iron spoon. It blackens and gives off burning feather fumes fairly easily. Protein is present in appreciable amount. (b) Take some of the dried turnip and heat in the spoon. Plenty of fumes are evolved that smell like burning straw or paper and sugar mixed, thus indicating that protein is practically absent. The dried turnip is certainly sweet—i.e., it contains a sugar."

After this we read: "Another method of judging the value of the solid residue is to see how much of it will dissolve in water about as warm as the body. If a large proportion dissolves, an equally large amount is immediately available and useful as food." How, by this method, would one compare the food values of common salt and starch? Is it possible to deceive oneself into thinking that experiments of this kind will either produce any permanent result on the minds of the children or ever teach students to be scientific?

Those of your readers with chemical knowledge will be interested to learn that the relative amounts of malic and citric acids in different fruits may be determined by titration with sodium carbonate solution, using methyl orange as indicator!

In the preface the author states that he is not treating exhaustively of the subject of elementary physics and chemistry. One would certainly not suspect him of this. He devotes some seventy pages to this part of his subject, and of these the first nine consist largely of diagrams of wire gauze, beakers, filter stand with one ring, filter stand with two rings, and other apparatus equally exciting.

I am urged to make this protest since this book has been received with much applause in certain circles, and I see that it has been quoted apparently with approval by one of the lecturers of King's College for Women, London. Yea, verily, I echo, though apparently in a different spirit, a truly remarkable book!—Yours truly,

H. J. HARTLEY.

Homerton College, Cambridge.

PHOTOGRAPHS OF THE HOLY LAND.

ON June 14 and 15, Miss Sophie Nicholls, M.A., held an exhibition at the North London Collegiate School for Girls of a unique set of photographs taken as she travelled through the Holy Land as Frances Mary Buss Travelling Scholar for 1910-11. Miss Nicholls combines the outlook of a geographer with high technical skill as a photographer, and the result is that she has produced a set of beautifully executed and well selected pictures which have been received with enthusiasm alike by teachers of geography and of Holy Scripture. She carried her camera eastwards as far as the desert port of Damascus, and westwards as far as the seaport of Jaffa, passing through the Lebanons, Galilee, Samaria, Judaea, and down into the tropical valley of the Jordan.

A bare and rugged country like Syria is best characterized by broad, sweeping panoramas, embracing as wide an area as possible. Thus many of these pictures were taken from the hilltops, and cover angles of from 100 to 120 degs. The utmost care was taken to mark on the map the exact position and orientation of the camera, in order that for teaching purposes the pictures might be used in combination with the contoured relief map. The essential basis of geography is map-reading, and its difficulties vanish when once we can place before our pupils a series of landscapes and contoured maps side by side. Hitherto no published set of pictures has made this possible.

Among important geographical principles illustrated by these pictures the following are selected almost at random:—The influence of relief upon route ways—illustrated by the valley of the Orontes and the Plain of Esdraclon; the influence of structure upon landscape, illustrated by

the contrasting outlines of chalk, limestone, and basalt hills; types of valleys, illustrated by the Anji valley, the Jordan rift valley, and the storm-eroded gullies in the Desert of Judaea; the relations of vegetation, soil, and climate, illustrated by the typical Mediterranean *macchie*, the hillsides terraced for cultivation, the orchards and olive groves, the fertile alluvial plain of Esdraelon, and the palm trees of the hot rift valley.

All these pictures can also be used most effectively to build up a background for the Bible stories. An example is the panorama (26 in. long) "From Jerusalem to Jericho." In this is seen a solitary traveller riding upon his ass along the lonely road, which winds downhill between desolate stony hills. Far away on the horizon are the hills of Moab, rising beyond Jordan. So, too, "The Shepherd," bearing a lamb upon his shoulders; and "Joseph's Well at Dothan" will appeal to the children's imagination, as will also the picture of a group of merchants measuring out corn, and giving "good measure, pressed down and running over." A very wonderful photograph is "The Temple Area from the Mount of Olives."

Miss Nicholls also took a large number of colour photographs, some of which were shown us as lantern slides in the course of a brief lecture. A group of women and children fetching water from the well at Nazareth made a specially interesting picture, as did also a very striking view across the Dead Sea to Moab.

It is with pleasure that we learn that a set of eight large photographs is to be published, with accompanying maps and letterpress, for the use of schools and colleges, to be followed later by other pictures and lantern slides. Inquiries should be sent to Miss Nicholls, care of Messrs. Sinclair, 54 Haymarket.

JUNE REVIEWS.

The *English Review* for June is, next to the *Cornhill*, the best literary shillingsworth we know, but it differs from the *Cornhill* in being half political. Last month Labour loomed large. Of the four articles devoted to Labour, the most remarkable is a defence of Syndicalism, with an account of a successful Syndicalistic experiment in Italy. Mr. H. Newbolt continues his "New Study of English Poetry"—this time a brilliant exposition of the Personality of Art. Next in interest comes a chapter of child autobiography. Mr. W. H. Hudson gives his memories of childhood—memories from the age of five, apparently in the Argentine, and the impression produced on him by death. There is a graphic picture of the drunken tutor, who rode from ranch to ranch—a welcome guest so long as he remained sober, a period which might be months, but was more often days.

The *Oxford and Cambridge Review* has little academic about it. Now avowedly the organ of Conservatism, it leads off with an article by Mr. F. E. Smith on the future policy of his party. Dr. de la Serrière, S.J., gives a glowing account of the progress of Catholic Missions in China, which now number well over a million disciples. He is hopeful of the new Republic, which numbers among its leaders no Catholics, but many "free and easy liberal Protestants," who are, after all, to be preferred to Mandarins. The two classical articles are likewise conservative: a plea for the Homeric Catalogue as an integral part of the original poem, and a most unconvincing argument to identify the "Vergilius" of Horace iv, 12 with the poet.

UNIVERSITIES AND SCHOOLS.

LONDON.

It was reported to the Senate, on June 12, that the Finance Committee approved the acceptance of a donation of £1,400 a year for three years, offered by Mr. Ratan Tata, for the "endowment of research into the principles and methods of preventing and relieving destitution and poverty." This munificent gift from a well known Indian gentleman (Mr. Tata's house overlooks the river at Twickenham Church) is a gratifying instance of the Imperial character of the University. An offer of Sir Charles Welby to present to the University the library of the late Hon. Victoria Lady Welby, consisting of over three thousand books and pamphlets mostly of a philosophical character, was also accepted.

Very unusual action, owing in part to the undercurrents now being felt with regard to the site controversy, and in some cases perhaps more personal motives, resulted in Sir William Collins, the retiring Vice-Chancellor, not being re-elected. Dr. W. P. Herringham was

elected to the office by a majority of one. Dr. Herringham is a Physician at St. Bartholomew's Hospital and was educated at Winchester and Keble College.

The Site Question.

It is an open secret that Convocation (and many senators) were far from pleased with the action of Lord Rosebery, our Chancellor, in the matter of the secret negotiations regarding the Bloomsbury site, in which, of course, the Royal Commission was also involved. Any public expression of this feeling at the last meeting of Convocation was averted by Lord Rosebery's statement that he had no special site in his mind. It was formally announced that the Bloomsbury "cross-roads" site had been abandoned, but it is now rumoured that a movement in its favour is still going on, aided by Lord Rosebery. If this is so, Convocation will hold him to blame, as they will for his lukewarm attitude regarding the preservation of the external work of the University, as set out in the series of letters issued with the minutes of the last meeting.

The Site Committee of the Senate has been considering a number of sites and has, it is stated, rejected all under three acres in area. The Bloomsbury site is rejected also by experienced surveyors and architects on account of the prohibitive cost of the enormous wall space required by the four separate buildings, and the cost of heating, &c. There is a fine site between Whitehall and the Embankment and another on the opposite side of the river, which would allow seven or eight acres. The County Council are anxious that the new University building should be erected here, next to the new County Council Hall. The effect of the two noble buildings extending practically from Westminster Bridge to Hungerford Bridge would be very fine, and no noisy traffic would be allowed either on the Embankment or at the back of the buildings.

It is believed that the Royal Commission is only waiting for the choice of the new site to issue its report. Many graduates cannot understand why a more vigorous effort is not made to get possession of the whole of the present splendid building and site at South Kensington. Most of the other suggested sites are decidedly objectionable owing to the character of the neighbourhood or the surroundings. University College and its influential friends are very keen on the Bloomsbury site, as they would be on the spot and be in a position to dominate affairs in the University, and they are anxious probably to raise the tone of the neighbourhood for their own students.

The London County Council have decided in favour of the external student. At first sight the L.C.C. may appear to be the last authority to pronounce an opinion on this subject. But the local question at issue is whether there are students in London who cannot take a regular course at one of the colleges or institutions of the University for whom the external system supplies a real need. The answer is definitely in the affirmative. Those who have gone in fear that the external student would be smothered by the Royal Commission should begin to pick up courage. If the Commission lives up to its character as a judicial body, the external student will survive its probings. Modifications, perhaps, but not the abolition of a system which has had such a great influence in the educational development of the Empire.

The Congress of the Universities of the Empire will be opened by Lord Rosebery, on July 3. Many of the delegates have already arrived and are visiting the Scottish and Northern Universities. Judging from the agenda paper and the names of those who are contributing papers, the success of the Congress is assured before it begins. It is appropriate that it should assemble at the metropolitan University and gratifying that Oxford and Cambridge have assisted so cordially in its organization.

Military science has been approved as a new subject for the Intermediate and Final Pass Examinations in Arts and Science, both for internal and external students. This is an interesting result of the establishment of the Officers' Training Corps, which has demonstrated throughout the educational world—as the resolution adopted at the Head Masters' Conference also shows—the value of the study of military subjects. The syllabuses adopted by the University are of interest to the expert, but it may be mentioned that both theoretical and practical instruction is provided for, the latter by training in field-sketching, &c., and by the drills and other exercises of the O.T.C. Captain G. P. A. Phillips has been appointed Lecturer in Military Science.

OXFORD.

A deputation from those who signed the petition to the Chancellor for a Commission met the Chancellor on June 7, and at a meeting in Oxford on June 15 the deputation reported that the Chancellor "while considering himself a Liberal and even an advanced reformer in University politics, and while he was disappointed at the slow pro-

(Continued on page 468.)

"Wonderful!" is the verdict of the entire Teaching Profession.

Some Recent Testimonials.

A Head Master writes:—

"I have all your 'Highroads of History' in use and they are the best books I have ever had. The children love them and so do the teachers."

A Head Master writes:—

"They are by far the best books I have ever seen."

A Head Master writes:—

"Last year I ordered supplies of Book 7 and Book 8. The year's use has been one of enjoyment to both boys and teacher. They have asked that Book 9 be obtained for the new year, a sufficient testimony to their appreciation of a most enjoyable series."

A Head Master writes:—

"I have used your 'Highroads of History' for some years now. I find them a conspicuous success in every way."

A Head Master writes:—

"The volumes which we have adopted are really admirable and have been a tremendous help during the last year. I really think they are the finest books we have in the school."

THOMAS NELSON & SONS, 35 & 36 Paternoster Row, LONDON, E.C.

EDINBURGH, LEEDS, MANCHESTER, DUBLIN, PARIS, LEIPZIG, and NEW YORK.

gress made with the proposals of 1910, was not prepared to advise the signatories to proceed with their proposals for a Commission and would not himself have anything to do with it." The Chancellor explained his reasons in private to the deputation. We presume that he thinks it better to wait and see what can still be done by Reform from within. The ordinary man would now say: "Obviously not very much"; but of course it is difficult to know how much good the advisory Finance Board may do.

The Chancellor's statement will probably check the movement for a Commission in the meantime. For most of the signatories, while quite certain that a Commission has got to come, are prepared to think that it is worth while to wait for a year or two rather than press for a Commission when reform forces are divided.

Meanwhile the financial position of the University has a welcome prospect of improvement, owing to the decision of the Inland Revenue Commissioners to accept the legal position that colleges are charitable institutions, and hence not liable to Income Tax. It is supposed that in this way the richer colleges will save, some of them, over a thousand a year, and the University will no doubt get its share of this. The colleges and the University are in debt to the Committee of Bursars who have been responsible for putting the case before the authorities, and especially the Bursar of Balliol. It is to be hoped that colleges will realize that to be a charitable institution implies certain responsibilities towards the public as well as certain privileges.

Income Tax.

tions, and hence not liable to Income Tax. It is supposed that in this way the richer colleges will save, some of them, over a thousand a year, and the University will no doubt get its share of this. The colleges and the University are in debt to the Committee of Bursars who have been responsible for putting the case before the authorities, and especially the Bursar of Balliol. It is to be hoped that colleges will realize that to be a charitable institution implies certain responsibilities towards the public as well as certain privileges.

As the term is coming to an end preparations are being made by the University Tutorial Classes Committee for its summer classes. Students are coming from tutorial classes of all Universities all over the kingdom in the next two months. The school will be even larger this year than last. The program consists of lectures mainly on political and economic subjects, but especial attention is paid to arranging that each student shall write an essay on a subject selected by himself in consultation with his tutor, and should be taken individually by a tutor. To arrange work and tutors for over two hundred students takes much elaborate organization, but the results last year were worth the trouble. It is hoped that in future years it will be possible to bring students up for a month or two at a time. If that can be arranged a beginning will be made of a Summer University Course which will be really accessible to working men. The great need is financial. Money is badly wanted as the work is expanding very rapidly.

Summer Classes.

In the beginning of the term an appeal was made by the Delegacy for women students for an endowment for the Society of Oxford Home-Students. The number of women home-students in Oxford has increased very much in late years, and much good work and admirable organization has been done with very slender resources. The Delegacy wish especially to endow the Principalship, the work of which is at present carried on without any salary. It is to be hoped that this important appeal will succeed.

Oxford Home Students.

The Union Society has been in ferment over charges of extensive canvassing at the recent election for President. There is a strong rule against canvassing, but it tends to fall into disuse from time to time. A Committee of ex-Presidents reported that neither candidate had himself infringed the rules, but found eight members of the Society guilty of soliciting votes.

The Union Society.

The University has received three munificent gifts from Mr. Walter Morison. Mr. Morison originally offered Balliol College £20,000 to pull down the present ugly Butterfield Chapel and restore as far as possible the beautiful sixteenth-century chapel which was wantonly destroyed in one of the worst acts of early Victorian vandalism. The College, after some hesitation, resolved not to accept the offer. Since then Mr. Morison has given the University £10,000 to form the nucleus of a pension fund for professors—a most useful purpose—and £10,000 to endow a readership in Egyptology. In the last week of term it was announced that he has given yet a third £10,000 to the University to endow the proposed Economic Research in Agriculture. It is proposed to spend £3,000 in equipment of laboratories and to use the income of the remaining £7,000 for the necessary annual expenses.

Bodleian Librarian.—The vacancy caused in this important department was filled, as everybody hoped and expected, by the appointment of Mr. Falconer Madan. He has long been well known and universally popular, as all visitors and users of the great library would agree; and those who know him best would be unanimous in the very high estimate they would set alike on his knowledge of books and his command of the history of Oxford.

University Scholarships and Prizes, and Appointments.—Abbott Scholarship, awarded to Henry A. H. Bren, Exhibitioner of Oriel; *Proxime*—W. D. Wilkinson, Bradford School. Boden Sanskrit

Scholarship, awarded to Montagu H. B. Lethbridge, B.A., Scholar of Christ Church; highly commended, G. F. S. Collins, B.A., Exhibitioner of Christ Church. Ellerton Theological Prize Essay, awarded to M. G. Haigh, B.A., New College. Weldon Memorial Prize: this prize was offered by the Electors to Prof. Karl Pearson; the offer was not accepted, and the Electors then awarded it to David Heron, D.Sc. London. Herbert Spencer Lecturer, 1912: the Board met on May 16, and appointed Darcy Wentworth Thompson, C.B., Professor of Natural History in University College, Dundee, to be Herbert Spencer Lecturer for 1912. The Chancellor's and Newdigate Prizes: Latin Essay—George Leicester Marriott, Exeter; English Essay—David Ogg, Lincoln; Newdigate Prize—William Chase Greene, Balliol. Gaisford Prizes: Greek Verse—Thomas Farrant Higham, Trinity; *proxime* Godfrey Rolles Driver, New College; Greek Prose—Cecil John Ellingham, St. John's. Hertford Scholarship—Charles Edward Shuter Dodd, Balliol; distinguished in the examination, Cyril Bertram Moss-Blundell, New College, and Frank Whittle, Balliol. Conington Prize—Marcus Niebuhr Tor, M.A., Fellow of Oriel. Charles Oldham Prize—Maurice Roy Ridley, Balliol.

Subjects for next year.—Greek Verse (Elegiacs): Pope's "Elegy on the Death of an Unfortunate Lady." Greek Prose (Thucydidean): the subject is set in Greek, which, for convenience, I translate:—"A sedition having arisen among the *Britannoï*, the leader of the people speaks first, and is answered by the commander-in-chief."

CAMBRIDGE.

I mentioned in my last letter the Memorial to the Prime Minister requesting the appointment of a University Commission with power to make Statutes. Two petitions besides this have been circulated during the term, both suggesting to the Prime Minister that he need not trouble.

As to a Commission.

The first of these two is the manifesto of those who may conveniently be called Conservatives—using the term in its University sense. They point out to the Prime Minister that the only proposals of reform actually put to the Senate of late were one in 1910 for a House of Residents (with the limitation of the powers of non-resident members of the Senate), and another in 1911 for changes in the degree fees and capitation tax—and no others; no proposals as to the relations between the University and the colleges, and none as to fellowships and exhibitions. (The last, of course, could not come before the Senate at all.) They conclude with a quotation from a speech of the Marquis of Crewe, made in 1907 in the debate in the Lords, and append their names, asking that a Commission be not appointed. The list contains approximately two hundred names—many of course what one might lightly call professional Non-Placets, but also many names of weight and significance—and all, I gather, residents.

Meanwhile, a third Memorial appeared—perhaps the most interesting of the three—urging that the request for a Commission is "far from representing the feeling of the University. Not only is it against the preponderance of Conservative opinion, but its proposals seem inadvisable to many who are in active sympathy with the development and progressive reform of the colleges and University. . . . A Statutory Commission would be desirable if it were clear that the University was financially hampered by vested interests, if its revenues were squandered or wastefully applied. This is at present by no means the case." And they point to the general efficiency of the education obtainable here by men of fair ability, and urge that competition proceeding on perfectly natural lines keeps all the colleges aiming at being efficient. The original petition "represents but a section of the Liberal opinion of the place. Many Liberals are convinced that there is no call at the present time for Parliamentary intervention." Some sixty signatures follow, and represent, one might say, in actual distinction achieved in original work, in scholarship, in science and administration, as strong a body of men as either of the two preceding lists could show in the same compass. I may remind your readers that the original Memorial for a Commission contained, when I wrote, about seventy names of residents. Of course it is impossible to be precise in a statement of the comparative weight of two or three lists of names, but I give an impression.

The Master of St. Catharine has issued a flysheet on the D.D. question, and the Master of Pembroke has replied to it. Were, or were not, the Council justified in proceeding as they did—in "welcoming" the proposal of the Divinity Professors to open the degrees—and will that terrible Buddhist be a Divinity Professor himself in the not inconceivable future? I don't think he will, and I doubt if any-

FROM GINN & COMPANY'S LIST

AN ILLUSTRATED SCHOOL GEOGRAPHY

By A. J. HERBERTSON and A. E. FRYE.

An adaptation by Professor Herbertson of Frye's "Complete Geography" for use in English Schools. The book contains nearly 700 Illustrations and Diagrams, about 50 Outline and Relief Maps, and 16 pages of fully coloured Maps. Large 4to in size, 263 pages. Price 5s.

PHYSICAL GEOGRAPHY

By W. M. DAVIS. A scholarly, practical text-book, emphasizing man's physical environment as determinant of man's social and political modes of life. 428 pages. With Illustrations and Maps. Price 5s. 6d.

ELEMENTARY PHYSICAL GEOGRAPHY

By W. M. DAVIS. Based on the author's "Physical Geography," with the addition of practical exercises and more space devoted to the atmosphere. 401 pages. Illustrated. Price 5s. 6d.

PRACTICAL EXERCISES IN PHYSICAL GEOGRAPHY WITH ATLAS.

By W. M. DAVIS. **TEXT**.—148 pages. Price 2s. **ATLAS**.—50 pages. Price 1s. 6d.

The object of this manual is to provide a series of systematic and disciplinary Exercises in Physical Geography, in order that the student may approach this subject through practical work in the laboratory as well as through lessons in a text.

Books suitable for the University Local Examinations, 1913.

RECOMMENDED FOR STUDY.

General History

By P. V. N. MYERS. 794 pages. Price 7s. 6d.

A complete outline in one volume of the world's history from that of the Eastern Nations to the present time. Accepted and recommended as the best brief course in general history. Half-morocco. Contains 30 maps and over 160 illustrations.

Part I.—**A Short History of Ancient Times.** 388 pages. Price 4s. 6d.

Part II.—**A Short History of Medieval and Modern Times.** 488 pages. Price 4s. 6d.

An Introduction to the History of Western Europe

By J. H. ROBINSON. 714 pages, with maps and illustrations. Price 7s. 6d.

Gives a clear and interesting account of the all-important movements, customs, institutions, and achievements of Western Europe since the German barbarians conquered the Roman Empire.

Two Volume Edition, dividing at the Sixteenth Century.

Vol. I.—368 pages. Price 4s. 6d.

Vol. II.—364 pages. Price 4s. 6d.

The Development of Modern Europe

During the Last Two Hundred Years. An Introduction to Current History. By J. H. ROBINSON and C. A. BEARD.

These volumes will meet the demand for a history of recent times which shall explain the social and economic as well as the political development of our own age.

Vol. I.—**The Eighteenth Century, The French Revolution, and the Napoleonic Period.** 374 pages. Price 6s. 6d.

Vol. II.—**Europe since the Congress of Vienna.** 433 pages. Price 6s. 6d.

English Literature

Its History and Significance for the Life of the English-speaking World. By WILLIAM J. LONG. 582 pages. Fully illustrated. Price 5s. net.

A direct, simple, and interesting account of the great English writers, their works, and the literary periods in which they are included. The quotations, outlines, summaries, historical introductions, complete indexes, and a good working bibliography will be found of inestimable value to students.

The Classic Myths in English Literature and in Art

By C. M. GAYLEY. New Edition, Revised and Enlarged. 597 pages. Price 6s. 6d.

A scholarly and attractive manual of mythology, with a fresh section on the history of myth. Contains over 200 illustrations.

COMPLETE CATALOGUE POST FREE ON APPLICATION.

BOOKS SENT ON APPROVAL TO TEACHERS.

GINN & COMPANY, ST. MARTIN'S STREET, LONDON, W.C.

body really thinks so. However, the matter is postponed to next term.

The Classical Tripos. I was not quite right in predicting that the new scheme containing a substitute for verse composition would be discussed next term, for it was proposed by the Council of the Senate that the vote upon it should

be taken during the May Race Week. A request, signed by a number of classical teachers, was sent to the Council, that an opportunity for discussion should be afforded, and it will be given early in October.

I think it might be of interest if you, Sir, would allow any of your readers who have experience of the good or evil effects of verse composition, or have any views about the alternative offered—viz. grammar, philology, and ancient systems of scansion and verse-construction—to express them in your columns. For my own part I realize that verse counts enormously but unevenly—all to the good with some men, and with others mostly to the bad—it trains taste and vivifies it—it wastes time and it makes an intimate scholarship possible to a degree of happiness not generally understood. I cannot help feeling that the making of it optional must affect classical teaching in every grammar school and high school of the country, nor can I help fearing that the new plan may not advance classical learning. The continual drafting of our better men into the Civil Service means the depletion of the ranks of the best classical teachers, and I think it possible that the proposed change may add to the factors that militate against sound scholarship of the old close, accurate, and intimate type. It is not for me to invite people to fill your columns, but I should be interested, and I think others might be, if you would tolerate it.

The Vice-Chancellor gives notice that, having regard to the drawbacks involved in holding Congregations on days which, so far as the town is concerned, are now statutory half-holidays—he has, after consultation

A Revolution.

with the Council of the Senate, decided to fix the ordinary Congregations for the ensuing academical year on Fridays and Saturdays, instead of Thursdays and occasional Saturdays as heretofore.

So the Czar, after consultation with Stolypin—it may be—can change immemorial usage. It is not very long since a movement was made in the town to shift the market to Friday and have the half-holiday on Saturday, thus to allow country week-ends to people from the villages who serve in shops in the town. I do not know why it fell through. It is a way we have in the 'Varsity. The Great Eastern Railway Company's proposal to have a proper railway station instead of the quarter-mile single platform and the terrible X that every Great Eastern train has to cross in going North or South, met with opposition from the town—nobody can conceive why. However, Thursday degrees have gone—another link with old days severed, though perhaps a slight one.

My prophecy for the May Week weather received the wettest kind of fulfilment. Prof. Gilbert Murray gave a brilliant Rede Lecture; the Jesus College boat recovered its place at the head of the river; there

&c.

were plenty of concerts, lots of balls; and the frocks our cousins brought with them went beyond our wildest records or expectations. However, they are gone, and the weather has largely recovered. Degrees are yet to be taken by the Tripos people. And now your correspondent hopes that for some time to come his duties to your readers and to the University are in abeyance.

WALES.

The report of the Welsh Department of the Board of Education on the Intermediate Schools of Wales is not really so critical in tone as some of its predecessors. On the contrary, it may be regarded in the main as almost eulogistic. It speaks of the "invigorating influence of the intermediate system on the life of the country," and it testifies that "progress has been made in the majority of the schools," that "some of them are entering on a new life," and that "the response of teachers to better and newer methods has been ready and almost universal." The report also speaks highly of the teaching of history and geography, and of the modern tendency to regard English as a living language and less as a matter of formal grammar. The criticisms in the report are chiefly directed towards the position of the Welsh language in some of our schools, and to the examinations of the Central Welsh Board. Referring to Welsh, the Chief Inspector makes some scathing comments. The teaching is often insufficient and the language is sometimes given an inferior place in the curriculum of the school, while the time given to it is short as compared with that given to French. In a system which professes to be national in character, it is very regrettable, in the

opinion of the Board, that it should be necessary to emphasize these defects and shortcomings in the teaching of our national language. The report, however, fails to give the other side of the picture, as in fairness it ought to have done. Let us compare all this with the verdict of the Chief Examiner in Welsh of the Central Welsh Board: "The result of the examination in Welsh was very encouraging in all stages, and the progress made during the last three years reflects great credit on the *teaching and organization* of the schools." If, therefore, there is any substance in the criticisms of the Department, it can only apply to a small minority of our schools, and it fails to do justice to the system as a whole.

In its references to the examinations of the Central Welsh Board, the Board of Education is inclined to be critical. It suggests, for instance, that the Junior Examination should be abandoned in order that a more educative and reliable examination may be substituted, and it courageously states that, at this stage, every school should be allowed to examine itself, subject to a rather shadowy system of control by examiners from the Central Welsh Board. A somewhat similar proposition was made by Mr. Owen Owen, but it will probably be some time before the public is ripe for the change—however sound it may be educationally. The Department has also a great deal to say about the entrance fees for the examinations. Reading between the lines, one may surmise that the policy of the Welsh Department with regard to examinations generally is to reduce them to a minimum and to substitute for them a rather elaborate system of Inspection. But whether the efficiency of the schools will be increased or not by the change is very doubtful. The great majority of the head masters are strongly opposed to it, and they firmly believe that the present satisfactory condition of Welsh secondary education is directly traceable to the stimulating influence of the examination system of the Central Welsh Board.

His Majesty the King laid the foundation-stone of the Welsh National Museum at Cardiff, on June 26. A very fine site in Cathays Park has been chosen, and the new Museum will stand close to the new buildings of the University College. It was not without a severe struggle that Wales succeeded in obtaining a Government contribution towards the cost of establishing and maintaining the Museum and the recently opened National Library at Aberystwyth. Several of the Welsh M.P.'s exerted themselves strenuously to get Government support, but it was not until 1905 that the Lord President of the Council issued a minute authorizing an annual contribution of £3,000 and a sum of about £30,000 towards the building of the premises. It is, however, estimated that the total cost will be about £250,000. The Director is Dr. W. Evans Hoyle, from the Manchester Museum.

The National Museum.

Prof. Bryner Jones, M.Sc., of the University College of Wales, Aberystwyth, has been appointed Commissioner for Agriculture for Wales. This appointment is universally approved as he has taken a prominent part in the development of agriculture in Wales. The President of the Board of Agriculture has also undertaken to establish a Department of Agriculture for the Principality—a step which is very generally welcomed. The Welsh farmer in the past has been most unscientific in his methods and, as a rule, quite impervious to new developments. It is true that during recent years there has been some improvement, owing to the influence of the University colleges; but so much remains to be done yet that the new Commissioner and the Department will be fully occupied for a long time.

Welsh Agricultural Department.

Mr. Pease is evidently determined to secure equal terms for teachers in non-provided schools in all the Welsh counties. The Glamorgan Education Committee is still pursuing a policy of differentiation, and evidently means to adhere to it. Notwithstanding the judgment in the Swansea Case, the President of the Board of Education has appointed Mr. Robert Younger, K.C., to hold inquiries in each locality in the county; and as the cost has to be borne by the locality itself, the bill for the whole county is likely to be a heavy one. Such is the penalty of stubbornness.

In an interesting address before the Denbighshire Association of Teachers, Mr. J. C. Davies, M.A., the Director of Education, said that they had to guard against two special dangers in Wales—(1) the intervention of mere business men in the work of administration of education—"practical" men without any experience or conception of its difficulty; and (2) the interference of mere theorists who had read a lot about education, but who had never had an opportunity of testing their theories by actual experience. Wales was also, in his opinion, very backward in the amount of attention that was paid to the culture of the body, and the results of medical inspection proved that, if their national health is to be improved, a far more serious view must be taken of it.

MACMILLAN & CO., Ltd., ST. MARTIN'S STREET, LONDON, W.C.

SCOTLAND.

Dundee University College. The question of the relation of University College, Dublin, to St. Andrews University, has again been raised. About twenty years ago this question led to a prolonged conflict, in course of which there was considerable litigation and much violent controversy between opposed parties. Ultimately, University College was, under the Universities Act of 1889, "affiliated to, and made part of," the University of St. Andrews. Its professors became members of the St. Andrews Senate, and its lecturers are appointed by the University Court. It has also derived considerable financial advantages from its connexion with the University. The College, however, still retains a Council of its own, and some of its work, mainly in the form of technical courses, is not under the control of the University. It is understood that the University Court has now asked for entire control of the funds of the College, and this demand is resisted by the Council. The College desires to extend its teaching in the Faculty of Arts, and if it retains the fees paid for any new courses which it may institute, it will come into direct and serious financial competition with the University, which draws many of its students from Dundee. The question turns mainly on the interpretation of the curious words quoted from the Universities Act. Do they mean that the College is merely affiliated to the University, or that it is incorporated in it? The College maintains the first alternative, the University holds to the second. The actual position of the College at the present moment seems to be that it is partly affiliated and partly incorporated. It seems unwise of the College to raise the question, for if the College is merely affiliated its professors must be withdrawn from the Senate and its share in the Government grants and other finances of the University must cease. A conference between the University Court and the Council of the College has been arranged, and it is to be hoped that this may result in some settlement by agreement. If the question is once more to be thrashed out by way of litigation and possibly of legislation, grave injury will be done both to the University and the College. At a recent meeting of the St. Andrews University Court, Principal Sir James Donaldson announced that a gentleman, who desires that his name should not meantime be disclosed, had intimated his intention to assign a sum of £15,000 to the University at the death of the survivor of his wife and himself, for the purpose of founding a Chair of Political Philosophy in the University. The Court has appointed Mr. A. J. B. Wace, M.A. (Cantab.), to the Lectureship in Ancient History and Archæology, and Mr. Walter N. Haworth, D.Sc. (Manchester), to be a lecturer in Chemistry at the United College, St. Andrews.

Glasgow. The Senate of Glasgow University has drafted new regulations for the bursary examinations. The regulations provide that each candidate may select four subjects from a list including English, history, five other languages, and five scientific subjects, under the condition that one subject at least must be a language other than English, and one subject at least must be a scientific subject. The regulations will probably be approved by the University Court and they will come into effect in 1913. June 25 is being observed as Commemoration Day at Glasgow University. Prof. Bower gives the commemoration address on Sir Joseph Hooker, and the honorary degrees already announced will be conferred. A number of the Colonial delegates to the Congress of Universities of the Empire will be present, and the honorary degree of LL.D. has been offered to the following:—Mirza Abbas Ali Baig, Member of the Council of India, representing Bombay University; President Falconer, C.M.G., University of Toronto; Sir John McCall, M.D., Agent-General for Tasmania; and Prof. W. H. Warren, University of Sydney. The installation of Mr. Birrell as Lord Rector of Glasgow University has been fixed to take place on Wednesday, December 4. In connexion with the centenary of the birth of David Livingstone, who was an honorary graduate of Glasgow University, Prof. Gregory is to deliver an address at the University on March 18, 1913. Mr. J. Pierpont Morgan has given to the University the valuable catalogues of his early printed books and MSS., paintings, miniatures, and jewels.

Aberdeen. Mr. Andrew Carnegie delivered his inaugural address as Lord Rector of Aberdeen University on June 6. He spoke of success in life and indicated many of his well known political and ethical opinions, discouraging against militarism, smoking, hereditary rank, plural voting, primogeniture, and in favour of religious equality and old-age pensions. There was considerable disorder in the student audience; but Mr. Carnegie's choice of subjects was not at all likely to maintain or produce peace. Mr. James Hendrick, B.Sc., has been appointed to the Strathcona Fordyce Chair of Agriculture at Aberdeen University.

Edinburgh University has offered the honorary degree of LL.D.

Edinburgh.

to two of the delegates to the Congress of Universities of the Empire, Mr. H. B. Allen, M.D., Professor of Anatomy at the University of Melbourne, and Mr. R. Ramsay Wright, B.Sc., Professor of Biology at the University of Toronto. Prof. Ramsay Wright is a graduate of Edinburgh University. The University Court has appointed Dr. Harry Rainy to the recently instituted Lectureship in Physical Methods in Therapeutics. Mr. T. F. Harley has been appointed Registrar of the General Council of Edinburgh University, in succession to Mr. John Stirton. The Senate and Court of Edinburgh University are promoting a memorial to the late Lord Lister.

Training Students. The Provincial Committees have revised their regulations regarding the amount of maintenance allowances to be paid to various classes of students in training. The chief effect of the changes made will be a reduction in the allowances to ordinary students living with their parents or relatives and an increased provision for students who take the new four years' course of concurrent professional training and University study. A considerable number of graduates from English Universities are seeking appointments as teachers of higher subjects in Scottish schools, and the Glasgow Provincial Committee has framed rules for dealing with these applications. The chief difficulty is that the English B.Sc. degree (except in London University) is an ordinary degree, analogous to the B.A., while the Scottish B.Sc. is an honours degree, some of the examination papers being identical with those of the M.A. degree with honours. In future English applicants will be required to have the B.Sc. degree with honours, except in the case of graduates of London. The number of students in training at Glasgow during the present session is as follows:—for the general certificate, 1,060; for the higher subjects certificate, 22; for the special subjects certificate, 243; and for further instruction, 3,192—total, 4,517.

The Scotch Department.

The annual report of the Education Department indicates continued progress in the readjustment of educational administration following on the Education Act of 1908. Schemes of medical inspection are in operation in all the large urban districts and in twenty-nine out of thirty-two county districts. There has been a considerable improvement in the provision of supplementary courses, and it is hoped that in a short time the schools of Scotland will be staffed entirely by fully trained teachers. Of the 20,000 teachers of all grades employed in 1911 in schools under the code, nearly 19,000 were certificated teachers and of these over 13,000 were trained certificated teachers, the remainder having passed the certificate examination.

At the annual meeting of the Scottish School Boards Association, the President, the Rev. Dr. John Smith, criticized the junior student system on the ground that it tended to the separation of junior students from other pupils in the schools by requiring of them a large number of subjects which were not included in the course of other pupils preparing for the Leaving Certificate. He contended that if a secondary course of any approved type was a satisfactory preparation for the later specialized study required for the Church, for medicine, or for law, a broad higher education taken along with future aspirants to other professions would be the best school preparation also for the teacher.

IRELAND.

Dublin University. The Board of Trinity College met on Monday, June 3, for the annual election to Fellowship and Scholarships. The Fellowship was awarded to the Rev. Arthur Alston Luce, B.D., formerly a pupil of

Eastbourne College, who scored 701½ marks in a course of Classics, Logics and Ethics, and Hebrew. The Madden Prize fell to Mr. Joseph Johnston, B.A., who scored 576 marks in Classics and Logics and Ethics. Twenty scholarships (four non-foundation ones) were awarded, six in mathematics, nine in classics, two in experimental science, and three in modern languages. Of twelve women candidates, four were successful—one in mathematics (second place), one in classics (third place), and two in modern languages (first and third places). Immediately after the announcement of the elections, the new Fellow was chaired by the undergraduates and carried in triumph down Grafton Street to the "Stickyback" photographic establishment; unfortunately on this occasion the hilarity of the students went beyond its usual bounds and resulted in a fracas with the police and the arrest of several.

The Professorship of Pastoral Theology, left vacant by the death of the Bishop of Killaloe, has been given to the Rev. J. A. Jennings, M.A., Incumbent of Harold's Cross Church and Wallace Lecturer in Divinity in the College, the election being made by the Bishops of the Church of Ireland.

The College is at present preparing for the celebration of the Bicentenary Festival of the Medical School, on July 4, 5, and 6. The Universities and Scientific and Medical Associations of the civilized world will be represented by delegates and guests, to the number of about two hundred, and a very large number of past graduates is expected to attend. The publication of a comprehensive "History of the Medical Teaching in Trinity College and of the School of Physic in Ireland," by Dr. T. P. Kirkpatrick, is a fitting forerunner to the celebration.

Irish education, and the possible effects which pending legislation may have upon it, have come in for a good share of discussion, in Press and on platform, during the past month. The General Assembly of the Presbyterian Church, in its annual meeting in Belfast, devoted a session to secondary and elementary education and adopted a report drawn up by a special committee and recommending the formation of a Register for secondary teachers, in which experience, University status, and, if possible, training, should be necessary qualifications; the institution of a minimum salary for registered teachers; and also of a pension scheme.

The Irish Technical Instruction Association, which held its eleventh annual congress in Cork, on June 4 to 6, listened to two important addresses on the state of Irish Education, from Sir Bertram Windle, President of University College, Cork (who was Chairman of the Congress), and Dr. Starkie, Resident Commissioner of National Education, both of which were fully reported in the Press. Sir Bertram Windle's inaugural address was largely an attack on the examination system, which dominated the education of the country in all its grades. The defunct Royal University had generated a widespread belief that the obtaining of a degree of any kind was an end in itself, the way in which that degree was obtained, and the education which it connoted being negligible matters. Out of the whirlpool in which the Royal University went down, happy Belfast had snatched (quite accidentally, one might say) a self-contained, independent University; the rest of the country had to put up with what was avowedly a makeshift, especially in the case of Cork, which had always wanted an independent University. The examination system reached its climax in the awarding of Fellowships in Trinity College, the highest educational prizes in the country. Then there was the Intermediate Board which was

prevented by Act from any other way of disposing of its funds than by examination, despite the fact that it recognized that way to be injurious to the interests of Irish youth.

Dr. Starkie, on the second day of the Congress, read an interesting and characteristically pessimistic paper on "Continuation Schools." Having described the higher-grade schools in Scotland, which he had himself inspected, and pointed out the crying need for a similar link between primary and secondary or technical education in this country, he went on to say that while England and Scotland had foraged Europe and America for fruitful ideas, which were carried out by Exchequer grants and rates, Ireland, "the Cinderella of the European family," must sit contented in her rags, happy now and then to have a few morsels thrown to her from the table of her richer sisters. While disclaiming any pronouncement of opinion on the Home Rule Bill Dr. Starkie felt it his duty to point out the risks to Irish education involved in the proposal that it, in common with all other transferred services, should be represented in the bulk sum handed over to the Irish Parliament by the grants allocated to it at the time of the passing of the Act. That these were insufficient Dr. Starkie went on to show, basing his statements on the admissions made in the official Conservative handbook "Against Home Rule," and dealing in brief detail with the requirements of secondary and primary education—in the former, a system of scholarships linking the primary with the secondary school, and the improvement of the position of teachers (reforms which the Chief Secretary had led them to hope might be introduced); in the latter, building grants, bonuses for teachers in the larger schools, readjustment of numbers in the higher grades, monthly payment of salaries, provision for practical instruction and medical inspection, and continuation schools. Whatever might be said for the wastefulness of Irish administration in other departments under the present regime, Irish educational administration, said Dr. Starkie, was penurious and further retrenchment was impossible. When Old Age Pensions—"an entirely unproductive service," which absorbed one-fourth of the revenue of the country, were abolished or reduced, it would be time enough to talk about economics in the education grant.

Mr. T. P. Gill, Secretary of the Department of Agriculture and Technical Instruction, who read a paper on "Preparation for Agricultural and Industrial Callings," took a more hopeful view of

AN EXPERIMENT IN HISTORY TEACHING.

By EDWARD ROCKLIFF, S.J.

"The vigorous and graphic methods here depicted will interest all masters, because they have been subjected to actual experiment for many years with a high measure of success. They essentially consist in visualizing, by means of picture-writing, the march of events, so that knowledge may enter by the eye as well as by the ear, and may be recalled in the same way. Several specimen charts are given as illustrations, and indicate how the history lecture, instead of being a dull and sleepy hour, may be made to palpitate with excitement."—*The Month*

"The coloured charts illustrative of the method are quite captivating and deserve the critical attention of every teacher of history."—*A.M.A.*

affairs and put in a defence of the Treasury, which, it seems, the Department has not found so obdurate as the National Board.

The want of a more practical character in Irish education generally and the tendencies fostered by the Intermediate and the examination-University system to turn out intellectual *déclassés*, unfit for any useful calling, was dealt with by most of the speakers at the Congress. In this connexion Dr. Starkie gave an interesting account of the attempts made by the National Board to introduce garden-plots in some of the schools, and the complete success which had attended these efforts in some schools in Co. Limerick.

The subject of the financial prospects of Irish education under the Home Rule Act has engaged a good deal of attention elsewhere and called forth letters in the daily press, amongst them one from Prof. Culverwell, of Trinity College, pointing out that all parties, Unionist and Nationalist alike, were consenting parties to the diversion of the equivalent grant of £185,000 per annum from its original educational purpose to that of financing land purchase. There are not a few Home Rulers, perhaps, who will agree with Dr. Starkie's estimate of the relative claims upon the nation's finances of pensions for the aged and the education of the young; who regret that Home Rule was not established before the introduction of National Insurance and similar legislation, more adapted to the needs of a country with a vast population engaged in industrial and commercial pursuits than to those of a thinly populated agricultural one; and who believe that Ireland with a measure of fiscal autonomy would, even if poorer in the main, be able to work out her own salvation and devote her resources to her most pressing wants, amongst them the education of her youth.

"Irish Ireland" is looking forward to the celebration of the annual Oireachtas on a larger scale than hitherto in Dublin, during the first week of July. Immediately after, the summer colleges and schools

will begin their work—most of them having two sessions, each covering a month. This year several new schools have been started in Irish-speaking centres, among others at Carrigaholt in Co. Clare, Achill Island, Omeath in Co. Down, and Caherdaniel in Kerry. A permanent Conference of the summer schools has been appointed, with a delegate from each, which is to meet at regular intervals in Dublin to discuss the work of the schools and to secure uniformity of standard.

Meantime, while the Irish tongue is struggling to hold its own against so many powerful rivals, ancient and modern, we are threatened with the introduction of a new language into our educational system. The fifth British Esperanto Congress was held in Portrush during the closing days of May, under the presidency of Lieut.-Colonel Pollen, LL.D. (a graduate of Trinity College), and seems to have been a success in all its proceedings, business and social. Dr. Traill, Provost of Trinity, who is an enthusiastic Esperantist and has already suggested Esperanto as a subject for Irish National School Teachers, consented to act as patron to the Congress. It appears that Esperanto is now one of the subjects for the entrance examination of the Royal College of Surgeons in Ireland—who knows but it may yet find its way to the National School?

SCHOOLS.

BRISTOL, COLSTON'S GIRLS' SCHOOL.—The large extension of the school buildings, which has recently been completed, will be opened on Saturday, July 6, by the Countess of Suffolk and the Lord Bishop of Bristol. The new buildings provide for a new preparatory department, a geography room, additional classrooms and cloak-rooms, and a well equipped cookery room. The special feature of the extension is the library, providing accommodation for some sixteen thousand books, and occupying with a reading room the whole of the top floor of the new wing. The School has recently come into possession of a very fine library, the bequest of the late C. J. Ryland, Esq., who, in addition, left a sum of money to complete such series of books as were in course of publication at his death. The bequest of such a library is almost unique in the history of girls' schools.

DULWICH COLLEGE.—Founder's Day was celebrated on June 24. The Head Master, Mr. Gilkes, read out a long list of honours gained during the year. It must not, he said, be concluded, because there were no French or German speeches or announcement of modern language prizes, that modern languages were neglected at Dulwich. No school in England had a better modern side.

HAILEYBURY.—Princess Henry of Battenberg has consented to lay the foundation stone of the new Great School, to be erected as a Jubilee memorial. Towards the estimated cost of £13,500 subscriptions to the amount of £12,000 have already been received.

HARROW.—The 15th of June was a red-letter day for Harrow,

PRESS OPINIONS.

"A gallant and successful effort to solve a difficult problem and to introduce a real and great improvement into the teaching of history."—*The Times*.

"This admirable little book . . . an excellent piece of work."—*The Athenæum*.

"We believe we have here the best school textbook on history that has yet appeared. Its adoption in the upper classes of our primary schools and in our higher grade departments would lead to greater interest in historical teaching, and would give pupils a training in historical method; both being ends for which many have striven, but so far without much success. Such a book as this would be a permanent possession to our pupils."—*Scottish Class Teacher*.

"Should revolutionize the teaching of history in schools."—*Aberdeen Free Press*.

"This history is . . . written on entirely new lines, and we strongly advise teachers to adopt it."—*Secondary Education*.

as glorious as any Fourth of June at Eton, and not marred, as Eton's Festival was this year, by rain. It was a happy accident that the opening speech by the head of the School was delivered by "the last of the Butlers," the son and grandson of a Head Master, one of Sir F. Galton's notable instances of hereditary genius. The principal speeches in the morning were from "The School for Scandal," "The Frogs," and "Champignol Malgré Lui." At the Head Master's luncheon the chief orators were the Archbishop of Canterbury, Lord George Hamilton (Chairman of the Governors), and Mr. Walter Long, all Old Harrovians. The King and Queen arrived at 4 o'clock and were received by a Guard of Honour of the Harrow Officers' Training Corps. Butler major read the School's address of welcome, which was handed to the King by the Head Master. His Majesty, in reply, recalled the happy visits paid by his father and mother to the School, recognized the great part that the School had played in national life (naming Byron, Palmerston, Peel, and Dalhousie), and, with a telling allusion to Bowen's famous song, expressed his confidence that Harrow boys were still preparing themselves "to do good and strenuous service to your King and country, be it twenty or thirty or forty years on." Then followed, with Dr. Percy Bach for conductor, the repertoire of songs that every Harrovian knows by heart, ending with "Auld Lang Syne." The King, who had shown his warm appreciation of the singing, rose, and again expressing his thanks for the hearty welcome accorded to him and the Queen, requested Lord George Hamilton, as Chairman of the Governors, to grant an extra week's holiday. Their Majesties, after taking tea with Mr. and Mrs. Ford in the Head Master's garden, returned to Windsor by motor-car.

LEINSTER HOUSE SCHOOL.—Lucy Frances Nettlefold (L.H.S. 1906-1909) has been placed in the First Class in the First Part of the Law Tripos at the University of Cambridge between the first and second men. She passed into Newnham from Leinster House with a Cambridge Higher Local Honours Certificate. It is perhaps worth notice that the six Leinster House girls who have taken Cambridge or London Final Examinations since 1905, have among them secured eight first classes and an M.A. London degree.

MALVERN.—Speech Day was June 20. The prizes were given away by Prince Ranjitsinhji. The Prince, replying to a vote of thanks, gratefully acknowledged the debt he owed to his English training. The public schools and Universities were the makers of English character, and he had sent four of his nephews to the

schools. Canon James said that any falling off in numbers was due, not to fewer entries, but to boys leaving at an earlier age. The class from which they drew their pupils were frightened at the financial schemes associated with the name of Mr. Lloyd George, and knew not what hen-roost might next be robbed.

PERSE SCHOOL, CAMBRIDGE.—Dr. Rouse has taken a leaf from Egeria's "Dramatic Teaching," and on June 18 there were performed two English plays, written, staged, and acted by Perse boys. The first, "Roundheads and Cavaliers," was the work of the Sixth Form. The second and more remarkable performance was a comedy in blank verse on the theft of Thor's hammer, written by a lower form, average age under thirteen. Dr. Rouse is shortly starting on a missionary tour in America.

ROSSALL.—June 25 was Speech Day. Sir Alfred Hopkinson, who distributed the prizes, said he knew enough of Rossall to sympathize with its ethics. It was often objected to public schools that they were out of touch with modern Universities. That was not his opinion. As at Manchester, so at Rossall, they endeavoured to cherish and extend the best Oxford traditions. The first was rowing, and there was no better physical training; next, an introduction to politics; and, thirdly, they learned a profound reverence for Aristotle's philosophy and for his ideal of education—to call out every side of our nature into its fullest activity and in due proportion. The Head Master read out a long list of honours at the Universities. He announced that the Council had decided to build an open-air swimming bath at a cost of £2,000, seven times the area of the present bath. £700 had already been promised towards the cost. The Officers' Training Corps had been particularly successful and the School had not lost a football or cricket match during the last three years.

SHREWSBURY.—Speech Day was Saturday, June 22. The Head Master, in distributing the prizes, referred to a regrettable misunderstanding between the School and the town. Shrewsbury was a poor school, the net income being approximately £1,000. The townsmen got a very good return for the money. Ever since the School was moved, thirty years ago, the Governors had been educating the sons of Salopians for fees considerably below cost price. Mr. Alfred Lyttelton, referring to recent labour troubles, urged that the gulf between wealth and poverty could only be bridged if those who enjoyed means and leisure would devote themselves to

(Continued on page 480.)

Education by Life

Written by various Education experts and Edited by H. BROWN SMITH, Lecturer in Education, Goldsmiths' College, University of London.

The intention of this book is to gather together some of the most important principles concerning early education that have stood the test of time and experience, and to apply them to modern conditions and in the light of modern knowledge, but with the intention of giving a point of view rather than of formulating definite method.

Just published. Crown 8vo, 212 pages. Cloth, **3s. 6d.** net.

Prospectus on application.

New School Atlas of Modern History

A Series of over 121 Maps and Diagrams. By RAMSAY MUIR, M.A., Professor of Modern History in the University of Liverpool.

Emphasis is throughout placed on the *physical basis* of historical geography, and careful attention is given to Colonial Development, Industrial Growth, &c. There is no existing publication in English equal to this, having regard to the character of its contents, their extent and arrangement, as well as to the quality and price of the work.

Demy 4to (11 by 9 inches), strongly bound in cloth, **3s.** net.

A detailed Prospectus and Specimen Map will be sent post free on application.

We have a number of new geography books well worth your consideration for next Term. You will doubtless be receiving particulars of them shortly, but, in case you do not, we shall be happy to send them on application.

TRANSFER AND PARTNERSHIP DEPARTMENT.

MESSRS. GABBITAS, THRING, & CO., having upon their books at all times a large number of thoroughly *bona fide* Boys' and Girls' Schools for Transfer and Partnerships in such Schools to negotiate, as well as the names of a very large number of Purchasers, both ladies and gentlemen, are able, with their thirty years' experience, to negotiate the Transfer of Schools of all types confidentially and efficiently.

The Transfer Department is in the hands of one of the Principals, who personally attends to all instructions.

Valuations are carefully made.

No list of any kind is issued—all instructions being strictly confidential—but each Client receives individual attention on receipt of detailed particulars.

No commission is charged to purchasers.

"Shown to the Children" Series

Edited by LOUEY CHISHOLM, the Editor of the now famous "Told to the Children" Series, and consisting of compact volumes on subjects of general appeal to children, abundantly illustrated with a profusion of clearly defined drawings in colour, and with text bearing directly on the illustrations written specially to interest the child.

BEES.

The most generally popular NATURE SERIES in existence. Bound in cloth, gilt design, 2s. 6d. net per volume.

THE NOW FAMOUS

"Told to the Children" Series

Edited by LOUEY CHISHOLM.

"The best series of books for little children that I have seen for a very long time."—*The Sphere*.

Bold type. Simple language. Eight coloured pictures in each volume. In cloth gilt, with picture design, 1s. 6d. net. Bound in ornamental boards, 1s. net.

"These are the beginnings, we hope, of an ideal child's library of story-books. The shortening and simplification of the originals has been admirably done, the print is a pleasure to read, and the spirited coloured illustrations, one of which figures on the dainty cover of each little volume, should suffice to tempt even the least bookish of the little ones to start upon a voyage of exploration inside."—*Pall Mall Gazette*.

WINCHESTER COLLEGE.—The alterations to the Head Master's house and garden are now complete. Eton Match is this year on July 3 and 4; and on July 15 the King and Queen, after attending the service in the Cathedral, are to be received *Ad Portas* at 4 p.m., on a visit to the College. No reigning monarch has been received there since George III in 1778, when he left a hundred guineas to be distributed among three senior scholars. M. Platnauer and H. E. G. Tyndale have returned from foreign study. Prof. Medley delivered a lecture on June 23 to the Sixteen Club, on "Class Relations."

PRIZE COMPETITIONS.

The Translation Prize for French is awarded to "Martin"; for Latin to "R.L." *Proxime accessit* "Kurzweil."

The winner of the Translation Prize for May is Miss Julia Waltenberg, 18 Eldon Place, Leeds.

Des confidences particulièrement dignes de foi nous ont guidé dans le cours de ce récit. La partie du public dont l'intérêt passionné s'attachait naguère au mystère dramatique d'une brillante existence parisienne peut donc lire ces pages avec confiance : elle y trouvera la vérité même sur le caractère et la destinée d'un homme qui nous paraît être une des physionomies les plus expressives de son temps et de son pays.

Dire d'un scélérat qu'il était né scélérat, d'une femme légère qu'elle était née courtisane, c'est une vaine et triste parole qu'on entend chaque jour et qu'on lit partout. Cette banalité à l'inconvénient de renverser en passant quelques notions de morale encore accréditées dans la foule. Si l'homme n'est responsable de ses actes que devant la gendarmerie, à la bonne heure ; mais, tant que l'humanité ne se sera pas rendue tout entière à cette croyance aussi élevée que salutaire, il faut tâcher de se persuader et de persuader aux autres qu'il n'y a point de fatalités de naissance. Cela est tout au moins encourageant pour les pères qui se donnent la peine d'élever leurs enfants, et pour les gens de bien qui se dévouent à l'éducation populaire.

By "MARTIN."

We have been guided in the course of this narrative by revelations from an exceptionally trustworthy source. That section of the public who have lately been tracing with lively interest the dramatic mystery of a brilliant Parisian career may, therefore, read these pages with full reliance, and find in them the exact truth as to the character and the fate of a man who is, in our opinion, one of the most characteristic types of his time and nation.

That a scoundrel was born a scoundrel or that a light woman was a born wanton—such is the kind of idle and depressing remark which we are for ever hearing and reading. This stupid commonplace has the drawback of upsetting incidentally some moral ideas which are still generally accepted. If a human being has no responsibility for his actions except to the police, there is no more to be said ; but, so long as we are not universally committed to this exalted and beneficent opinion, we have to try to convince ourselves and others that no man's destiny or character is fixed at birth. This, at any rate, gives some encouragement to fathers who take the trouble to bring up their children well, and to the worthy people who devote themselves to public education.

We classify the 185 versions received as follows :—

First Class.—C.W.C., Eicarg, Gothicus, T.T.P.E., Daffikins, Martin, Magdalenensis, Constantine, Dane, Patience, Sarnia, Chingleput, Peter Pan, Balgown, Figaro, Beau Séjour, Dol, J.J.R.

Second Class.—Pakeha, M.E.L., Leroy, Cumberland Lass, Hesperus, Craig Dhu, W.H.S., A.D., Destiny, Marguerite, Quinta, E.M.C., Shakspeare, J.E.M., Moncha, Macnamara, W.B.D., Nessko, Le Petit Chose, Benone, Curé, Aline, Mergy, Wallis, Bushido, Anitra, Duffer, Heli, Käthe, Agatha Ross, Merrybent, Mousty, C.J.B., C.C.C., Pierrette, Katty Ann, Vigoriensis, Shamrock, Dunboy, A.F.L., Caterina, Bia, In Periculo Audax, Ever the same, Angel, Happy-go-lucky, Erica, M.C., Muguet, Dysart, Jappy, Rocamadour, C.M.D., I.H.D.M., Gryphon, Marenoire, Carlowitz, Elpis, The Commonplace, Piano, Moriando vivo, Erigena, Junggesell, Ardeonaig.

THE LONDON Central Institute for Swedish Gymnastics,

16, 17, & 18 Paddington Street, Marylebone, W.

Telephone: 872 Mayfair.

The School World says: "This college for men students . . . will provide a first year's course fitting students for posts in elementary schools, and a second year's course enabling the graduate to take charge of any school of whatever standing. Anatomy, physiology, theory of movements, hygiene, and kindred subjects necessary for a complete grasp of physical training will be taught by experienced teachers. This will be a noteworthy addition to the facilities for training in this subject. . . . this new college has been most cordially welcomed by the Parliamentary Secretary representing the Board. . . . As a sign of progress, and in the hope of a better future for the physique of the youth of the nation, the new 'Central Institute' will be cordially welcomed."

PUPILS ARE NOW RECEIVED.

The Institute also undertakes the instruction in Physical Exercises on the Swedish System for Schools in the neighbourhood.

Recreative Classes—Gymnastics and Fencing—are held in the afternoons and evenings.

For particulars apply to the Principal—

ALLAN BROMAN,

The reference to Octave Feuillet's "Monsieur de Camors" was not given to avoid the possibility of consulting an English translation, if such exists. It affords a good test of French scholarship, but there is only one serious difficulty, and whether this was seen most translations failed to show. How can the author who begins by denouncing fatalism assert that the whole duty of man is, or will be, not to find himself in the dock? "A doctrine as elevating as it is salutary" must be taken ironically. In the first sentence the natural order is—"In writing this narrative I have throughout been guided by confidential communications on which I can absolutely rely." "Reliable" is an odious word. In the next sentence many failed to see that the mysterious downfall of a leader of Paris society had recently been the talk of the town. *Même* was often mistaken for an adverb, and for "most expressive physiognomies" read "most typical figures." *Vaines et tristes paroles*: "fatuous" would nearly express it; *vain* retains the force of the Latin *vanus*, "empty," and *triste* combines the meanings of "depressing" and "sorry." *L'inconvénient* is not "inconvenience," but "draw-back." *En passant* is best rendered by "incidentally." "Accredited" for "credited" was a common blunder. *A la bonne heure*: "there is nothing more to say." *Fatalité de naissance*:

better turned, "that a man's destiny is not predetermined at his birth." *Gens de bien*: "philanthropists," not "millionaires."

Tu vero felix, Agricola, non vitæ tantum claritate sed etiam opportunitate mortis. Ut perhibent qui interfuerunt novissimis sermonibus tuis, constans et libens fatum excepisti, tanquam pro virili portione innocentiam principi donares. Sed mihi filiaque eius præter acerbitatem parentis erepti auget maestitiam quod assidere valetudini, fovere deficientem, satiari vultu complexuque non contigit. Excepissemus certe mandata vocesque quas penitus animo figeremus. Omnia sine dubio, optime parentum, assidente amantissima uxore superfuere honori tuo; paucioribus tamen lacrimis compositus es, et novissima in luce desideravere aliquid oculi tui. Si quis piorum manibus locus, si, ut sapientibus placet, non cum corporibus extinguerent magnæ animæ, placide quiescas, nosque domum tuam ab infirmo desiderio et mulieribus lamentis ad contemplationem virtutum tuarum voces, quas neque lugeri neque plangi fas est.

By "R.L."

Happy in truth wert thou, Agricola; thy life was glorious, and timely the visitation of death. Those who were nigh at hand to hear thy last utterances relate that, with tranquil and cheerful mien, thou didst accept thy doom, as though to the utmost of thy power thou wert clearing the Emperor of blame. But for his daughter, and for me, sorrow is heaped on sorrow; we must bear the bitter loss of our father; we must mourn that it was not ours to tend him in his weakness, to cherish him as his strength ebbed, to stay our cravings with the dear look, the dear clasp. Some words there would have been, some admonitions, for memory to treasure deep in her shrine. O best of fathers! naught, we know well, was lacking to honour thee, while thy devoted wife was by thy pillow. Yet thou wast laid to rest with tears all too few, and thine eyes, as their light faded, craved one boon in vain.

If there is any place of abiding for the shades of the just, if (as philosophers would have us think) great spirits are not quenched when the body dies, rest thou in peace, and let thy memory be a trumpet call to us thy children, that we may turn from vain regret

(Continued on page 484.)

GIRLS' SCHOOL TRANSFERS.

Messrs. GABBITAS, THRING & Co.,
36 SACKVILLE STREET,
PICCADILLY, W.
(Established 1873.)

TRANSFERS OF AND PARTNERSHIPS IN GIRLS' SCHOOLS.

Messrs. GABBITAS, THRING & Co. have
a large number of Girls' Schools on
the books of their Transfer Department,
but issue no list of such Schools. On
learning a Purchaser's qualifications
and requirements, they will send to her
notices of opportunities likely to suit her.

The following are a few of the Schools now
on their books:—

No. **TRANSFER** of good-class School in
4,978. healthy London Suburb, carried on
successfully by present Principals for over 20 years.
They wish to retire. Over 50 Day Pupils, at pro-
spectus fees of 4½ guineas for Kindergarten up to
9 guineas, and considerable extras. 2 weekly Boarders
at 15 guineas. Receipts from the School £460, and
from letting School Hall, &c., £140, during the last
year. Goodwill £300.

No. **TRANSFER** of Day Connexion of
4,976. flourishing Boarding and Day School
near an important Northern City, containing nearly
100 Day Pupils. Prospectus fees 6 to 12 guineas.
Nearly 30 Boarders; the majority of the Boarders
would probably follow the Principals, who wish to
move to another locality and conduct a small School
there. Gross receipts considerably over £3,000.
From Day Pupils alone about £1,400. Goodwill at
capitation fees.

GIRLS' SCHOOL TRANSFERS.

No. **TRANSFER** of good-class Boarding
4,973. School at a favourite health resort re-
ceiving regularly Pupils from Orphan Association
maintained by certain Banks, which always has at
least 10 Pupils at the School. Now 26 Boarders.
Prospectus fees from 40 to 60 guineas, paying from
26 to 50 guineas. Gross receipts nearly £700. Owing
to the illness of one of the Principals the School
would be sold outright for £300, though the furniture
and equipment are probably worth more than this.

No. **TRANSFER** of licensed Boarding
4,968. House of a Girls' High School, situated
at Inland Health Resort. Vendor giving over owing
to death of relative. House opposite the School con-
taining 23 rooms, leased at £135, terminable in June
1914. Now 10 Boarders and 3 Mistresses. Purchaser
must be approved by Principal of School. For Good-
will and furniture only £400.

No. **TRANSFER**, owing to death, of old-
4,967. established Boarding and Day School
at South-West Coast Resort in delightfully situated
house, containing about 20 bedrooms, with grounds,
23 Pupils. Prospectus fees for Boarders 75 to 90
guineas. Receipts at the rate of over £900 per
annum. Price for goodwill and all school and
household furniture, &c., £1,000.

No. **TRANSFER** of large Day School in a
4,964. healthy suburb of an important Irish
City, containing about 80 Day Pupils at prospectus
fees of £2.5s. to £4.10s. per annum, with considerable
extras. Prospectus fees for Boarders £40 per annum.
Gross receipts £300. School very flourishing and
good opening. Price £200 for Goodwill and furniture.

No. **PARTNERSHIP** in flourishing School
4,963. for Gentlemen's Daughters in the Home
Counties. Partner required to assist in extension.
About 12 Boarders and 30 Day Pupils. Prospectus
Fees of £75 to £100 and about £30 per annum respec-
tively. To be divided into different departments in
separate houses. Present profit about £300, and
pupils being refused.

No. **PARTNERSHIP** in old-established
4,954. Boarding and Day School, at a South
Coast Resort. Inexpensive School, but strictly for
the daughters of gentlemen. Senior Partner propos-
ing to retire. About 15 Boarders and 8 Day Pupils.
Prospectus Fees 60 guineas for Boarders and 9 to 18
guineas for Day Pupils. Gross receipts and profits
increased the last three years. For last year about
£950 and £250 respectively. For half share of Good-
will £250, and £250 for household furniture.

GIRLS' SCHOOL TRANSFERS.

No. **OPENING for STARTING** high-class
4,918. Girls' School in very desirable sur-
roundings in conjunction with a lady of much suc-
cessful experience who owns a suitable House and
Grounds, and who would arrange to build for the
purposes of the School, when desirable.

No. **TRANSFER or PARTNERSHIP**
4,880. with a view to succession. Flourish-
ing School for Boarders only, at a favourite South
Coast Resort. Steadily full, with rather over 30
Girls. Prospectus fees of 90 guineas, besides extras.
Gross receipts about £4,400 last year. Average
annual receipts of last four years about £4,000. Net
profits for those periods over £750 and over £720
respectively. Goodwill of half share £1,000.

No. **PARTNERSHIP** in Boarding and Day
4,874. School in residential locality close to im-
portant Midland town, containing 7 Boarders an
about 25 Day Pupils and Day Boarders. Prospectus
fees 60 to 75 guineas and 15 to 42 guineas respectively.
Gross receipts about £1,000. Profits between £20
and £300. Goodwill of half share £250.

No. **PARTNERSHIP** with a view to suc-
4,804. cession in Boarding and Day School
for Gentlemen's Daughters in a very healthy locality
near the South Coast. Nearly 20 Boarders. Pro-
spectus fees from 75 to 99 guineas, and 12 Day Pupils,
9 to 18 guineas. Excellent premises. Gross receipts
about £1,200 and net profits about £200 per annum.

No. **TRANSFER** of Boarding and Day
4,656. School for Gentlemen's daughters in
residential seaside district in the Northern Midlands,
containing 6 Boarders and between 30 and 40 Day
Pupils. Boarders pay from 45 to 80 guineas and Day
Pupils from 9 to 50 or more guineas per annum.
Gross receipts over £1,400, and profits nearly £300.
One term's fees for Goodwill, or a lump sum of £300.

No. **PARTNERSHIP**, possibly to succe-
4,476. sion, in Boarding and Day School in
healthy Northern Suburb of London. A few Board-
ers paying on the average about £60 per annum, and
about 40 Day Pupils, and Day Boarders, paying fees
varying from 9 guineas for the youngest up to 28 guineas
per annum, and considerable extras. Gross receipts
over £1,000. Goodwill by capitation fee.

Further information will be sent to
applicants, but Messrs. GABBITAS, THRING
& Co. will require full particulars before
arranging introductions to their clients. No
charge is made to Purchasers.

and womanish tears to fix our thoughts upon thy glorious qualities! Nothing is here to wail, to beat the breast.

We classify the 75 versions received as follows:—

First Class.—Atossa, Angel, Dane, Amadan, R.L., Mergy, Kern, Woodstock, Kurzweil, Origen, Constantine, Duplex, Agonistes.

Second Class.—M.A.H., Dunboy, T.S.M., Ardeonaig, A.D., Flaccus, Galatea, D.T.C., J.E.M., Apollinis Sacerdos, Electra, B.C.W., Eicarg, M., Nutcracker, Heli, Käthe, March, A Moret, W.H.S., Magdalenensis, Ignatius, Pebble, Parergon, M.T., Em, Wrig, Erigena, Peripatetic II.

Third Class.—R.A.P., Agatha Ross, Lotus, Corniger, C.H.L., Modestine, G.A.C., Alexia, Martin, Vigdeniensis, Charity, Hesperis, Erica, R.E.C.

Fourth Class.—M.P.H., J.J.R., Aixoise, Hamlet, Esmeralda, Conator, Chalk, Junggesell.

Fifth Class.—En Avant, Tacit, A.L.A., Myra, Grus, Sic vos, Agricola, A.D.C., Felix, Ono, Rats.

The famous peroration of the "Agricola" of Tacitus needs no comment; any annotated edition will give all necessary explanations. The prize was determined mainly by considerations of rhythm. *Opportunitate mortis* is one of those "golden phrases" (like Virgil's *lacrimae rerum*) that are the translator's despair. "Happy Agricola! thy life was glorious to the end and death overtook thee at the right hour," or (more freely) "saved thee from the evil to come." "Thou," in ornate prose, is not yet obsolete. *Tanquam*, &c.: "wishing, it would seem, as far as in you lay, to avert suspicion from the Emperor." *Superfuere*, &c.: "all honours due to your rank and fame were paid and more than paid." *Quas neque lugeri*: "a thought that should banish all sorrow and sighing." It is tempting to borrow Milton's "Nothing is here for tears," which seems an echo of Tacitus, but it would be a purple patch.

A Prize of Two Guineas is offered for the best translation of the following extract from Renan's "Discours de Réception":—

Ce grand cardinal de Richelieu, comme tous les hommes qui ont

laissé dans l'histoire la marque de leur passage, se trouve avoir fondé bien des choses auxquelles il ne pensait guère, certaines même qu'il ne voulait qu'à demi. Je ne sais, par exemple, s'il se souciait beaucoup de ce que nous appelons aujourd'hui tolérance réciproque et liberté de penser. La déférence pour les idées contraires aux siennes n'était pas sa vertu dominante, et, quant à la liberté, on ne voit pas qu'elle eût sa place indiquée dans le plan de l'édifice qu'il bâtissait. Et pourtant, voici qu'à deux cent cinquante ans de distance, l'apre fondateur de l'unité française se trouve, dans un sens très réel, avoir été le fauteur de principes qu'il eût peut-être vivement combattus, s'il les eût vus éclore de son vivant. Cette Compagnie, qui est après tout la plus durable de ses créations, qu'est-elle, Messieurs, si ce n'est une grande leçon de liberté, puisque ici toutes les opinions politiques, philosophiques, religieuses, littéraires, toutes les façons de comprendre la vie, tous les genres de talent, tous les mérites, s'assoient côte à côte avec un droit égal? La règle de la maison de Mécène, vous l'observez:

"... Nil mi officit unquam
Ditior hic aut est quia doctior, est locus uni
Cuique suus. . . ."

Réunir les hommes, c'est être bien près de les réconcilier, c'est au moins rendre à l'esprit humain le plus signalé des services puisque l'œuvre pacifique de la civilisation résulte d'éléments contradictoires, maintenus face à face, obligés à se tolérer, amenés à se comprendre et presque à s'aimer.

Initials or a nom de guerre must be adopted by ALL competitors, but the prize-winners will be required to send real names for publication.

All competitions must reach the Office by July 16th, addressed "Prize Editor," THE JOURNAL OF EDUCATION, 3 Broadway, Ludgate Hill, E.C.

Those in the First Class are entitled on application to a copy of "Essays, Mock Essays, and Character Sketches."

Translations sent with an addressed and stamped envelope and six penny postage stamps will be returned corrected. Foreign postage stamps are not accepted.

Translations will not be returned unless both these conditions are complied with.

These School and Teachers' Advertisements are continued from page 442.

NATIONAL INSURANCE ACT, 1911. Part I.

THE NATIONAL HEALTH INSURANCE COMMISSION (England) invite applications from women for the posts of

- Salaries.*
(a) Inspector... .. £300 rising to £400.
(b) Assistant Inspector ... £100 rising to £300.
(c) Health Insurance Officer £80 rising to £150.

No application will be considered unless it is made on the official application form, which may be obtained from The Secretary, National Health Insurance Commission (England), 55, Whitehall, London, S.W. Such forms will (together with a memorandum giving details of the posts to be filled) be supplied by post only. Letters asking for forms should be marked "Appointments—Women" on the left-hand top corner of the outside cover, and must be accompanied by an addressed foolscap envelope (9 ins. x 4 ins.), which need not be stamped.

Any attempts made by candidates seeking posts to enlist support for their applications, whether through Members of Parliament, or Commissioners, or in any other way, except as directed in the memorandum above referred to, will disqualify.

The appointments will necessitate whole time service, and will, with certain exceptions mentioned in the memorandum, be pensionable.

Candidates must be over 25 and under 50 years of age. *No application form will be issued after July 6th, and the list for applications will be closed on July 12th.*

Candidates who appear from their applications to be suitable will be interviewed, and the final selection will be made on the results of a written examination to be conducted by the Civil Service Commissioners. Successful candidates will, before appointment, be required to undergo a strict medical examination. No person should apply unless in a thoroughly sound state of health.

Among the qualifications required are general administrative experience, including experience of work in connexion with Public Health, special knowledge of industrial conditions, experience in dealing with bodies of employers or employed persons, or experience of Friendly Society, Trade Union or Insurance work.

Candidates already in the Civil Service must apply through the Head of their Department, and in no case direct to the Commissioners.

The List of Candidates open to men is now closed.

June, 1912.

NORTHUMBERLAND.

REQUIRED, in September, non-resident MISTRESS for Public Secondary School. French and Elementary German. Degree and experience. Initial salary £120 to £130, rising to £170. Apply at once to Address—No. 9,396.*

VACANCY, next term, in large Girls' Boarding School for Student wishing to prepare for Cambridge Higher Local Examination or London Degree, or Froebel Examinations. Premium. Address—No. 9,403.*

COUNTY COUNCIL OF THE WEST RIDING OF YORKSHIRE.

KNARESBOROUGH RURAL SECONDARY SCHOOL (DUAL).

Owing to the resignation of the present Head Master on appointment to an Inspectorship under the Board of Education, applications are invited for the HEAD MASTERSHIP, the duties to begin in September next. The School has been established for four years, and provides a Course of general instruction specially suited to the needs of boys and girls in Rural Districts: it is aided by the Board of Education by a special grant in view of the educational experiment which the curriculum constitutes.

Commencing salary £300 per annum (with residence). The Head Master's House has accommodation for Boarders (boys), of whom there are 9 at present. Applicants must be graduates and should have experience in Secondary School teaching and organization. Sympathy with rural interests is particularly desired.

Applications should be made on Forms to be obtained from the EDUCATION DEPARTMENT (Secondary Branch), County Hall, Wakefield, and to be returned, with copies of not less than three recent testimonials, to reach the County Hall not later than 9 a.m. on Monday, July 15th, 1912.

Canvassing will be a disqualification.

BIRKENHEAD EDUCATION COMMITTEE.

COUNCIL GIRLS' SECONDARY SCHOOL.

Head Mistress: Miss M. KENNEDY, M.A.

Wanted, in September next, an experienced ENGLISH SPECIALIST MISTRESS with an Honours Degree in English. Salary £110 to £140, according to qualifications and experience. Forms of application, which should be returned immediately, may be had from the SECRETARY. Further particulars may be obtained from the HEAD MISTRESS.

Canvassing will be considered a disqualification.
ROBERT T. JONES,
Education Department, Secretary.
Town Hall, Birkenhead.

June, 1912.

HARROGATE MUNICIPAL SECONDARY DAY SCHOOL (DUAL).

Wanted, on September 9th, 1912, a fully qualified SENIOR MISTRESS. University Degree with special qualifications in English, and good experience indispensable. Salary £150 per annum, with prospects of increase.

Applications, stating age, qualifications, and experience, and accompanied by three recent testimonials, must reach the undersigned not later than the 19th July, 1912.

J. TURNER TAYLOR,
Clerk to the Governors.

Education Office, Harrogate.

WANTED, GOVERNESS STUDENT in good School. Exceptionally good preparation for L.R.A.M. (Piano) or London Matriculation given. Address—No. 9,383.*

LADY MATRON, fully trained Nurse, wanted in September for large high-class Public Boarding School for Girls. Address—No. 9,397.*

HIGH SCHOOL, COLLEGE ROAD, HARROW, MIDDLESEX.—Wanted, September, STUDENT MISTRESS, not under 17. Some Latin and Music desirable. Write fully—HEAD MISTRESS.

EXETER MODERN SCHOOL.—Wanted, in September, a HISTORY SPECIALIST. Honours degree and experience essential. Apply at once, with testimonials and full details, to the HEAD MISTRESS.

CHANNING HOUSE SCHOOL, HIGGGATE, LONDON, N.—Wanted, in September, resident MATHEMATICAL MISTRESS. Salary £55 with laundry. Unitarian essential. Please mention this in application. State also age, qualifications, experience, and any subsidiary subjects offered. Apply, by letter, to the HEAD MISTRESS.

TOO LATE FOR CLASSIFICATION.

HOCKEY GROUND to let in October. Tuesdays, Thursdays, and Saturdays. In Bishop's Avenue, near East Finchley Station, G.N.R. Apply—HEAD MISTRESS, Channing House, Higggate, N.

Messrs. TRUMAN & KNIGHTLEY, Ltd.,

Educational Agents,

SHEFFIELD HOUSE, 158 to 162 OXFORD STREET, LONDON, W.

ASSISTANT MISTRESSES' DEPARTMENT.

Ladies seeking appointments in Public or Private Schools for the Autumn Term should apply *without delay* to Messrs. TRUMAN & KNIGHTLEY, who will be pleased to give their requirements prompt and careful attention. The following are selected from a large number of SEPTEMBER VACANCIES, for which Messrs. TRUMAN & KNIGHTLEY have been instructed to select and put forward candidates:—

ENGLISH AND GENERAL FORM MISTRESSES.

Assistant Mistress for important high-class Boarding School in Home Counties, to teach advanced English, Literature, and Latin. Oxford Honours Schools or equivalent; experience and Churchwoman. Games a recommendation. Res. £70 to £100.—A 30993.

Head Mistress of Junior Department of Public School in Canada. Good qualifications and experience, good disciplinarian and organizer. Evangelical Churchwoman. Res. £130 to £150 and passage.—A 31135.

English Mistress for Church of England Boarding and Day School in Canada, to teach general English subjects. Higher Local or equivalent and experience essential. Res. £75 to £80 and passage.—A 31157.

Assistant Mistress with good Degree and some Boarding School experience to act as Head of Boarding House attached to an important High School in the Midlands. Res. £100 to £120.—A 30934.

English Mistress for Public Secondary School in the Eastern Counties, to teach English and Scripture to the Highest Forms. Mathematics a recommendation. Degree or equivalent; experience. Res. £80.—A 31579.

Senior Assistant Mistress for Public Secondary School, to teach French and English History. Degree and good experience essential. Non-res. £140 increasing.—A 31453.

Assistant Mistress for Secondary School in the West Indies, to teach Latin, English, and French. Degree or equivalent, or good Higher Local Honours. Experience. Non-res. £120 to £130 with furnished rooms and passage.—A 31378.

Fourth Form Mistress for Private Boarding School on the South Coast, to teach Arithmetic, Botany, and Geography to Matriculation standard, with elementary Mathematics. Experience. Churchwoman. Res. £50 to £60.—A 31589.

Assistant Mistress with good Geography and English for mixed Secondary School in Midlands. Degree or equivalent. Games. Non-res. £100-£120.—A 31933.

History Mistress for Church High School in North of England to teach History, with Geography. Degree or other good qualifications. Churchwoman. Non-res. £105-£110.—A 31941.

Assistant Mistress to teach English Literature and Classics in important London High School. Churchwoman. Oxford or Cambridge Honours woman preferred. Non-res. from £100.—A 32124.

Assistant Mistress for important High School in the Midlands to teach Literature and German, with Latin. Degree, Churchwoman, and experience. Non-res. £110.—A 32122.

Senior Mistress for school in Vancouver to teach English, German, and French, and assist in organization. Churchwoman. Res. £100-£110 and passage.—A 31910.

Second English Mistress for high-class Boarding School on South Coast, to teach general English subjects, with Arithmetic. High-class Boarding School experience and Churchwoman essential. Res. £50-£60.—A 31566.

Assistant Mistress for Public Boarding School on South Coast to teach English subjects, with some Mathematics. Degree and Boarding School experience desirable. Churchwoman. Res. £60-£70 or more.—A 32007.

CLASSICAL MISTRESSES.

Assistant Mistress for Church of England Public Boarding School on the South Coast, to teach Classics and Mathematics. Degree or other good qualifications and experience and Churchwoman essential. Res. up to £75 or more.—A 30990.

Classical Mistress for high-class Private School in West of England. Oxford or Cambridge Honours woman with experience essential. Res. £80.—A 32074.

MATHEMATICAL AND SCIENCE MISTRESSES.

Mathematical Mistress for high-class Boarding School in the Home Counties. Mathematical Tripos or equivalent, experience, and Churchwoman. Able to play games. Res. £70 to £100.—A 30992.

Assistant Mistress for high-class Boarding School in the Midlands, to teach Botany for Matriculation, Modern Geography, with some Chemistry and Physics. Good qualifications and experience essential; Churchwoman. Res. £70 to £80.—A 31097.

Assistant Mistress for Public Secondary School in South Africa, to teach Botany to Matriculation standard, Junior Latin, English Grammar, and Scripture. Nonconformist and good experience essential. Res. £110-£120 and passage.—A 30510.

Lecturer for Day Training College on South Coast, to teach good Mathematics and Geography on modern lines. Degree, with experience and Teacher's Diploma, essential. Non-res. £150, increasing.—A 30714.

Lecturer in Botany for Training College in the Midlands. Degree, experience, Churchwoman. Res. £70 to £90.—A 31439.

Science Mistress for Public Secondary School in Surrey, to teach Chemistry, Physics, Mathematics, Geography. Degree and experience essential. Non-res. £130.—A 31619.

Mathematical Mistress for Public Day School in University City. Tripos or equivalent. Non-res. £100-£120.—A 32032.

Mistress of Method for important High School in Midlands to teach Geology, Chemistry, and Botany to Higher Local Standard, and prepare pupils for Training Certificate. Experience. Churchwoman. Non-res. £150.—A 32121.

MODERN LANGUAGE MISTRESSES.

Senior French Mistress for large Public School in Canada. Res. £100.—A 31137.

French Mistress for Church of England Day School. French acquired abroad. Degree or equivalent and experience. Non-res. £120.—A 31315.

Modern Language Mistress for large Public School in the Midlands, to teach German throughout the School, with French. English Degree or Cambridge Tripos. Non-res. £100 to £120.—A 31487.

Senior Modern Language Mistress for London Public Day School to teach French and German acquired abroad. Honours Degree or equivalent and experience. Non-res. £130-£150.—A 32090.

KINDERGARTEN MISTRESSES.

Kindergarten Mistress for Public High School in the Eastern Counties. Higher N.F.C. Certificate and experience essential. Res. £60.—B 30579.

First Form Mistress for Public Day and Boarding School in North-west of England, with good elementary Music. Froebel trained; Churchwoman. Res. £40-£50. B 31829.

Kindergarten Mistress for London Public Day School. Good training and Certificates, and Secondary School experience, and experience in training students. Non-res. £100-£110.—B 32031.

ART MISTRESSES.

Art Mistress for large Public School in Canada. Good qualifications and experience. Res. £100 to £120.—B 31144.

Art Mistress for important Public High School in Yorkshire. Art Class Teacher's and Ablett's Teacher Artist's Certificate, with good school experience. Non-res. £130.—B 32194.

MUSIC MISTRESSES.

Music Mistress for high-class Boarding School on the East Coast. First-rate training and experience essential. Res. up to £100.—B 31204.

Pianoforte Mistress for high-class Boarding School near London. German training essential. Res. £60 to £80. B 31687.

Music Mistress for large Public Day School in Midlands, to teach Pianoforte, Violin, and Class Singing. L.R.A.M. or A.R.C.M. Non-res. £80.—B 31873.

GYMNASTICS AND GAMES MISTRESSES.

Gymnastics Mistress for important high-class Private School. Mine Osterberg's training and experience essential. Res. post with good salary.—B 31300.

Gymnastics Mistress for high-class Boarding School in the Home Counties, to teach Swedish Drill, Medical Gymnastics, and Games, including Lacrosse. First-rate training essential; some experience desirable. Res. post, good salary.—B 32172.

TECHNICAL MISTRESS.

Domestic Science Mistress for Public High School in the Eastern Counties. Res. £60 to £80. No supervision.—B 31632.

FOREIGN MISTRESSES.

Senior French Mistress for high-class Private School near London. Brevet Supérieur and experience in first-class English Boarding School essential. Res. £70 to £100.—F 1060.

German Music Mistress for high-class Private School on South Coast, to teach German and Music. Res. £80.—F 31550.

STUDENT-TEACHERS.

Messrs. TRUMAN & KNIGHTLEY always have on their books a large number of Vacancies for **Student-Teachers** on mutual terms or at moderate premium.

LADY MATRONS AND HOUSE MISTRESSES.

Messrs. TRUMAN & KNIGHTLEY assist qualified **Lady Matrons, Housekeepers, and House Mistresses** to find appointments in Boys' and Girls' Schools.

Ladies desiring further information of any of the above and of other suitable Vacancies should write fully to Messrs. TRUMAN & KNIGHTLEY, stating their age, qualifications, &c., and enclosing copies of their testimonials. NO CHARGE OF ANY KIND is made to applicants unless an engagement be secured through this Agency, when the terms are reasonable. Prospectus, terms, &c., will be forwarded on application.

METHUEN'S MODERN SCHOOL BOOKS

ENGLISH

JUNIOR ENGLISH. By F. J. RAHTZ, M.A., B.Sc., Senior Lecturer at Merchant Venturers' Technical College, Bristol. Eighth Edition. Crown 8vo, 1s. 6d.

This book is intended for the Lower Forms of Secondary Schools. It deals with Grammar, the Construction of Phrase and Sentence, Analysis, Parsing, Expansion, Condensation, Composition, and Paraphrasing, and many other Exercises in the use of English. The Questions and Exercises are numerous and varied.

HIGHER ENGLISH. By F. J. RAHTZ, M.A., B.Sc. Sixth Edition. Crown 8vo, 3s. 6d.

This book provides a much-needed course in the study of modern English, suitable for pupils in the Upper Forms of Secondary Schools. Examination Papers set recently at London University are added.

ENGLISH COMPOSITION. By F. J. RAHTZ, M.A., B.Sc. Crown 8vo, 1s. 6d.

This work is intended for pupils of Secondary Schools and private students. It supplies a progressive course in English composition, embracing not only essays and letters but also other important and useful work in writing English. Numerous and varied exercises are appended to each chapter.

ENGLISH COMPOSITION FROM MODELS. By C. ROONEY, B.A., LL.B. Crown 8vo, 2s. 6d.

This book is an attempt to apply the Direct Method to the teaching of English composition. The models range from Bacon to Stevenson, and the extracts, which have been carefully selected, are calculated to interest senior students.

ENGLISH LITERATURE. By F. J. RAHTZ, M.A., B.Sc. Crown 8vo, 2s. 6d.

This work is suitable for pupils in the Upper Forms of Secondary Schools, and also for older students. Its aim is to review in a general but critical manner the groundwork of English Literature. Special attention has therefore been paid to the course of the development of our literature; the general characteristics of each period and the external influences bearing upon it are carefully explained.

SELECTIONS FROM ENGLISH LITERATURE. Vol. I (1350-1700). By F. J. RAHTZ, M.A., B.Sc. Crown 8vo, 2s.

This volume covers the period from 1350 to 1700. Extracts are given from prose, poetry, and the drama. In dealing with verse, complete poems have been given where space would permit; and in the case of the drama, poems, and longer poems, the extracts are such as should be intelligible by themselves or with the aid of brief prefatory notes.

SELECTIONS FROM ENGLISH LITERATURE. Vol. II (1700-1900). By H. N. ASMAN, M.A., B.D., Second Master of Owen's School, Islington. Crown 8vo, 2s.

This is the second of two volumes of selections that have been prepared for use with "English Literature," by F. J. Rahtz, M.A., B.Sc.

TOMMY SMITH'S ANIMALS. By EDMUND SELOUS. With 8 Illustrations by G. W. ORD. Eleventh Edition. Fcap. 8vo, 1s. 6d.

This charming continuous reader, besides inculcating kindness to animals, conveys much natural history information. The animals dealt with are—frog, toad, rook, rat, hare, grass-snake, adder, peewit, mole, wood pigeon, squirrel, barn-owl.

TOMMY SMITH'S OTHER ANIMALS. By EDMUND SELOUS. With 12 Illustrations by AUGUSTA GUEST. Fifth Edition. Fcap. 8vo, 1s. 6d.

Uniform with the above. The animals dealt with are—rabbit, nightjar, weasel, blackbird, thrush, hedgehog, dabchick, moorhen, woodpecker, fox, cuckoo, water vole.

HEALTH READINGS FOR ELEMENTARY SCHOOLS. By C. J. THOMAS, M.D., B.Sc., D.P.H., University Scholar in Medicine, Member of the Examining Board of the Royal Sanitary Institute. Crown 8vo, 1s. 6d.

This volume has been written in accordance with the recommendations of the Board of Education.

FRENCH

SIMPLIFIED FRENCH TEXTS.

Edited by T. R. N. CROFTS, M.A., Head Master of Roan School, Greenwich. Fcap. 8vo, 1s. each.

This series, consisting of 16 volumes, provides pupils who have been studying French for about two or three years with simple translation books which they can understand, and at the same time complete stories, instead of a succession of little anecdotes. It thus makes possible the more rapid reading of a greater variety of authors. Vocabularies have been added, in which the chief idioms are explained.

L'Équipage de la Belle-Nivernaise. By ALPHONSE DAUDET. Adapted from "La Belle-Nivernaise," by T. R. N. CROFTS, M.A. Third Edition.

L'Histoire de Pierre et Camille. By ALFRED DE MUSSET. Adapted from "Pierre et Camille," by J. B. PATTERSON, M.A., Modern Language Master at Merchant Taylors School, London.

Mémoires de Cadichon. By Madame DE SÉGUR. Adapted from "Mémoires d'un Ane," by J. F. RHOADES, Modern Language Master at Fettes College, Edinburgh.

L'Histoire d'une Tulipe. By ALEXANDRE DUMAS. Adapted from "La Tulipe Noire," by T. R. N. CROFTS, M.A. Third Edition.

La Bouillie au Miel. By ALEXANDRE DUMAS. Adapted from "La Bouillie de la Comtesse Berthe," by P. B. INGHAM, B.A., Modern Language Master at Merchant Taylors School, London.

Edmond Dantès. By ALEXANDRE DUMAS. Adapted from "Monte Cristo," by M. CÉPPI, Head Modern Language Master at King's College School, Wimbledon.

D'Ajaccio à Sainte-Hélène. By ALEXANDRE DUMAS. Adapted from "Napoléon," by F. W. M. DRAPER, Modern Language Master, City of London School.

M. de Beaufort à Vincennes. By ALEXANDRE DUMAS. Adapted from "Vingt Ans Après," by P. B. INGHAM, B.A.

FRENCH—continued.

Le Docteur Mathéus. By ERCKMANN-CHATRIAN. Adapted from "L'Illustre Docteur Mathéus," by W. P. FULLER, M.A., Head Master of the Holborn Estate Grammar School, London.

Le Conscrit de 1813. By ERCKMANN-CHATRIAN. Adapted from "L'Histoire d'un Conscrit," by H. RIEU, M.A., Modern Language Master at Merchant Taylors School, London.

La Bataille de Waterloo. By ERCKMANN-CHATRIAN. A Sequel to the above. Adapted from "Waterloo," by G. H. EVANS, M.A., Modern Language Master at Oundle School.

Jean Valjean. By VICTOR HUGO. Adapted from "Les Misérables," by F. W. M. DRAPER, M.A., Modern Language Master at King's College School, Wimbledon.

Abdallah. By EDOUARD LAHOULAYE. Adapted from "Abdallah; ou, le trèfle à quatre feuilles," by Mrs. J. A. WILSON.

Deux Contes. By P. MÉRIMÉE. Adapted from "Mateo Falcone" and "Tamanko," by J. F. RHOADES.

La Chanson de Roland. Adapted by H. RIEU, M.A. Second Edition.

Remy, Le Chevrier. By EMILE SOUVESIRE. Adapted from "Le Chevrier de Lorraine," by E. E. CHOTTIN, B. ès L., Modern Language Master at St. Laurence College, Ramsgate.

ADVANCED FRENCH TEXTS.

Edited by T. R. N. CROFTS, M.A., Head Master of Roan School, Greenwich. Crown 8vo, 2s. each.

This series aims at supplying translation books for fairly rapid class-reading among pupils who have already been through some of the volumes in the Simplified Texts, or who have acquired a good working knowledge of elementary French. The first volumes are:—

Bernard de Merçy. By P. MÉRIMÉE. Adapted by P. B. INGHAM, B.A. Assistant Master at Merchant Taylors School.

This is a condensation of Prosper Mérimée's one historical novel, "Chronique du Règne de Charles IX," considered the best of its type in the French language. Passages have been omitted, but no changes have been made in the text.

Ursus et sa Troupe. Adapted from "L'Homme qui Rit," of Victor Hugo, by EM. B. LE FRANÇOIS, French Tutor at Redcliff House, Clifton, and Wolsey Hall, Oxford.

A complete and exciting story, divided into twenty chapters. Each chapter becomes a theme for conversation by means of questions based upon it. There is a vocabulary of difficult words and idiomatic expressions.

GERMAN

SIMPLIFIED GERMAN TEXTS.

Edited by T. R. N. CROFTS, M.A., Head Master of Roan School, Greenwich. Fcap. 8vo, 1s. each.

A series of simple translation books, on the same lines as Simplified French Texts.

Der Müller am Rhein. By C. BRENTANO. Adapted from "Das Märchen von dem Rhein und dem Müller Radlauf," by Miss A. F. RYAN, Modern Language Mistress at the High School, Derby.

Die Geschichte von Peter Schlemihl. By A. VON CHAMISSO. Adapted from "Peter Schlemihl's wundersame Geschichte," by R. C. PERRY, M.A., Modern Language Master at Merchant Taylors School, London.

Undine und Huldbrand. By DE LA MOTTE FOUCÉ. Adapted from "Undine," by T. R. N. CROFTS, M.A.

Die Nothelfer. By W. H. RIEHL. Adapted from "Die Vierzehn Nothelfer," by P. B. INGHAM, B.A., Modern Language Master at Merchant Taylors School, London.

HISTORY

A JUNIOR HISTORY OF GREAT BRITAIN. By E. M. WILMOT-BUXTON, F.R.Hist.S. Crown 8vo, 2s.

This book gives a systematic and interesting account of the history of Great Britain to pupils of ages ten to fourteen, who have hitherto studied the subject in the form of "Stories."

A SHORT HISTORY OF MODERN ENGLAND. 1714-1910. By ERNEST BOWYER, B.A., B.Sc. Crown 8vo, 2s. 6d.

This volume has been written, on modern lines, expressly for Upper Forms of Schools. In order to enable the young pupil to grasp the history of his country during the last two centuries as an intelligible whole, the economic side of England's history and the part she has played in international politics have been dealt with in greater detail than is usual in text-books written for schools. Each chapter deals with a particular phase of the subject; illustrative extracts drawn from typical "Sources" are added to many of the chapters, and the usefulness of the volume is further increased by the inclusion of biographies and summaries.

MATHEMATICS

DOUBLE ENTRY BOOK-KEEPING. A Complete Treatise on its Theory and Practice. By JAMES CUSACK, LL.D., Principal of the Business Training College, Finsbury Square. Crown 8vo, 3s. 6d.

Covers the requirements for all the Elementary, Junior, and Intermediate Examinations held by the London Chamber of Commerce, the Royal Society of Arts, the National Union of Teachers, the Oxford and Cambridge Senior Locals, the College of Preceptors, and other similar Examinations.

PRACTICAL GEOMETRY FOR SCHOOLS. By SIDNEY A. SWITZER, Art Master and Honours Medallist in Geometry, Examiner to the Examination Board of the N.U.T. Fully Illustrated. Crown 8vo, 2s.

This up-to-date text-book is the result of twenty years' practical experience. It is suited to the requirements of candidates taking the Board of Education, Oxford and Cambridge Local, and College of Preceptors Examinations. The problems are well graduated; suggestive dimensions are inserted in their enunciation; and they are all illustrated. Each page is self-contained, so that there is no turning over in the study of any one problem. Each page has a corresponding set of exercises. These exercises are mostly original.

METHUEN & CO., LTD., 36 ESSEX STREET, LONDON, W.O.

Supplement to THE JOURNAL OF EDUCATION.

No. 516.

JULY 1, 1912.

Cambridge University Press

The Cambridge Modern History Atlas

Edited by A. W. WARD, Litt.D., P.B.A., G. W. PROTHERO, Litt.D., F.B.A., and STANLEY LEATHES, M.A., C.B. Assisted by E. A. BENIANS, M.A. Containing 141 maps, the majority of which are coloured, with a full index, and an introduction by E. A. BENIANS, with indexes of the maps described and of the local names mentioned therein.

The general idea of the *Atlas* is to illustrate, in a series of maps of Europe and of its different countries, as well as of other parts of the world associated with the progress of European history, the course of events by which the Europe of the fifteenth century has been transformed into the Europe of the present day. The arrangement of the maps follows, so far as possible, the order of the narrative in *The Cambridge Modern History*, and an endeavour has been made to insert all the place names that occur in it. At the same time, the entire series is designed to stand by itself as an *Atlas of Modern History*. The historical introduction traces the course of the territorial changes and explains the purpose of each map. A detailed prospectus giving full particulars of the volume will be sent on application.

Scripture Teaching in Secondary Schools

Papers read at a conference held in Cambridge, 10-13 April, 1912. Edited by N. P. WOOD, M.A., B.D., Assistant Master at Bishop's Stortford College and Secretary to the Conference. With a foreword by F. C. BURKITT, M.A., F.B.A., Norrisian Professor of Divinity in the University of Cambridge.

"I have been allowed to see an advance copy of the report of the Scripture Teaching Conference which was held at Cambridge in April last, and am glad to have the opportunity of commending it to the notice of Public School Masters engaged in Divinity work. The papers will, I think, be found interesting and valuable, both in themselves, and as affording openings for discussion among such Masters, many of whom will welcome guidance and suggestion on a subject as important as it is difficult. I heartily recommend them this little book." — LIONEL FORD, *Head Master of Harrow School and Chairman of the Head Masters' Conference Committee on Bible Teaching.*

Crown 8vo
1s 6d net

A prospectus of the work giving a list of the papers read at the Conference will be sent on application.

Livy. Book I

Edited by H. J. EDWARDS, C.B., M.A., Fellow and Tutor of Peterhouse, formerly Scholar of Trinity College.

Pitt Press Series

Extra
fcap 8vo
With 2 maps
3s 6d

Containing the text with 146 pages of notes and an introduction of 37 pages dealing with (1) Livy and the Augustan Age; (2) Livy as a historian and as a writer; (3) the legends connected with the foundation of Rome; (4) the beginnings of the City; Romulus and Titus Tatius, Numa Pompilius; (5) Rome and Latium; Tullus Hostilius and Ancus Marcius; (6) Rome and Etruria; the Tarquins; (7) the development of the city-state; Servius Tullius; (8) the end of the Monarchy.

Greek Education. Its Practice and Principles

By JAMES DREVER, M.A. (Edin.), B.Sc. (Lond.), Lecturer on the principles of and history of Education under the Edinburgh Provincial Committee for the training of Teachers, and Assistant to the Professor of Education, University of Edinburgh.

The main purpose of the author in this work is to indicate what seem to him the essential lines upon which any discussion of Greek education, that is to be of value to the student of Education, must proceed. At the same time he has tried to throw out the suggestion that the whole history of educational practice and educational thought may be treated from the same point of view, and as a whole, by taking our departure from the education of Greece.

Algebra for Beginners

By C. GODFREY, M.V.O., M.A., Head Master of the Royal Naval College, Osborne, and A. W. SIDDON, M.A., Assistant Master at Harrow School.

Crown 8vo
With answers
2s 6d
without answers
2s

In this book the authors have followed the lines laid down in the Report of the Mathematical Association Committee on the teaching of Elementary Algebra and Numerical Trigonometry (1911); they are also indebted for valuable ideas to the Board of Education Circular on the teaching of Geometry and Graphic Algebra (Circular 721, March, 1909). The book will also be found to fit in with the Algebra Syllabus suggested by the Head Masters' Conference.

Algebra for Secondary Schools

By CHARLES DAVISON, Sc.D., Mathematical Master at King Edward's High School, Birmingham. In one volume. Or in two parts with answers, 3s each, or without answers, 2s 6d each. *Exercises* separately, 3s, or without answers, 2s 6d.

The author's aim has been to prepare a text-book that may be of use in all but the highest classes of a secondary school. The subjects included are, for the most part, those which are common to all text-books of elementary algebra; but a few, such as indeterminate equations of the first degree, the remainder theorem and simple partial fractions, are introduced at an earlier stage than usual. The applications of graphs are confined to the illustrations which they afford of the methods of solving simultaneous equations and of the theory of quadratic equations and expressions.

Crown 8vo
6s

A School Algebra Course

By F. GORSE, M.A. With or without answers. Complete in one volume. Or in three parts, 1s each.

Crown 8vo
3s

The three parts (without Answers) are divided as follows:— Part I.—To Simple Simultaneous Equations (including Factors), with Appendix. Part II.—Factors to Quadratic Equations, with Appendix. Part III.—Surd to the Binomial Theorem, with Appendix.

Numerical Trigonometry

By J. W. MERCER, M.A., Head of the Mathematical Department, Royal Naval College, Dartmouth.

Crown 8vo
2s 6d

It seems to be generally agreed that it is desirable to cut out a considerable amount of heavy manipulation from the elementary Arithmetic and Algebra Course and to use the time thus saved in giving the boy some acquaintance with numerical Trigonometry. This book is an attempt to indicate the kind of work that can probably be done, and the contents are well within the powers of boys from 13 to 15 years of age.

The Calculus for Beginners

By J. W. MERCER, M.A., Head of the Mathematical Department, Royal Naval College, Dartmouth.

Crown 8vo
6s
Exercises only,
3s

This book follows the lines on which the subject has been taught to boys of sixteen during the last few years at the Royal Naval College, Dartmouth, and is extended primarily for those who are or will be interested in applications of the Calculus to Physics and Engineering. No great amount of previous mathematical knowledge is assumed.

The Story of our Trees: in Twenty-four Lessons

By MARGARET M. GREGSON, B.A.

Cambridge Nature Study Series

Many schools have lately found *Trees* a useful topic, one that can be pursued in town or country, in summer or winter, indoors or out of doors. Prof. H. Marshall Ward's volumes have undoubtedly stimulated interest. The serious inquiries now being made into National Afforestation show that we may have to enlist the sympathy of boys and girls in the protection of new plantations. Mrs. Gregson has a very pleasant simple style of diction, and her book is fully illustrated.

MILLS & BOON will be happy to receive applications for Specimens from Heads of Schools and Teachers of special subjects. Applications should state the number of copies that will be required if the book asked for is introduced.

PROBLEMS IN PRACTICAL CHEMISTRY FOR ADVANCED STUDENTS.

By G. F. HOOD, M.A., B.Sc., Chemistry Master Nottingham High School. With 21 Diagrams. 5s.

The object of this book is to provide a course of practical exercises suitable for candidates for the Higher Certificate Examination, for University Scholarships, and for the Inter-Science Examination. It aims at developing both the reasoning powers and the technical skill of the student. Throughout the book, simplicity combined with the necessary accuracy is insisted on.

EXPERIMENTAL MECHANICS AND PHYSICS.

By A. H. E. NORRIS, B.Sc., Physics Master King Edward's School, Stourbridge. With 133 Diagrams. 1s. 6d.

The course in this book meets all the requirements of students preparing for the examinations of the Lancashire and Cheshire Institutes and the Midland Counties Union.

A FIRST SCHOOL CHEMISTRY.

By F. M. OLDHAM, B.A., Senior Science Master at Dulwich College; late Scholar of Trinity Hall, Cambridge. With 71 Illustrations. Second Edition. 2s. 6d.

ELEMENTARY QUANTITATIVE ANALYSIS.

By F. M. OLDHAM, B.A. With 11 Diagrams. 1s. 6d.

PREPARATORY ARITHMETIC.

By F. C. BOON, B.A., Principal Mathematical Master at Dulwich College. 1s. Answers with Hints on the Problems, 6d. net.

ARITHMETIC FOR SCHOOLS AND COLLEGES.

By F. C. BOON, B.A. Without Answers, 3s. 6d.; with Answers, 4s.; Answers, 6d. net.

"An exceptionally well-planned book for school use. Every difficulty likely to arise is taken in hand and thoroughly well explained. The importance of rough checks is rightly insisted on throughout. Approximation methods in decimals are accorded particularly full treatment."—*Mathematical Gazette*.

GRAPHS IN ARITHMETIC, ALGEBRA, AND TRIGONOMETRY.

By W. J. STAINER, B.A. Head Master of the Municipal Secondary School, Brighton. With 120 Diagrams. 2s. 6d.

This book treats of many types of graphs and includes sections on indices, logarithms, the exponential function, the trigonometrical functions, simple periodic motion, physical quantities, &c. Such mathematical tables as are required are appended.

A NEW SCHOOL GEOMETRY. Part I.

By RUPERT DEAKIN, M.A., Balliol College, Oxford, and London University. With 200 Diagrams. 1s.

The First Part contains both Practical and Theoretical work for pupils being taught in accordance with the new method. It includes all that is prescribed for Geometry in the Preliminary Local Examinations and the Third Class College of Preceptors' Examinations. The book contains more than 1,000 exercises and riders which have been presented with gradually increasing difficulty, and also as leading up to the discovery of new propositions and new ideas.

HOUSEHOLD ACCOUNTS.

By RUPERT DEAKIN, M.A., and P. J. HUMPHREYS, B.Sc. 72 pages. With Answers, 6d. net.

A short text-book of household book-keeping. Great pains have been taken to make the book quite up to date, and the numerous exercises convey much information of a thoroughly reliable character.

THE NEW PRELIMINARY GEOGRAPHY.

By H. B. WETHERILL, M.A., Second Master Royal Masonic School, Bushey. With 8 Illustrations and 19 Diagrams. 1s. 6d.

A course of 60 lessons which can be gone through and revised in a year. The British Isles are treated in considerable detail. The book is intended to satisfy the requirements of the Universities Preliminary Examinations for Schools, and to serve as a first year text-book in secondary schools.

EXERCISES IN FRENCH FREE COMPOSITION FOR UPPER CLASSES.

By R. R. N. BARON, M.A., French Master Cheltenham Grammar School, Author of "French Prose Composition" and "Junior French Prose." 1s. 6d.

Il n'y a que le premier pas qui coûte applies largely to the writing of free composition, in which a pupil is confronted with four considerations: subject-matter, logical order, vocabulary, and style. The method adopted in this book provides something in each of these directions, and will be found to give stimulus to the imagination and confidence in dealing with the subject. A large portion of the material has been already submitted to the test of the classroom.

Adopted at—Charterhouse; Eton; Uppingham; George Watson's College, Edinburgh; Cheltenham Ladies' College; Training Colleges at Cambridge, Cheltenham, Chichester, &c.

DIRECT METHOD FRENCH TEXTS

Edited by R. R. N. BARON, M.A.

The Stories in this series of Direct Method French Texts have been chosen as being both good literature and stories likely to appeal to those by whom they are intended to be read.

The Questionnaires and Exercises provide ample material for homework, and contain, besides questions suggested by and based on the text, a wide range of Grammar practice given in such a form as to involve the use of common sense, in addition to knowledge of inflexions and syntax. The first volume is:—

TAMANGO. By PROSPER MÉRIMÉE. 1s.

SHAKSPERE'S AS YOU LIKE IT.

With a Revised Text, Questions, Notes, and Appendices, by the Rev. C. R. GILBERT, M.A., Rector of Seagrave, formerly Head Master of King Henry VIII School, Coventry. 1s.

This edition is based on the recommendations contained in Circular 753 of the Board of Education on the Teaching of English.

SHAKSPERE'S KING HENRY V.

Edited by the Rev. C. R. GILBERT, M.A. 1s. Uniform with "As You Like It" above.

BOOKS FOR EVENING SCHOOLS

A RURAL ARITHMETIC, INCLUDING HOUSEHOLD ACCOUNTS.

By RUPERT DEAKIN, M.A., and P. J. HUMPHREYS, B.Sc. With 2 Plates and 41 Diagrams. 8vo. 1s. With Answers, 1s. 6d.

This book meets the requirements of the Rural and Preliminary Domestic Courses in the Union of Lancashire and Cheshire Institutes, and of the Preliminary Rural and Domestic Groups, and of the Rural Arithmetic in the Midland Counties' Union of Educational Institutions.

PRACTICAL MATHEMATICS.

By W. E. HARRISON, A.R.C.S. With 2 Plates and 90 Diagrams. Third Edition, revised and enlarged. With Answers, 1s. 6d.

Without, 1s. 3d.

The course covers the Board of Education Syllabus of "Practical Mathematics and Practical Drawing" as given in the "Preliminary Course for Trade Students," also the work for the Lancashire and Cheshire and Midland Counties' Union Preliminary Technical Certificates. On the L.C.C. List.

PETER PAN. READERS

By G. D. DRENNAN. With an Introduction by A. R. PICKLES, M.A., Director of Education for Burnley. Illustrated by JOHN HASSALL, R.I. 6d.

THE ZOO CONVERSATION BOOK.

By EDMUND SELOUS. Author of "Tommy Smith's Animals." A nature study reader for senior classes. 1s.

THE STORY OF WESTMINSTER ABBEY.

By G. E. TROUTBECK. With an Introduction by SIR LAURENCE GOMME, F.S.A. Illustrated. 1s.

An Historical Reader for seniors recommended by the National Home-Reading Union for their "Young People's Course, History Section, 1911-1912."

New Educational Catalogue post free from

MILLS & BOON, LTD., 49 RUPERT STREET, LONDON, W.

THE BEST DICTIONARY.

STORMONTH'S ENGLISH DICTIONARY.

I. School and College Edition. Crown 8vo, 1,080 pp., 5s. net.
 II. Handy School Edition. 16mo, 7d. net.

STORIES OF THE ENGLISH FOR SCHOOLS. By F.

Vol. I. For Junior Scholars.—From the Coming of the English to the Armada. Illustrated, 1s. 6d.
 Vol. II. For Senior Scholars.—The Struggle for Power and Greater England. Illustrated, 1s. 6d.

Scotsman.—"If history can be given a form likely to make it palatable to young folks, 'F.' has succeeded in doing so in these 'Stories of the English.' It is no exaggeration to say that the book represents not only a masterpiece in literature for children, but a work of no slight value for the national good."

THE STORY OF THE WORLD.

Adopted by the London County Council Education Committee.

THE STORY OF THE WORLD. In Five Books. By M. B. SYNGE, Author of "Stories from European History," &c., &c. Coloured Frontispiece, numerous Illustrations and Maps. Book I.—On the Shores of the Great Sea, 1s. 4d. Book II.—The Discovery of New Worlds, 1s. 6d. Book III.—The Awakening of Europe, 1s. 6d. Book IV.—The Struggle for Sea Power, 1s. 9d. Book V.—Growth of the British Empire, 2s.

(Prize Edition) Complete in Two Volumes, 3s. 6d. net each.

Uniform with the above.

THE WORLD'S CHILDHOOD. In two Books.

1. STORIES OF THE FAIRIES. 10d.
2. STORIES OF THE GREEK GODS AND HEROES. 10d.

With numerous Illustrations by BRINSLEY LE FANU.

BLACKWOODS' LITERATURE READERS.

Edited by JOHN ADAMS, M.A., B.Sc., F.C.P., Professor of Education in the University of London.

BOOK I ... Pp. 228. Price 1s.
 BOOK II ... Pp. 275. Price 1s. 4d.
 BOOK III ... Pp. 303. Price 1s. 6d.
 BOOK IV ... Pp. 381. Price 1s. 6d.

BLACKWOODS' ILLUSTRATED CLASSICAL TEXTS.

With or without Vocabulary. From 1s. 6d. Full List on application.

Cæsar—Gallic War, Books I-III.
 Cæsar—Gallic War, Books IV, V.
 Cæsar—Gallic War, Books VI, VII.

ASSOCIATION OF HEAD MISTRESSES.

THE thirty-eighth Annual Conference was held at St. Paul's Girls' School, Hammersmith, on Friday and Saturday, June 14 and 15, by the invitation of Miss F. R. Gray, the Head Mistress. The President, Miss DOUGLAS, was in the chair.

The SECRETARY announced the election of the following members to serve on the Executive Committee until 1916:—Miss M. F. Holland (Graham Street), Miss Clement (Godolphin and Latimer), Miss Limebeer (Wallasey), Miss Shekleton (Redland, Bristol), Miss Macrae (Mansfield).

After the transaction of private business, the PRESIDENT delivered her address on Training.

At a time when education is receiving more serious attention than ever it did before, it behoved the teaching profession to prove to the outside public that they had grasped the problems to be solved and were leaders who might be trusted. No subject was of more pressing importance, and on none was there greater diversity of views than the training of teachers. Training was still in the experimental stage, and she trusted that the door would be left open for experiments of all kinds. The one thing she deprecated was indifference to the subject, a charge to which many head masters and mistresses were still open. To begin with school life. Up to the age of fifteen a girl was trained not for any special vocation, but with the thought that she may one day become a wife and a mother; and many of precisely the same qualities were wanted for a teacher as for a mother. Both needed to be trained in home and social duties as well as in purely intellectual studies, and there was abundant testimony from wives and mothers to refute the charge brought against spinster teachers of neglecting this side of their duty. Her experience showed that young teachers rarely failed from ignorance of the subjects they professed to teach, but more often from some fault of character, temper, manner, or manners. Some were lacking in voice training; others, with high degrees, could not write good English. A sarcastic manner was the most blighting of all faults. The personality of the teacher might cover a multitude of sins, but there was no personality so strong that it could not be fortified and corrected by early training. Most important were wide interests and open-eyed wonder. The school must not be a house of business or a factory, but it should be a wonderland, where children enter by one gate to learn, to work, to wonder, and to worship, and leave by another, carrying with them strenuous wills, eyes full of reverent admiration, and hearts tender and eager to enter the senior ranks of service to God and to man.

The next business was the adoption of reports of committees.

Miss WHITEHEAD moved:

"That every effort should be made by individual members of the Association to take mistresses on their staffs who have had experience overseas."

She urged that not only the Colonies, but England, would profit by a free interchange of mistresses. Teachers in the Colonies were brought face to face with the elementary problems of life, and would return to England with both varied experience and a wider outlook. It was not right that they should feel in taking work abroad that they were sacrificing their professional prospects in England.

Miss AITKEN (Girls' High School, Pretoria) seconded, and the resolution was carried unanimously.

Miss BENTON pointed out the good work done by the Colonial Intelligence League, and the many good openings for women in Canada.

Miss WALKER expressed the hope that the State aid promised by the Chancellor of the Exchequer to a Secondary Teachers' Pension Scheme might be extended to all approved secondary schools.

The Consultative Committee's Report on Examinations.

Miss GADESSEN proposed a resolution endorsing the report and quoting the summary conclusion: "The time has come not for their abandonment (for nothing can supply their place) but for the curtailment of their numbers and for the correction of their results, &c." The resolution was drafted so as to provoke discussion, not as pronouncing a dogmatic opinion on examinations. She held herself that examinations must continue, quite apart from their obvious academic value, but as a safeguard against "sloppiness" in education and as a test of intellectual grip; but she wished to see all public, preliminary, and junior examinations for boys and girls under fifteen abolished. Secondly, the number of examinations must be curtailed. The report told of one school where twelve different examinations were prepared for in three forms.

The Oxford Senior Certificate, which was the easiest way of entrance to the Universities and to some of the professions, could be gained by passing in five subjects, but there was no set of five subjects accepted by all the exempting bodies. To test the work of a school, examination and inspection must be combined. She asked leave to add a rider approving the Consultative Committee's suggestion for the summoning of a Conference of representatives of the various examining authorities with a view to the reduction of the number of examinations.

Miss H. L. POWELL seconded.

Miss BURSTALL desired to omit the words "for nothing can supply their place." They should look forward to a time when the school record of a registered and duly inspected school should take their place. On the proposed conference, associations of teachers as well as examining bodies should be represented.

Miss GADESSEN accepted both the amendments.

Mrs. BRYANT urged that idealism should not be carried to extremes. She should be loath to see established in England the German system of granting certificates awarded by the teachers and an Inspector under State control. It was a despotism for the pupils.

The resolution, as amended, was then put and carried.

Training of Teachers.

Miss BURSTALL moved the following resolution:—

"That this Conference reaffirms the opinion expressed at previous Conferences, that, in the interests of the teaching profession and as tending to the efficiency of school work, it is desirable that teachers should undergo a course of professional training after their academic course. The Conference, while expressing its appreciation of the value of the work of pioneers in the past, and of the training of many kinds now being given, recognizes that no one type or method of training is suitable for all teachers alike. It therefore welcomes further variations and developments to meet the new needs of the new conditions of secondary education."

In bringing it forward the Association desired to elicit an instruction to their representatives on the Registration Council. It was a compromise between the views of the extreme right and the extreme left—those who deemed training the one thing needful and those who looked on training as a somewhat questionable *parergon*. Clause I reaffirmed this belief in training as essential to a learned profession. Clause II deprecated the standardization of any one of the existing types or methods of training. The only thing on which she would insist was that whatever form training took it must stand in some definite relation to a University.

Miss M. G. YOUNG seconded. The Joint Committee on Training was awaiting a resolution of their Association confirming those passed by the Conference and by the Association of Head Masters. Convinced as she was by her own experience of the value of training, she was not at present prepared to enforce it on all teachers. Some head mistresses were prepared to undertake the work of training themselves, but they were already too fully occupied to add this to their other duties. Much of the adverse criticism she heard was based on the fallacy that a year's training produced a "trained teacher." A year's practical experience of teaching might seem to give better results, but a comparison of the trained and the untrained at the end of five years would lead to a different conclusion.

Miss RHYNS said that one reason for the low esteem in which training was held was the low calibre of those who took the training course. Training colleges, no doubt by reason of their poverty, did not act as a sieve and reject those who obviously had not in them the making of a teacher.

Miss WOOD (Burnley) emphasized the necessity of training secondary teachers on secondary lines. The elementary training colleges had definitely set to work to train students for the lower work of secondary schools, and the new type of county schools often appointed the best of such students who had obtained degrees at provincial Universities, but who had had no experience of teaching in any but an elementary school.

Miss LEAHY confessed herself a heretic. The personality of the teacher was everything, and no amount of training could supply its lack.

Miss PHILLIPS (Clifton) pressed the importance of the theoretical side. The morning might be devoted to study and the afternoon to practice. The student should have the actual management of a class under the supervision of the head mistress.

Miss POWELL (Newcastle) pointed out the danger of expecting too much. If a year's training were made obligatory, few would be able to afford a full college course. They must make up their minds whether they preferred mistresses with something to impart or those knowing how to impart it. Training would be more valuable after a year of teaching.

Mrs. O'BRIEN HARRIS (Hackney) believed in training, but did not think it essential. Untrained as well as trained teachers were needed in their schools. She would like to add to the resolution, "and, if possible, after a certain definite time of responsible teaching."

Miss RIGG held that the problem had not yet been solved. Variety of method should be encouraged, and any attempt to stereotype be fought against. The training colleges were endeavouring to give students more responsibility, and undoubtedly the best students were those who had had practice in teaching, but it was hardly fair to children to make them the *corpus vile*. Years ago Dr. Abbott had confessed to her father his grief at the thought of the harm he had done to children in his prentice days while he was learning his business.

Miss STEELE (Grey Coat Hospital) defended the training colleges against Miss Leahy's strictures. They could not at present afford to reject at starting unpromising students and made the best of them. So convinced were the governors of the new secondary schools of the benefits of training that they were appointing girls from the elementary training colleges in preference to untrained graduates.

Miss BRAMWELL (Eltham) wished to emphasize the word "professional." Teaching was not a mere craft that could be learnt by doing. There must be thought behind the practice. A professional body should not commend training because it paid, but because it was essential. The resolution would have been appropriate twenty years ago, but now it seemed to her only to mark time. She appealed to her fellow members to pledge themselves not to take untrained teachers if they could get trained ones.

Miss BURSTALL replied briefly. The resolution was then put (with "take" substituted for "undergo") and carried, with six dissentients.

A New Scheme of Training.

Miss F. R. GRAY invited the Conference to sanction as an alternative to a training college a scheme that she had drawn up at the request of the Sub-Committee. She had hoped that it would be one of several, but she found to her dismay that hers was the only one submitted. The scheme, which had been circulated as a supplementary Agenda Paper, is confined to graduates of any University in the United Kingdom. Any such may serve for two years in an approved school as a "teacher in training." An approved school is one in which at least half of the staff are graduates, and the Head Mistress must guarantee an adequate amount of efficient supervision and facilities for attending lessons. Salary to cover the cost of living. In addition, the teacher in training is required to write a thesis on a subject approved by a University examiner. The thesis must give proof of personal observation of the candidate's pupils.

Miss GRAY contrasted the present conditions with those that obtained when she was a Newnham student. Women's colleges were then in their infancy, and intending teachers who had taken the Higher Local were rarely public-school girls. No wonder that the clever student who found it easy to floor the examiners in the Mathematical Tripos was herself easily floored by a score of young geometers in a lively Fourth Form. Now the intending teacher had, as a rule, been to a high school and heard the best teaching that could be given. Example was better than precept, and she was not afraid to say that the woman who started with the methods she had unconsciously picked up in her school days would prove a more original and therefore a more stimulating teacher than the woman who had learnt her methods in the lecture room. In her experience most lectures were a sheer waste of time. The same argument applied with even more force to discipline. The teacher in training would learn the whole life of a school, in the playground as well as in the classroom, in the lowest and highest forms and in the common room. She would be guided, directed, and tested, beginning as a *répétiteur*, and if successful would end by taking three-fourths of a full mistress's work. And the tenderest hearted head mistress might be trusted (unlike the training colleges) to reject the failures. Lastly, the thesis would provide a goal to give direction to the probationer's reading and observation.

Miss GAVIN seconded. There need be no fear that the scheme if adopted would undersell the training colleges. It could only cater for the few, and the colleges could not exist without numbers. The scheme was an improvement on that drawn up by six G.P.D.S. head Mistresses in that it gave two years of school training for one, and substituted a thesis for a University examination. The colleges began at the wrong end. Discipline was the essential thing for a teacher, and psychology might come later.

Mrs. BRYANT much preferred the London scheme, which insisted that the student in training must be in touch with the University teaching on the subject. In Miss Gray's approved school there was no security that the staff would be qualified in the matter of teacher-ship. There was the further danger that governing bodies would substitute teachers in training for full mistresses to save expense.

Miss FAITHFULL hoped the Conference would not endorse the scheme without full consideration. Clause 1 not only superseded the training college, but it offered no security that the trainers in school knew their business. The attack on training colleges was not warranted by facts. The average number in a secondary training college was twenty, and most of them had schools attached which offered ample opportunity for practice under proper supervision. The value of a University degree for a teacher was overestimated.

Miss ROBERTSON (Christ's Hospital) said that the scheme would train specialists only, and those of the narrowest type. The student teacher would emerge knowing only one school and how to teach only one subject. She herself had felt the value of her training the moment she began to teach, and she felt it increasingly every day.

Miss F. GADSDEN believed in training students in school and in small numbers, but she felt that the scheme was defective in respect of theory, and needed amendment. She proposed that it be referred back to the Committee and brought up at the next Conference. Miss Gray and Miss Gavin consented, and the proposal was adopted, with one dissentient.

The Teachers' Register.

Mrs. BRYANT proposed four resolutions, all dealing with qualifications for admission to the Register. It was agreed to take these separately, and they were all carried with amendments, mostly verbal.

i. "That the standard of attainment required be (1) for secondary school teachers (as amended, teachers engaged in secondary teaching of literary or scientific type) that of a University degree or its equivalent; (2) for each other section of the teaching profession the appropriate qualification most nearly corresponding to this in the judgment of the Registration Council. Specialists for teaching in the junior classes of secondary schools or in preparatory schools should be dealt with in one of these sections."

ii. "That training of some kind should be required: its character, duration, and conditions to be approved either by the Registration Council itself or otherwise, as it may determine."

iii. "That sufficient educational experience be required: its character and duration to be decided by the Registration Council."

iv. "That the Association is in favour of a provision by which, with or without further conditions as the Registration Council may see fit, admission to the Register during a period of two or three years be granted to all teachers who have served for not less than five years in schools on the list of schools recognized by the Board of Education; that steps be taken to make this list complete as soon as possible, and that some similar procedure should, if possible, be adopted with respect to private schools of approved efficiency."

"Five years" was substituted for "two" in the original resolution, and the last clause but one was amended to meet objections taken to "such public schools for boys and girls as are not at present included in the list," both as ambiguous and invidious if a privileged status was claimed for schools like Harrow and Eton.

Mrs. BRYANT explained that Clause 1 required for all an adequate test of intellectual ability, but it was obviously impossible to demand of the kindergarten teacher, still more of the gymnastic mistress, a University degree. It was not necessary for everyone who taught in a school to be on the Register, and she had reason to believe that in insisting on a high intellectual standard they would be supported by the N.U.T. Private schools presented a special, but not insuperable, difficulty. Few measures were more needed than the regulation of private schools, and she would welcome an Act prohibiting any school that did not satisfy the Education Authority. In the Colony of Victoria they had begun in 1902 to organize secondary education by instituting a Register, and the public and private schools there were now in line with each other.

Mixed Schools.

A resolution, the wording of which was much debated, was finally carried in the following form:—

"That this Conference views with anxiety the increase of mixed secondary schools under the management of a head Master with a Mistress as assistant. In country places where separate schools for boys and girls are for financial reasons impossible, this Conference is strongly of opinion that it is of great importance that the chief assistant mistress should have a more clearly defined status than at present."

Miss ROBERTSON, who introduced the subject, stated that there were now in England and Wales 202 such schools, and that they were increasing in number. It appeared to be the general view of

the Committee that during secondary-school life separate schools for boys and girls were preferable. There was much evidence to show that the position of the head assistant mistress in relation to the head Master, the rest of the staff, and the governing body was not satisfactory. She had no voice in deciding or modifying the curriculum for girls, and their health often suffered in consequence.

In the debate that followed it was remarkable that not a voice was raised in favour of mixed schools, and that no one advocated a dual rule with parity of powers. Only one speaker (Miss Escott, Sheffield High School) asked why it should be taken for granted that the head of a mixed school should necessarily be a man, and no one took up the challenge.

Miss FAITHFULL proposed:

French Polish.

"That the tendency to curtail or interrupt the general English education of a girl before the age of eighteen, in order to send her abroad to acquire a conversational knowledge of modern languages, is injurious to her character and mental development, and should be discouraged."

She said that the custom referred to in the resolution was the fashion in some schools, and it would soon become the fashion in all schools. The objections were that the girl left school at sixteen and a-half to seventeen, at the very moment when she was of most use to the school and the school to her, and when she was awakening to a keen interest in work for its own sake; the head girls were needed as a power in the school. Girls were often sent to a place quite casually chosen, and did not go to a school. Discipline was removed at a time when supervision and guidance were most needed. The girl was her own mistress, and returned not even with the knowledge of French or German, music or art, which she had been sent to acquire, and with nothing but a veneer of foreign manners and acquaintance with the latest style of French hair-dressing. Six months was too short a time to be of any good. She asked the Conference to express a strong opinion, in order to strengthen the hands of head mistresses who suffered from this fashion.

Miss BENTINCK-SMITH seconded. The point was that the parents were acting under the mistaken impression that they were providing their children with what, in the eighteenth century, was called "The Grand Tour," only it was limited to six months in Paris or Dresden. An exchange of pupils, by which girls would get several years in a foreign school, would be much wiser.

The resolution was carried.

Spelling Reform.

Miss GAVIN introduced the subject of Spelling Reform and proposed:

"That this Conference is of opinion that a reform of English spelling is desirable on educational and Imperial grounds."

This was seconded by Miss WALKER, but, owing to lack of time, was neither debated nor put to the meeting.

Vote of Thanks to the Hostess and her Staff.

Miss DAY (Grey Coat) proposed, and Miss HAIG BROWN seconded, a vote of thanks to the hostess and her staff.

This was carried by acclamation and responded to by Miss F. R. GRAY.

The Conference then terminated.

PROF. GILBERT MURRAY AND AMERICA. AN INTERVIEW.

IN the spring of the year Prof. Gilbert Murray exchanged an Oxford lecture room for a class of students at Amherst College in New England. Forty of them read "Iphigenia in Tauris," and six did more advanced work. One of the best of the six was the son of a Croatian immigrant, who is now a carpenter in New York; others were sons of millionaires; so that America, the absorber of nations and the creator of wealth, was typically represented in that small company. Besides this regular teaching, Prof. Murray gave courses on Greek Religion at Columbia University, and on Greek Drama at the Lowell Institute in Boston, besides a few isolated public lectures elsewhere. His large audiences, running to seven and eight hundred, seemed to testify to remarkable public interest in these somewhat abstruse subjects.

I had an opportunity recently of asking Prof. Murray to

give *The Journal of Education* impressions of his visit.

"The attack on classics," he said, "has for the moment carried all before it in America. The schools are rapidly becoming unable to teach Greek, and I heard again and again the story of clever boys and girls who had made great efforts to be taught Greek and found it practically impossible. And even in the greatest Universities, like Harvard and Yale, the number of students taking Greek has become very small. Latin is still standing; and, owing to the increase of population and the immense spread of education in general, there is actually a deceptive increase in the numbers taking Latin. But the Latin teachers I met were only one degree less despairing than the Greek. This was more or less what I expected. I knew also that the Amherst trustees, at whose invitation I went out, were anxious about the situation and felt strongly the loss of this classical substructure. What surprised me was the wide prevalence of the same feeling. On all sides I met people who were deploring the effects of the recent worship of the 'practical' in education—the cry for 'vocational training,' for indiscriminate choice of subjects on the ground that one subject is as good as another, and the rejection of the severer and less immediately paying studies. Of course I make allowance for the fact that people who thought in this way naturally came and spoke to me, while those who thought otherwise stayed away; I allow also for the instinctive sympathy and politeness of American audiences. But the signs of some sort of reaction are quite visible; the stand made at Princeton, the stiffening of the curriculum at Amherst, the very important modifications introduced by President Lowell at Harvard into the old absolutely 'free' curriculum.

The trouble is, perhaps, rather particularly at the door of Harvard. Of course, a big democracy in a hurry to be educated would naturally chafe at the slow classical training; and, of course, it was desirable that schools and Universities should be provided, lots of them, and big ones, to give the cheap, rapid, and practical education that was wanted. But it does seem a pity that there should not have remained one or two of the old and great Universities, to stand outside the stream and provide not what was most desired, but what was educationally best—something deeper, solider, slower, and, in that sense, more expensive. It was president Elliott, a man of very great distinction and influence—his subject was Chemistry—who led Harvard into the one-subject-as-good-as-another policy, and so prepared the destruction of Greek in the eastern States. Elliott was a great man and the experiment was a good one to make, though I do wish it had been tried on a body less noble than Harvard. For when Harvard abandoned Greek as a foundation for other studies it seemed impossible for other Universities to demand it and 'unpractical' for schools to teach it."

I was about to interpolate a question, but Prof. Murray anticipated me. "Do I want to restore 'compulsory Greek'?" On the contrary, I want to abolish the absolute compulsion even at Oxford. I think there should be dozens of Universities giving a cheap sound modern education, though providing classics for those who specially want them; and at the same time one or two Universities which demand a classical foundation for all their teaching in arts. The Princeton system seems to me just right: Greek and Latin necessary for the degree in Arts (B.A.), not necessary for the degree in Science (B.Sc.). The same line is followed in various Western Universities, such as Colorado and California. These places may well be performing an immense service to the education of the world. You see my point? A man may want to learn English literature without being bothered with classics. All right; let there be places which teach him his Milton and Shelley on that basis. Only let there also be one or two places which say: 'No. When we turn out a man with First Class Honours in English Literature, saying he knows Milton specially well, we mean that he knows Milton's sources, understands classical references, and can feel Virgil's style and Homer's style.' That is a much slower and more difficult, but also a much more thorough, kind of knowledge.

There ought to be one or two Universities which conduct their higher teaching on the assumption that all students know some Latin and Greek.

"I think some such differentiation will come about in America. The first need of that vast promiscuous democracy was education of some sort—something effective and rapid and not too hard; and the country rose to that need with splendid public spirit and success. I do not suppose the world has ever seen such an educated nation, or such enormous gifts given by individuals to a public and ideal object as have been, and still are, given to education in America. And it is mere silliness to sneer at these gifts as 'material things.' They come from a genuine zeal, a zeal that one finds in the teachers and the taught as well as in the givers. The first need is now satisfied, or soon will be. There will then be the need for some education that is not common and not meant for everybody; for an education meant for the ablest men and women, who will repay a long and thorough and quite un-utilitarian training. And in America, as soon as a public need is seen, some one will give his work or his money to supply it. Fortunately the race of fine Greek scholars is not dead in America. Gildersleeve and Goodwin have trained worthy successors."

Prof. Murray had hinted at certain splendid features in the American Universities. I asked him to tell me what impressed him more particularly.

"The libraries to begin with. Not only are the libraries themselves very rich and convenient and well equipped, but they are admirably organized and easy to use. For instance, in most Universities a Professor has not only a special teaching room with a library of reference books, but his room is in communication with the general University library, so that in a few minutes he can have almost any book he needs brought to him. Then there is the general keenness and hopefulness of the members, both old and young. There is a sense of life, of good will, of constant increase and improvement. Then there is the delightful feeling that higher education is not a privilege of the rich. True the 'young bloods' at Harvard and Yale and Princeton will probably spend as much as the same class at Oxford and Cambridge; but in many places University teaching is free, in others the fees are very small. Anyhow, the poorest people can get to the Universities, if they are good enough."

Prof. Murray spoke in appreciation of the way men who have "gone down" keep up their connexion with their colleges. The students who graduate in a particular year, for instance, constantly combine to make gifts to their college. The great Stadium at Harvard served for illustration of this spirit; and Lady Mary Murray reminded us of the splendid library at Smith College with its sixteen hundred girl students. As I listened it seemed to me that our British Universities lose much by not keeping old students more definitely in touch with them. For want of some distinct organization, memories alone serve to bind us to the haunts of our student days. Our schools have old boys' associations, but not our Universities.

There was one other comment to make. Prof. Murray fears that athleticism and the social amenities of American University life tends to make too large a claim on time that ought to be devoted to austerer ends. "It is odd, too," he added, "and to an Oxford man disappointing, that they have, as a rule, no Honours Degree, only a pass. They make up for this difference, in part, by having more post-graduate work than we. But I think we gain greatly by the elasticity of our Honours courses, and the encouragement they give to initiative and artistic understanding. A pass course with an examination at the end is almost sure to be rather mechanical, though, to be sure, their pass work seems a great deal better than ours. We neglect our Pass men for the sake of our Honours men."

Prof. Murray reverted to his first theme. He has returned from America with a deepened conviction that the complete abolition of Greek at Oxford and Cambridge would probably kill the subject in the schools, except in a few rich or specially severe ones. That is the lesson he has read from the West of the Atlantic.

SYDNEY WALTON.

THE LEIPZIGER HOCHSCHULE FÜR FRAUEN.

THE Leipziger Hochschule für Frauen, a unique institution in the system of German education, was opened on October 29, 1911. Far, however, from being an entirely new venture, it may rather be regarded as forming the result of a movement extending over forty years.

In 1871 Frau Henriette Goldschmidt founded in Leipzig a Society for Education in Family and National Life ("Verein für Familien- und Volkserziehung"), whose efforts were to be directed towards supplementing the education of women as women. She was inspired chiefly by two of Friedrich Froebel's principles. The first is well known: "Let us live for our children!" ("Kommt, lasst uns unsern Kindern leben!"). The second is less well known: "The characteristic of our time is the raising of woman to the recognition of her merited vocation, especially raising her above her instinctive passivity, and placing her, from the point of view of her nature and her vocation in rearing humanity, on precisely the same level as man" ("Es ist das Charakteristische der Zeit, das weibliche Geschlecht seiner instinktiven, passiven Tätigkeit zu entheben und es von seinem Wesen aus, und um seiner Menschheit pflegenden Bestimmung willen, zu ganz gleicher Höhe wie das männliche Geschlecht zu erheben").

The Society began by founding a Kindergarten. A year later it set up a college for the training of Kindergarten teachers; in 1874 it inaugurated a series of "Scientific Addresses for Women," conducted by professors of the University of Leipzig. The Society made an effort to avoid the qualities which have brought reproach on many *Kindergärten* and kindred institutions; but the success of these ventures by no means satisfied Frau Goldschmidt. It had not been her wish to merely supply a training for the profession of *Kindergärtnerin*: she had looked on the Kindergarten, though essential to the child's education, as but one stage in the education of the mother. "Not every young girl," she said in one of her publications on the subject, "needs to be a *Kindergärtnerin*, but every mother should to a certain degree be one." This, then, is the leading principle in the whole movement—the education of the mother. And of this principle Frau Goldschmidt has never lost sight, from the first founding of her Society until the opening of the *Hochschule* last autumn.

The next step taken by the Society was the expansion of the "Scientific Addresses" into a regular *Lyceum* in 1878. It was the first attempt in Germany to put Froebel's principles into practice; and the words, "Education is the vocation of woman in modern life" ("Der Erziehungsberuf ist der Kulturbederuf der Frau"), construed in their best and widest sense, might be taken as the motto which has guided its energies and the choice of the subjects of instruction. The "Scientific Addresses for Women" were continued at the *Lyceum*, and an interesting variety of subjects has been touched on in the thirty-two years of its existence. The primary idea was not lost sight of, and subjects such as "Energy in the Economy of Nature" (1894) or "First Aid in Accident Cases" (1883) stand side by side with lectures on Goethe, Schiller, and Frederick the Great. In addition courses for younger women were arranged, which gave preparation to governesses, to *Kindergärtnerinnen*, and to the teachers in Kindergarten training colleges. From 1878 to 1910 the *Lyceum* had six hundred regular students and two thousand five hundred members taking isolated courses. But never once during these thirty-two years did Frau Goldschmidt lose sight of her original intention, and in almost every annual report she repeated her conviction that the *Lyceum* must expand into a *Hochschule*.

There must be a technical school where a woman might learn the technicalities of her profession as a woman. Frau Goldschmidt was not dissuaded from this conviction by the fact that, since the founding of the *Lyceum* in 1878, the Universities had been thrown open to women. On the contrary, she was strengthened in it. For she was persuaded that the

need of knowledge in wide circles of women is not covered by the professional study afforded in a University.

At last, in 1909, by a generous gift, her ideal could be realized, and the first German Technical School for Women was opened in October last as a result. It has three aims—to give the necessary culture to all women who desire to take part in the intellectual life of their nation and their age; to prepare them thoroughly for the performance of their educative duties as mothers; and to enable them to devote themselves with far-sightedness and understanding to the manifold needs of the age in the community, in the State, and in society.

In accordance with these aims it affords instruction this year in—philosophy and ethics; in art, history, and literature; in political economy and sociology; in biology and botany; and in psychology (especially of children) and pedagogy. There is a course in social hygiene, with observation of sanitary arrangements in various institutions. The course in the care and management of infants is practical as well as theoretical, for practical work is undertaken in a home for infants in a Leipzig suburb, and an institution in the nature of a home or crèche is shortly to be added to the school. A course of lectures (with an investigation class) in economics, one on the women's movement, and one on the position of women under the law in the principal civilized countries of the world complete this side of the school's activity. Geology, physics, and chemistry are to be added to the curriculum very shortly.

The school, however, carries on at the same time the work which the *Lyceum* began, by providing a complete course of training on one side for teachers in kindergarten training colleges, *Frauenschulen* (explained below), and similar institutions, and on the other for those who wish to take up positions under public bodies, such as that of health visitor, inspector of prisons and factories, female assistant to the police, and the like. The former of these courses provides more advanced study on the side of psychology (including the pathology of child psychology) and pedagogy; the second specializes rather in hygiene, sociology, and economics, and includes the care and management of infants and the domestic economy of a workman's home. Both provide ample practical instruction in suitable premises, and require the student to attend some lectures on literature or philosophy in order that her general culture may not be neglected. The fees for instruction are moderate, and the number of students already enrolled shows how much the institution is appreciated. The regular courses, for which evidence of suitable preparation is required, are attended by twenty-six students; irregular students, who attend lectures of their own choice, number nine hundred.

It is of particular interest to us to draw a comparison between this institution and similar efforts in England. We, too, have only one institution where the training of a woman in the duties of a home is on a University standard. It is the course provided in the King's College for Women (University of London) in Kensington Square. Here we find that the woman's general education is not an essential part of the course, as in the Leipzig institution; and the arrangement of the studies tends to be somewhat more practical and direct, with rather less choice of subjects on the part of the student. The ordinary one-year course there includes applied chemistry, sanitary science and hygiene, economics of the household and household work, biology and either bacteriology or psychology.

This department of King's College also trains teachers of home science for schools, or they may find preparation with us in the special department of the Clapham High School for Girls. The instruction there is similar, but it provides in addition courses in teaching practice, first aid, and care and management of infants. But of independent ventures of this description we have cases in Germany also in the *Haushaltungsschulen* in various towns. These are, however, never in connexion with a girls' school or college; whereas in England, to treat for a moment of the mere instruction of home science, domestic economy, cooking, &c., apart from the training of teachers, we have such a course as a thoroughly

developed part of the curriculum in some high and a large number of secondary schools. The only attempt in Germany to make home science a regular part of the course in a girls' school is the *Frauenschule*. The *Frauenschule* is a recent effort on the part of the State (*i.e.* the *Kultusministerium*) to provide education in the home arts for girls. It is an alternative to the Matriculation course in girls' high schools, and from the time of its inauguration three years ago no girls' school which did not already possess a Matriculation course has been allowed to institute one unless it at the same time provides a *Frauenschule*. As yet, however, very few *Frauenschulen* exist, and, where they do, the organization and instruction are still in a very unsettled and undeveloped condition. This side of girls' education is therefore decidedly in advance in England.

The Leipziger Hochschule für Frauen seems, however, to be a very genuine effort, well organized on broad, educative lines, and differing noticeably in one important principle from the English college of a similar nature. The aim of the English educator is to provide a clever housewife and a good controller of the home from a business point of view; the German rather emphasizes that trend in the instruction and subjects which will produce a wise and capable mother.

THE TEACHING OF LITERATURE IN A FRENCH SCHOOL.

By S. LANDMAN.

TEACHERS of English literature will find in M. Bezard's monograph* a multitude of useful and original hints on the teaching of language and literature. The author has had the ingenious idea of writing the book in the form of a "journal," giving a verbatim report of a year's work in the class preparing for the *baccalauréat*, which is a trifle stiffer than the London Matriculation. The writer of this review has had the privilege of seeing M. Bezard at work on more than one occasion, and has found the classes fascinating in interest and lively in manner. In the school year the pupils have to cover the chief literary productions from 1600 to 1900, and at the same time be taught how to compose a decent essay, the examination at the *baccalauréat* consisting of a *dissertation* on a literary subject. The examiner's aim is to see if the candidate is familiar with the great masterpieces of literature, and if he can express his thoughts with a sufficiency of clearness.

In order to cover the requirements careful selection is incumbent on the teacher. Manuals and other cram-books are avoided. Instead, M. Bezard dictates once every fortnight *sommaires* of the classes to come. The first part of these *sommaires* gives the book or books to be read, while in the second an extract from the author in question is indicated for careful reading and subsequent discussion in class. I have seen M. Bezard, pen in hand, dictate these *résumés*, writing them himself at the same time as the pupils, and giving life to the otherwise dull process by apt interruptions and lively remarks. At the end of each lesson, which is mainly dialogue, the dictating process is repeated to fix the substance of the hour's teaching. These notes are taken on *feuilles volantes*, or loose leaves, which are indexed by the pupil himself. I have observed the interest taken by the pupils in this entirely independent indexing and the help it afforded them to a better understanding of the ensemble of the literary productions of the period.

The books indicated in the *sommaires* are in the class library, to which each boy contributes a half-crown for the year. On library days the teacher comments on any new books he has bought, or any books suggested for purchase. The feature which struck me with regard to this, as in every part of M. Bezard's teaching, is the constant effort to bring the subject into relation with the pupil's everyday life. The great danger of their considering literature as something

* *De la Méthode Littéraire.* Par J. Bezard, Professeur de première au Lycée Hoche. (Paris, 1911: Libraire Vuibert. 1p. 738. 5 fr.)

apart from life is avoided by constant applications to current events, by references to up-to-date works, newspapers, or reviews bearing on the subject.

The correction of essays is naturally of the first importance for the *baccalauréat*, and here M. Bezard is incomparable. A devoted disciple of the stern discipline of the old Rhétorique, he never tires of enforcing the value of careful arrangement of paragraphs (each of which expresses a single and simple idea), and of the somewhat artificial, but necessary devices for securing a clear, limpid style. The correction in class of essays on subjects like the following (which, by the way, are really literary subjects) are wonderfully helpful: "Un oratorien, professeur de rhétorique au Collège d'Orléans et janséniste convaincu, remercie Etienne Périer de lui avoir envoyé la première édition des 'Pensées' de Pascal. Il lui fait part de ses réflexions, après la lecture du chef-d'œuvre inachevé" (1670); or, "Lettre d'un souscripteur de l'Encyclopédie à Diderot après la retrait du privilège en 1757."

How to arrive at the framework of an essay, what to omit and what to select for insertion, and the many other requirements of a literary effort, are thoroughly discussed in a most interesting manner all through the book. The remarks of the pupils, carefully registered, are not the least interesting feature.

Another style of subject opens the way for originality in the pupils. Thus, the subject given by M. Bezard for the prize essay was: "Quels sont, parmi les ouvrages que vous avez lus depuis trois ou quatre ans, ceux dont vous croyez avoir retiré le plus de profit?"

I have mentioned only a few of the many features of the work. By what it omits, as well as by what it includes, M. Bezard's book is remarkable. No more dry chronological arrangement in the style of an encyclopædia, no more textbook materials to be stuffed into the memory and recited or written down without having digested them, on the day of the examination; no more details, disconnected and disjointed. M. Bezard's rational methods will commend themselves to all teachers who seek to make literature a living subject.

AN EASTER HOLIDAY IN FLORENCE.

A HOLIDAY with seven schoolgirls in Florence presented so many anxieties in prospect, and now in retrospect shows such a golden sheaf of success, that it may be worth while to set down some of the points of such an experiment. There may be others who are balancing, much as I balanced, its allurements and anxieties, and for such a few notes and comments may have enough weight to dip the scale towards enterprise.

And, first, a word with regard to expense. This is by no means an experiment for children of wealthy parents alone. Many people who cannot afford to *take* a daughter to Italy will seize an opportunity of *sending* her, and will make a great effort to that end. There is considerable difference between the total cost of two persons' expenses and one and one-seventh shares. For guidance, let me give a few particulars. We were a party of eight, and away twenty-two days. We broke the journey going and coming; we were lavish in the matter of "entrances"; punctual, but frugal, in the matter of tea. We did not reduce luggage to an uncomfortable minimum, but were well provided with books and sufficiently with clothes. Our quarters were central, food was excellent, and the total expense for each girl worked out at £19, this sum including a share of the chaperon's expenses.

Florence is an ideal spot for such a holiday at Easter. It is generally cool enough, yet sunny enough, for sight-seeing to be unexhausting and country walks delightful. It is the loveliest treasure city in the world, and to these enchantments adds full measure of open-air joy. The tram system, which

stretches long fingers to outlying villages in all directions, makes an endless variety of rambles possible, on tracks through warm vineyards, where the sappy syrup drips from the shoot, or on the fine bare slopes of the Apennines, where one guesses the way by outlying church or castle.

As a teacher who every year strips off further rags of faith in talking about things, I had no wish to lead my party about Florence and lecture to them; but we had done a good deal of preparation the preceding term. We had in a sense shaped and smoothed the sockets in which to slip impressions, and the impressions were received individually or in companies of twos and threes, as the accident or interest of the moment would have it. Free interchange of opinion, disagreements in taste, comparison of different points observed—these were the invaluable educative agents, so that all learnt and all taught.

Some part of this, as well as the free sharing of counsels, arrangements, and responsibilities, I owed most certainly to being single-handed. (It is so much more possible to absorb into a set of individuals one member of different age, standing, or even race; two are considered company for each other.)

Whilst the holiday was under discussion two classes of comments were freely expressed. Many people said "How fortunate for the girls!" A few said: "How fortunate for you!" It was pleasant to feel that, despite kind parental emphasis on the first point of view, the girls themselves frankly held both. They had no doubts at all that anxiety would be swallowed up in pleasure, and that the pleasure was enough to go round. And they were right.

One head mistress at least has had enough enjoyment in this holiday to wish to repeat it, and she would gladly recommend it to any who, like herself three months ago, contemplate such an undertaking with great searchings of heart.

THEODORA E. CLARK.

COLONIAL AND FOREIGN NOTES.

FRANCE.

Britain has her Empire Day; she might do much more in the way of educative celebrations. For France, Education by Festival.

M. Verlot in the *Annales de la jeunesse laïque* has been demanding "Fêtes civiques," such as Condorcet, in 1792, advocated, Quatremère de Quincy and François de Neufchâteau approved. To-day, says M. Verlot, when religious opinions have been strongly shaken, the ideas of country, solidarity, fraternity should be exalted in festivals. The human mind must be initiated into all that is beautiful and noble. We must sing before crowds about the different phases of life, about human toil, and the joys of effort. Days must be fixed on which to extol the love of France, those private virtues which are the sources of public virtues, and the great, permanent feelings that are capable of shaping the national conscience. We should institute festivals to which "l'exécution des chœurs, traduisant les sentiments collectifs, donnera le caractère, la grâce française et l'élan qui conviennent." M. Verlot suggests particular celebrations—in spring a "Fête de la jeunesse," in summer a "Fête de l'agriculture," in autumn a "Fête du départ de la classe," when the young would render homage to the old, and in winter a "Fête de la Noël laïque," in honour of wives and mothers. A secularized Christmas! The notion will shock most of our readers. Yet there is in M. Verlot's article much to stir thought. Could we not both add to the number of our national festivals and celebrate them in a more elevating spirit? Should there not be appointed days on which we might "sing before crowds" not class hatred but solidarity, not the hardships of labour but its excellence and ennobling power?

And we make so little use in education of our dead, who, did we let them, would still speak. On Sunday, May 19, Paris and many other towns of France kept the five-hundredth anniversary of the birth of Jeanne d'Arc. Peace and reconciliation were in the air. Why, asks the *Journal des Débats*, should not a celebration so fine and unifying receive some legal sanction? Years ago the Senate voted the

institution of a "Fête de Jeanne d'Arc"; but the project has never been realized. The humble peasant girl who saved France in the fifteenth century will soon be canonized. Is that to prevent the Republic from adopting her as a national heroine, from uplifting her to inspire the women of France? In this strain the great French journal writes. Perhaps our neighbours have by this time forgiven us for our part in Jeanne's tragic history; with friends the memory of mutual injuries must be not indelible. To-day, at any rate, we will cast no torch at her. Yet for domestic use and as an inspiration to our own girls we should choose a saint of a more modern and authentic sort—such, for example, as Florence Nightingale.

Is it not recorded in Littré that *concours général* means "compositions, par classes respectives, entre l'élite des élèves des lycées et collèges de Paris et du lycée de Versailles"? The term grew obsolete; for the competition, as in the due course of history we chronicled, was abolished. M. Guist'hau, the present Minister of Public Instruction, proposes to revive it, and, if the Chamber votes the sum set down in the budget for this purpose, the "Concours général" will, next year, rise like a phoenix from its ashes. M. Guist'hau, in that case, will have his name honourably associated with a reform which is a significant return to the traditions of the past.

GERMANY.

No need to talk of reconciling educated England to educated Germany! There has never been any estrangement. Yet between the two nations are misunderstandings which it were well to remove. **About History.** To this end Dr. C. E. Gleye makes an interesting proposal in the March number of the *Vierteiljahrshäfte des Vereins für das Deutschtum im Auslande*. He argues that, whilst many superfluous books are written, some necessary books remain unwritten. And of the unwritten necessary books one should bear the title "Die Darstellung der deutschen Geschichte in den geschichtlichen Lehrbüchern des Auslandes"—How German history is told in the history-books of other nations. Strange, he says, are the views of foreigners, above all, of Englishmen, Russians and Frenchmen, about German history; and he condemns, in particular, the textbook of the Russian compiler Ilowaisky. Moreover, not only should false conceptions be exploded, but just notions should be diffused. Thus for Englishmen there ought to be prepared, and circulated among them, a short account of what Germans have done to justify their claim to a place in the sunlight. Dr. Gleye is right. German history is an ill-used subject in England, and a widened knowledge of what *Deutschtum* has meant in the progress of human culture might be as useful to us as many Dreadnoughts.

Friendly relations between peoples are fostered when their scholars meet to exchange fertilizing thoughts. **The Neuphilologentag at Frankfurt.** At the Frankfurt Neuphilologentag, in the closing days of May, France was represented by Prof. Brunot, whose theme was "L'Autorité en matière de Langage," and England by Dr. Sadler, the Vice-Chancellor of Leeds, who, dealing with "England's Debt to German Education," made a handsome acknowledgment of a real obligation. The *Frankfurter Zeitung* in publishing an abstract of this discourse described it as "ein wertvoller Beitrag zur deutsch-englischen Verständigung," a valuable contribution to a mutual understanding between Germany and England. We might borrow a little more from Germany. A series of eminent philosophers from Fichte to Paulsen has taught her to regard national education as the most sacred of duties; we might take from her the lesson that it is not to be deemed a jest and administered in the spirit of comic opera. Would it be possible in Germany that a Minister of Education who had just begun to learn the rudiments of his business should be called off to pilot a Franchise Bill?

UNITED STATES.

Germany had its *Jugendwehr*; like England the United States was rejoicing in the Boy Scout. What could be done for the girls? The Camp Fire Girls were incorporated under the laws of the District of Columbia in March 1912. The aim of the founders of the new league is to apply the power of organization to the promotion of such activities for girls as will most effectively make for physical vitality, personal efficiency, and spiritual and intellectual vigour, as well as to preserve the largest possible amount of beauty, inspiration, and romance in their daily lives. A group of girls (who should be over ten years of age) wishing to affiliate themselves to the national association, must first find a suitable woman to act as

guardian. Experience shows that the most desirable number of members for a local group is about twelve. There are three grades of Camp Fire Girls: wood-gatherers, fire-makers, and torch-bearers. The law of the Camp Fire is to seek beauty, give service, pursue knowledge, be trustworthy, cling to health, glorify work, be happy. Dr. Luther H. Gulick is at the head of the organization, and the national head-quarters are at 118 East 28th Street, New York City.

Does not this seem to be an admirable way of helping big girls?

The Woman Teacher and the Boy.

Teachers used to say "keep their minds occupied"; the new education adds emphatically "and their bodies." The same principle applies to the big boy, as to whom we have often wondered how he is affected by the woman teacher to whose guidance, in the United States, he is so commonly entrusted. The subject is touched on by a recent writer in the *New England Journal of Education*. We learn that "there is always in the relation of a boy to his woman teacher a certain condescension, the feeling of superiority of sex being more marked in the adolescent period than it will ever be again." Often, if the teacher has remained womanly and lovable, her older boys will constitute themselves her knights and defenders. Sometimes a romantic attachment springs up. It happened at a village in Long Island within the course of the past year that a boy of eighteen became enamoured of his teacher, who was thirty-five years old. The lady settled the pedagogic difficulty by marrying her pupil.

At the San Francisco meeting of the National Education Association the Board of Directors was, as we reported, **The N.E.A.** for holding the next session at St. Paul, but referred the matter to the Executive Committee. The latter body, owing to reasons with which we have no concern, has decided that the meeting this year shall be at Chicago. The date is July 6 to 12. Among the subjects to be discussed is the Montessori method.

CANADA.

The Minister's Report for the year 1911 on education in the Province of Ontario indicates great progress in many directions. As more schools are needed more are supplied. **The Ontario Report.** Despite the higher cost of education, there has been no shrinking from the heavier burden entailed. The economic conditions at present affecting all civilized countries involve higher salaries for teachers, since the scale of remuneration for every kind of professional or other work has been advanced. The cost of building has also greatly increased, and it is much to the credit of the people in Ontario, both in urban and in rural areas, that the new school houses erected are of the best modern type and ensure comfortable and healthy conditions for the pupils. The development of courses of instruction likewise necessitates heavier expenditure for equipment both in scientific apparatus and school libraries. Owing to such causes during the last five years, the cost of primary education alone has risen from about 6,100,000 dollars in 1905 to 9,300,000 dollars in 1910. The teachers get some share of the increased expenditure. In 1910 the average salary of a man teacher in rural schools was 508 dollars, in urban 1,089 dollars; of a woman teacher in rural schools 431 dollars, in urban 565 dollars—all these salaries indicating an upward tendency. The prosperity of the Province causes many teachers to be drawn into more lucrative callings, and the West often looks to Ontario for its instructors. Hence a lack of teachers is sometimes felt. The qualifications of those employed are improving; teachers trained in the Normal Schools are steadily replacing those with Third Class Certificates.

The proportion of average attendance to the total registration has risen from 40.82 in 1867 to 60.84 in 1910. **Some Details.** The Minister states, however, that in some parts of the Province the enforcement of the law requiring compulsory attendance leaves much to be desired, and there seem to be seventy-two towns and villages which have no truancy officer, or, at least, make no report on truancy. As to what is termed comprehensively technical education, it has been stimulated by the Act of 1911, which provides machinery for the establishment of industrial training classes. Advisory boards have been formed in a number of urban centres to organize such classes. Eighteen courses supply agricultural instruction in connexion with high schools or continuation schools. A newly appointed Director of Elementary Agricultural Education inspects school garden work—the school gardens numbering thirty-three at the close of 1911, as against seventeen in 1910. He writes: "Everywhere throughout the world there is evidence of a strong desire on the part of educationists and Governments to have the schools give some measure of instruction in agriculture. Nowhere has the

problem been solved completely. The plans that have been in operation in Ontario for the past five years give promise of a very satisfactory solution. To promote the work, teachers are trained specially at Guelph, material is sent for gardening purposes, special grants are paid both trustees and teachers, practical help is given by the District Agricultural Representatives, and the teachers are assisted by charts, bulletins, and instruction sheets. In no other part of Canada nor in any State of the United States has any better scheme been devised; nor, indeed, has greater progress been made."

WESTERN AUSTRALIA.

Continuation Schools. Mr. Cecil Andrews, Inspector General of Schools, after collecting information in Europe and North America, has drawn up a Report upon Continuation Schools and the Question of Compulsory Attendance at them. He shows us the present state of affairs in an admirable conspectus, and his investigations lead him to recommend, among other things: (i) That the State should make attendance at continuation classes a condition of employment in Government Departments for those under a certain age. (ii) That, wherever possible, arrangements should be made for the holding of the classes in the daytime during working hours. (iii) That a Bill should be introduced giving power to proclaim compulsory attendance in any district for those under a fixed age, such compulsion to be applied at first only to those who leave school after the passing of the Act. Western Australia, we venture to prophesy, will give some effect to these recommendations. As for England, we should like to exhibit the state of the case to our kinsmen beyond the seas pictorially. There is somewhere a picture of Hercules contending with Death for the body of Alcestris; with a few changes it might be made to represent Educated England contending with the Board of Education for possession of Mr. Pease, our Minister. Hercules, it will be remembered, won the fight. At present Mr. Pease is still in the bondage of iniquity, and, far from promoting Continuation, he even threatens to destroy the character of our secondary schools as places of liberal education!

NEW ZEALAND.

The New Zealand University. "The University Reform Association," or, more simply, four Professors of Victoria College, Wellington, are engaged in an assault on the constitution of the New Zealand University. Their chief complaint is that it is purely an examining University, and that the teaching staff have no part or lot in awarding degrees. This is so far well founded that the chief examinations are conducted by Englishmen in England, but the adequate defence is that a sufficient number of competent examiners outside the University staff is not to be found in the colony. It should also be stated that candidates before presenting themselves for degree examinations are subject to a preliminary test, and must satisfy their own professors. The second complaint is that the teachers are not adequately represented on the University Senate. To this, too, it is a sufficient answer that of the twenty members constituting the Senate nine are University professors.

JAPAN.

Sex Education. There prevails in some quarters a notion that Japan has made greater progress in respect of *Aufklärung*, or sex education, than the nations of the West. This is an error. The subject is studied by Prof. P. A. Smith, of Hiroshima Normal College, in the *Journal of Educational Psychology* (III, 5, 257 ff.). Japan, he tells us, has not yet much to teach the world in this matter. The state of affairs may be summed up thus:—"There is a good deal of 'freedom of speech' on all sex matters among all classes of people as compared with our Western standards of modesty (or prudishness), and the child gets a good deal of knowledge in this way. But his knowledge is not at all adapted to the needs of the case, and probably does more harm than good to his moral development. In the schools there is, for the boys, little or nothing. For the girls there is some excellent instruction, but it is imposed from above by the educational authorities, and is not given in response to a demand for such work on the part of the general public. It therefore loses some of its force by not being an outgrowth of sentiment among the mothers and fathers of the girls. Moreover, in some cases, at least, the full value and the importance and significance of such instruction are not well comprehended by those who give it. And behind and around all this is a public sentiment on questions of sex morality that leaves much to be desired."

THE TEACHERS' GUILD OF GREAT BRITAIN AND IRELAND.

[By a resolution of the Council of June 19, 1884, "The Journal of Education" was adopted as the medium of communication among members of the Teachers' Guild; but "The Journal" is in no other sense the organ of the Guild, nor is the Guild in any way responsible for the opinions expressed therein.]

The twenty-eighth Annual General Meeting was held at the Grey Coat Hospital, Westminster, on Saturday, June 1, 1912. The President and Chairman of Council (the Rev. Canon H. Wesley Dennis) took the chair.

After the notice convening the meeting and the minutes of the twenty-seventh annual meeting had been read by the General Secretary and confirmed, the Chairman presented the Annual Report for the year 1911-12. The Chairman called attention to the following points in the Report:

I. The Teachers' Registration Council.—There was no doubt that those who had studied the history of the Registration movement were thoroughly satisfied that the Teachers' Guild had contributed in no small degree to its ultimate success.

II. University Education in London.—The evidence presented to the Royal Commission by the Guild had received a very sympathetic hearing, but the matter was confidential till the appearance of the Blue book on the subject.

III. The Joint Committee on Public Aid to Private Schools.—The Resolutions of the Conference, which it was hoped would form the basis of articles in the Press, had been adopted only after the most careful consideration, as the Council felt that private schools played an important part in the education of the country, and would be sorry for the country to lose the opportunities for enthusiasm and independence which they offered.

IV. The Special Committee which prepared evidence on Playgrounds of Elementary Schools.—This Committee had given an immense amount of trouble to its work, the result being that a Report full of the most valuable suggestions was placed before the Board of Education's Departmental Committee on the subject.

V. The Secondary, Technical, and University Teachers' Provident Society.—The Guild had co-operated with other bodies to form this Society. The Council were extremely sorry that the difficulties in the way of throwing this Society open to all its members as such had been too great. The Guild had done its utmost to do so, but had found it was not possible to include elementary teachers, who were already provided for.

VI. Joint Conference of Educational Associations.—It was hoped that the first of these, to be held in January, 1913, would be the beginning of a definite and permanent Joint Association, and would do something to relieve the pressing burden of those interested and working in education, and would also lift education into the public eye.

The adoption of the report was then moved from the chair, seconded by Miss S. Green, and, after some discussion on the resolutions of the Joint Committee on Public Aid to Private Schools, was passed with one dissentient.

The Statement of Accounts and Balance Sheet for 1911 were then passed unanimously (proposed by Mr. Thornton and seconded by Mr. Hinton).

The CHAIRMAN next declared the result of the voting for the President to be that Dr. Rouse, of the Perse School, Cambridge, was elected.

On the proposal of Mr. HETHERINGTON, seconded by Miss DOWNS, it was unanimously carried "That Mr. J. Arnold Turner be elected as Hon. Treasurer."

The result of the voting for eight General Members of Council was declared. It was announced that Miss Lees had withdrawn from nomination, and the following were declared duly elected: Mr. R. F. Charles, Mr. J. A. Green, Mr. J. L. Holland, Mr. T. L. Humberstone, Miss Constance Jones, Mr. J. Wilkinson, Mr. W. H. Winch, and Mr. J. S. Wise.

The following names were received as elected to the Council as Representatives of Local Centres:—Miss H. Busk, London; Mr. J. Campbell, Worcester; Mr. D. T. Cowan, Southampton; Rev. H. V. Dawes, Salop; the Rev. Canon H. Wesley Dennis, London; Mr. G. P. Dymond, Three Towns; Miss F. Edwards, London; Miss S. B. Flear, Ipswich; Miss Foxley, Manchester; Mr. H. B. Garrod, London; Mr. C. Granville, London; Miss M. R. N. Holmer, London; Mr. P. B. Ingham, Guernsey; the Rev. the Hon. E. Lyttelton, London; Miss H. A. Martin, Cork; the Rev. H. Kingsmill Moore, Dublin; Mr. H. A. Nesbitt, London; Mr. J. Oliphant,

DENT'S HISTORICAL AND ECONOMIC GEOGRAPHIES.

BY

HORACE PIGGOTT, M.A., Ph.D.,

AND

ROBERT J. FINCH, F.R.G.S.,

Senior Geography Master, Hornsey County School.

Volume I. **WORLD STUDIES.** NOW READY.

Profusely illustrated with Maps, Diagrams, Drawings, and Photographs. Price 3s. 6d.

To be followed at short intervals, by volumes dealing with:—

II. *Europe.* III. *Asia.* IV. *The Americas.*

V. *Africa and Australia.*

VI. *The British Isles and the British Empire*
(A More Advanced Study).

Please write for detailed Prospectus.

London: J. M. DENT & SONS, Ltd., Bedford St., W.C.

Exam. Book-keeping, &c.

Sarll's Text-Book Sales nearly 250,000 copies.

SARLL'S MODERN BOOK-KEEPING.

Founded on "Sarll's Double Entry": consists of four Courses of **Graduated Exercises**—Introductory, Theory, Practice, Trading Accounts, &c., from Trial Balances, followed by a selection of forty **Exam. Papers** by the leading Boards. All Exercises with full or outline **Keys**. Meets the requirements of all Elementary and Intermediate **Exams.** 410 pages. 3s. 6d. Now ready.

SARLL'S BOOK-KEEPING FOR NEW CODE.

Stage I, Introductory; II, Practical; III, Theory or Journalizing. Each 48 pages. Price 4d. **Outline Keys.** Schoolmaster says:—"They are the best and cheapest manuals of the kind in the market." MS. Books, 2d. each.

SARLL'S PRACTICAL BOOK-KEEPING.

Fourteenth and greatly improved Edition. *Teachers' Aid* says:—"There is no cheaper and safer guide." Consists of Grad. Exercises and Exam. Papers, with full or outline **Keys**. 128 pages, 1s.

SARLL'S DOUBLE-ENTRY BOOK-KEEPING.

Fifteenth Edition. 2s. Complete with full or outline **Keys.** *Practical Teacher* says:—"We heartily recommend it as the best and cheapest manual we have seen." 256 pages.

SARLL'S TWENTIETH CENTURY EXAM. PAPERS IN BOOK-KEEPING.

Containing Papers by the leading **Examining Boards**, with Notes and brief Answers, in Two Parts, 6d. each. Part I, **Junior Papers**, College of Preceptors, University Local, &c. Part II, **Senior Papers**, Society of Arts, London Chamber of Commerce, &c.

SUPPLEMENTARY KEYS.

I. TO SARLL'S PRACTICAL.

At 1s., and Stages I and II, at 4d. All Exercises fully worked. 2s.

II. TO SARLL'S DOUBLE-ENTRY.

At 2s., and Stage III at 4d., and to Exam. Papers, 1-25 in Modern—all Exercises fully worked. 3s.

* Specimen Copies, except Keys, at one-third off, or Teachers can have Parcels for inspection, post free, from A. SARLL, A.K.C. (Late Lecturer, People's Palace, E.; Polytechnic, W.; Goldsmiths' Institute, S.E., &c.), 62 Oakley Road, London, N.

Lessons by Correspondence and School Exams. conducted.

London: GEORGE GILL & SONS, 13 Warwick Lane, E.C.

Glasgow; Mr. J. Slingsby Roberts, Brighton; Mr. F. Storr, London; Prof. Foster Watson, London.

It was proposed from the Chair and carried unanimously: "That Mrs. Harold Cox be asked to act as auditor for 1912."

The Chairman reported that the Council had appointed Mr. F. Storr as Representative of the Guild on the Teachers' Registration Council. The meeting approved of this.

The Council met, at 74 Gower Street, on June 7. Present: Dr. W. H. D. Rouse (President), Miss H. Busk, Miss F. Edwards, Miss B. Foxley, Mr. J. L. Holland, Mr. H. Holman, Miss M. R. N. Holmer, Mr. T. L. Humberstone, Miss H. A. Martin, Mr. H. A. Nesbitt, Mr. F. Storr, Mr. W. H. Winch.

In the absence of the President at the commencement of the meeting, Miss H. Busk was voted to the chair.

The minutes of the last meeting were read and confirmed.

Arising out of the minutes, the Chairman announced that the Finance Committee had decided that "Holiday Resorts" should be published by Mr. Francis Hodgson, 89 Farringdon Street.

At this point the President arrived and took the chair.

On the proposition of Mr. Nesbitt, seconded by Mr. Winch, Miss Busk was asked to accept office as Vice-Chairman of Council and Chairman of the Executive Committee; this was carried with acclamation.

Mr. H. Holman was elected Deputy-Chairman.

Mr. S. Green was elected a General Member of the Council in place of Mr. A. Kahn (resigned).

The Council then proceeded to the election of Standing Committees. The Executive Committee was re-elected, they being asked to co-opt new members in place of those resigned. It was decided to ask Canon Swallow to serve on the Political Committee, and to elect Mr. Holland and Mr. Humberstone in place of Mr. Hinton and Mr. Daniell (resigned). The other standing Committees were re-elected.

The Council referred the following questions to the several Committees for discussion during the year:—To the Joint Political and Education and Library Committees—the Conditions of Registration. To the Thrift and Benefits Committee—the question as to how Pensions could be combined with Thrift. To the Organizing Committee—to consider how far the present activity of the Guild for increasing the Membership can be extended. To the Education and Library Committee—the New Code with special reference to Continuation Schools.

It was agreed that a list of the subjects proposed for discussion by the Committees be sent to the Local Secretaries, with the suggestion that the Local Centres should also discuss them.

The dates for the meeting of Council were provisionally fixed as follows:—October 18 and December 13, 1912, and February 7 and May 30, 1913.

The dates for the meeting of the Executive Committee were provisionally fixed as follows:—July 4, September 26, October 31, November 28, 1912, January 30, February 27, April 3, May 8, June 26, 1913.

The report of the Organizing Committee was received.

It was proposed by Mr. Holman, and seconded by Miss Holmer, "That the Council fix the minimum annual subscription for members, in accordance with Art. 4 (a) and (b) of the Articles of Association, at 5s." Carried with one dissident.

The report of the Organizing Committee was adopted.

Thirty-one new Members were duly elected; namely, London Centre, 11; Manchester Centre, 2; Cardiff Centre, 18. A Report from Miss Cedeberg, delegate to the Parents' National Education Union, was received with thanks.

The General Secretary reported that he was to speak at Guernsey on the Provident Scheme on May 10, and that Mr. Holman, Miss Newton, and himself were to speak at Watford at a preliminary meeting for the formation of a new Centre on June 21.

MR. HARDY, in acknowledging the gold medal presented to him on his seventy-second birthday by the Academic Committee of the Royal Society of Literature, used the occasion to denounce "the appalling increase every day in slipshod writing that would not have been tolerated for one moment a hundred years ago," and to urge that the Committee should offer prizes for the encouragement of pure English. While millions have lately been learning to read, few of them have been learning to discriminate. The complaint is as old as Horace—"Scribimus indocti doctique poemata passim"—and we do not believe there is more slipshod writing now than under George IV. Nor have we much faith in prizes as a remedy. The true cure is to write as Mr. Hardy writes. No offer of a prize will produce a poem like "The Dynasts," and the good seed will kill the bad.

PATON'S GUIDE TO CONTINENTAL SCHOOLS

(Seventh Annual Edition).

Containing information regarding personally inspected and recommended Schools for Boys and Girls in France, Switzerland, Belgium, and Germany.

Invaluable to all seeking Schools Abroad.

Giving particulars of: Preparatory Schools for Boys; Municipal Schools for Girls and Boys; Tutors for Army, Navy, and Professions; Home Schools, Families, and Pensions; Catholic Schools and Convents.

Post free 1s. 4d.

Prospectuses and advice regarding suitable establishments furnished free of charge.

Paton's List of Schools and Tutors,

**PUBLISHED ANNUALLY, is an Efficient Aid to
Parents in the Selection of Schools.**

*The following appeared in "The Journal of
Education" for October, 1911:—*

**PATON'S LIST OF SCHOOLS AND TUTORS,
1911-12. (2s. J. & J. Paton.)**

The fourteenth annual edition runs to over eleven hundred pages. Photographs of leading educationists in the Dominions and Colonies is a new feature. There have been so many bogus agencies, some of whose doings we have helped to expose, that we welcome all the more the growing prosperity of a firm against whom we have heard no complaints and frequent commendation.

J. & J. PATON,

Educational Agents,

143 CANNON STREET, LONDON, E.C.

Mr. Edward Arnold's New Books.

ENGLISH.

SELECTED ESSAYS FROM ENGLISH LITERATURE. Edited, with Introduction and brief Notes, by ELIZABETH LEE. 2s.

THE TREE OF EMPIRE. A Reading Book for Middle Forms. 256 pages. Illustrated, 1s. 6d. Uniform with "In Golden Realms," "In the World of Books," &c.

ARNOLD'S ENGLISH LITERATURE SERIES. Shortened School Editions of famous books. Illustrated. 1s. 6d. each volume. The following volumes have just been added to the series:

LORNA DOONE. By R. D. BLACKMORE. Edited by E. A. ARNOLD.

HEReward THE WAKE. By CHARLES KINGSLEY. Edited by W. E. CANDY.

PRÉCIS WRITING. By E. A. BELCHER, B.A., Assistant Master (Military Side) at Clifton College. 2s. 6d. A Key, containing the exercises in the above book, with notes and suggestions on each Précis, followed in each case by a fair copy (for the use of Teachers and Private Students), is obtainable only on written application. Price 3s. 6d. net.

ARNOLD'S SHILLING ENGLISH COMPOSITION. By E. J. KENNY. 1s.

EXERCISES IN COMPOSITION. By E. J. KENNY, Author of "Arnold's Shilling English Composition." In Three Parts. Manila paper covers, 4d. each.

THE BRITANNIA BOOK OF POETRY. A Poetical Reader for the Intermediate and Upper Classes. 128 pages. Limp cloth, 8d.

THE POET'S REALM. An Anthology of Verse for Schools. Edited by H. B. BROWNE, M.A., Assistant Master at Hymers College, Hull. 224 pages. 1s. 6d.

HISTORY.

THE ANCIENT WORLD. An Historical Sketch. By C. DU PONTET, M.A., Assistant Master at Harrow School. With Maps. 4s. 6d.

This book gives a brief survey of ancient history, developing in broad outline the story of the empires of the ancient world. It enables the pupil to view ancient history as a whole, to see the various events in their proper perspective, and to comprehend the relations of the different empires to one another.

SCENES FROM EUROPEAN HISTORY. By G. B. SMITH, M.A., Assistant Master at the Royal Naval College, Osborne. 2s. 6d.

In this volume an attempt has been made to provide a companion to an English History text-book for the purpose of lending a greater reality to some of the more important actors on the stage of Europe, who in ordinary text-books must necessarily remain little more than names.

ARNOLD'S SHILLING ENGLISH HISTORY. By C. E. M. HAWKESWORTH, M.A., Assistant Master at Rugby School. 1s. A brief history of England suitable for Junior Forms.

LATIN.

MIRABILIA. By C. D. OLIVE, M.A., formerly Head Master of Rokeby School, Wimbledon. With or without Vocabulary. 1s. 6d.

A collection of modern stories told in Latin, which can be used either for the purposes of a reading book or for unseen.

SIMPLIFIED OVID. A First Latin Reader. Arranged with Notes, Exercises, and Vocabulary. By W. F. WITTON, M.A., Classical Master at St. Olave's Grammar School, S.E. 1s. 6d.

SELECTIONS FROM OVID'S METAMORPHOSES. With Notes and Vocabulary. Edited by H. A. JACKSON, B.A., Assistant Master at Winchester College. Crown 8vo, cloth, 1s. 6d.

GERMAN.

ARNOLD'S MODERN GERMAN COURSE. By F. W. WILSON, Ph.D., Assistant Master at Clifton College. Cloth, 3s. 6d.

FREE COMPOSITION IN GERMAN. By F. W. WILSON, Ph.D., Assistant Master at Clifton College, Author of "Arnold's Modern German Course." 1s. 6d.

MATHEMATICS.

ARNOLD'S SHILLING ARITHMETIC. By J. P. KIRKMAN and J. T. LITTLE. 1s.

ELEMENTARY ALGEBRA. By W. D. EGGAR, M.A., Assistant Master at Eton College. 3s. 6d. With or without Answers. Answers to Miscellaneous Examples and Revision Exercises only. 6d.

PRACTICAL TRIGONOMETRY. By H. C. PLAYNE, M.A., Head Master of Bancroft's School, and R. C. FAWCETT, M.A., Head of the Military and Engineering Side at Clifton College. 2s. 6d.

SCIENCE.

INORGANIC CHEMISTRY FOR SCHOOLS. By W. M. HOOTON, M.A., M.Sc., Chief Chemistry Master at Repton School. 416 pages. 3s. 6d.

The ground covered in this book is a sufficient preparation for the London Matriculation, Northern Universities Matriculation, Central Welsh Board, and Military Entrance Examinations.

OUTLINES OF INORGANIC CHEMISTRY. With Special Reference to its Historical Development. By E. B. LUDLAM, D.Sc., F.C.S., Head of Chemical Department, Clifton College. With Introduction by Prof. Sir WM. RAMSAY, K.C.B., F.R.S. 4s. 6d.

THE ELEMENTS OF INORGANIC CHEMISTRY. For use in Schools and Colleges. By W. A. SHENSTONE, F.R.S. With nearly 150 Illustrations and a Coloured Table of Spectra. Revised and Partly rewritten by K. G. DURRANT, M.A., Assistant Master at Marlborough College. 5s.

London: EDWARD ARNOLD, 41 & 43 Maddox Street, Bond Street, W.

THE COLLEGE OF PRECEPTORS.

INCORPORATED BY ROYAL CHARTER.

EXAMINERSHIPS.

The Council of the College of Preceptors invite
applications for additional EXAMINERSHIPS in
ENGLISH LANGUAGE and LITERATURE,
CLASSICS, and SPANISH. Candidates should
have had considerable experience in teaching, and,
except in the case of the Examinership in Spanish,
must have obtained an Honours Degree at a Uni-
versity in the United Kingdom. Applications (twenty
copies), stating age, degree, experience in teaching
and examining, &c., should be addressed to the
DEAN of the College not later than the 31st of
August, 1912. If testimonials are sent, they should
be not more than three in number, and twenty copies
of each should be forwarded.

C. R. HODGSON, B.A., *Secretary*.
Bloomsbury Square, W.C.

INSURANCE.

Members of the College of Preceptors are
admissible to the Dividend Section of the
Secondary, Technical, and University Teach-
ers' Insurance Society. Full particulars may
be obtained from the Secretary of the College
of Preceptors, Bloomsbury Square, London,
W.C.

They will be awarded to the best candidates holding a Degree or its equivalent in Arts or Science.

Applications should be sent to the HEAD OF THE DEPARTMENT.

MADAME BERGMAN ÖSTERBERG'S PHYSICAL TRAINING COLLEGE, DARTFORD HEATH, KENT, FOR RESIDENT STUDENTS.

The College, the first of its kind in England, was opened in 1885, with the view of training educated women as Teachers of Scientific Physical Education.

The Course of Training conducted by a large and competent staff of teachers, extends over two years. It includes the study of Anatomy, Physiology, Hygiene, Anthropometry, and Theory of Movement. In practical subjects instruction is obtained in Ling's Swedish Gymnastics, Dancing, Outdoor Games, and Medical Gymnastics and Massage. At the end of the Course, examinations are held and certificates of theoretical knowledge and practical efficiency in teaching are awarded to successful students.

The College, which provides 50 separate bed-sitting rooms and several large studies, is situated on very high ground, gravel soil, on the confines of an extensive bath, half an hour from town. It stands in its own fine grounds of fourteen acres, which contain an Outdoor Gymnasium, Running Track, Cricket and Hockey Grounds, Lawn Tennis Courts. The Indoor Gymnasium, 70 ft. by 35 ft., and the Medical Gymnastic Room, 50 ft. by 25 ft., lofty and well ventilated, are fitted up in the most perfect style, all the apparatus having been designed and executed in Stockholm.

The immediate neighbourhood offers over one thousand children for the students' practice as teachers. Hundreds of posts have been obtained through this College, a list of which is to be obtained with the Prospectus.

Students admitted in September.

For particulars apply—THE SECRETARY.

MADAME BERGMAN ÖSTERBERG'S UNION OF TRAINED GYMNASIUM TEACHERS.
Ling's Swedish System.

Aim of the Union: To advance the cause of Physical Education on scientific lines.

In placing members of this Union as Teachers in Schools, careful and discriminating choice is exercised, and the exact requirements of each School specially considered.—PHYSICAL TRAINING COLLEGE, DARTFORD HEATH, KENT.

OPENING OF SESSION 1912-1913.

UNITED COLLEGE.

(ARTS, SCIENCE, AND MEDICINE.)

This College will be formally opened on Monday, 14th October, and the Martinmas Term will begin on Tuesday, 15th October.

The Preliminary Examinations, with which the Competitions for Entrance Bursaries are combined, will commence on 13th September. Schedules of application for admission will be supplied by the SECRETARY up to 31st August.

The Subjects of Examination are:—English, Latin, Greek, Mathematics, French, German, Italian, Dynamics. Candidates may enter for five of these in the Bursary Competitions.

For Entrant students there are thirty-three Bursaries open to Competition. Twenty-two are tenable by men only (including the following:—Tenable for four years—1 of £50, 1 of £20, 1 of £16, 5 of £10; tenable for three years—1 of £50, 2 of £40, 1 of £32, 2 of £30, 6 of £20, 1 of £15; tenable for one year—1 of £10). Nine are open to women only: they are tenable for three years, and include 3 of £25, 1 of £20, and 5 of £15, and to these students who intend to enter the medical profession have a preference. Two Malcolm Bursaries of £25 each for 5 years, restricted to Medical Students, are tenable by men or women. In addition to open bursaries there are seven presentation and preference bursaries vacant.

For students of the Second year there are vacant:—Two Spence Bursaries of £30 each for the first year and £40 for the second year of tenure, for which women are eligible as well as men; and one Bursary of £30 for three years and another of about £16 for two years, tenable only by men.

Two Bursaries—one of £47, and one of £20, each tenable for one year—will be awarded to fourth-year Honours students. Grants, not exceeding £20 each, may be assigned to Honours students (men or women) during their fourth or fifth year, and six grants of £20 each (attached to different departments of study) may also be assigned to students who, after completing a Degree curriculum, wish to train for Secondary School Teacherships.

In the course of the Session nine Scholarships for advanced study will be competed for, five of which are open to women students as well as to men. They include 1 of £80 for four years; 2 of £50 for two years; and 6 of £80 for one year.

ST. MARY'S COLLEGE. (DIVINITY.)

This College will be opened on Tuesday, 15th October. The Examination for Bursaries will be held on Friday, 18th October. Intimation of candidature is not necessary. There are five competitive Bursaries vacant (including 1 of £40, 1 of £24, 1 of £18, and 1 of £12, 10s. tenable for three years; and 1 of £15 tenable for four years). At the close of the Session one Scholarship of £80, one of £21, and one of £14, will be open to competition.

The Classes in the Colleges are open to Men and Women Students alike, and include Latin, Greek, English, French, German, Hebrew, Arabic, Aramaic, Syriac, Assyrian, Logic and Metaphysics, Moral Philosophy, Political Economy, Education, Mathematics, Applied Mathematics, Natural Philosophy, Chemistry, Zoology, Botany, Geology, Agriculture and Rural Economy, Modern History, Ancient History, Economic History, Archaeology, Sociology, Anthropology, Physiology, Anatomy; Military History, Strategy, Tactics, Engineering, Topography, Law and Organization; Systematic Theology, Biblical Criticism, and Church History.

Specimen Examination Papers and full particulars respecting the Courses of Instruction, Fees, Examinations for Degrees, &c., will be found in the CALENDAR of the UNIVERSITY, published by Messrs. WILLIAM BLACKWOOD & SONS, 45 George Street, Edinburgh.

Specimen Examination Papers for the Preliminary and Bursary Competition Examinations are published in separate booklets, and may be had from the SECRETARY, or from Messrs. HENDERSON, Booksellers, St. Andrews.

A general prospectus, as well as detailed information for the coming academical year regarding any department of the University, may be obtained on application to the SECRETARY.

ANDREW BENNETT,
Secretary and Registrar.

The University, St. Andrews,
August, 1912.

UNIVERSITY OF EDINBURGH.

Chancellor: The Right Hon. A. J. BALFOUR, M.P., D.C.L., LL.D., &c.

Rector: The Right Hon. THE EARL OF MINTO, P.C., G.C.M.G.

Principal and Vice-Chancellor: Sir WILLIAM TURNER, K.C.B., D.C.L., LL.D., D.Sc., M.B., &c.

Secretary of Senatus: Professor Sir LUDOVIC J. GRANT, Bart., B.A., LL.D.

The **Winter Session** begins about the beginning of October and closes about the middle of March; the **Summer Session** extends from the middle of April to the end of June.

The University embraces **Six Faculties**, viz.: **Arts, Science, Divinity, Law, Medicine and Surgery, and Music**, in all of which full instruction is given and Degrees are conferred. There are many different avenues to the **Arts Degrees**, the graduation subjects embracing English, History, Modern Languages, Science, &c., besides Ancient Languages, Philosophy, Mathematics, &c. The widening of the Arts Curriculum permits, to a greater extent than formerly, the Combination of Arts, Science, Medical or Special Studies, and it has been shown by successes of Edinburgh students in the Civil Service Examinations that it is possible to combine study for Degrees in Arts, Science, or Law with preparation for this and other Special Examinations. In addition to the Ordinary and Honours Degrees in Arts, the Higher Degrees of D.Litt., D.Phil., and D.Sc. are conferred. Education in Military subjects is given in connexion with the Scheme of allotment of Army Commissions to Graduates of the University. Degrees in **Science** (B.Sc. and D.Sc.) may be taken in **Pure Science, Engineering**, and in **Public Health**, and the Degree of B.Sc. in **Agriculture, Forestry**, and in **Veterinary Science**. There are fully equipped Science Laboratories, and other necessary appliances, in all these Departments. The curriculum in **Divinity** affords a thorough training in Theological subjects, and in Hebrew, Arabic, and Syriac. The Degree of Bachelor of Divinity (B.D.) is conferred. The **Law** Faculty, besides furnishing the professional equipment necessary for those intending to practise in Scotland, contains Chairs in Jurisprudence and Public International Law, Constitutional Law and History, Roman Law, and Political Economy, as also Lectureships in other important branches of the Law, and is thus adapted for students preparing for the Civil Service Examinations, and for legal, political, and administrative appointments generally. The Degrees of Bachelor of Laws (LL.B.) and Bachelor of Law (B.L.) are conferred. The Faculty of **Medicine** has a full curriculum in Medicine and Surgery, and is equipped with very extensive Laboratories and all other necessary appliances for Practical Teaching. Ample facilities are afforded for Clinical Instruction at the Royal Infirmary, Maternity Hospital, Royal Hospital for Sick Children, Hospital for Infectious Diseases, and Royal Asylum for the Insane. Four Degrees in Medicine and Surgery are conferred by the University, viz.: Bachelor of Medicine (M.B.), Bachelor of Surgery (Ch.B.), Doctor of Medicine (M.D.), and Master of Surgery (Ch.M.), and these Degrees qualify for practice throughout His Majesty's dominions, and for admission to the Naval, Military, and other Public Medical Services in the United Kingdom. A **Diploma in Tropical Medicine and Hygiene** (D.T.M. & H.) is conferred on Graduates in Medicine of the University, a **Diploma in Psychiatry** (Dipl. Psych.), and a **University Certificate in Tropical Diseases** is also conferred on qualified Medical Practitioners who have attended Courses in the University on practical Bacteriology and Tropical Diseases. In **Music** also there is a full course of study for graduation, and the Degrees of Mus.B. and Mus.D. are conferred.

The University Staff consists of 41 Professors, 62 Lecturers, and over 50 Assistants and Demonstrators. The annual amount available for Fellowships, Scholarships, Bursaries, Prizes, &c., is about £18,700. Facilities are afforded for research in scientific and other subjects.

Women may attend the Classes in Arts, Science, Divinity, Law, and Music, and they are admitted to graduation in Arts, Science, Law, Medicine, and Music, the training for Degrees in Medicine being afforded by well equipped extra-academical Schools.

Information regarding Matriculation, the Curricula of Study for Degrees, &c., the Examinations for Fellowships, Scholarships, &c., may be obtained from the **DEANS OF THE FACULTIES**, or from the **CLERK OF SENATUS**; and full details are given in the University Calendar, published by JAMES THIN, 55 South Bridge, Edinburgh—price 3s. 6d. by post. The Preliminary and Degree Examination papers in each of the Faculties are also published by Mr. JAMES THIN, viz.—Arts and Science Preliminary papers and Bursary papers, 1s.; Medical Preliminary papers, 6d.; Degree papers: Arts, 1s.; Science, 9d.; Divinity, Law, Medicine, and Music, 6d. each.

July, 1912.

By order of the Senatus,

L. J. GRANT, *Secretary of Senatus.*

SCHOOLS FOR SALE AND PARTNERSHIPS.

Messrs. TRUMAN & KNIGHTLEY, Ltd., Educational Agents, 158-162 OXFORD STREET, LONDON, W.

MESSRS. TRUMAN & KNIGHTLEY always have on their books a large number of thoroughly genuine Schools for Sale and Partnerships to negotiate, as well as the names and requirements of numerous would-be purchasers, and therefore can offer unusual facilities for satisfactorily negotiating the TRANSFER of SCHOOLS and arranging PARTNERSHIPS. All communications and inquiries are treated in the strictest confidence. The following are a few selected from their list:—

GIRLS' SCHOOLS.

WORCESTERSHIRE.—Good-class **BOARDING SCHOOL FOR GIRLS.** Established 25 years. 33 boarders, fees 45 to 51 guineas, and a few day boarders, fees 18 to 27 guineas. Large detached house. Dry and bracing climate; gravel soil. Receipts £1,724. Profit £360. Capitation fee accepted on pupils transferred. Successor should be a lady with Low Church views. Inspected and warmly recommended.—T 2015.

WEST COAST.—Two ladies, who are retiring, are prepared to hand over their high-class **BOARDING AND DAY SCHOOL** to their present Head Mistress and for whom a Partner is required. School thoroughly sound and quite full with 30 boarders. Receipts over £2,000; profit about £350, but could be considerably increased with reasonable economy. Half share of goodwill £500. School enjoys a high reputation and can be warmly recommended.—T 2036.

SOUTH COAST.—Very flourishing and high-class **BOARDING AND DAY SCHOOL FOR GIRLS** at a favourite health resort. 32 boarders, fees £63 to £78. 15s., and 9 day pupils, fees 9 to 12 guineas per annum, exclusive of extras. Receipts over £2,000. Profit over £900. Specially built premises with grounds of about an acre. Capitation fee accepted on pupils transferred.—T 2035.

PARIS.—The Principal of a first-class Educational Home in Paris desires to dispose of her connexion: 7 boarders paying fees from £150 to £200 per annum. Profit about £300. Accommodation for 10 pupils. A thorough introduction and excellent references given.—T 2006.

LONDON.—House of **RESIDENCE FOR STUDENTS** near Kensington, with 13 students now in residence, whose average receipts amount to £26 per week. Students are all over 20 years of age, and are girls of good families.—T 1,188.

ESSEX.—Good-class **BOARDING AND DAY SCHOOL FOR GIRLS**; 74 pupils, of whom 8 are boarders. Receipts £1,321, profit £302. Delightful premises built regardless of expense. Grounds of nearly an acre, with good tennis and croquet lawns. The school can be bought at a bargain as only £300 is asked for goodwill, or one term's capitation fees.—T 1,186.

SURREY.—Very flourishing **GIRLS' HIGH SCHOOL**, with Kindergarten; old-established, 85 pupils, 16 of whom are boarders. Receipts £1,200, net profit £300. Splendid schoolroom accommodation for 120 pupils. Good residential neighbourhood, with plenty of scope for increasing present number of pupils.—T 1,189.

HOMER COUNTIES.—Large, old-established, and very successful **BOARDING AND DAY SCHOOL.** Principal retiring. 50 boarders, 100 day pupils. Gross receipts over £3,000. Profit £500. Fine premises with field for games. Capitation fee accepted on all pupils transferred. Personally inspected and strongly recommended.—T 1,158.

LONDON, N.—Old-established **BOARDING AND DAY SCHOOL**, with Kindergarten. Principal retiring from the teaching profession. 5 boarders, 60 day pupils. Gross receipts over £1,000. Entire goodwill only £400.—T 1,157.

LANCASHIRE COAST.—Good-class **BOARDING AND DAY SCHOOL**, old-established. 25 boarders, fees £50 per annum; 30 day pupils, fees £15 per annum, exclusive of

extras. Specially built premises. Receipts £2,300, net profit over £600. Genuine opening.—T 1,150.

LONDON, N.—Large and flourishing **PRIVATE DAY SCHOOL**, with Kindergarten. 165 pupils. Fees 44 to 12 guineas per annum, exclusive of extras. Specially built school premises, including large assembly hall and gymnasium. Receipts £1,166, profit £350. Entire goodwill, £700.—T 1,168.

SUSSEX.—**PARTNERSHIP** is offered in a nice-class Girls' School at a seaside watering place. There are 16 boarders and 8 day pupils. The school has a good French and German connexion. Receipts £952; profit £250. Half share of goodwill £250.—T 1,180.

CHESHIRE.—Principals removing their boarders to the seaside desire to dispose of the **DAY-PUPIL CONNEXION**, numbering nearly 100 pupils, and any boarders who may not go with them. Receipts from day pupils alone £1,310. One term's fees asked for pupils transferred. Exceptionally fine premises at moderate rent.—T 2,019.

SURREY.—Nice-class **HOMER SCHOOL AND HOLIDAY HOME FOR CHILDREN** of parents who live abroad. 6 boarders, 2 weekly boarders, and 7 day boarders. School delightfully situated amongst the Surrey Hills. Receipts £800, profit about £120. Any reasonable offer accepted. Only part of the purchase money need be paid down.—T 2,025.

GLAMORGANSHIRE.—**BOARDING AND DAY SCHOOL** with kindergarten. 19 boarders, 16 day pupils. Receipts £995, profit £140. Only £300 asked for goodwill, to include school furniture, gymnasium appliances, &c. Only part need be paid down.—T 2,031.

NO CHARGE TO PURCHASERS.

Full particulars of the above and others may be obtained on application. Intending purchasers are invited to write stating their requirements. Address—158 to 162 OXFORD STREET, LONDON, W.

LADY TEACHERS everywhere should subscribe to "**Madame**." The best illustrated paper for ladies. Contains Fashion, Sport, Drama, Music, Court and Society News, &c., &c., and articles by experts upon all subjects of interest to ladies. Every Wednesday, price Threepence. Specimen copy of a recent issue, free from Publishers, 67 Long Acre, W.C., on receipt of 4d. stamp for postage.

PLAYING FIELD and PAVILION.—First-rate levelled ground and large Pavilion TO LET for Cricket, Hockey, Football, &c. Five minutes from Elstree Station, Midland Railway. All equipment provided. Cheap fare from St. Pancras. Tea can be had on the ground. Apply—P., Hadley Dene, Hadley Wood, Barnet.

OCCASIONAL NOTES.

LORD ROSEBERRY, in the oration with which he opened the Congress of the Universities of the British Empire, pleaded eloquently that the production of men of character ought to be the first aim of Universities. His is the generous ideal of Milton that education should fit a man "to perform justly and skilfully and magnanimously all the offices, both private and public, of peace and war"; and of the Oxford bidding prayer that the Universities should ever send forth "a due supply of men, fitted to serve God in Church and State." There is no doubt need for the plea in these days, when professions and crafts are demanding that colleges should make a technical equipment their first and foremost aim. Yet it surprises us to find Lord Rosebery saying: "I care less about brains than character for the purpose I am speaking of." We cannot help thinking of another great speech his lordship made some years ago, when he rebuked our national habit of not preparing scientifically for the great struggles of peace and war, because we always hoped "to muddle through somehow." Character is indeed needed for administration and government; but will any one say that science is not at the present moment at least as great a need?

OF the discussions of the Congress, that on specialization in the Universities was perhaps the most valuable. As Sir Alfred Hopkinson pointed out, small and slenderly endowed Universities, such as are now rising up in many parts of the Empire, cannot hope to teach everything: each must be content to leave some subjects to

its neighbours. But, at the same time, Dr. Warren's principle of an "irreducible minimum of equipment" must be kept in mind. Every University must continue to teach literature, history, philosophy, mathematics, and the fundamental sciences. Outside these there is plenty of room for specialization. Brewing, Agriculture, Engineering, and Applied Chemistry are not faculties which are everywhere indispensable, and such things will probably be better taught if no University attempts to deal with more than one or two of them.

THERE is something very fascinating about the proposal for the occasional interchange of professors amongst British Universities. It conjures up visions of half fossilized dons resuming the attributes of humanity under the kindly influences of young and democratic communities, and, on the other hand, of scholarship that has perhaps faded a little in the uncongenial atmosphere of a small colonial town regaining its early bloom in the halls and groves of ancient Universities. But we fear that the scheme is scarcely practicable. It is difficult to hand over a man's task to someone else for two or three years. An exchanged professor would be little more than a *locum tenens*, with all the weakness that that position involves. He would spend the first year learning his new work, and all the time he would be hampered by the feeling that he was merely a bird of passage. Then there would be the difficulty of securing equality of value in the articles exchanged. Delicate indeed would be the negotiations on such a point. Three years of Professor Gilbert Murray might vivify the classical teaching of half a continent, but where in the British Empire is the half continent which could send us anything but ten oxen for our hundred?

THE free movement and interchange of academic thought is, no doubt, very desirable, but it can be secured in better ways than this. It ought, in the first place, to be possible to arrange for lecturing tours by distinguished Professors. A term's leave of absence would suffice for this; and a term off is a very different thing from a two or three years' displacement. Next we hope to see in the future more promotions from colonial professorships to similar posts in Great Britain. A Chair in a Colonial University is at present somewhat in the nature of a blind alley. If there were more possibilities of a career for overseas professors, more of our able young men would be willing to pitch their tent in a colony. Should they come to be candidates for English or Scotch professorships they might possibly be found to have missed a few of the latest results of research, but they would certainly have gained in breadth of view and knowledge of mankind.

MR. BENTLIFF, the President of the N.U.T., read a remarkable paper at the Conference of Teachers' Associations on the connexion between primary and secondary schools. He contended that the provisions in pursuance of the Act of 1902 for the "co-ordination of all forms of education" are wholly inadequate, and, instead of removing, tend to deepen and widen class distinctions. The fee charged in grant- and rate-aided municipal schools ranges from one to fifteen

guineas (five is the commonest), and the 25 per cent. of free places (not always enforced) is wholly inadequate for the scholars of over twenty thousand primary schools. The scholarships offered by Local Education Authorities are few in number, and, like those in public schools, go to parents who can afford to pay for coaching. Further, the curricula of primary and secondary schools are not co-ordinated, and the primary scholar finds himself pitted against boys who have been learning a foreign language for a year or more. Lastly, Mr. Bentliff complains that pupils in secondary schools come too early and do not stay long enough to profit. A fourth of them are under twelve and ought to be in primary schools, and the vast majority leave before they are sixteen.

WITH Mr. Bentliff's indictment we heartily sympathize, though we are convinced that both the Board of Education and Local Authorities have honestly

Free Secondary Schools.

endeavoured to remove class distinctions, and, in part, succeeded. But we cannot endorse his "simple but drastic" remedy. He would make all State-aided secondary schools "free to the fit," and modify the curriculum accordingly. Waiving the financial difficulty, we seek and seek in vain a definition of the fit. That a secondary education which ends at sixteen profits little is part of Mr. Bentliff's charge, but can one working man in a hundred afford to keep his son at school till eighteen even if all fees are excused? Maintenance scholarships are a necessary corollary. However many rungs we provide, a liberal education, in the conventional sense of the word, must be for the few, and the mass must be educated to be hewers of wood and drawers of water. These have been grievously neglected, and for them continuation schools must be provided to make them more efficient operatives and labourers. We shall not develop national brain power by compelling them to come in to grammar schools or by compelling grammar schools to adapt their curriculum to the requirements of the mechanic and ploughman. In our experience, which is fairly extensive, there are even now more county scholarships than brains to fill them.

CANON WESLEY DENNIS, who opened the discussion on training at the Imperial Conference of Teachers, seemed almost to sigh for the golden days of

Defects in Training.

the pupil-teacher system, but we can hardly believe that he would wish to turn back to such an Egyptian bondage. No doubt he put his finger on some weak spots in our present system. The student does not get enough practical work. We would add that it is doubtful whether the best possible use is made of the time allotted to practical work in schools. Much is spent in giving isolated lessons—an arid and uninteresting form of practice. Every student should be given some particular tasks in teaching to perform, and the results of his efforts should be tested. Much time is also wasted in watching the work of the masters, who, like all other human beings, are much more frequently mediocre than first-rate craftsmen. A second and more dangerous weakness in the system is its failure to weed out the inefficient. The chief offender, we take it, is the Board of Education, which refuses to pluck for certificates; but, however this may be, there can be no doubt that a certain number of young men and women are sent out into the world as teachers who are better fitted to be clerks or typists.

Some remedy must clearly be found for this, or the reputation of the training colleges will suffer.

THE modern habit, caught partly from the scientists and partly from the administrators, of making rigid classifications of educational activities leads to many fallacies. One of these is the distinction between general and technical education which pervades discussions on pedagogy.

Vocational Education.

Vocational education is frequently treated by teachers and others as if it was something which could be marked off in water-tight compartments from liberal education. The truth is that the two intermingle in every school system. Even Greek is vocational instruction for young Levites, and geometry is to the future land surveyor one of the implements of his craft. We are glad to see that Miss Burstall, in her address to the Conference of the Teachers' Guild, laid stress upon this point, arguing that there need be no antagonism between the training that makes a human being and training for a definite occupation. General education can be given through vocational and vocational through general. This is the spirit in which teachers should approach the question. It is useless simply to scold the public, as did the Head Master of Sherborne on his school commemoration day, for demanding an education which will enable a young man to earn his living; the more practical course for the schoolmaster is to devote his skill to adding the flavour of a genuine humanistic education to bread-earning studies.

AFTER the offers of large sums to the University of London for a new site come Mrs. Lecky's bequest of landed property to endow a Chair of History at Trinity College, Dublin; Mr. Morison's munificent gifts to Balliol College, reported in our last number; and Mr. C. B. Marlay's legacy of £80,000 and his art collections to the Fitzwilliam Museum at Cambridge. Princely though this last donation is, and ungrateful though it be to look such a gift horse in the mouth, we cannot help thinking that many Cambridge men will wish that some part of the funds could be diverted to other University purposes, such as the increase in the endowment of professorial Chairs. This is the really pressing need of our Universities, and our rich men usually overlook it. Schools, be it noted, rarely come in for these windfalls nowadays. The reason is obvious. It is generally accepted that it is the duty of the State to provide opportunities for elementary and secondary education, and the private donor directs his generosity into other channels.

THE ink was scarcely dry on the above note when an appeal for contributions to a building fund for the Girls' Public Day School Trust appeared in the Press.

The Appeal of the G.P.D.S.T.

The signatories, who include Lord Lansdowne, Lord Crewe, and Lord Reay, justly claim that the Company have been pioneers in the education of girls belonging to the middle classes, and that the whole of the income derived from fees, except what was required to pay a low rate of interest on the capital subscribed, has been devoted to maintaining the efficiency of the schools, which are now educating six thousand girls. Endowment there is none, and only small grants are received from the Board of Education. Money is urgently needed to provide proper

equipment for the teaching of science, art, and domestic economy. We wish the appeal every success. The public is continually calling out for a less bookish education, but it has not yet realized what is the price of the article it demands. Laboratories, studios, and kitchen equipment cost a great deal more than stationery and blackboards. We are glad to note, by the way, that the Council base their claim partly on having raised salaries; but, when it is remembered that some of their employees have put in twenty or thirty years' work, the rise is ludicrously inadequate.

A CIRCULAR opposing the proposal to abolish the External Degrees of London University has been issued by the National Union of Teachers, who fear that such a change would debar many poor students from getting a degree and so prevent them taking "their proper place in the world." The authors confess that the External student misses the atmosphere of a University and the sympathy and guidance of cultured Professors, but they argue that such things are not essential. Here we must part company; in our view they are just the things which are essential. *Pace* Carlyle, the true University is *not* a library of books, and the most thorough study of the printed volume is inadequate as a mind-forming education without the inspiration of the living teacher and the conflict of contending spirits. Nothing can take the place of the contact of mind with mind, especially of the contact of the mature mind with the immature; and that would remain true, even if it could be shown that the difference between the solitary reader and the college student is not visible in their examination scripts. It will assuredly be visible when they come to apply their knowledge in after-life, whether in classrooms or elsewhere. A degree should imply training as well as book-learning. Not that book-learning by itself is valueless; it has a value of its own, which may well be recognized by Universities, but it should not be stamped with the same hall-mark as the fuller and deeper discipline.

"L EAFLET No. 21," issued by the English Association, is welcome evidence of two things—the first that there are educational associations which have some policy beyond pulling at the coat-tails of the Board of Education; the second, that some teachers at least are beginning to realize that education has other problems besides those of method. Considering the small amount of time that can be devoted to any subject, the question of what to teach is of the first importance. In history and geography it is particularly urgent, for it is but a tiny scrap of either which can be taught to boys and girls who leave school at fifteen or sixteen. In literature it is scarcely less so, and "Leaflet No. 21," which is a lengthy list of poems, dramas and prose works suitable for children of various ages, ought to be helpful to many staffs. The only criticism we would make on it is that some of the works mentioned suggest the over-ambitious teacher. Milton's shorter poems are rather beyond children of fourteen, and only the highest forms in the most advanced schools could tackle the "Prometheus Unbound" and the "Adonais."

THE Modern Language Association has issued a pamphlet describing its scheme for arranging

exchanges between English and foreign families. The procedure is very simple. The secretary on this side of the water corresponds with the secretaries of societies on the other side, and thus families of the same social status are brought into communication with one another. The children get the advantage of a holiday in a foreign country for practically nothing and the best possible opportunity for acquiring fluency in speaking a foreign tongue. It need hardly be said that such visits are not designed to be, and can never be, a substitute for school work. Indeed it is probable that only children who have had a good grounding at school will profit by them. Amongst the supporters of the scheme whose names appear in the pamphlet are Dr. Sadler, Lord Esher, Bishop Welldon, and other well known public men, and from the scholastic profession the Head Masters of Wellington College and Manchester Grammar School and Dr. E. R. Edwards.

WE have always supported the Foundling Hospital site for the University of London, and we are glad that it has now received the approval of the Senate. The position has the first necessary qualification—it is central. Moreover, it is in the neighbourhood of one of the largest of the London Colleges, of other educational institutions, and of the British Museum. The ground itself has much to recommend it. There is plenty of open space and there are trees. Lastly, if the University goes there, the foundlings will go into the country and they will gain greatly thereby. If the scheme is carried through, we may be sure that the children will be pleased, whoever else is dissatisfied.

ONE of the great dangers of the Insurance Act to teachers is that they may lose the privilege, well-established by custom but without definite legal sanction, of payment during sickness. The question has been considered by the Committee of the Secondary Schools Association, which recommended that governing bodies of secondary schools should not take advantage of the provision of the Act under which reduced contributions are accepted if the employer guarantees payment of salaries during the first six weeks of sickness. It is further suggested that governing bodies should pay full salary during sickness for the usual period, deducting therefrom the sums receivable under the Insurance Act. Teachers as a class are undoubtedly underpaid, and any proposals which tend to relieve them from anxiety without unduly straining the financial resources of the schools should be accepted without quibble.

LOCAL AUTHORITIES.

MANY admirable reports are published by School Medical Officers to the contents of which it is impossible to give due consideration within the confines of a paragraph. These reports follow, as a general rule, the form prescribed by the Board of Education, who, although they do not contribute a penny to the service, control it. It is frequently said that, in order to preserve local option, it is necessary for the large proportion of the cost of education to be met out of local rates. As regards medical inspection, the Authorities pay all the charges of the piper and the Board calls

Reports of School Medical Officers.

the tune. There are, however, obvious advantages in the uniformity of school medical reports, and the system might be extended, without detriment, to the general work of Local Education Authorities. The report of Dr. D. M. Taylor, the Schools Medical Officer for the County Borough of Halifax, contains an extremely interesting and instructive account of a residential home and school for weakly and tubercularly disposed children.

Halifax, Bormerside, Home and School.

THE institution which has been established was rendered possible by the munificence of Mr. A. D. Oates and Miss Oates. Their gift consisted of a mansion and some ten acres of park land, and these have been adapted for the purposes of a residential home and school for thirty children. It is a sanatorium for defective juveniles. Dr. Taylor discusses the essential principles of the treatment, gives a careful analysis of the cases admitted to the home, and says that the immediate benefits have, as a rule, been most striking. He is of opinion also, that while the cost of residential schools may deter Local Authorities from establishing them, they may in the end be found cheaper than open-air day schools. One session of residence may be sufficient to arrest the development of a serious malady. "Every early case of tubercular disease of bone, joint, or lung prevented from undergoing further ravages of the disease means that a cripple less is added to our population, or that a tubercular adult less is thrown on our economic waste heap, and becoming in turn another focus to spread the disease. In a word, open-air and residential schools of this kind by centring on child life represent the best type of preventive activity."

Leeds.

DR. ALGERNON WEAR, the School Medical Officer for the City of Leeds, in a report which the Chairman of his Committee appropriately described as a "valuable document," asserts that medical inspection is daily becoming a greater factor for good in the life of the children. Among the pupils attending the schools, 24,452 defects were discovered, and of that number 69 per cent. received treatment. "Something has been done to make the children cleaner and healthier; but much remains to be done in this direction. It is only by the inculcation of cleanliness in habits and person that a permanent effect can be produced; the result of the moral lesson of being excluded from school for dirt or vermin must, in the majority of cases, be not only salutary, but lasting." We observe that the Committee has decided to establish an open-air school, which the Medical Officer regards as of vital importance for a number of children who are unfitted for attendance at an ordinary school.

Derbyshire.

DR. SYDNEY BARWISE is an enthusiastic School Medical Officer, and in his fourth annual report he discusses various matters of interest and importance. We agree with his strictures upon the various expedients adopted to maintain a high percentage of average attendance. The present system under which Local Authorities are, in effect, fined by the Board of Education, if they do their duty by excluding children from school attendance, is, moreover, both objectionable and unjust. Regarding the practice of giving a holiday for good attendance, Dr. Barwise makes a suggestion worth noting. "If this holiday were given for the teachers having created in the school a good wholesome atmosphere and secured a large proportion of children coming to school with clean hands, well brushed clothes and boots, it would have a much better educational influence." The School Medical Officer is of opinion that the appointment of a lady to organize the teaching of home management and personal hygiene has had beneficial results, and that the experiment of employing a school nurse as Attendance Officer has been justified. In fact, he considers that, if the present fifty attendance officers were replaced by thirty nurses, with half-a-dozen male inspectors to deal with recalcitrant cases, school attendance and nursing arrangements would be much improved.

Walsall.

THE report of the Medical Officer for the County Borough of Walsall has not reached us, but, judging from its reception by the Education Committee, it appears to contain opinions which might have been expressed differently. "It was slipshod in composition," said one of the members; "its manner was flippant and jeering, and it was not drawn up in that detached, impersonal, scientific spirit which carried the weight of conviction." Another member said the report was one of the most extraordinary documents it had ever been his lot to read. "It consisted principally of ill-digested statistics, an indiscriminate mixture of bad English, maudlin sentiment, unfounded innuendoes and misstatements, and was an entire misapprehension of what a report should be." We are curious to see it.

IN the interests of Local Authorities it is necessary to direct attention, whenever an opportunity is presented, to the enormous increase in the demands now made upon rate-payers for public education. A few weeks ago, at a meeting of the Nottingham Education Committee, it was stated that, comparing 1905 with the present year, there was actually a decrease in the average attendance of children. But, while in the former year the amount received from the rates was £68,200, it was now £107,191—an increase of no less than £38,991. On the other hand, the Government grants in the same period had decreased from £86,075 to £82,794. The salaries of teachers, which in 1905 amounted to under £100,000, now total £118,193. Alderman Houston urged, reasonably enough, that the time has come for a larger contribution to be provided by the National Exchequer. "Additional duties, or what had been termed 'side shows' which had been placed upon the Committee, were not of their own seeking, but had been put upon them by the Central Authority." As another member of the Committee said, if the education rate kept going up, people would at last revolt against the burden, and the injury to education would be incalculable.

Sheffield.

"No one wished for a moment to put a stop to the good work, but it did not follow that they were simply to scoop money out of a bowl, and never to trouble to think what they were spending." Thus did Colonel Hughes, a member of the Sheffield Education Committee, express himself when a proposal to increase the expenditure on medical inspection and treatment was under consideration. Alderman Styring stated that the cost of the work already amounted to about £4,000, and demands were increasing from day to day. He wisely recommended deferring the additional expenditure proposed until they heard something from the Government as to when they were likely to contribute to the enormous cost they had put upon the Committee.

Agricultural Education: The Joint Councils.

THE Rural Education Conference, having been requested by the Board of Agriculture to advise as to the co-ordination of the work of the agricultural staffs employed by counties and by collegiate centres serving the area in which the county is situated, has tendered advice in the terms required. Its report is, in effect, the departmental view elaborated. The conference recommends the division of the country into twelve districts, each division to be under a Joint Council, and to be regarded as a "unit" for the purposes of agricultural education. The functions of the Joint Councils, it is suggested, are not likely to be identical in each division. In certain cases it would be the executive body; elsewhere it might be given powers of supervision and co-ordination only; in other areas an advisory body whom the Board would consult before awarding grants to any of the authorities engaged in the provision of agricultural education in the division.

Warrington.

WHATEVER the functions—executive, supervisory, or advisory—of the proposed Joint Councils, they will menace such independence as the existing "units" of local government may claim to possess in educational administration. Local Authorities will be ill advised if they consent to relinquish any of their powers and responsibilities to these alien creations. County Councils may, and do, find it convenient to combine for certain educational purposes, and in some of the divisions contemplated there may be organizations in existence similar in character to the proposed Joint Councils. But it is an entirely different matter if, under a scheme drawn up by the Board of Agriculture, quasi-statutory bodies are to be created to determine the destination of public money and to regulate the proceedings of statutory Local Education Authorities.

Southampton's Protest.

THE Director of Education for the County of Southampton, Mr. D. T. Cowan, in a useful memorandum on the co-ordination of the work of the Farm School at Basing with University College, Reading, states that the Agricultural Sub-Committee of his county have discussed at various times the question of the connexion of the school and the general agricultural work of the county with the University College. "While the Committee," he says, "are deeply sympathetic with the desire to see the link strengthened between the county work and the college, they are of opinion that, in a county of the size of Hampshire, it is essential that the organization shall be complete in itself and that any attempt to centralize out of the county what are essentially local concerns would not be for the good of the work and might even destroy interest that has been created."

THE County Councils of Cumberland and Westmorland have maintained a farm school for sixteen years, and, without the intervention of a Joint Council, its work appears to be sufficiently "co-ordinated" with the Agricultural Department of Armstrong College. The institution does an excellent work for the agricultural areas concerned at a relatively small cost. During the spring and summer months courses of dairy instruction—each of two months' duration—are arranged for girls and young women. In the winter there is a four months' course in agricultural science for lads and young men. Since 1896, 349 girls and 160 young men have passed through the school. A number of useful agricultural trials and demonstrations are also conducted at the farm. Last year the deficit on the farm account was £66. 19s. 9d. only, while the "school and experiments" required £614. 9s. 4d. to balance the account. This was met by a Government grant of £235, and by contributions from the County Councils interested.

Mining in Elementary Schools. It is entertaining to imagine the officials of the Home Office and the Board of Education gravely deliberating as to the desirability of introducing into the curriculum of schools in mining districts elementary instruction in mining. It is also reassuring to know that these Authorities do not suggest "advanced or specialized instruction." But it is recommended that special classes should be formed for elementary-school teachers, to be conducted by those who have not only a thorough knowledge of mining, but also understand thoroughly what can be taught to elementary-school children. Local Authorities will, it may be hoped, realize the possibilities and limitations of the elementary school more precisely, and recognize that efficiency in the rudiments of knowledge, and such development of intelligence as may be practicable, is the main business of the primary school.

Supplementary Grants for Secondary Schools. It is doubtful whether the Board of Education is to be congratulated upon the provision which it proposes to substitute permanently for the grant hitherto available for secondary schools under Article 38 of the Regulations. The grant under this article, it will be remembered, was intended to encourage the production of candidates for the teaching profession. As an alternative, it is proposed to pay an additional grant of £1 per head on pupils between fifteen and eighteen years of age. The general regulations contemplate an "age range" from twelve to seventeen and an "adequate proportion" of pupils remaining at least four years in the school. Apart, however, from what appears to be a departure from the spirit of these regulations, the policy of bribing secondary schools to endeavour to retain their pupils up to the age of eighteen is open to grave question. A large proportion of the recognized secondary schools are local institutions providing a preparatory training not for the Universities, but for industries and commerce. Unless the pupil, who has no definite object in view justifying a prolonged secondary education, seeks employment at the age of sixteen, he will lose his chance. There are "blind alleys," it must be remembered, for the products of secondary as well as of elementary schools.

Two Voices. WHILE Mr. C. P. Trevelyan, the Parliamentary Secretary to the Board of Education, was opening the new Training College for teachers established by Cheshire County Council near Crewe, Mr. McKinnon Wood, the Secretary for Scotland, was presenting the prizes at Mill Hill School. Mr. Trevelyan said that the whole secret of education was to interest children. The old system had passed away. Schooling was to be made a pleasure to the scholars; "cramming" was abolished. Mr. McKinnon Wood, on the other hand, said he believed in "cramming," though not as a substitute for more thorough methods. He emphasized the value of machinery that fostered concentration of mind, accuracy of thinking, and precision in acquiring knowledge which desultory reading could never give.

Wiltshire Supply of Teachers. THE General Education Committee of the Wilts County Council is of opinion that one of the reasons for the falling off in the number of candidates for the teaching profession is to be found in the Board's rigorous application of the rules regulating admissions. In Wiltshire the number of teachers in the early stages of training has decreased in five years by more than 50 per cent. On March 31, 1908, there were 225 pupil-teachers, bursars, and student-teachers, and on the same date in this year 104. The Committee has decided to admit as student-teachers, under suitable conditions, candidates other than those who have fulfilled the

Board's regulations. The Committee, in a recent report, prints an interesting table showing the teachers employed at the appointed day and at subsequent dates. Comparing the figures of 1905 with 1912, the total of 1,102 regular adult teachers has increased to 1,211. But the staff value of the teachers has increased from 35,400 to 42,600, owing largely to an increase in the number of certificated teachers and decrease in the number of supplementary.

Surrey. THE forty-third report of the Surrey Education Committee contains much information of interest. It is an excellent summary of the many-sided activities of a Local Education Authority. The estimated expenditure on elementary education for the current year reaches the high figure of £311,675, and for higher education £70,705. The local rate for the former, which was 7d. in 1904-5, was 9½d. last year; for higher education the rate has increased from ½d. to 1½d. in the same period. The cost of elementary education per child in average attendance was, in 1910-11, £4. 19s. 4½d., made up thus: teachers' salaries, £2. 18s. 5d.; other expenses of maintenance, 17s. 7d.; special subjects, 2s. 7½d.; medical inspection and physical training, 1s. 0½d.; loan charges, 13s. 5½d.; administration, 5s. 10½d.; miscellaneous, 4½d. The net cost to the rates was £2. 4s. 11½d. per child.

SCIENCE NOTES.

The Royal Society. UNDER Royal Charter, the advancement of natural knowledge has been faithfully and unceasingly pursued by the Royal Society for the last two hundred and fifty years. Such an era of progress could not have been foreseen by its founders; the part played by the Society confers distinction not only on them and their successors, but also on the nation. Not unworthy of such an era or of the present epoch was the splendid gathering of scientific worthies of the highest eminence who came from every land to take part in the celebrations last month. We note with pleasure that the delegates had the privilege of a special reception by the King at Windsor. It will be remembered that Charles II incorporated the Society in 1662, among the original members being Boyle, Hooke, and Christopher Wren. Newton was elected a member in 1672 and was made president in 1703, an office which he held until his death in 1727, and it must have been a great advantage to the young Society to have such a leader. No other scientific society has had so famous and continuous an existence.

The late Henri Poincaré. So recently as last May we were drawing attention in these columns to the lectures given in London by the great French physicist, Henri Poincaré, and now the world of science is poorer by his sudden death. Some of our readers will be interested to hear that one of the lectures, entitled "The Relations between Matter and the Ether," is now published *in extenso*. The magneton or discrete unit of magnetism, the structure of the atom, the Brownian movement (*pepésis*) are among the topics included in a brilliant exposition of modern "views"—or perhaps we should say "working hypotheses."

Handwork. THE reformers have succeeded in introducing handwork in many elementary schools throughout the standards. The reform is in itself worthy of encouragement, and in time will produce good results in better brain development, better co-ordination in the neuro-muscular systems responsible for small movements requiring dexterity, and in general a greater power of "doing." The better training in artistic perception is another great gain for which we hope. But at present we must candidly admit that many of the occupations are trivial. This state of affairs must be remedied; every item of handwork must justify its inclusion in the syllabus by being worth doing. A piece of work may be (1) of æsthetic value, (2) of instrumental value as contributing to clearer concepts—e.g., of geometry or geography. It is also permissible to employ occasionally some exercises for the aid given thereby in cultivating dexterity required for further work. The work should have a motive and purpose which appeal to the boys or girls. Purposeless handwork is not educationally justifiable; badly executed handwork is pernicious.

Our Unscientific Examinations. MUCH skill and industry have been expended during the past month on examinations—some by examiners and officials, more by examinees. We confess ourselves staggered by the wholesale waste of the information which these tests should provide. The waste may be attributed to the refusal of those in authority to look at the problem in a scientific spirit. The

first step in a scientific treatment of examinations would be to define the aim of each particular examination, and the next to study the conditions requisite for the fulfilment of that aim. In some cases the aim is not competitive, but the maintenance of a good general standard in our classes. Why should not the examiners give lectures on the papers which they have set, to be followed by discussion? All teachers concerned should be invited to attend and to take part in the discussion. Science teachers—and examiners—would gain many useful hints and receive profitable criticism.

Temperature or Level of Heat. SOME teachers draw in class thermometer scales reading from absolute zero to 3500°C. with interesting temperatures marked thereon. Note the distance on the scale between the highest tropical temperature and the lowest arctic reading, and compare with the distance from the boiling-point of hydrogen—253°C. to that of carbon, 3500°C. The object of the diagram is mainly to give a concept of temperature as denoting the heat-level. The weak point has been a sense of insecurity with regard to the accuracy of the higher temperatures. From a paper published in *Nature* of July 18 we learn the National Physical Laboratory experience of the practical range of thermometers. The mercury in silica thermometer gives reliable results up to 600°C., and the optical pyrometers from 600°C. to 3500°C. The optical pyrometer is really a photometer which measures the intensity of the light emitted from the hot body.

Science or Cookery? Is domestic science teaching slipshod? The question is a serious one. A good teacher can make the teaching of cookery useful and interesting. She can impart a flavour of science. Can she do more, and make the lessons really scientific? Take, for example, the statements frequently made that fat is "a heat-producing food," and peas "a muscle-forming food," while carbohydrates are "restorers of tissue." Can any evidence be produced for these statements? The writer would be glad to hear of any real evidence—not mere *dicta*. A more critical attitude towards such current textbook statements would clear away much superstition which now masquerades as science.

Nature Study and Science. IN few subjects has the heuristic method been applied with such success as in the study of plant life. In many schools to-day girls are gaining practice in scientific method by following sound courses of experimental study, attacking definite questions, and employing arguments derived from first-hand information. The use of the "control" plant gives a useful exercise in the comparative method. How far will this scientific training overflow into other channels of activity?

THE INSURANCE ACT AND SECONDARY TEACHERS.

By G. T. HANKIN.

THERE is probably no class in the community receiving a living wage that needs the Insurance Act so little as the secondary teacher. He, or she, is usually treated with great consideration during sickness and can expect that generosity to be continued for a considerable period if the illness should be protracted. What he obviously wants, and politicians of all parties have at last admitted the need, is an adequate pension scheme. Under these circumstances the Assistant Masters' Association, when the Insurance Bill was under discussion, did all in its power to carry an excepting amendment. The attempt failed. Accordingly, in conjunction with the Assistant Mistresses, the Technical Teachers, the University Women Teachers, the College of Preceptors, and the Teachers' Guild, they have set themselves to get the best possible advantages for secondary teachers under the Act as it stands to-day. A conference representing these various associations has been sitting for some months; has founded the Secondary, Technical, and University Teachers' Insurance Society; has taken offices at 35 John Street, W.C.; has been approved by the Insurance Commissioners; and

is now prepared to receive all *bona fide* secondary, technical, University teachers and governesses within its ranks.

To teachers and head masters the Act should present no terrors. The administration and organization of provident societies under the Act may be complicated, but for the insured teacher the way is clear.

He or she writes to 35 John Street, receives a form of application for membership, returns it with a birth certificate, receives a card of membership and the rules of the Society, and when the salary is paid, produces the card for stamps. The employer puts on the card the stamps for the period paid for, including the holidays, and the transaction is complete, except that the card, when full, must be returned to 35 John Street. In all probability head masters will pay both contributions out of school funds. It seems a self-evident fact that a secondary teacher who is compulsorily insured under the Act is inadequately paid. In any case the actual payment is made by the employer, though he has the right to deduct the necessary fourpence or three-pence off the employee's wages.

Furthermore, the prudent teacher will see that all his compulsorily insured colleagues join the Secondary, Technical, and University Teachers' Insurance Society, thus strengthening his Society, increasing local interest in it, and making it possible for all the fully-stamped cards to be sent up together to the one society. The employer might in that case keep the cards with advantage, and the trouble to all parties concerned be reduced to a minimum.

So far the advice here offered seems to be: "You press the button and we'll do the rest." In the first instance this is true. The Society moreover offers only the normal benefits. But the Society must be self-governing and the committee of management be elected by the members. To judge from the experience of other classes of society there are always a considerable number of persons who are interested in this type of activity. In the Society they will find congenial occupation and at the same time have the satisfaction of knowing that they are doing useful work for their profession. Delicate and interesting problems lie ahead. No actuarial figures exist at present for the sickness incidence of such a peculiarly healthy class as the secondary teacher, particularly in the case of women. When the first three years' working are completed, the question of additional benefits will arise. At present no rash promises have been made, but there seems no reasonable doubt that large additional benefits will be available out of the surplus that will inevitably accrue if the Society is managed on sound lines. Therefore there is abundant scope in the management of the Society for those whose talents lie in that direction.

It is difficult to imagine a teacher deliberately joining any other provident society, either from the business or the sentimental point of view. He knows that his class is peculiarly healthy and that malingering is practically unknown. He can see that no money is being wasted in advertising, that agents are not being paid sixpence a head for members they catch. He will be able, moreover, to decide by a majority of his own class, where interests are almost identical, the form that the benefits shall take when the Society is firmly on its legs. He knows also that the Society is safe, managed on lines laid down by the State and for no private profit.

More than that, the teacher can be assured that he is sticking to his fellow teachers when he joins this Society, that if he escapes illness his payments will go to help less fortunate members of his own profession; if also in the fullness of time his salary rises above the fatal £160, his previous contributions will not be swept into a general fund from which the needs of perhaps millions have to be met, but will make, in the aggregate, a substantial addition to the benefits available for the poor schoolmaster or the needy governess. There may be a feeling in many minds against joining a provident society at all. But this Society receives both those compulsorily insured and, in a separate section, those who feel impelled to make some provision against sickness, when money is most wanted and most diffi-

cult to get. In this department of the Society's activities we hope to see many a schoolmaster and mistress who wishes to insure against illness, who believes in the solidarity of the profession, and who sees that such mutual self-help tends to the real unity which will mean so much for education.

THE CASE FOR THE BACKWARD CHILD.

By STANLEY H. WATKINS, M.A., Ph.D.

THE problem of the backward child, whilst always to the school teacher faced with large classes and varied types of intelligence a very present one, has only in recent years received any adequate form of attention. Until very recently, and often even at present, a considerable percentage of the children in the elementary schools leave without having pursued any regular system of instruction. Most of them are left to struggle in the third and fourth classes, some indeed never leave the first standard; a clear indication that the school work, or its application, is beyond their ken, and that these children leave school with little educational equipment. The introduction of the medical officer into the school gave a much needed impetus to the consideration of the lower tenth of school life. But, though the physically and mentally defective child is now treated in something like a scientific manner, yet between this class and the normal child there exists a large proportion of school children, apparently physically and mentally fit, who yet manifest distinct signs of backwardness in comparison with children of their own age. The border lines here are extremely difficult—nay, almost impossible—to determine. Often this backwardness is accompanied by lack of proper physical development, often it is an immediate consequence of malnutrition. In some cases it is seen gradually to disappear as the slower growth of the child broadens and expands. Under present conditions a frequent cause is the absurd method of classification according to age with no consideration of the differences in mental growth.

The movement towards reform in the treatment of these children may be roughly considered under two heads—reform of the usual school subjects and the basis of school work in general, and the remodelling of the organization of the school in its various forms. From the nature of the case, the backward child has to be treated individually. When the causes seem to lie in arrested development, such children should receive the special attention of the medical officer; in all cases a careful medical, as well as psychological, examination is a necessary preliminary to the treatment of the child. With the education of the defective child we are not concerned; that is a question of special schools and special training. The treatment of the backward child is, however, of a different nature. Should he be excluded altogether from the school? should his attendance be limited to special classes, or series of classes, within the same school? or should we adopt the drastic plan of a new system of general school instruction based not on memory and rote learning, but on the development and guidance of the creative energies of the child? The first plan is that adopted by the great public schools, where the entrance examination gives the backward boy little chance. Few schools, however, can pick and choose their pupils. The second is that in vogue at Mannheim, and is known as the Mannheim School System. The third is embodied in that movement of German school reform termed the *Arbeitschule*. A consideration of the last two methods is of interest not only individually, but from the peculiarly opposite nature of their principles. Briefly, the Mannheim system may be described as the institution of parallel classes, not necessarily all in the same school, the pupils of which are graded according to their intellectual ability. The main division consists of the normal pupils—

children, that is, who are neither blessed with too much sense nor cursed with too little. These classes comprise the usual eight years in which the ordinary school instruction is given. Should a child, however, prove incapable of the instruction given in the normal classes, he is drafted to a series of parallel, or *Förderklassen*, consisting of seven classes, where similar, though modified, instruction is given, with, however, much more individual work and more attention to the broad outlines of instruction combined with handicraft. Children found mentally defective are drafted further to a series of four special classes (*Hilfssklassen*), and finally there is an establishment for the reception of the idiot children. Thus, from the point of view of the subnormal child, the school may be taken as comprising four divisions: (1) classes for normal children who proceed regularly through the school, (2) for backward children, (3) for defectives, (4) one for imbeciles. In each of these the children are graded according to their school ability, and instruction is given in accordance with the mental development and state of the individual child. Of these divisions, the most interesting is that for the so-called backward child—namely, the *Förderklassen*. These classes consist of children of the normal classes who are not able to run the gauntlet at the annual Easter examinations. Instead of making these children repeat the year's work, they are drafted into the parallel *Förderklasse*, where the same work, with necessary limitations, is given. Should the child, at the end of the first or second half of the year, have shown sufficient progress, he is then drafted back to the normal classes; if not, he proceeds through the regular order of the parallel classes. Thus each *Förderklasse* consists of the children promoted from the class below, together with the children of the parallel normal class who have failed to go up.

Nor is this all. For, in addition to the seven "backward" classes, running parallel with the fifth and sixth normal standards, are two "leaving" classes, where the most important of the work in the two highest standards of the normal series is taught. Should a child, therefore, on leaving the third standard, be too old to proceed to the fourth, he is sent to the first of the "leaving" classes. There he receives in simple form a summary of the most important of the work which the normal child gets in his last years. Thus the backward child has three ways of escape from the school. Should he prove able to take advantage of the seven years' course, then the last year gives him little difference from that of the normal class; should he be one or more years behind, then the first and second "leaving" classes allow him opportunities of finishing with some possibility of finality. In this manner the difficulty which the backward child has in obtaining the knowledge of the upper standards, owing to his inability to come within reach of them, is to some extent avoided, and such children leave school with a certain equivalent of the knowledge which the normal child is supposed to possess. It is this which is the most striking feature of the Mannheim System.

It remains to be added that, with the thoroughness characteristic of German organization, the supernormal child has also not been neglected. In 1908 separate classes were formed for the cleverer pupils. At the end of the fourth school year (*i.e.* at ten years of age) the clever pupils are separated and given special instruction in French. Should they profit by this they are then formed into special classes with a modern language as part of the ordinary school curriculum and intended as preliminary to the commercial classes of the continuation schools. In addition classes of eighteen months' duration are formed from the third year onwards for those children who will later proceed to the various branches of higher education.

The merits of such a differentiation are clear. Children who, through illness or through transference from one school to another, have lost their necessary training are able to retrieve their lost knowledge and thus to take their places later in the normal classes. In general, however, it appears that the great majority of the backward children remain in the *Förderklassen*. Whether these are really victims of

mental incapacity or of the methods of education remains to be seen. Curiously enough, backward children who, showing signs of interest and intelligence in their work have been promoted to a normal class, have shown there all the evidence of backwardness—a striking criticism of an educational system which in its demands pays little regard to the varying abilities of the children. Those children, on the other hand, who remain in the parallel classes where individual work is possible, and where much less is given and expected of them, make steady, if slow, progress. Moreover, one great advantage of their segregation is the opportunity thus given for the collection of data on which methods of differentiation of, and of work with, backward children may be adopted. It is only thus that the varied factors which play a part in mental backwardness can be noted and observed—only thus, too, that practical schemes of work to meet these defects can be formulated and applied. In this spirit and with these objects in view, the syllabus for the *Förderklassen* is prepared and altered as fresh experience affords new guidance.

Fundamentally, it appears that the Mannheim system is an attempt to remedy the evils of organization by counter-organization. It is mainly concerned with the effects of the educational system, not with the defects underlying it. The question of the nature of the teaching, in so far as it implies the whole principle of school work, is not attacked. It is, perhaps, from this aspect that the system is most open to criticism. For the division and subdivision of the school into compartments which in theory allow—in practice, however, reveal little—intimate connexion disturb that organic unity essential to school and to organization. Practically the system is an attempt to reduce the method of class teaching to one of special teaching dependent on the varying capacity of the child. Excellent in principle, this, nevertheless, brings with it seeds of danger. For the segregation of the backward children deprives them of that main feature of healthy school life, the personal contact with and competition of the normal child. Not only is this, from many aspects, bad for the child—it is, too, bad for the teacher. The gaps between backwardness and the normal are, after all, not so great but that often they can be partially bridged. Indeed, the answers of the more fortunate scholars are often the keystones in those structures which bridge the painful way of the backward child into the land of knowledge; often it is just those answers which give the experienced teacher hints for the proper presentation of his work and reveal to him the nature of the child's mind.

Then, too, it is obviously very difficult to define the limits of backwardness. More often than not it may be due to temperamental defects in the teacher or to inherent dislike to and lack of appreciation of the subjects taught and to easy means of evading detection. But, above all, there fails at present any definite method of determining, or, indeed, any comprehensive definition of, intelligence. Certain it is that "the good, bad, or worse" of rough and ready experience is insufficient. Intelligence is, in such cases, largely a matter of school results. Hence quick and easy comprehension, together with quick and adaptable memory, are the deciding factors in the process of selection. The modern theory of intelligence, however, with its differentiation of the various fundamental types, its regard for the differences in work of the slow and quick learner, its analysis of the various typical forms of attention, together with its insistence on the varying types of fatigue and on the right methods of proper work, rests by no means satisfied with any broad *a priori* classification, which, judging in the mass, sacrifices the individual. Not only is this so, but the appearance of backwardness is a matter of some uncertainty. One can never be assured that the apparently dull child is not, after all, happy in the slow development of his powers—powers, however, which, when once fully grown, reveal few signs of incapacity. To adopt, therefore, a system of definite labelling under conditions which do not always arise from inherent defects in the child's nature, with consequences, too, which in after life are never thoroughly eliminated, is to damn with faint hope and less reason.

Another criticism which has been levelled against this system is that it has but "scotched the snake," it does not kill it. In other words, the evils which it attempts to remedy are more deeply rooted than the remedial effects. Under present-day circumstances, one of the most frequent causes of the so-called backward child is the strain put upon the as yet insufficiently developed organism, resulting in apparent dullness and incapacity. The teacher, with some sixty to eighty children, obliged to "get through" a certain syllabus in a certain time, has to employ the easiest means for its attainment—the use, that is, of mechanical rote memory, with little or no effort at individual self-expression, and with the consequent result of the rise of the precocious child and the rapid settling of the backward. This feature has not been lost sight of by the exponents of the *Arbeitschule*, the most famous representative of whom may be said to be Dr. Kerschensteiner of Munich. The Work School is primarily a movement for the reform of elementary education in general, but its methods are also applied to the backward child. Dr. Kerschensteiner advocates the practical abolition of the familiar Book, or *Lern*, school, and the establishment of communities of work (*Arbeitsgemeinschaften*).

The ruling principle would appear to be utilitarian: education is the preparation for life, based, however, on life. It is social work in the early Pestalozzian sense of bringing education into intimate contact with the home life. The schools, therefore, should seek to develop the creative energies of the child. That knowledge is power is essentially true, but true only within limits, not the least of which is the fact that knowledge must be capable of expression and fulfilment—i.e. that action founded on right knowledge is power—"Im Anfang war die Tat." In this sense Dr. Kerschensteiner believes in individual work in the school. "Only in the work-room, the laboratory, the school kitchen and garden, the art and music room does the child find the work which it can master. Here the backward child works side by side with the clever, and finds, or should find, help with him." * Thus, mathematics become an adjunct of the workshop or of the school garden, and drawing a means of expression for practical work. So both backward and clever children, by the due exercise of their relative abilities, experience the "joy of success" in the conquest of practical tasks and difficulties. In such a school individual work is a necessary consequence of the method of teaching. For here, where mechanical learning is a thing of the past and where emphasis is laid rather on the value of the method employed than on that of the finished product, there is no necessity for the customary graded march to common measure. ("Hier brauchen sie nicht alle in Reih und Glied zu marschieren.") So the work school seeks to reform school conditions from the inside and endeavours to relieve the school of that weight of superfluous knowledge with which it has long been burdened. Still, underlying both systems of reform there is ever one main problem which must first be solved. Before the question of the backward child can be adequately approached, that of the existence of large classes and their reduction to workable size must be faced. Until that be done, until opportunity is given to the teacher to devote individual attention to those of his pupils who require it in the shape either of extra, or even of different work, the problem of the backward child will remain to a great extent unsolved. From this point of view, the Mannheim system is but endeavouring to remedy faults inherent in the organization of the school rather than in the nature of the child. The standard of backwardness employed—that, namely, of the ability to reach a certain level of instruction—is obviously not a test of intelligence, nor can any series of Tests be as yet considered satisfactory until they have been tried and adapted to local conditions as well as to the varying development of the individual mind. It is not, too, a matter of improbability that the grouping of the backward children may result in deterrent effects upon the morally good but undeveloped child who finds himself placed in close

proximity to the morally bad but often precociously developed urchin.

In the treatment of the backward child, then, the first essential is the insistence on small classes. Next the adoption of systems of work which shall give more scope for the expressive activity of the child. Our schools should not remain mere *Lern Schule* establishments for the passive reception of fact. And, lastly, opportunity must be afforded for psychological experiment in the school itself. Just as modern psychological data applied to education are essentially the outcome of experiment, so also should new methods be first subjected to scientific trial and experiment. Each school should, therefore, contain facilities whereby the backward children may be carefully watched and examined by trained observers. This method is already in vogue in Leipzig, Bremen, Hamburg, and other of the more advanced German towns. Here preliminary classes (*Versuchsklassen*) have been established primarily with the object of relieving the abrupt transition from the free, sensorial, playful life of early childhood to the constrained life of the school. In these classes, however, not only is the method and plan of work adapted to the age and development of the children, but each class is under the control of a teacher specially chosen for the work. The length of the lessons, and even the choice of material, is left to his experience and knowledge of the children. Thus the forcing of young undeveloped minds is to a great extent eliminated. In addition, early opportunity is given for obtaining that intimate knowledge of the individual child, based on systematic inventories of his mental and physical functions, which will serve as guides through almost the whole of his school life. In this manner, by the careful compilation of reliable facts, not only can some conception of intelligence be obtained whereby the children may with reasonable accuracy be graded, but the trial and examination of educational methods is also rendered practicable, so that those lacking in mental ability may be so exercised as to develop in the best possible manner what capacity they possess.

PENSIONS FOR SECONDARY TEACHERS.

THE President of the Board of Education has issued the following terms of reference to the Departmental Committee appointed to inquire into the establishment of a system of superannuation for teachers in schools and institutions (not being elementary schools or Universities or University Colleges) which are aided by grants from the Board of Education:—

1. To consider and report upon the best system by which provision can be made for the superannuation of teachers in secondary and technical schools and institutions, schools of art, colleges and schools for the training of teachers, pupil-teacher centres, and other schools and institutions (not being Universities or University Colleges) which are aided by grants from the Board of Education, and upon its cost, both immediate and ultimate.

2. The system should be confined to teachers who are in full-time employment; it should be optional for teachers at present serving, and compulsory for those who begin service in future. The benefits should include allowances payable on retirement at suitable ages with or without allowances payable alternatively on disablement; and the basis of the system should be the payment of suitable contributions by the teachers themselves supplemented by State assistance approximately equivalent to, though not necessarily the same as, that given to elementary-school teachers.

3. The Committee should in particular report upon the nature and length of the service which should be recorded as qualifying for pension; the employment which should be regarded as full-time employment; the extent to which, and the conditions under which, service already rendered can be taken into account in fixing the allowances received on retirement by teachers now in service; and the conditions under which a pension should be obtainable by service rendered partly in elementary schools and partly in secondary or other grant-aided schools and institutions.

CROWDED HOURS.*

HERE is a series of eighteen lectures delivered by the Faculty of Columbia University. It was a bold emprise to sum up in the brief space of one hour each the literatures of China, Rome, Greece, India, England, France, Germany, Spain, Russia, &c., and it is good to note that several of the writers blenched at the proposal. Prof. Calvin Thomas observes: "German literature is a very different thing at different epochs, and even within the epochs there is much diversity for which it is hard to find a unifying formula. But, for better or worse, the order of the day is broad generalization about a vast and complicated subject that has a long history." And Prof. Ashley H. Thorndike is no less emphatic when he states that there can be no brief and satisfactory characterization of a literature so varied and extensive as that of the English people.

But, granted the difficulty of the task, some of the generalizations are arresting. Prof. Thorndike, in his summing up of English literature, notes the lack of form which distinguishes it, its rejection of classical tutelage, its determination to find expression, art or no art, in the way the individual writer thinks best. This has produced a trinity of graces—variety, novelty, and abundance. It disdains authority, and yet has been extraordinarily fertile in the creation of new art forms, and has even given fresh splendour to foreign forms like the ode, the elegy, and the sonnet. In all this freedom and variety Prof. Thorndike traces a resemblance to our political institutions, in which we have refused to be bound by theories and written constitutions, the result being that Britain is "foremost among the modern nations in expansion and democratization. The English have built up both an individualistic democracy and a vast empire." One might push the comparison a stage further and show how the extraordinary freedom of our language from fixed rules of syntax is a Declaration of the Rights of poets and others to rid themselves of grammatical shackles. The language also is a great democracy, a vast word empire for which we reach out our hands and take all we can get. The lecturer finds that the English people have not greatly excelled in music, painting, or sculpture: their great practical art is literature, and the essential of our literature is a moral criticism of life. We insist on conduct first and art second.

Prof. Adolphe Cohn has much to say that is worth reading on the subject of French literature. "The clearness and lucidity of the French language is a natural consequence of the logical character of the French mind." As Rivarol declared more than a century ago, "that which is not clear is not French." He enounces a curious little theory to explain the French nasal syllables, showing that the utterance of words was thereby made easier, but the language was deprived of one of the most musical elements of language. French literature finds its most characteristic expression in the drama, and Molière is, of course, the chief national exponent of dramatic art.

Prof. Calvin Thomas is deeply interesting in his hour-long talk on German literature; well worth careful reading, as the following excerpt shows:

Modern German has developed an elaborate periodic structure, with rigid rules of word-order in subordinate clauses and a tendency to make the sentence very complex. I seem to observe in recent writers a conscious reaction against that sort of thing, but it does not yet amount to a revolution. Thus it has come about that, while German verse is more flexible than English, German prose is less flexible, less expeditious, more intricate. To the uninitiated those Gothic cathedrals of syntax become mere jungles in which it is easy to get lost. And in the hands of a careless writer they really are jungles. It is said that a Frenchman cannot write his mother tongue in an altogether slovenly manner if he tries; but a German can do it without trying.

* "Lectures on Literature" (8s. 6d. net. The Columbia University Press and H. Frowde.)

Elsewhere Prof. Cohn returns to the charge that the English poet has a more powerful instrument, but the German a more delicate and flexible. It seems difficult to believe that German is a more delicate and flexible instrument of poetic expression than English; the reviewer limits himself to chronicling the fact that a learned Professor holds this view.

BOOKS OF THE MONTH.

Architecture.

Military Architecture in England during the Middle Ages. By A. Hamilton Thompson, M.A. Illustrated by 200 Photographs, Drawings, and Plans. *Frowde*, 7s. 6d. net.

Biography.

Livingstone the Pathfinder. By B. Matthews, M.A. *Frowde*, 2s. net.

Classics.

Livy I. Edited by H. J. Edwards, C.B., M.A. *Cambridge University Press*, 3s. 6d.

Virgil: Aeneid, Book VIII. Edited by J. F. Richards, M.A. *Clive*, 1s.

Homeri Opera V. Recognovit Brevique Adnotatione Critica Instruxit. Thomas W. Allen. *Oxford University Press*, 4s. 6d.

P. Vergili Maronis Opera Omnia ex Recensione. H. Nettleship a J. P. Postgate relecta Tom I. Two vols. *Macmillan*, £1. 11s. 6d. net.

The Odes of Horace. Books I-IV and the Saecular Hymn. Translated into English Verse by W. S. Marris. *Frowde*, 3s. 6d. net.

A New Latin Grammar. Based on the recommendations of the Joint Committee on Grammatical Terminology. By E. A. Sonnenschein, D.Litt. *Oxford University Press*, 2s. 6d.

First Lessons in Latin Grammar and Translation. By W. Greenstock, B.A. *Rivingtons*, 2s. 6d.

Selections from Ovid. Edited, with Notes, Vocabularies, &c., by W. D. Lowe, Litt.D. *Oxford University Press*, 1s. 6d.

Vergil's Taking of Troy. Selected from Vergil's Aeneid. Edited by S. E. Winbolt, M.A. *G. Bell*, 1s. 6d.

Domestic Science.

The Chemistry of Housecraft: a Primer of Practical Domestic Science. By Lucy Hall, B.Sc., and Ida Grünbaum, B.Sc. *Blackie*, 8d.

English.

Plays of Shakespeare. Edited, with Introductions and Notes, by G. S. Gordon, M.A. (1) Hamlet; (2) Coriolanus; (3) A Midsummer Night's Dream; (4) As You Like It; (5) The Tempest. *Oxford University Press*, each 1s. net.

Beaumont and Fletcher. Vol. X. Edited by A. R. Waller, M.A. *Cambridge University Press*, 4s. 6d. net.

Exercises in English for Intermediate and Senior Classes. By J. Mushet, M.A. *Baxendine*, 2s.

Scott's Marmion. Edited by F. Allen, B.A. *Clive*, 1s. 6d.

The Tudor Shakespeare.—(1) Richard the Third, edited by G. B. Churchill, Ph.D.; (2) Henry IV, Part II, edited by Elizabeth D. Hanscom, Ph.D. *Macmillan*, each 1s. net.

Milton's Comus. Edited by S. E. Goggin, M.A., and A. F. Watt, M.A. *Clive*, 1s.

Shakespeare: As You Like It. Edited by A. R. Weekes, M.A., and F. J. Fielden, M.A. *Clive*, 1s. 4d.

Studies and Essays in English Literature (Keats, Shelley, Shakespeare, &c.). By S. J. Mary Suddard, L.L.A. *Cambridge University Press*, 6s. net.

The Red Letter Library.—(1) Poems of John Dryden. Selected, with an Introduction, by R. Brimley Johnson. (2) Plays and Poems by Oliver Goldsmith. Selected, with an Introduction, by Thomas Secombe. *Blackie*, each 2s. 6d. net.

Maid Marian. By Thomas Love Peacock. Edited by F. A. Cavenagh, M.A. *Macmillan*, 1s.

A Persian Hero: Stories from the "Shah Nameh." With Introduction and Notes by Wallace Gandy. *Macmillan*, 1s.

The Preparatory English Grammar and Spelling Book. By W. Benson, M.A. Third edition, revised. *G. Bell*, 1s. net.

Modern English Grammar, with Chapters on Idiom and Construction. By J. C. Nesfield, M.A. *Macmillan*, 2s.

The Plain-Text Plays:—(1) She Stoops to Conquer (Goldsmith); (2) The Good-natured Man (Goldsmith). Each 6d. *Blackie*. *Blackie's English Texts*.—The Life of Lord Herbert of Cherbury. 6d.

Selections from Malory. Chosen and edited by H. Wragg, B.A. *Oxford University Press*, 2s.

Graduated Passages for Reproduction. By M. L. Banks, M.A. *Oxford University Press*, 2s.
